A Writer’s Reference
How to use this book and its companion Web site

A Writer’s Reference is designed to save you time and will answer most of the questions you are likely to ask as you plan, draft, revise, and edit a piece of writing: How do I choose and narrow a topic? How do I know when to begin a new paragraph? Should I write each was or each were? When should I place a comma before and? What is counterargument? How do I cite a source from the Web?

How to find information with an instructor’s help

When you are revising an essay that your instructor has marked, tracking down information is simple. If your instructor uses a code such as S1-a or MLA-2b to indicate a problem, you can turn directly to the appropriate section of the handbook. Just flip through the tabs at the tops of the pages until you find the code in question.

If your instructor uses an abbreviation such as w or dm, consult the list of abbreviations and revision symbols on the next-to-last page of the book. There you will find the name of the problem (wordy; dangling modifier) and the number of the section to consult.

If your instructor provides advice without codes or abbreviations, use the index at the back of the book to look up specific terms. (See pp. ix and xii for more about the index.)
How to find information on your own

This handbook is designed to allow you to find information quickly without an instructor’s help—usually by consulting the main menu inside the front cover. At times, you may also consult the detailed menu inside the back cover, the index, the glossary of usage, the list of revision symbols, or one of the directories to documentation models. The tutorials on pages xii–xv give you opportunities to practice finding information in different ways.

THE MAIN MENU  The main menu inside the front cover displays the handbook’s contents briefly and simply. Each of the twelve sections in the main menu leads you to a color-coded tabbed divider (such as C/Composing and Revising), where you can find a more detailed menu.

Let’s say that you want to find out how to make your sentences parallel. Your first step is to scan the main menu for the appropriate topic—in this case, S1, “Parallelism.” Then you can browse the section numbers at the tops of the pages to find section S1.
THE DETAILED MENU  The detailed menu appears inside the back cover. When the section you’re looking for is broken up into quite a few subsections, try consulting this menu. For instance, if you have a question about the proper use of commas after introductory elements, this menu will quickly lead you from P/Punctuation to P1, “The comma” to P1-b, “Introductory elements.”

Once you find the right subsection in the book, you will see three kinds of advice to help you edit your writing—a rule, an explanation, and one or more examples that show editing.

THE INDEX  If you aren’t sure which topic to choose from one of the menus, consult the index at the back of the book. For example, you may not realize that the question of whether to use have or has is a matter of subject-verb agreement (section G1). In that case, simply look up “has vs. have” in the index. You will be directed to specific pages covering subject-verb agreement.
MAKING THE MOST OF YOUR HANDBOOK  You will find your way to helpful advice by using the index, the menus, or the tabbed dividers. Once you get to the page with the advice you are looking for, you may also find a “Making the most of your handbook” box that pulls together additional related advice and models for your assignment.

THE GLOSSARY OF USAGE  When in doubt about the correct use of a particular word (such as affect and effect), consult the glossary of usage, section W1. This glossary explains the difference between commonly confused words; it also includes words that are inappropriate in formal written English.

MORE ONLINE

Using the book’s companion Web site: hackerhandbooks.com/writersref

Throughout A Writer’s Reference, Seventh Edition, you will see references to more advice and help on the book’s Web site. These are labeled PRACTICE (for interactive exercises), MODELS (for model papers and other documents), and THE WRITING CENTER (for tips on getting help with your assignments). Here is a complete list of resources on the site. Your instructor may use some of this material in class; each area of the site, however, has been developed for you to use on your own whenever you need it.

> Practice exercises
  More than 1,800 interactive writing, grammar, and research/documentation exercise items, all with immediate feedback. Research exercises include topics such as integrating quotations and documenting sources in MLA, APA, and CMS (Chicago) styles.

> Model papers
  Annotated sample papers, organized by style (MLA, APA, CMS [Chicago], CSE) and by genre (research paper, argument paper, review of the literature, and so on)

> Research and Documentation Online
  Advice on finding sources in a variety of academic disciplines and up-to-date guidelines for documenting print and online sources in MLA, APA, CMS (Chicago), and CSE styles
DIRECTORIES TO DOCUMENTATION MODELS When you are documenting sources in a research paper with MLA, APA, or CMS (Chicago) style, you can find documentation models by consulting the appropriate color-coded directories.

MLA, page 371
APA, page 443
CMS (Chicago), page 498

> Multilingual/ESL
Resources, strategies, model papers, and exercises to help multilingual students improve their college writing skills

> Revision
Papers in progress and models of global and sentence-level revisions

> Writing center resources
Revision checklists and helpsheets for common writing problems

> Language Debates
Mini-essays exploring controversial issues of grammar and usage

> Exercise PDFs, diagnostics, and test prep
Print-format practice exercises, interactive diagnostic tests, and links to additional online resources for every part of the book

> Nancy Sommers videos
From the book’s coauthor, advice on revising, reading and responding to texts, working with teacher comments, and developing an argument

> Re:Writing
A free collection of resources for composition and other college classes: help with preparing presentation slides, avoiding plagiarism, evaluating online sources, and more

> E-book
An online version of the book with interactive exercises, audio commentary on model papers, and short movies that teach essential college skills such as integrating sources in a research paper and revising with peer comments (This area of the Web site requires an activation code.)
Tutorials

The following tutorials will give you practice using the book’s menus, index, glossary of usage, and MLA directory. Answers to the tutorials begin on page xiv.

**TUTORIAL 1: Using the menus**

Each of the following “rules” violates the principle it expresses. Using the main menu inside the front cover or the detailed menu inside the back cover, find the section in *A Writer’s Reference* that explains the principle. Then fix the problem. Example:

*Tutors in* the writing center, *they* say that vague pronoun reference is unacceptable. *G3-b*

1. A verb have to agree with its subject.
2. About sentence fragments. You should avoid them.
3. Its important to use apostrophe’s correctly.
4. If your sentence begins with a long introductory word group use a comma to separate the word group from the rest of the sentence.

**TUTORIAL 2: Using the index**

Assume that you have written the following sentences and want to know the answers to the questions in brackets. Use the index at the back of the book to locate the information you need, and edit the sentences if necessary.

1. Each of the candidates have decided to participate in tonight’s debate. [Should the verb be *has* or *have* to agree with *Each*?]
2. We had intended to go surfing but spent most of our vacation lying on the beach. [Should I use *lying* or *laying*?]
3. In some cultures, it is considered ill mannered for you to accept a gift. [Is it OK to use *you* to mean “anyone in general”?]
4. In Canada, Joanne picked up several bottles of maple syrup for her sister and me. [Should I write *for her sister and I*?]

**TUTORIAL 3: Using the menus or the index**

Imagine that you are in the following situations. Using either the menus or the index, find the information you need.

1. You are a student studying health administration, and you’re editing a report you’ve just written on the benefits of community-based urgent
care clinics. You recall learning to put a comma between all items in a series except the last two. But you have noticed that most writers use a comma between all items. You’re curious about the rule. Which section of A Writer’s Reference will you consult?

2. You are tutoring in your university’s writing center. A composition student comes to you for help with her first college essay. She is revising a draft and struggling with her use of articles (a, an, and the). You know how to use articles, but you aren’t able to explain the complicated rules on their correct use. Which section in A Writer’s Reference will you and the student, a multilingual writer, consult?

3. You have been assigned to write a response to an essay you read for your composition class. Your instructor has asked that you use at least three quotations from the text in your response, which must be written in MLA style. You aren’t quite sure how to integrate words from another source in your own writing. Which section in this handbook will help?

4. You supervise interns at a housing agency. Two of your interns have trouble with the -s endings on verbs. One tends to drop -s endings; the other tends to add them where they don’t belong. You suspect that both problems stem from dialects spoken at home. The interns are in danger of losing their jobs because your boss thinks that anyone who writes “the tenant refuse . . .” or “the landlords insists . . .” is beyond hope. You disagree. Where can you direct your interns for help in A Writer’s Reference?

TUTORIAL 4: Using the glossary of usage

Consult the glossary of usage to see if the italicized words are used correctly. Then edit any sentences containing incorrect usage. Example:

▶ The pediatrician gave my daughter an injection for her allergy.

1. Changing attitudes toward alcohol have effected the beer industry.
2. It is mankind’s nature to think wisely and act foolishly.
3. Our goal this year is to grow our profits by 9 percent.
4. Most sleds are pulled by no less than two dogs and no more than ten.

TUTORIAL 5: Using the directory to MLA works cited models

Let’s say that you have written a short research essay on the origins of hip-hop music. You have cited the following four sources in your essay, using MLA style, and you are ready to type your list of works cited. Turn to pages 371–72 and use the MLA directory to locate the appropriate models. Then write a correct entry for each source and arrange the entries in a properly formatted list of works cited.

An online article by Kay Randall called “Studying a Hip Hop Nation.” The article appeared on the University of Texas at Austin Web site. The title of the site is University of Texas at Austin. You accessed the site on April 13, 2010; the last update was October 9, 2008.

A sound recording entitled “Rapper’s Delight” performed by the Sugarhill Gang on the CD Sugarhill Gang. The CD was released in 2008 by DBK Works.

A magazine article accessed online through the database Expanded Academic ASAP. The article, “The Roots Redefine Hip-Hop’s Past,” was written by Kimberly Davis and published in Ebony magazine in June 2003. The article appears on pages 162–64. You found this article on April 13, 2010.

Answers to the Tutorials

TUTORIAL 1

1. A verb has to agree with its subject. (G1-a)
2. Avoid sentence fragments. (G5)
3. It’s important to use apostrophes correctly. (P4)
4. If your sentence begins with a long introductory word group, use a comma to separate the word group from the rest of the sentence. (P1-b)

TUTORIAL 2

1. The index entry “each” mentions that the word is singular, so you might not need to look further to realize that the verb should be has, not have. The first page reference takes you to the entry for each in the glossary of usage (W1), which directs you to G1-e and G3-a for details about why has is correct. The index entry “has vs. have” leads you to the chart in G1.
2. The index entry “lying vs. laying” takes you to section G2-b, where you will learn that lying (meaning “reclining or resting on a surface”) is correct.
3. Looking up “you, inappropriate use of” leads you to the glossary of usage (W1) and section G3-b, which explain that you should not be used to mean “anyone in general.” You can revise the sentence by using a person or one instead of you, or you can restructure the sentence completely: In some cultures, accepting a gift is considered ill mannered.
4. The index entries “I vs. me” and “me vs. I” take you to section G3-c, which explains why for her sister and me is correct.

TUTORIAL 3

1. Section P1-c states that, although usage varies, most experts advise using a comma between all items in a series—to prevent possible misreadings or ambiguities. To find this section, you would probably use the menu system.
2. You and the student would consult section M2, on articles. This section is easy to locate in the menu system.
3. In the menu system, you will find “MLA papers” and then section MLA-3, “Integrating sources.”
4. You can send your interns to sections G1 and G2-c, which you can find in the menu system if you know to look under “Subject-verb agreement” or “Verb forms, tenses, and moods.” If you aren’t sure about the grammatical terminology, you can look in the index under “-s, as verb ending” or “Verbs, -s form of.”

TUTORIAL 4
1. Changing attitudes toward alcohol have affected the beer industry.
2. It is human nature to think wisely and act foolishly.
3. Our goal this year is to increase our profits by 9 percent.
4. Most sleds are pulled by no fewer than two dogs and no more than ten.

TUTORIAL 5
Everywhere I travel, instructors tell me that they love *A Writer’s Reference*—its clear, concise explanations and respectful tone and its ease of use inside and outside the classroom. I understand why *A Writer’s Reference* inspires such affection; it is the book I too have always loved, the book my students trust and keep, and the one that teaches one patient lesson at a time. Over the last six editions, millions of students and instructors have turned to *A Writer’s Reference* for the straightforward, reliable, and comprehensive support that Diana Hacker always offered. It has been one of the great pleasures of my own teaching career to build on that foundation as the coauthor of *A Writer’s Reference*.

Many people have asked, *How do you revise the most successful handbook in the country—the handbook that everyone loves?* To prepare for the seventh edition, I traveled to more than forty-five colleges and universities to learn how students use their handbooks and how instructors teach from them. I listened, everywhere, for clues about how to make the handbook an even more helpful companion for students throughout their academic careers and an even stronger resource for the teachers guiding their development as writers. Throughout my travels, I heard students puzzle out the unfamiliar elements of academic writing, particularly those related to working with sources. I watched creative instructors show their students how to build arguments, synthesize sources, and strengthen their ideas through revision. I observed writing center tutors responding to students’ questions about thesis statements and counterargument. And I listened to librarians expertly explain how to approach research assignments and evaluate sources. I wanted the seventh edition to capture the vibrant energy and creativity that surround conversations about student writing, wherever they take place.

As you look through the seventh edition, you’ll discover many innovations inspired by these conversations. One of the new features I’m most excited about is “Revising with comments.” During my
travels, I asked students about the comments they receive most frequently and asked instructors to show me the comments they write most frequently on their students’ drafts. The answers to these questions, combined with my own research on responding to student writers, shaped this feature, which helps students and instructors make the most of reviewing and commenting. In keeping with the Hacker tradition, this new feature teaches one lesson at a time—how to revise an unclear thesis or how to consider opposing viewpoints, for instance—and directs students to specific sections of the handbook to guide their revision strategies.

In A Writer’s Reference, Diana Hacker created the most innovative and practical college reference—the one that responds most directly to student writers’ questions and challenges. The seventh edition carries on that tradition. You’ll find that the book you’ve always loved now includes a new argument paper, a stepped-out approach to writing and revising thesis statements, new coverage of synthesizing sources, expanded attention to writing assignments across the disciplines, and many more practical innovations. As a classroom teacher, I know how much a trusted and reliable handbook can help students make the most of their writing experiences in college and beyond. And now as the coauthor of the seventh edition, I am eager to share this book with you, knowing that you’ll find everything you and your students love and trust about A Writer’s Reference.

Features of the seventh edition

What’s new

TARGETED CONTENT FOR TODAY’S STUDENTS: ACADEMIC WRITING AND RESEARCH

• Synthesis. Many of today’s college writing assignments require that students synthesize—analyze sources and work them into a conversation that helps develop an argument. New coverage
of synthesis, with annotated examples in MLA and APA styles, helps students work with sources to meet the demands of academic writing. (See MLA-3c and APA-3c.)

- **A new sample argument paper** shows students how to state and support an argumentative thesis, address counterarguments, integrate visuals, and document sources. (See pp. 87–91.)

- **A new annotated advertisement** illustrates how one student analyzes key elements of a visual to begin building an interpretation. (See p. 70.)

- **A new case study** follows one student’s research and writing process, providing an illustrated model for strategizing about a research assignment, using search tools and techniques, evaluating search results and sources, taking notes, thinking critically about how best to use sources in a paper, and integrating a source responsibly. This self-contained section (MLA-5b) directs students to more detailed information throughout the book. (See pp. 432–35.)

- **New advice for distinguishing scholarly and popular sources.** (See pp. 350–51.)

- **Integrating evidence in analytical papers.** New coverage in section A1-d, “Using interpretation in an analysis,” shows—at the sentence level—how to introduce, include, and interpret a passage in an analytical paper. (See p. 74.)

- **More help with writing assignments in other disciplines and in various genres.** For students who work with evidence in disciplines other than English, we have included annotated assignments and excerpts from model papers in psychology, business, biology, and nursing. (See pp. 105-08.)

- **New documentation models, many annotated.** Eighty-six new models across the three styles (MLA, APA, CMS [Chicago]) include sources students are using today—podcasts, online videos, blogs, and DVD features. Detailed annotations for many models help students see at a glance how to gather information about their sources and format their citations. (See p. 419 for an example.)

- **New chart on avoiding plagiarism.** (See pp. 364–65.)

**CONCRETE STRATEGIES FOR REVISING**

- **New coverage of portfolio keeping.** For students who are asked to maintain and submit a writing portfolio, a new section, C3-e, “Prepare a portfolio; reflect on your writing,” covers types of
portfolios, offers tips for writing a reflective cover document, and provides a sample reflective essay. (See pp. 28-31.)

- **Revising with comments.** Based on research with sixty-five students at colleges and universities across the country, this new feature helps students understand common instructor comments such as “unclear thesis,” “develop more,” or “cite your source” and gives students revision strategies they can apply to their own work. (See pp. 23–27.)

- **Specific strategies for revising thesis statements.** We know that college writers often need help reworking thesis statements, in whatever discipline they are writing. A new stepped-out approach helps students identify a problem in a draft thesis, ask relevant questions, and use their own responses to revise. (See pp. 16–18.)

NEW EXAMPLES, RELEVANT GRAMMAR COVERAGE

- **Academic examples that reflect the types of sentences students are expected to write in college.** A new type of hand-edited example (“Writing with sources”) shows typical errors students make — and how they can correct them — when they integrate sources in MLA, APA, and CMS (Chicago) papers. (See p. 270 for an example.)

- **More ESL coverage.** Part M, Multilingual Writers and ESL Challenges, offers more accessible advice and more support for multilingual writers across the disciplines.

- **Basic grammar content that is more straightforward than ever.** Tabbed section B, Basic Grammar, the handbook’s reference within a reference, now teaches with everyday example sentences.

NAVIGATION HELP THAT MAKES SENSE TO STUDENTS

- **Making the most of your handbook.** These new boxes, running throughout the book, help students pull together the advice they need to complete writing assignments in any class. The boxes teach students to use their handbook as a reference by prompting them to consult related advice and examples from different parts of the book as they write and revise. (See p. 347 for an example.)

- **Plain-language navigation for quick and easy reference.** In the upper right-hand corner of every page, terms like main idea, flow, and presenting the other side will help students see at a glance the exact page they need.
A NEW COLLECTION OF RESOURCES THAT HELPS INSTRUCTORS MAKE THE MOST OF THEIR HANDBOOK

- *Teaching with Hacker Handbooks*, by Marcy Carbajal Van Horn, offers practical advice on common topics such as designing a composition course, crafting writing assignments, and teaching multilingual writers. Ten lesson plans, each including strategies and materials that are ready to use or customize, support common course goals, like teaching argument, teaching paragraphs, and teaching with peer review. The collection also includes a wealth of handouts, syllabi, and other resources for integrating a Hacker handbook into your course. Available in print and online (hackerhandbooks.com/teaching).

What’s the same

The features that have made *A Writer’s Reference* work so well for so many students and instructors are still here.

**Color-coded main menu and tabbed dividers.** The main menu directs students to yellow, blue, and green tabbed dividers; the color coding makes it easy for students to identify and flip to the section they need. The documentation sections are further color-coded: orange for MLA, dark green for APA, and purple for CMS (*Chicago*).

**User-friendly index.** Even students who are unsure of grammar terminology will find help fast by consulting the user-friendly index. When facing a choice between *I* and *me*, for example, students may not know to look for “Case” or “Pronoun case.” They are more likely to look up “*I*” or “*me*,” so the index includes entries for “*I* vs. *me*” and “*me* vs. *I*.” Similar entries appear throughout the index.

**Citation at a glance.** Annotated visuals show students where to find the publication information they need to cite common types of sources in MLA, APA, and CMS (*Chicago*) styles. (See p. 416 for an example.)

**Quick-access charts and an uncluttered design.** The seventh edition has what instructors and students have come to expect of a Hacker handbook: a clear and navigable presentation of information, with charts that summarize key content.

**What’s on the companion Web site?**

hackerhandbooks.com/writersref

See page xxi for a list of resources available on the handbook’s companion Web site.
Grammar, writing, and research exercises with feedback for every item. More than 1,800 items offer students plenty of extra practice, and our new scorecard gives instructors flexibility in viewing students’ results.

Annotated model papers in MLA, APA, CMS (Chicago), and CSE styles. Student writers can see formatting conventions and effective writing in traditional college essays and in other common genres: annotated bibliographies, literature reviews, lab reports, business proposals, and clinical documents.

Research and Documentation Online. Written by a college librarian, this award-winning resource gives students a jump start with research in thirty academic disciplines. In addition to coverage of MLA, APA, and CMS (Chicago) styles of documentation, the site includes complete documentation advice for writing in the sciences (CSE style).

Resources for writers and tutors. Checklists, hints, tips, and help-sheets are available in downloadable format.

Resources for multilingual writers and ESL. Writers will find advice and strategies for understanding college expectations and completing writing assignments. Also included are charts, exercises, activities, and an annotated student essay in draft and final form.

Language Debates. Twenty-two brief essays provide opportunities for critical thinking about grammar and usage issues.

Access to premium content. New copies of the print handbook can be packaged with a free activation code for premium content: the e-book, a series of online video tutorials, and a collection of games, activities, readings, guides, and more.

Acknowledgments

I am grateful for the expertise, enthusiasm, and classroom wisdom that so many individuals brought to the seventh edition.

Reviewers

For their participation in a focus group on A Writer’s Reference at the 2010 Conference on College Composition and Communication, I would like to thank Jennifer Cellio, Northern Kentucky University; Robert Cummings, University of Mississippi; Karen Gardiner, University of Alabama; Letizia Guglielmo, Kennesaw State College; Liz Kleinfeld, Metropolitan State College of Denver; and Melinda Knight, Montclair State University.

I thank those professors whose meticulous feedback helped shape Strategies for Online Learners: Jill Dahlman, University of Hawaii; Dana Del George, Santa Monica College; Larry Giddings, Pikes Peak Community College; David Hennessy, Broward College; Neil Plakcy, Broward College; and Rolando Regino, Riverside Community College.

I am indebted to the members of our Librarian Advisory Board: Barbara Fister, Gustavus Adolphus College; Susan Gilroy, Harvard University; John Kupersmith, University of California, Berkeley; and Monica Wong, El Paso Community College.

For their invaluable input, I would like to thank an insightful group of reviewers who answered detailed questionnaires about the

Rekha Rosha, Wake Forest University; Mitchell Rowat, University of Western Ontario; Kirsti Sandy, Keene State College; Robert M. Sanford, University of Southern Maine; Su Senapati, Abraham Baldwin Agricultural College; Shant Shahoian, Glendale Community College; Michele Singletary, Nashville State Community College; Michel Small, Shasta College; Matt Smith, University of Saint Francis; Marcia A. Sol, Cloud Community College; Stephen E. Sullivan, University of Saint Francis; Judith K. Taylor, Northern Kentucky University; Matt Theado, Gardner-Webb University; Jennifer Thomas, Azusa Pacific University; Matthew A. Thomas, Azusa Pacific University; Katherine E. Tirabassi, Keene State College; Cliff Toliver, Missouri Southern State University; Elaine Torda, SUNY Orange County Community College; Monica Trent, Montgomery College, Rockville; Ellen Vance, Art Institute of Seattle; Travis Wagner, University of Southern Maine; Karen Woods Weierman, Worcester State College; and Kelli Wood, El Paso Community College. We would also like to thank our anonymous reviewers from Brooklyn College, the University of Colorado at Denver, Glendale Community College, Ithaca College, Northern Kentucky University, Pulaski Technical College, and Wake Forest University.

Contributors

I am grateful to the following individuals, fellow teachers of writing, for their smart revisions of two key supplements: Joe Bizup, Boston University, updated Writing about Literature with fresh selections and relevant advice; and Jon Cullick, Northern Kentucky University, and Terry Myers Zawacki, George Mason University, tackled Writing in the Disciplines, expanding the advice to cover nine disciplines with the addition of music, engineering, and criminology. I am enormously grateful to Marcy Carbajal Van Horn, ESL specialist, experienced composition instructor, and former online writing lab director, who lent her expertise on several projects: She served as lead author for two brand-new resources, Teaching with Hacker Handbooks and Strategies for Online Learners, and she improved our coverage for multilingual writers both in the handbook and on the companion Web site.

Student contributors

A number of bright and willing students helped identify which instructor comments provide the best guidance for revision. From Green River Community College: Kyle Baskin, Josué Cardona, Emily Dore, Anthony Hines, Stephanie Humphries, Joshua Kin, Jessica Llapitan, James Mitchell, Derek Pegram, Charlie Piehler, Lindsay
Preface for instructors

Allison Rae Richards, Kristen Saladis, Jacob Simpson, Christina Starkey, Ariana Stone, and Joseph Vreeburg. From Northern Kentucky University: Sarah Freidhoff, Marisa Hempel, Sarah Laughlin, Sean Moran, Laren Reis, and Carissa Spencer. From Palm Beach Community College: Alexis Day, Shawn Gibbons, Zachary Jennison, Jean Lacz, Neshia Neal, Sarah Reich, Jude Rene, and Sam Smith. And from the University of Maine at Farmington: Nicole Carr, Hannah Courtright, Timothy Doyle, Janelle Gallant, Amy Hobson, Shawn Menard, Jada Molton, Jordan Nicholas, Nicole Phillips, Tessa Rockwood, Emily Rose, Nicholas Tranten, and Ashley Wyman. I also thank the students who have let us use and adapt their papers as models in the handbook and on its companion Web site: Ned Bishop, Lucy Bonilla, Jamal Hammond, Sam Jacobs, Albert Lee, Luisa Mirano, Anna Orlov, Emilia Sanchez, and Matt Watson.

Bedford/St. Martin’s

A handbook is truly a collaborative writing project, and it is a pleasure to acknowledge and thank the enormously talented Bedford/St. Martin’s editorial team, whose deep commitment to students informs each new feature of A Writer’s Reference. Joan Feinberg, Bedford’s president and Diana Hacker’s first editor, offers her superb judgment on every aspect of the book. Joan’s graceful and generous leadership, both within Bedford and in the national composition community, is a never-ending source of inspiration for those who work closely with her. Michelle Clark, executive editor; Mara Weible, lead development editor; and Barbara Flanagan, senior editor, are treasured friends and colleagues, the kind of editors every author dreams of having. Michelle, an endless source of creativity and joy, combines wisdom with patience, imagination with practicality, and hard work with good cheer. Mara’s brilliant, close, and careful attention to each detail of the handbook comes from her teacher’s sensibility and editor’s unerring eye. And Barbara, who has worked on Diana Hacker’s handbooks for more than twenty-five years, brings to the seventh edition her unrelenting insistence on both clarity and precision as well as her editorial patience and perseverance. Thanks to Alicia Young, associate editor, for expertly managing the review process, preparing documents, and editing several ancillaries. Thanks also to Kylie Paul, editorial assistant and newest member of the handbook team, for managing many small details related to both our Web and print projects.

The passionate commitment to A Writer’s Reference of many Bedford colleagues—Denise Wydra, editorial director; Karen Henry, editor in chief; Marjorie Adler, marketing manager; and John Swanson, senior
Preface for instructors

executive marketing manager—ensures that the seventh edition remains the most innovative and practical handbook on the market. Special thanks go to Jimmy Fleming, senior English specialist, for his abundant contributions, always wise and judicious, and for his enthusiasm and support as we traveled to colleges near and far. Many thanks to Rosemary Jaffe, senior production editor, who kept us on schedule and efficiently and gracefully turned a manuscript into a handbook. And thanks to Linda McLatchie, copyeditor, for her thoroughness and attention to detail; to Claire Seng-Niemoeller, text designer, who always has clarity and ease of use in mind as she designs A Writer’s Reference; to Donna Dennison, art director, who has given the book a strikingly beautiful cover; and to Sarah Ferguson, new media editor, who developed the book’s companion Web site and e-book.

Most important, I want to thank Diana Hacker. To create the best writing help for her students at Prince George’s Community College, she studied their practices and puzzled out their challenges. What she learned inspired her to create the best reference for all students of academic writing. I’m honored to acknowledge her work, her legacy, and her innovative spirit—and pleased to continue in the tradition of this brilliant teacher and writer.

And last, but never least, I offer thanks to Maxine Rodburg, Laura Saltz, and Kerry Walk, friends and colleagues, for sustaining conversations about teaching writing; to Joshua Alper, an attentive reader of life and literature, for his steadfastness across the drafts; to Sam and Kate for lively conversations about writing; and to Rachel and Alexandra, whose good-natured and humorous observations about their real lives as college writers are a constant source of instruction and inspiration.

Writing is a process of figuring out what you think, not a matter of recording already developed thoughts. Since it’s not possible to think about everything all at once, most experienced writers handle a piece of writing in stages. You will generally move from planning to drafting to revising, but be prepared to return to earlier stages as your ideas develop.

### C1 Planning

**C1-a Assess the writing situation.**

Begin by taking a look at your writing situation. Consider your subject, your purpose, your audience, available sources of information, and any assignment requirements such as length, document design, and deadlines (see the checklist on p. 6). It is likely that you will make final decisions about all of these matters later in the writing process—after a first draft, for example—but you can save yourself time by thinking about as many of them as possible in advance.

In many writing situations, part of your challenge will be determining your purpose, or your reason, for writing. The wording of an assignment may suggest its purpose. If no guidelines are given, you may need to ask yourself, “Why am I communicating with my readers?” or “What do I want to accomplish?” College writers most often write for the following purposes:

- to inform
- to explain
- to summarize
- to recommend
- to evaluate
- to persuade
- to analyze
- to synthesize
- to propose
- to call readers to action
- to change attitudes
- to express feelings

Audience analysis can often help you determine how to accomplish your purpose—how much detail or explanation to provide, what kind of tone and language to use, and what potential objections to address. You may need to consider multiple audiences. The audience for a business report, for example, might include readers who want details and those who prefer a quick overview. For a service learning course, the audience for a proposal might include both your instructor and the supervisor at the organization at which you volunteered. The checklist
on page 6 includes questions that will help you analyze your audience and develop an effective strategy for reaching your readers.

**Academic English** What counts as good writing varies from culture to culture and even among groups within cultures. In some situations, you will need to become familiar with the writing styles—such as direct or indirect, personal or impersonal, plain or embellished—that are valued by the culture or discipline for which you are writing.

**C1-b Experiment with ways to explore your subject.**

Instead of just plunging into a first draft, experiment with one or more techniques for exploring your subject: talking and listening, reading and annotating texts, listing, clustering, freewriting, asking questions, keeping a journal, blogging. Whatever technique you turn to, the goal is the same: to generate ideas that will lead you to a question, a problem, or a topic that you want to explore. At this early stage of the writing process, don’t censor yourself. Sometimes an idea that initially seems trivial or far-fetched will turn out to be worthwhile.

**Talking and listening**

Because writing is a process of figuring out what you think about a subject, it can be useful to try out your ideas on other people. Conversation can deepen and refine your ideas before you even begin to set them down on paper. By talking and listening to others, you can also discover what they find interesting, what they are curious about, and where they disagree with you. If you are planning to advance an argument, you can try it out on listeners with other points of view.

Many writers begin a writing project by brainstorming ideas in a group, debating a point with friends, or chatting with an instructor. Others prefer to record themselves talking through their own thoughts. Some writers exchange ideas by sending e-mails or instant messages or by posting to discussion boards or blogs. You may be encouraged to share ideas with your classmates and instructor in an online workshop, where you can begin to refine your thoughts before starting a draft.

Understanding an assignment

Determining the purpose of the assignment

Usually the wording of an assignment will suggest its purpose. You might be expected to do one of the following in a college writing assignment:

- summarize information from books, lectures, or research (See A1-c.)
- analyze ideas and concepts (See A1-d.)
- take a position and defend it with evidence (See A2.)
- synthesize (combine ideas from) several sources and create an original argument (See MLA-3.)

Understanding how to answer an assignment’s questions

Many assignments will ask you to answer a how or why question. Such questions cannot be answered using only facts; instead, you will need to take a position. For example, the question “What are the survival rates for leukemia patients?” can be answered by reporting facts. The question “Why are the survival rates for leukemia patients in one state lower than they are in a neighboring state?” must be answered with both facts and interpretation.

If a list of prompts appears in the assignment, be careful— instructors rarely expect you to answer all of the questions in order. Look instead for topics, themes, or ideas that will help you ask your own questions.

Recognizing implied questions

When you are asked to discuss, analyze, argue, or consider, your instructor will often expect you to answer a how or why question.

Discuss the effects of the No Child Left Behind Act on special education programs. = How has the No Child Left Behind Act affected special education programs?

Consider the recent rise of autism diagnoses. = Why are diagnoses of autism rising?

Recognizing disciplinary expectations

When you are asked to write in a specific discipline, pay attention to the expectations and features of the writing in that discipline. Look closely at the key terms and specialized vocabulary of the assignment and the kinds of evidence and citation style your instructor expects. (See A4.)
Checklist for assessing the writing situation

Subject
- Has the subject (or a range of possible subjects) been given to you, or are you free to choose your own?
- What interests you about your subject? What questions would you like to explore?
- Why is your subject worth writing about? How might readers benefit from reading about it?
- Do you need to narrow your subject to a more specific topic (because of length restrictions, for instance)?

Purpose and audience
- Why are you writing: To inform readers? To persuade them? To entertain them? To call them to action? Some combination of these?
- Who are your readers? How well informed are they about the subject? What do you want them to learn?
- How interested and attentive are they likely to be? Will they resist any of your ideas?
- What is your relationship to your readers: Student to instructor? Employee to supervisor? Citizen to citizen? Expert to novice?

Sources of information
- What kinds of evidence will best serve your subject, purpose, and audience?
- What sort of documentation style is required: MLA? APA? CMS?

Length and document design
- Do you have any length specifications? If not, what length seems appropriate, given your subject, purpose, and audience?
- Is a particular format required? If so, do you have guidelines to follow or examples to consult?
- How might visuals—charts, graphs, tables, images—help you convey information?

Reviewers and deadlines
- Who will be reviewing your draft in progress: Your instructor? A writing center tutor? Your classmates?
- What are your deadlines? How much time will you need for each stage, including proofreading and printing the final draft?
Reading and annotating texts

Reading is an important way to deepen your understanding of a topic and expand your perspective. Annotating a text, written or visual, encourages you to read actively—to highlight key concepts, to note possible contradictions in an argument, or to raise questions for further research and investigation. Here, for example, is a paragraph from an essay on medical ethics as one student annotated it:

Breakthroughs in genetics present us with a promise and a predicament. The promise is that we may soon be able to treat and prevent a host of debilitating diseases. The predicament is that our newfound genetic knowledge may also enable us to manipulate our own nature—to enhance our muscles, memories, and moods; to choose the sex, height, and other genetic traits of our children; to make ourselves “better than well.” When science moves faster than moral understanding, as it does today, men and women struggle to articulate their unease. In liberal societies they reach first for the language of autonomy, fairness, and individual rights. But this part of our moral vocabulary is ill equipped to address the hardest questions posed by genetic engineering. The genomic revolution has induced a kind of moral vertigo.

—Michael Sandel, “The Case against Perfection”

Listing

Listing ideas—a technique sometimes known as brainstorming—is a good way to figure out what you know and what questions you have.

Here is a list one student jotted down for an essay about community service requirements for college students:

- Volunteered in high school.
- Teaching adults to read motivated me to study education.
- “The best way to find yourself is to lose yourself in the service of others.”

—Gandhi
• Volunteering helps students find interests and career paths.
• Volunteering as requirement? Contradiction?
• Many students need to work to pay college tuition.
• Enough time to study, work, and volunteer?
• Can’t students volunteer for their own reasons?
• What schools have community service requirements?
• What do students say about community service requirements?

Listing questions and ideas helped the writer narrow her subject and identify her position. In other words, she treated her early list as a record of her thoughts and a springboard to new ideas, not as an outline.

**Clustering**

Unlike listing, clustering highlights relationships among ideas. To cluster ideas, write your subject in the center of a sheet of paper, draw a circle around it, and surround the circle with related ideas connected to it with lines. If some of the satellite ideas lead to more specific clusters, write them down as well. The writer of the following cluster diagram was exploring ideas for an essay on obesity in children.

```
CLUSTER DIAGRAM

- sleep disorders
- heart attacks
- health problems later in life
- obesity in children
- genetics
- diet
- exercise
- lunch and snack options high in sugar and fat
- TV ads for unhealthy foods
- “product placement” of foods in popular movies, TV shows
- time spent using computer or watching TV instead of being outside
- funding for athletic programs
```

Volunteering helps students find interests and career paths. Volunteering as requirement? Contradiction? Many students need to work to pay college tuition. Enough time to study, work, and volunteer? Can’t students volunteer for their own reasons? What schools have community service requirements? What do students say about community service requirements?

Listing questions and ideas helped the writer narrow her subject and identify her position. In other words, she treated her early list as a record of her thoughts and a springboard to new ideas, not as an outline.

**Clustering**

Unlike listing, clustering highlights relationships among ideas. To cluster ideas, write your subject in the center of a sheet of paper, draw a circle around it, and surround the circle with related ideas connected to it with lines. If some of the satellite ideas lead to more specific clusters, write them down as well. The writer of the following cluster diagram was exploring ideas for an essay on obesity in children.
**Freewriting**

In its purest form, freewriting is simply nonstop writing. You set aside ten minutes or so and write whatever comes to mind, without pausing to think about word choice, spelling, or even meaning. If you get stuck, you can write about being stuck, but you should keep your fingers moving. If nothing much happens, you have lost only ten minutes. It's more likely, though, that something interesting will emerge—perhaps an eloquent sentence, a genuine expression of curiosity, or an idea worth further investigation.

To explore ideas on a particular topic, consider using a technique called *focused freewriting*. Again, you write quickly and freely, but this time you focus on a subject and pay attention to the connections among your ideas.

**Asking questions**

When gathering material for a story, journalists routinely ask themselves Who? What? When? Where? Why? and How? In addition to helping journalists get started, these questions ensure that they will not overlook an important fact.

Whenever you are writing about events, whether current or historical, asking the journalist’s questions is one way to get started. One student, whose topic was the negative reaction in 1915 to D. W. Griffith’s silent film *The Birth of a Nation*, began exploring her topic with this set of questions:

- *Who* objected to the film?
- *What* were the objections?
- *When* were the protests first voiced?
- *Where* were protests most strongly expressed?
- *Why* did protesters object to the film?
- *How* did protesters make their views known?

In the academic world, scholars often generate ideas by posing questions related to a specific discipline: one set of questions for analyzing short stories, another for evaluating experiments in social psychology, still another for reporting field experiences in criminal justice.

If you are writing in a particular discipline, you might begin your writing process by finding out which questions scholars in that discipline typically explore.
Keeping a journal

A journal is a collection of informal, exploratory, sometimes experimen-
tal writing. In a journal, often meant for your eyes only, you can take
risks. You might freewrite, pose questions, comment on an interesting
idea from one of your classes, or keep a list of questions that occur to
you while reading and researching. You might imagine a conversation
between yourself and your readers or stage a debate to understand
opposing positions. A journal can also serve as a sourcebook of ideas to
draw on in future essays.

Blogging

Although a blog (Weblog) is a type of journal, it is a public writing
space rather than a private one. In a blog, you might express opinions,
make observations, recap events, have fun with language, or interpret
an image. Since most blogs have a commenting feature, you can create
a conversation by inviting readers to give you feedback—ask ques-
tions, pose counterarguments, or suggest other readings on a topic.

C1-c Draft a working thesis.

As you explore your topic and identify questions to investigate, you
will begin to see possible ways to focus your material. At this point, try
to settle on a tentative central idea. The more complex your topic, the
more your focus will change as your drafts evolve. For many types of
writing, you will be able to assert your central idea in a sentence or
two. Such a statement, which ordinarily appears in the opening para-
graph of your finished essay, is called a thesis statement (see also C2-a).

A thesis is often one or more of the following:

• the answer to a question you have posed
• the solution for a problem you have identified
• a statement that takes a position on a debatable topic

A tentative or working thesis will help you organize your draft.
Don’t worry about the exact wording because your main point may
change as you refine and focus your ideas. Here, for example, are one
student’s efforts to pose a question and draft a thesis statement for
an essay in his film course.

QUESTION

In Rebel without a Cause, how does the filmmaker show that the
main character becomes alienated from his family and friends?
Testing a working thesis

Once you have come up with a working thesis, you can use the following questions to evaluate it.

- Does your thesis answer a question, propose a solution to a problem, or take a position in a debate?
- Does the thesis require an essay’s worth of development? Or will you run out of points too quickly?
- Is the thesis too obvious? If you cannot come up with interpretations that oppose your own, consider revising your thesis.
- Can you support your thesis with the evidence available?
- Can you explain why readers will want to read an essay with this thesis? Can you respond when a reader asks “So what?”

WORKING THESIS

In *Rebel without a Cause*, Jim Stark, the main character, is often seen literally on the edge of physical danger, suggesting that he is becoming more and more agitated by family and society.

The working thesis will need to be revised as the student thinks through and revises his paper, but it provides a useful place to start writing.

Here another student identifies a problem to focus an argument paper.

PROBLEM

Americans who earn average incomes cannot run effective national political campaigns.

WORKING THESIS

Congress should pass legislation that would make it possible for Americans who are not wealthy to be viable candidates in national political campaigns.

The student has roughed out language for how to solve the problem—enacting federal legislation. As she learns more about her topic, she will be able to refine her thesis and suggest a more specific solution, such as federal restriction of campaign spending.

Keep in mind as you draft your working thesis that an effective thesis is a promise to a reader; it points both the writer and the reader in a definite direction. For a more detailed discussion of thesis, see C2-a.
Sketch a plan.

Once you have drafted a working thesis, listing and organizing your supporting ideas is a good next step. Creating outlines, whether formal or informal, can help you make sure your writing is credible and logical.

When to use an informal outline

You might want to sketch an informal outline to see how you will support your thesis and to figure out a tentative structure for your ideas. Informal outlines can take many forms. Perhaps the most common is simply the thesis followed by a list of major ideas.

Working thesis: Television advertising should be regulated to help prevent childhood obesity.

- Children watch more television than ever.
- Snacks marketed to children are often unhealthy and fattening.
- Childhood obesity can cause sleeping disorders and other health problems.
- Addressing these health problems costs taxpayers billions of dollars.
- Therefore, these ads are actually costing the public money.
- But if advertising is free speech, do we have the right to regulate it?
- We regulate alcohol and cigarette ads on television, so why not advertisements for soda and junk food?

If you began by jotting down a list of ideas (see pp. 7–8), you can turn that list into a rough outline by crossing out some ideas, adding others, and putting the ideas in a logical order.

When to use a formal outline

Early in the writing process, rough outlines have certain advantages: They can be produced quickly, they are obviously tentative, and they can be revised easily. However, a formal outline may be useful later in the writing process, after you have written a rough draft, especially if your topic is complex. It can help you see whether the parts of your essay work together and whether your essay's structure is logical.

The following formal outline brought order to the research paper that appears in MLA-5c, on Internet surveillance in the workplace. The student's thesis is an important part of the outline. Everything else in the outline supports it, directly or indirectly.
FORMAL OUTLINE

Thesis: Although companies often have legitimate concerns that lead them to monitor employees’ Internet usage—from expensive security breaches to reduced productivity—the benefits of electronic surveillance are outweighed by its costs to employees’ privacy and autonomy.

I. Although employers have always monitored employees, electronic surveillance is more efficient.
   A. Employers can gather data in large quantities.
   B. Electronic surveillance can be continuous.
   C. Electronic surveillance can be conducted secretly, with keystroke logging programs.

II. Some experts argue that employers have legitimate reasons to monitor employees’ Internet usage.
   A. Unmonitored employees could accidentally breach security.
   B. Companies are legally accountable for the online actions of employees.

III. Despite valid concerns, employers should value employee morale and autonomy and avoid creating an atmosphere of distrust.
   A. Setting the boundaries for employee autonomy is difficult in the wired workplace.
      1. Using the Internet is the most popular way of wasting time at work.
      2. Employers can’t tell easily if employees are working or surfing the Web.
   B. Surveillance can create resentment among employees.
      1. Web surfing can relieve stress, and restricting it can generate tension between managers and workers.
      2. Enforcing Internet usage can seem arbitrary.

IV. Surveillance may not increase employee productivity, and trust may benefit productivity.
   A. A company shouldn’t care how many hours salaried employees work as long as they get the job done.
   B. Casual Internet use can actually benefit companies.
      1. The Internet may spark business ideas.
      2. The Internet may suggest ideas about how to operate more efficiently.

V. Employees’ rights to privacy are not well defined by the law.
   A. Few federal guidelines on electronic surveillance exist.
   B. Employers and employees are negotiating the boundaries without legal guidance.
   C. As technological capabilities increase, the need to define boundaries will also increase.
Generally, the introduction to a piece of writing announces the main point; the body develops it, usually in several paragraphs; the conclusion drives it home. You can begin drafting, however, at any point. If you find it difficult to introduce a paper that you have not yet written, try drafting the body first and saving the introduction for later.

**Guidelines for constructing an outline**

1. Put the thesis at the top.
2. Make items at the same level parallel grammatically (see S1).
3. Use sentences unless phrases are clear.
4. Use the conventional system of numbers, letters, and indents:
   - I.
     - A.
     - B.
       - 1.
       - 2.
         - a.
         - b.
   - II.
     - A.
     - B.
       - 1.
       - 2.
         - a.
         - b.
5. Always include at least two items at each level.
6. Limit the number of major sections in the outline; if the list of roman numerals (at the first level) gets too long, try clustering the items into fewer major categories with more subcategories.

**C2 Drafting**

For most types of writing, draft an introduction that includes a thesis.

**Drafting an introduction**

Your introduction will usually be a paragraph of 50 to 150 words (in a longer paper, it may be more than one paragraph). Perhaps the most common strategy is to open the paragraph with a few sentences that
engage the reader and establish your purpose for writing and then state your main point. The statement of your main point is called the thesis. (See also C1-c.)

In the following introductions, the thesis is highlighted.

Credit card companies love to extend credit to college students, especially those just out of high school. Ads for credit cards line campus bulletin boards, flash across commercial Web sites for students, and get stuffed into shopping bags at college bookstores. Why do the companies market their product so vigorously to a population that lacks a substantial credit history and often has no steady source of income? The answer is that significant profits can be earned through high interest rates and assorted penalties and fees. By granting college students liberal lending arrangements, credit card companies often hook them on a cycle of spending that can ultimately lead to financial ruin. — Matt Watson, student

As the United States industrialized in the nineteenth century, using immigrant labor, social concerns took a backseat to the task of building a prosperous nation. The government did not regulate industries and did not provide an effective safety net for the poor or for those who became sick or injured on the job. Immigrants and the poor did have a few advocates, however. Settlement houses such as Hull-House in Chicago provided information, services, and a place for reform-minded individuals to gather and work to improve the conditions of the urban poor. Alice Hamilton was one of these reformers. Hamilton’s efforts helped to improve the lives of immigrants and drew attention and respect to the problems and people that until then had been ignored. — Laurie McDonough, student

Ideally, the introductory sentences leading to the thesis should hook the reader, perhaps with one of the following:

• a startling statistic or an unusual fact
• a vivid example
• a description or an image
• a paradoxical statement
• a quotation or a bit of dialogue
• a question
• an analogy
• an anecdote

Whether you are writing for a scholarly audience, a professional audience, or a general audience, you cannot assume your readers’ interest in the topic. The hook should spark curiosity and offer readers a reason to continue.
Although the thesis frequently appears at the end of the introduction, it can also appear at the beginning. Much work-related writing, for example, requires a straightforward approach and commonly begins with the thesis.

Flextime scheduling, which has proved effective at the Library of Congress, should be introduced on a trial basis at the main branch of the Montgomery County Public Library. By offering flexible work hours, the library can boost employee morale, cut down on absenteeism, and expand its hours of operation. — David Warren, student

For some types of writing, it may be difficult or impossible to express the central idea in a thesis statement; or it may be unwise or unnecessary to include a thesis statement in the essay. A personal narrative, for example, may have a focus that is too subtle to be distilled in a single statement. Strictly informative writing, like that found in many business memos, may be difficult to summarize in a thesis. In such instances, do not try to force the central idea into a thesis sentence. Instead, think in terms of an overriding purpose, which may or may not be stated directly.

Writing effective thesis statements

An effective thesis statement is a central idea that requires supporting evidence; its scope is appropriate for the required length of the essay; and it is sharply focused. It should answer a question you have posed, resolve a problem you have identified, or take a position in a debate.

When constructing a thesis statement, ask yourself whether you can successfully develop it with the sources available to you and for the purposes you’ve identified. Also ask if you can explain why readers should be interested in reading an essay that explores this thesis.

A thesis must require proof or further development through facts and details; it cannot itself be a fact or a description.
The first polygraph was developed by Dr. John A. Larson in 1921.

**PROBLEM** The thesis is too factual. A reader could not disagree with it or debate it; no further development of this idea is required.

**STRATEGY** Enter a debate by posing a question about your topic that has more than one possible answer. For example: Should the polygraph be used by private employers? Your thesis should be your answer to the question.

Because the polygraph has not been proved reliable, even under controlled conditions, its use by employers should be banned.

A thesis should be an answer to a question, not a question itself.

**DRAFT** Would John F. Kennedy have continued to escalate the war in Vietnam if he had lived?

**PROBLEM** The thesis is a question, not an answer to a question.

**STRATEGY** Take a position on your topic by answering the question you have posed. Your thesis should be your answer to the question.

Although John F. Kennedy sent the first American troops to Vietnam before he died, an analysis of his foreign policy suggests that he would not have escalated the war had he lived.

A thesis should be of sufficient scope for your assignment; it should not be too broad.

**DRAFT** Mapping the human genome has many implications for health and science.

**PROBLEM** The thesis is too broad. Even in a very long research paper, you would not be able to discuss all the implications of mapping the human genome.

**STRATEGY** Consider subtopics of your original topic. Once you have chosen a subtopic, take a position in an ongoing debate and pose a question that has more than one answer. For example: Should people be tested for genetic diseases? Your thesis should be your answer to the question.

Although scientists can now detect genetic predisposition for specific diseases, policymakers should establish guidelines about whom to test and under what circumstances.
A thesis also should not be too narrow.

**DRAFT**
A person who carries a genetic mutation linked to a particular disease might or might not develop that disease.

**PROBLEM**
The thesis is too narrow. It does not suggest any argument or debate about the topic.

**STRATEGY**
Identify challenging questions that readers might have about your topic. Then pose a question that has more than one answer. For example: Do the risks of genetic testing outweigh its usefulness? Your thesis should be your answer to this question.

**REVISED**
Though positive results in a genetic test do not guarantee that the disease will develop, such results can cause psychological trauma; genetic testing should therefore be avoided in most cases.

A thesis should be sharply focused, not too vague. Avoid fuzzy, hard-to-define words such as interesting, good, or disgusting.

**DRAFT**
The Vietnam Veterans Memorial is an interesting structure.

**PROBLEM**
This thesis is too fuzzy and unfocused. It’s difficult to define interesting, and the sentence doesn’t give the reader any cues about where the essay is going.

**STRATEGY**
Focus your thesis with concrete language and a clear plan. Pose a question about the topic that has more than one answer. For example: How does the physical structure of the Vietnam Veterans Memorial shape the experience of visitors? Your thesis—your answer to the question—should use specific language that engages readers to follow your argument.

**REVISED**
By inviting visitors to see their own reflections in the wall, the Vietnam Veterans Memorial creates a link between the present and the past.

---

C2-b Draft the body.

The body of your essay develops support for your thesis, so it’s important to have at least a working thesis before you start writing. What does your thesis promise readers? Try to keep your response to that question in mind as you draft the body.
You may already have written an introduction that includes your working thesis. If not, as long as you have a draft thesis, you can begin developing the body and return later to the introduction. If your thesis suggests a plan or if you have sketched a preliminary outline, try to block out your paragraphs accordingly. Draft the body of your essay by writing at least a paragraph about each supporting point you listed in the planning stage. If you do not have a plan, pause for a few moments and sketch one (see C1-d).

Keep in mind that often you might not know what you want to say until you have written a draft. It is possible to begin without a plan—assuming you are prepared to treat your first attempt as a “discovery draft” that will be radically rewritten once you discover what you really want to say. Whether or not you have a plan when you begin drafting, you can often figure out a workable order for your ideas by stopping each time you start a new paragraph, to think about what your readers will need to know to follow your train of thought.

For more detailed advice about paragraphs in the body of an essay, see C4. For specific help with drafting paragraphs, see C4-b.

**TIP:** As you draft, keep careful notes and records of any sources you read and consult. (See R3.) If you quote, paraphrase, or summarize a source, include a citation, even in your draft. You will save time and avoid plagiarism if you follow the rules of citation and documentation while drafting.

---

**C2-c Draft a conclusion.**

A conclusion should remind readers of the essay’s main idea without repeating it. Often the concluding paragraph can be relatively short. By the end of the essay, readers should already understand your main point; your conclusion drives it home and, perhaps, gives readers something larger to consider.

In addition to echoing your main idea, a conclusion might

- briefly summarize your essay’s key points
- propose a course of action
- offer a recommendation
- discuss the topic’s wider significance or implications
- pose a question for future study

To conclude an essay analyzing the shifting roles of women in the military services, one student discusses her topic’s implications for society as a whole:
As the military continues to train women in jobs formerly reserved for men, our understanding of women’s roles in society will no doubt continue to change. As news reports of women training for and taking part in combat operations become commonplace, reports of women becoming CEOs, police chiefs, and even president of the United States will cease to surprise us. Or perhaps we have already reached this point.

— Rosa Broderick, student

To make the conclusion memorable, you might include a detail, an example, or an image from the introduction to bring readers full circle; a quotation or a bit of dialogue; an anecdote; or a witty or ironic comment.

Whatever concluding strategy you choose, keep in mind that an effective conclusion is decisive and unapologetic. Avoid introducing wholly new ideas at the end of an essay. And because the conclusion is so closely tied to the rest of the essay in both content and tone, be prepared to rework it (or even replace it) as you revise your draft.

C3 Revising

Revising is rarely a one-step process. Global matters—focus, purpose, organization, content, and overall strategy—generally receive attention first. Improvements in sentence structure, word choice, grammar, punctuation, and mechanics come later.

C3-a Make global revisions.

Many of us resist global revisions because we find it difficult to view our work from our audience’s perspective. To distance yourself from a draft, put it aside for a while, preferably overnight or even longer. When you return to it, try to play the role of your audience as you read. If possible, enlist friends or family to be the audience for your draft. Or visit your school’s writing center to go over your draft with a writing tutor. Ask your reviewers to focus on the larger issues of writing, such as purpose and organization, not on word- or sentence-level issues. The checklist for global revision on the next page may help you and your reviewers get started.
Checklist for global revision

Purpose and audience
- Does the draft address a question, a problem, or an issue that readers care about?
- Is the draft appropriate for its audience? Does it account for the audience’s knowledge of and possible attitudes toward the subject?

Focus
- Is the thesis clear? Is it prominently placed?
- If there is no thesis, is there a good reason for omitting one?
- Are any ideas obviously off the point?

Organization and paragraphing
- Are there enough organizational cues for readers (such as topic sentences or headings)?
- Are ideas presented in a logical order?
- Are any paragraphs too long or too short for easy reading?

Content
- Is the supporting material relevant and persuasive?
- Which ideas need further development?
- Are the parts proportioned sensibly? Do major ideas receive enough attention?
- Where might material be deleted?

Point of view
- Is the dominant point of view—first person (I or we), second person (you), or third person (he, she, it, one, or they)—appropriate for your purpose and audience? (See S4-a.)

C3-b Revise and edit sentences.

Much of this book offers advice on revising sentences for clarity and on editing them for grammar, punctuation, and mechanics. Some writers handle sentence-level revisions directly at the computer, experimenting with a variety of possible improvements. Other writers prefer to print out a hard copy of the draft and mark it up before
Guidelines for peer reviewers

- View yourself as a coach, not a judge. Work with the writer to identify the draft’s strengths and areas for improvement.
- Restate the writer’s main ideas to check that they are clearly expressed.
- Where possible, give specific compliments. Let the writer know which of his or her strategies are successful.
- Ask to hear more about passages you find confusing or interesting.
- Express interest in reading the next draft.

making changes in the file. Here is a rough-draft paragraph as one student edited it on-screen for a variety of sentence-level problems.

Although some cities have found creative ways to improve access to public transportation for passengers with physical disabilities, and to fund other programs, there have been problems in our city has struggled with due to the need to address budget constraints and competing needs priorities. This The budget crunch has led citizens to question how funds are distributed. For example, last year when city officials voted to use available funds to support had to choose between allocating funds for accessible transportation or allocating funds to after-school programs rather than transportation upgrades. , they voted for the after-school programs. It is not clear to some citizens why these after-school programs are more important.

The original paragraph was flawed by wordiness, a problem that can be addressed through any number of revisions. The following revision would also be acceptable:

Some cities have funded improved access to public transportation for passengers with physical disabilities. Because of budget constraints, our city chose to fund after-school programs rather than transportation programs. As a result, citizens have begun to question how funds are distributed and why certain programs are more important than others.

Some of the paragraph’s improvements do not involve choice and must be fixed in any revision. The hyphen in after-school programs is necessary; a noun must be substituted for the pronoun these in the last sentence; and the question mark in the second sentence must be changed to a period.
C3-c Revising with comments

To revise is to “re-see,” and the comments you receive from your instructors, peers, and writing center tutors will help you re-see your draft from your readers’ point of view. Sometimes these comments are written as shorthand commands—“Be specific!”—and sometimes as questions—“What is your main point?” Such comments don’t immediately show you how to revise, but they do identify places where global and sentence-level revisions can improve your draft.

When instructors, peers, and writing tutors comment on your work, you won’t be able to incorporate everyone’s advice. Sort through the comments you receive with your purpose and audience in mind.

You may also want to keep a revision and editing log, a list of the global and sentence-level concerns that come up repeatedly in your reviewers’ comments. When you apply lessons from one assignment to another, comments can help you become a more effective writer.

Remember not to take criticism personally. Your readers are responding to your essay, not to you. It may be frustrating to hear that you still have more work to do, but taking feedback seriously—and revising accordingly—will make your essay stronger. This section addresses common types of comments an instructor or peer might make in response to your writing.

THE COMMENT: Unclear thesis

SIMILAR COMMENTS: Vague thesis • State your position • What is your main point?

UNDERSTANDING THE COMMENT When readers point out that your thesis is unclear, the comment often signals that they have a hard time identifying your essay’s main point.

STRATEGIES FOR REVISING

• Ask questions. What is the thesis, position, or main point of the draft? Can you support it with the available evidence? (See C1-c, A2-c, and A2-d.)

• Reread your entire draft. Because ideas develop as you write, you may find that your conclusion contains a clearer statement of your main point than does your working thesis. Or you may find your thesis elsewhere in your draft. (See C-2a.)

• Try framing your thesis as an answer to a question you pose, the resolution of a problem you identify, or a position you take in a
debate. And put your thesis to the “So what?” test: Why would a reader be interested in this thesis? (See C1-c and p. 11.)

THE COMMENT: **Narrow your introduction**  

SIMILAR COMMENTS: **Unfocused intro • Too broad**

UNDERSTANDING THE COMMENT When readers point out that your introduction needs to be “narrowed,” the comment often signals that the beginning sentences of your essay are not specific or focused.

STRATEGIES FOR REVISING  

- **Reread your introduction and ask questions.** Are the sentences leading to your thesis specific enough to engage readers and communicate your purpose? Do these sentences lead logically to your thesis? Do they spark your readers’ curiosity and offer them a reason to continue reading? (See C-2a.)

- **Try engaging readers with a “hook” in your introduction—a question, quotation, paradoxical statement, vivid example, or an image.** (See p. 15.)

THE COMMENT: **Develop more**

SIMILAR COMMENTS: **Undeveloped • Give examples • Explain**

UNDERSTANDING THE COMMENT When readers suggest that you “develop more,” the comment often signals that you stopped short of providing a full and detailed discussion of your idea.

STRATEGIES FOR REVISING  

- **Read your paragraph to a peer or a tutor and ask specific questions.** What’s missing? Do readers need more background information or examples to understand your point? Do they need more evidence to be convinced? Is it clear what point you’re making with your details? (See A2-d.)

- **Keep your purpose in mind.** Your assignment probably asks you to do more than summarize sources or list examples and evidence. Make sure you discuss the examples and illustrations you provide and analyze your evidence. (See A2-e.)
• **Think about why your main point matters to your readers.** Take another look at your points and support and answer the question “So what?” (See p. 11.)

---

**THE COMMENT:** Be specific

**SIMILAR COMMENTS:** Need examples • Evidence?

**UNDERSTANDING THE COMMENT** When readers say that you need to “be specific,” the comment often signals that you could strengthen your writing with additional details.

**STRATEGIES FOR REVISING**

• **Reread your topic sentence** to understand the focus of the paragraph. (See C4-a.)

• **Ask questions.** Does the paragraph contain claims that need support? Have you provided evidence—specific examples, vivid details and illustrations, statistics and facts—to help readers understand your ideas and find them persuasive? (See A2-e.)

• **Interpret your evidence.** Remember that details and examples don’t speak for themselves. You’ll need to show readers how evidence supports your claims. (See A1-d and A2-e.)

---

**THE COMMENT:** Consider opposing viewpoints

**SIMILAR COMMENTS:** What about the other side? • Counterargument?

**UNDERSTANDING THE COMMENT** When readers suggest that you “consider opposing viewpoints,” the comment often signals that you need to recognize and respond to possible objections to your argument.

**STRATEGIES FOR REVISING**

• **Read more** to learn about the debates surrounding the topic. (See p. 7.)

• **Ask questions:** Are there other sides to the issue? Would a reasonable person offer an alternative explanation for the evidence or provide counterevidence? (See p. 85.)

• **Be open-minded.** Although it might seem illogical to introduce opposing arguments, you’ll show your knowledge of the topic by
recognizing that not everyone draws the same conclusion. (See A2-f, A2-g, and p. 376.)

- Introduce and counter objections with phrases like these: “Some readers might point out that . . .” or “Critics of this view argue that . . .” (See p. 85.)
- Revise your thesis, if necessary, to account for other points of view.

THE COMMENT: **Summarize less, analyze more**

SIMILAR COMMENTS: **Too much summary • Show, don’t tell • Go deeper**

UNDERSTANDING THE COMMENT When readers point out that you need to include more analysis and less summary, the comment often signals that they are looking for your interpretation of the text.

STRATEGIES FOR REVISING

- **Reread your paragraph and highlight the sentences that summarize.** Then, in a different color, highlight the sentences that contain your analysis. (Summary describes what the text says; analysis offers a judgment or interpretation of the text.) (See A1-c and A1-d.)
- **Reread the text** (or passages of the text) that you are analyzing. Pay attention to how the language and structure of the text contribute to its meaning. (See A1-a.)
- **Ask questions.** What strategies does the author use and how do those strategies help convey the author’s message? What insights about the text can you share with your readers? How can you deepen your reader’s understanding of the author’s main points? (See A3 and A1-d.)

THE COMMENT: **More than one point in this paragraph**

SIMILAR COMMENTS: **Unfocused • Lacks unity • Hard to follow**

UNDERSTANDING THE COMMENT When readers tell you that you have “more than one point in this paragraph,” the comment often signals that not all sentences in your paragraph support the topic sentence.
STRATEGIES FOR REVISING

• **Reread your paragraph and ask questions.** What is the main point of the paragraph? Is there a topic sentence that signals to readers what to expect in the rest of the paragraph? Have you included sentences that perhaps belong elsewhere in your draft? (See C4-a.)

• **Revisit your topic sentence.** It should serve as an important signpost for readers. Make sure the wording of your topic sentence is precise and that you have enough evidence to support it in the paragraph. (See C4-b.)

THE COMMENT: **Your words?**

SIMILAR COMMENTS: **Source? • Who’s talking here?**

UNDERSTANDING THE COMMENT When readers ask “Your words?” the comment often signals that it is unclear whether you are using only your own words or are mixing in some words of your sources.

STRATEGIES FOR REVISING

• **Check that you have clearly marked the boundaries** between your source material and your own words. Have you borrowed words from sources without properly acknowledging them? (See MLA-2, APA-2, and CMS-2.)

• **Use a signal phrase** to introduce each source and provide context. Doing so prepares readers for a source’s words. (See MLA-3b, APA-3b, and CMS-3b.)

• **Use quotation marks** to enclose language that you borrow word-for-word from a source and follow each quotation with a parenthetical citation. (See MLA-2b, APA-2b, and CMS-2b.)

• **Put summaries and paraphrases in your own words** and always cite your sources. (See MLA-2c, APA-2c, and CMS-2c.)

As you revise your paper, you might request feedback or clarification from instructors or peers by e-mail. Because e-mail communication can be quick and convenient, it’s natural to think of it as informal, but be sure to keep your audience in mind. You should usually use a formal greeting for an instructor (Dear Professor Brink) instead of a casual one (Hey!) and use standard formatting and language (avoiding emoticons, abbreviations like LOL, and unconventional capitalization). You can
often be more flexible with peers, but use a more formal style at the beginning of the semester, until you get to know them. And make sure you have a clear purpose in mind: Are you trying to share an observation? Asking for another perspective on your topic? Requesting feedback on a particular paragraph? For more on using e-mail in business and academic contexts, see C5-f.

**C3-d Proofread the final manuscript.**

After revising and editing, you are ready to prepare the final manuscript. (See C5-e for guidelines.) Make sure to allow yourself enough time for proofreading—the final and most important step in manuscript preparation.

Proofreading is a special kind of reading: a slow and methodical search for misspellings, typographical mistakes, and omitted words or word endings. Such errors can be difficult to spot in your own work because you may read what you intended to write, not what is actually on the page. To fight this tendency, try proofreading out loud, articulating each word as it is actually written. You might also try proofreading your sentences in reverse order, a strategy that takes your attention away from the meanings you intended and forces you to focus on one word at a time.

Although proofreading may be slow, it is crucial. Errors strewn throughout an essay are distracting and annoying. If the writer doesn’t care about this piece of writing, the reader might wonder, why should I? A carefully proofread essay, however, sends a positive message that you value your writing and respect your readers.

**C3-e Prepare a portfolio; reflect on your writing.**

At the end of the semester, your instructor may ask you to submit a portfolio, or collection, of your writing. A writing portfolio often consists of drafts, revisions, and reflections that demonstrate a writer’s thinking and learning processes or showcase the writer’s best work. Your instructor may give you the choice of submitting a paper portfolio or an e-portfolio.

Reflection—the process of stepping back periodically to examine your decisions, preferences, strengths, and challenges as a writer—is the backbone of portfolio keeping. Your instructor may ask you to submit a reflective document in which you introduce or comment on the pieces in your portfolio and discuss your development as a writer throughout the course. This reflection may take the form of an essay,
a cover letter, or some other kind of statement—often, but not always, placed as an introductory piece. You might try one or more of the following strategies:

- Discuss, in depth, your best entry. Explain why it is your best and how it represents what you learned in the course.
- Describe in detail the revisions you’ve made to one key piece and the improvements and changes you want readers to notice. Include specific passages from the piece.
- Demonstrate what this portfolio illustrates about you as a writer, student, researcher, or critical thinker.
- Reflect on what you’ve learned about writing and reading throughout the course.
- Reflect on how you plan to use the skills and experiences from your writing course in other courses where writing will be assigned.

SAMPLE REFLECTIVE LETTER FOR A PORTFOLIO

December 11, 2010
Professor Todd Andersen
Humanities Department
Johnson State College

Dear Professor Andersen,

This semester has been more challenging than I had anticipated. I have always been a good writer, but I discovered this semester that I had to stretch myself in ways that weren’t always comfortable. I learned that if I wanted to reach my readers, I needed to understand that not everyone sees the world the way I do. I needed to work with my peers and write multiple drafts to understand that a first draft is just a place to start. I have chosen three pieces of writing for my portfolio: “Negi and the Other Girl: Nicknames and Identity,” “School Choice Is a Bad Choice,” and “Flat-footed Advertising.” Each shows my growth as a writer in different ways, and the final piece was my favorite assignment of the semester.

The peer review sessions that our class held in October helped me with my analytical response paper. My group and I chose to write about

Reflective writing can take various forms. Bonilla wrote her reflection as a letter.

Reflective writing often calls for first person (“I”).

Bonilla lists the pieces included in her portfolio by title.
“Jibara,” by Esmeralda Santiago, for the Identity unit. My first and second drafts were unfocused. I spent my first draft basically retelling the events of the essay. I think I got stuck doing that because the details of Santiago’s essay are so interesting—the biting termites, the burning metal, and the jíbara songs on the radio—and because I didn’t understand the differences between summary and analysis. My real progress came when I decided to focus the essay on one image—the mirror hanging in Santiago’s small house, a mirror that was hung too high for her to look into. Finding a focus helped me move from listing the events of the essay to interpreting those events. I thought my peers would love my first draft, but they found it confusing. Some of their comments were hard to take, but their feedback (and all the peer feedback I received this semester) helped me see my words through a reader’s eyes.

While my Identity paper shows my struggle with focus, my next paper shows my struggle with argument. For my argument essay, I wrote about charter schools. My position is that the existence of charter schools weakens the quality of public schools. In my first draft, my lines of argument were not in the best order. When I revised, I ended the paper with my most powerful argument: Because they refuse to adopt open enrollment policies and are unwilling to admit students with severe learning or behavior problems, charter schools are elitist. While revising, I also introduced a counterargument in my final draft because our class discussion showed me that many of my peers disagree with me. To persuade them, I needed to address their arguments in favor of charter schools. My essay is stronger because I acknowledged that both the proponents and opponents of abandoning charters want improved education for America’s children. It took me a while to understand that including counterarguments would actually make my argument more convincing, especially to readers who don’t already agree with me. Understanding the importance of counterargument helped me with other writing I did in this course, and it will help me in the writing I do for my major, political science.

Another stretch for me this semester was seeing visuals as texts that are worth more than a five-second response. The final assignment was my favorite because it involved a number of surprises. I wasn’t so much surprised by the idea that ads make arguments because I understand that...
they are designed to persuade. What was surprising was being able to see all the elements of a visual and write about how they work together to convey a clear message. For my essay “Flat-footed Advertising,” I chose the EAS Performance Nutrition ad “The New Theory of Evolution for Women.” In my summary of the ad, I noted that the woman who follows the EAS program for twelve weeks and “evolves” is compared to modern humans and our evolution from apes as shown in the classic 1966 March of Progress illustration (Howell 41). It was these familiar poses of “Nicolle,” the woman in the image, that drew me to study this ad. In my first draft, I made all of the obvious points, looking only literally at the comparison and almost congratulating the company on such a clever use of a classic scientific drawing. Your comments on my draft were a little unsettling because you asked me “So what?”—why would my ideas matter to a reader? You pushed me to consider the ad’s assumptions and to question the meaning of the word evolve. In my revised essay, I argue that even though Nicolle is portrayed as powerful, satisfied, and “fully evolved,” the ad campaign rests on the assumption that performance is best measured by physical milestones. In the end, an ad that is meant to pay homage to woman’s strength is in fact demeaning. My essay evolved from draft to draft because I allowed my thinking to change and develop as I revised. I’ve never revised as much as I did with this final assignment. I cared about this paper and wanted to show my readers why my argument mattered.

The expectations for college writing are different from those for high school writing. I believe that my portfolio pieces show that I finished this course as a stronger writer. I have learned to take risks in my writing and to use the feedback from you and my peers, and now I know how to acknowledge the points of view of my audience to be more persuasive. I’m glad to have had the chance to write a reflection at the end of the course. I hope you enjoy reading this portfolio and seeing the evolution of my work this semester.

Sincerely,

Lucy Bonilla
C4  Writing paragraphs

Except for special-purpose paragraphs, such as introductions and conclusions (see C2-a and C2-c), paragraphs are clusters of information supporting an essay’s main point (or advancing a story’s action). Aim for paragraphs that are clearly focused, well developed, organized, coherent, and neither too long nor too short for easy reading.

C4-a  Focus on a main point.

A paragraph should be unified around a main point. The main point should be clear to readers, and every sentence in the paragraph should relate to it.

Stating the main point in a topic sentence

As a rule, you should state the main point of a paragraph in a topic sentence—a one-sentence summary that tells readers what to expect as they read on. Usually the topic sentence (highlighted in the following example) comes first in the paragraph.

All living creatures manage some form of communication. The dance patterns of bees in their hive help to point the way to distant flower fields or announce successful foraging. Male stickleback fish regularly swim upside-down to indicate outrage in a courtship contest. Male deer and lemurs mark territorial ownership by rubbing their own body secretions on boundary stones or trees. Everyone has seen a frightened dog put his tail between his legs and run in panic. We, too, use gestures, expressions, postures, and movement to give our words point. —Olivia Vlahos, *Human Beginnings*

In college writing, topic sentences are often necessary for advancing or clarifying the lines of an argument or reporting the research in a field. In business writing, topic sentences (along with headings) are essential because readers often scan for information and summary statements. Sometimes the topic sentence is introduced by a transitional sentence linking the paragraph to earlier material, and occasionally the topic sentence is withheld until the end of the paragraph.
**Sticking to the point**

Sentences that do not support the topic sentence destroy the unity of a paragraph. If the paragraph is otherwise focused, such sentences can simply be deleted or perhaps moved elsewhere. In the following paragraph describing the inadequate facilities in a high school, the information about the chemistry instructor (highlighted) is clearly off the point.

As the result of tax cuts, the educational facilities of Lincoln High School have reached an all-time low. Some of the books date back to 1990 and have long since shed their covers. The few computers in working order must share one printer. The lack of lab equipment makes it necessary for four or five students to work at one table, with most watching rather than performing experiments. Also, the chemistry instructor left to have a baby at the beginning of the semester, and most of the students don’t like the substitute. As for the furniture, many of the upright chairs have become recliners, and the desk legs are so unbalanced that they play seesaw on the floor.

Sometimes the solution for a disunified paragraph is not as simple as deleting or moving material. Writers often wander into uncharted territory because they cannot think of enough evidence to support a topic sentence. Feeling that it is too soon to break into a new paragraph, they move on to new ideas for which they have not prepared the reader. When this happens, the writer is faced with a choice: Either find more evidence to support the topic sentence or adjust the topic sentence to mesh with the evidence that is available.

---

**C4-b Develop the main point.**

Though an occasional short paragraph is fine, particularly if it functions as a transition or emphasizes a point, a series of brief paragraphs suggests inadequate development. How much development is enough? That varies, depending on the writer’s purpose and audience.

For example, when health columnist Jane Brody wrote a paragraph attempting to convince readers that it is impossible to lose fat quickly, she knew that she would have to present a great deal of evidence because many dieters want to believe the opposite. She did not write only the following:

When you think about it, it’s impossible to lose—as many diets suggest—10 pounds of fat in ten days, even on a total fast. Even a moderately active person cannot lose so much weight so fast. A less active person hasn’t a prayer.
Writing paragraphs

This three-sentence paragraph is too skimpy to be convincing. But the paragraph that Brody did write contains enough evidence to convince even skeptical readers.

When you think about it, it’s impossible to lose—as many . . . diets suggest—10 pounds of fat in ten days, even on a total fast. A pound of body fat represents 3,500 calories. To lose 1 pound of fat, you must expend 3,500 more calories than you consume. Let’s say you weigh 170 pounds and, as a moderately active person, you burn 2,500 calories a day. If your diet contains only 1,500 calories, you’d have an energy deficit of 1,000 calories a day. In a week’s time that would add up to a 7,000-calorie deficit, or 2 pounds of real fat. In ten days, the accumulated deficit would represent nearly 3 pounds of lost body fat. Even if you ate nothing at all for ten days and maintained your usual level of activity, your caloric deficit would add up to 25,000 calories. . . . At 3,500 calories per pound of fat, that’s still only 7 pounds of lost fat.

—Jane Brody, Jane Brody’s Nutrition Book

Choose a suitable pattern of organization.

Although paragraphs (and indeed whole essays) may be patterned in any number of ways, certain patterns of organization occur frequently, either alone or in combination:

- examples and illustrations (p. 34)
- narration (p. 35)
- description (p. 36)
- process (p. 36)
- comparison and contrast (p. 36)
- analogy (p. 37)
- cause and effect (p. 38)
- classification and division (p. 38)
- definition (p. 39)

These patterns (sometimes called methods of development) have different uses, depending on the writer’s subject and purpose.

Examples and illustrations

Providing examples, perhaps the most common method of development, is appropriate whenever the reader might be tempted to ask, “For example?”
Normally my parents abided scrupulously by “The Budget,” but several times a year Dad would dip into his battered black strongbox and splurge on some irrational, totally satisfying luxury. Once he bought over a hundred comic books at a flea market, doled out to us thereafter at the tantalizing rate of two a week. He always got a whole flat of pansies, Mom’s favorite flower, for us to give her on Mother’s Day. One day a boy stopped at our house selling fifty-cent raffle tickets on a sailboat, and Dad bought every ticket the boy had left—three books’ worth.

—Connie Hailey, student

Illustrations are extended examples, frequently presented in story form. When well selected, they can be a vivid and effective means of developing a point.

Part of [Harriet Tubman’s] strategy of conducting was, as in all battle-field operations, the knowledge of how and when to retreat. Numerous allusions have been made to her moves when she suspected that she was in danger. When she feared the party was closely pursued, she would take it for a time on a train southward bound. No one seeing Negroes going in this direction would for an instant suppose them to be fugitives. Once on her return she was at a railroad station. She saw some men reading a poster and she heard one of them reading it aloud. It was a description of her, offering a reward for her capture. She took a southbound train to avert suspicion. At another time when Harriet heard men talking about her, she pretended to read a book which she carried. One man remarked, “This can’t be the woman. The one we want can’t read or write.” Harriet devoutly hoped the book was right side up.

—Earl Conrad, Harriet Tubman

Narration

A paragraph of narration tells a story or part of a story. The following paragraph recounts one of the author’s experiences in the African wild.

One evening when I was wading in the shallows of the lake to pass a rocky outcrop, I suddenly stopped dead as I saw the sinuous black body of a snake in the water. It was all of six feet long, and from the slight hood and the dark stripes at the back of the neck I knew it to be a Storm’s water cobra—a deadly reptile for the bite of which there was, at that time, no serum. As I stared at it an incoming wave gently deposited part of its body on one of my feet. I remained motionless, not even breathing, until the wave rolled back into the lake, drawing the snake with it. Then I leaped out of the water as fast as I could, my heart hammering.

—Jane Goodall, In the Shadow of Man
**Description**

A descriptive paragraph sketches a portrait of a person, place, or thing by using concrete and specific details that appeal to one or more of the senses—sight, sound, smell, taste, and touch. Consider, for example, the following description of the grasshopper invasions that devastated the midwestern landscape in the late 1860s.

They came like dive bombers out of the west. They came by the millions with the rustle of their wings roaring overhead. They came in waves, like the rolls of the sea, descending with a terrifying speed, breaking now and again like a mighty surf. They came with the force of a williwaw and they formed a huge, ominous, dark brown cloud that eclipsed the sun. They dipped and touched earth, hitting objects and people like hailstones. But they were not hail. These were *live* demons. They popped, snapped, cracked, and roared. They were dark brown, an inch or longer in length, plump in the middle and tapered at the ends. They had transparent wings, slender legs, and two black eyes that flashed with a fierce intelligence.

— Eugene Boe, “Pioneers to Eternity”

**Process**

A process paragraph is structured in chronological order. A writer may choose this pattern either to describe how something is made or done or to explain to readers, step by step, how to do something. The following paragraph explains how to perform a “roll cast,” a popular fly-fishing technique.

Begin by taking up a suitable stance, with one foot slightly in front of the other and the rod pointing down the line. Then begin a smooth, steady draw, raising your rod hand to just above shoulder height and lifting the rod to the 10:30 or 11:00 position. This steady draw allows a loop of line to form between the rod top and the water. While the line is still moving, raise the rod slightly, then punch it rapidly forward and down. The rod is now flexed and under maximum compression, and the line follows its path, bellying out slightly behind you and coming off the water close to your feet. As you power the rod down through the 3:00 position, the belly of line will roll forward. Follow through smoothly so that the line unfolds and straightens above the water.

— *The Dorling Kindersley Encyclopedia of Fishing*

**Comparison and contrast**

To compare two subjects is to draw attention to their similarities, although the word *compare* also has a broader meaning that includes a consideration of differences. To contrast is to focus only on differences.
Whether a paragraph stresses similarities or differences, it may be patterned in one of two ways. The two subjects may be presented one at a time, as in the following paragraph of contrast.

So Grant and Lee were in complete contrast, representing two diametrically opposed elements in American life. Grant was the modern man emerging; beyond him, ready to come on the stage, was the great age of steel and machinery, of crowded cities and a restless, burgeoning vitality. Lee might have ridden down from the old age of chivalry, lance in hand, silken banner fluttering over his head. Each man was the perfect champion of his cause, drawing both his strengths and his weaknesses from the people he led.

—Bruce Catton, “Grant and Lee: A Study in Contrasts”

Or a paragraph may proceed point by point, treating the two subjects together, one aspect at a time. The following paragraph uses the point-by-point method to contrast speeches given by Abraham Lincoln in 1860 and Barack Obama in 2008.

Two men, two speeches. The men, both lawyers, both from Illinois, were seeking the presidency, despite what seemed their crippling connection with extremists. Each was young by modern standards for a president. Abraham Lincoln had turned fifty-one just five days before delivering his speech. Barack Obama was forty-six when he gave his. Their political experience was mainly provincial, in the Illinois legislature for both of them, and they had received little exposure at the national level—two years in the House of Representatives for Lincoln, four years in the Senate for Obama. Yet each was seeking his party’s nomination against a New York senator of longer standing and greater prior reputation—Lincoln against Senator William Seward, Obama against Senator Hillary Clinton. They were both known for having opposed an initially popular war—Lincoln against President Polk’s Mexican War, raised on the basis of a fictitious provocation; Obama against President Bush’s Iraq War, launched on false claims that Saddam Hussein possessed WMDs [weapons of mass destruction] and had made an alliance with Osama bin Laden.

—Garry Wills, “Two Speeches on Race”

**Analogy**

Analogies draw comparisons between items that appear to have little in common. Writers can use analogies to make something abstract or unfamiliar easier to grasp or to provoke fresh thoughts about a common subject. In the following paragraph, physician Lewis Thomas draws an analogy between the behavior of ants and that of humans.
Ants are so much like human beings as to be an embarrassment. They farm fungi, raise aphids as livestock, launch armies into wars, use chemical sprays to alarm and confuse enemies, capture slaves. The families of weaver ants engage in child labor, holding their larvae like shuttles to spin out the thread that sews the leaves together for their fungus gardens. They exchange information ceaselessly. They do everything but watch television.

— Lewis Thomas, “On Societies as Organisms”

**Cause and effect**

A paragraph may move from cause to effects or from an effect to its causes. The topic sentence in the following paragraph mentions an effect; the rest of the paragraph lists several causes.

The fantastic water clarity of the Mount Gambier sinkholes results from several factors. The holes are fed from aquifers holding rainwater that fell decades—even centuries—ago, and that has been filtered through miles of limestone. The high level of calcium that limestone adds causes the silty detritus from dead plants and animals to cling together and settle quickly to the bottom. Abundant bottom vegetation in the shallow sinkholes also helps bind the silt. And the rapid turnover of water prohibits stagnation.

— Hillary Hauser, “Exploring a Sunken Realm in Australia”

**Classification and division**

Classification is the grouping of items into categories according to some consistent principle. The following paragraph classifies species of electric fish.

Scientists sort electric fishes into three categories. The first comprises the strongly electric species like the marine electric rays or the freshwater African electric catfish and South American electric eel. Known since the dawn of history, these deliver a punch strong enough to stun a human. In recent years, biologists have focused on a second category: weakly electric fish in the South American and African rivers that use tiny voltages for communication and navigation. The third group contains sharks, nonelectric rays, and catfish, which do not emit a field but possess sensors that enable them to detect the minute amounts of electricity that leak out of other organisms.

— Anne and Jack Rudloe, “Electric Warfare: The Fish That Kill with Thunderbolts”

Division takes one item and divides it into parts. As with classification, division should be made according to some consistent principle.
The following paragraph describes the components that make up a baseball.

Like the game itself, a baseball is composed of many layers. One of the delicious joys of childhood is to take apart a baseball and examine the wonders within. You begin by removing the red cotton thread and peeling off the leather cover— which comes from the hide of a Holstein cow and has been tanned, cut, printed, and punched with holes. Beneath the cover is a thin layer of cotton string, followed by several hundred yards of woolen yarn, which makes up the bulk of the ball. Finally, in the middle is a rubber ball, or “pill,” which is a little smaller than a golf ball. Slice into the rubber and you’ll find the ball’s heart—a cork core. The cork is from Portugal, the rubber from southeast Asia, the covers are American, and the balls are assembled in Costa Rica.

— Dan Gutman, *The Way Baseball Works*

**Definition**

A definition puts a word or concept into a general class and then provides enough details to distinguish it from other members in the same class. In the following paragraph, the writer defines *envy* as a special kind of desire.

Envy is so integral and so painful a part of what animates behavior in market societies that many people have forgotten the full meaning of the word, simplifying it into one of the synonyms of desire. It is that, which may be why it flourishes in market societies: democracies of desire, they might be called, with money for ballots, stuffing permitted. But envy is more or less than desire. It begins with an almost frantic sense of emptiness inside oneself, as if the pump of one's heart were sucking on air. One has to be blind to perceive the emptiness, of course, but that's just what envy is, a selective blindness. *Invidia*, Latin for envy, translates as “non-sight,” and Dante has the envious plodding along under cloaks of lead, their eyes sewn shut with leaden wire. What they are blind to is what they have, God-given and humanly nurtured, in themselves.

— Nelson W. Aldrich Jr., *Old Money*

**C4-d Make paragraphs coherent.**

When sentences and paragraphs flow from one to another without discernible bumps, gaps, or shifts, they are said to be coherent. Coherence can be improved by strengthening the ties between old information and new. A number of techniques for strengthening those ties are detailed in this section.
**Linking ideas clearly**

Readers expect to learn a paragraph’s main point in a topic sentence early in the paragraph. Then, as they move into the body of the paragraph, they expect to encounter specific details, facts, or examples that support the topic sentence—either directly or indirectly. In the following paragraph, all of the sentences following the topic sentence directly support it.

A passenger list of the early years [of the Orient Express] would read like a *Who's Who of the World*, from art to politics. Sarah Bernhardt and her Italian counterpart Eleonora Duse used the train to thrill the stages of Europe. For musicians there were Toscanini and Mahler. Dancers Nijinsky and Pavlova were there, while lesser performers like Harry Houdini and the girls of the Ziegfeld Follies also rode the rails. Violinists were allowed to practice on the train, and occasionally one might see trapeze artists hanging like bats from the baggage racks. — Barnaby Conrad III, “Train of Kings”

If a sentence does not support the topic sentence directly, readers expect it to support another sentence in the paragraph and therefore to support the topic sentence indirectly. The following paragraph begins with a topic sentence. The highlighted sentences are direct supports, and the rest of the sentences are indirect supports.

Though the open-space classroom works for many children, it is not practical for my son, David. **First, David is hyperactive.** When he was placed in an open-space classroom, he became distracted and confused. He was tempted to watch the movement going on around him instead of concentrating on his own work. **Second, David has a tendency to transpose letters and numbers,** a tendency that can be **overcome only by individual attention from the instructor.** In the open classroom, he was moved from teacher to teacher, with each one responsible for a different subject. No single teacher worked with David long enough to diagnose the problem, let alone help him with it. **Finally, David is not a highly motivated learner.** In the open classroom, he was graded “at his own level,” not by criteria for a certain grade. He could receive a B in reading and still be a grade level behind, because he was doing satisfactory work “at his own level.”

— Margaret Smith, student

**Repeating key words**

Repetition of key words is an important technique for gaining coherence. To prevent repetitions from becoming dull, you can use variations of the key word (*hike, hiker, hiking*), pronouns referring to the
word (gamblers . . . they), and synonyms (run, spring, race, dash). In the following paragraph describing plots among indentured servants in the seventeenth century, historian Richard Hofstadter binds sentences together by repeating the key word plots and echoing it with a variety of synonyms (which are highlighted).

Plots hatched by several servants to run away together occurred mostly in the plantation colonies, and the few recorded servant uprisings were entirely limited to those colonies. Virginia had been forced from its very earliest years to take stringent steps against mutinous plots, and severe punishments for such behavior were recorded. Most servant plots occurred in the seventeenth century: a contemplated uprising was nipped in the bud in York County in 1661; apparently led by some left-wing offshoots of the Great Rebellion, servants plotted an insurrection in Gloucester County in 1663, and four leaders were condemned and executed; some discontented servants apparently joined Bacon’s Rebellion in the 1670’s. In the 1680’s the planters became newly apprehensive of discontent among the servants “owing to their great necessities and want of clothes,” and it was feared they would rise up and plunder the storehouses and ships; in 1682 there were plant-cutting riots in which servants and laborers, as well as some planters, took part.

— Richard Hofstadter, America at 1750

Using parallel structures
Parallel structures are frequently used within sentences to underscore the similarity of ideas (see S1). They may also be used to bind together a series of sentences expressing similar information. In the following passage describing folk beliefs, anthropologist Margaret Mead presents similar information in parallel grammatical form.

Actually, almost every day, even in the most sophisticated home, something is likely to happen that evokes the memory of some old folk belief. The salt spills. A knife falls to the floor. Your nose tickles. Then perhaps, with a slightly embarrassed smile, the person who spilled the salt tosses a pinch over his left shoulder. Or someone recites the old rhyme, “Knife falls, gentleman calls.” Or as you rub your nose you think, That means a letter. I wonder who’s writing?

— Margaret Mead, “New Superstitions for Old”

Maintaining consistency
Coherence suffers whenever a draft shifts confusingly from one point of view to another or from one verb tense to another. In addition, coherence
can suffer when new information is introduced with the subject of each sentence. For advice on avoiding shifts, see S4.

**Providing transitions**

Transitions are bridges between what has been read and what is about to be read. Transitions help readers move from sentence to sentence; they also alert readers to more global connections of ideas—those between paragraphs or even larger blocks of text.

---

**Academic English**  
Choose transitions carefully and vary them appropriately. Each transition has a different meaning; if you use a transition with an inappropriate meaning, you might confuse your reader.

- Although taking eight o’clock classes may seem unappealing, coming to school early has its advantages. Moreover, students who arrive early typically avoid the worst traffic and find the best parking spaces.

---

**SENTENCE-LEVEL TRANSITIONS**  
Certain words and phrases signal connections between (or within) sentences. Frequently used transitions are included in the chart on page 43.

Skilled writers use transitional expressions with care, making sure, for example, not to use consequently when also would be more precise. They are also careful to select transitions with an appropriate tone, perhaps preferring so to thus in an informal piece, in summary to in short for a scholarly essay.

In the following paragraph, an excerpt from an argument that dinosaurs had the “right-sized’ brains for reptiles of their body size,” biologist Stephen Jay Gould uses transitions (highlighted) to guide readers from one idea to the next.

I don’t wish to deny that the flattened, minuscule head of large bodied Stegosaurus houses little brain from our subjective, top-heavy perspective, but I do wish to assert that we should not expect more of the beast. First of all, large animals have relatively smaller brains than related, small animals. The correlation of brain size with body size among kindred animals (all reptiles, all mammals, for example) is remarkably regular. As we move from small to large...
animals, from mice to elephants or small lizards to Komodo dragons, brain size increases, but not so fast as body size. In other words, bodies grow faster than brains, and large animals have low ratios of brain weight to body weight. In fact, brains grow only about two-thirds as fast as bodies. Since we have no reason to believe that large animals are consistently stupider than their smaller relatives, we must conclude that large animals require relatively less brain to do as well as smaller animals. If we do not recognize this relationship, we are likely to underestimate the mental power of very large animals, dinosaurs in particular.

PARAGRAPH-LEVEL TRANSITIONS Paragraph-level transitions usually link the first sentence of a new paragraph with the first sentence of the previous paragraph. In other words, the topic sentences signal global connections.

Look for opportunities to allude to the subject of a previous paragraph (as summed up in its topic sentence) in the topic sentence of the next one. In his essay “Little Green Lies,” Jonathan H. Alder uses this strategy in the topic sentences of the following paragraphs, which appear in a passage describing the benefits of plastic packaging.
Consider aseptic packaging, the synthetic packaging for the “juice boxes” so many children bring to school with their lunch. One criticism of aseptic packaging is that it is nearly impossible to recycle, yet on almost every other count, aseptic packaging is environmentally preferable to the packaging alternatives. Not only do aseptic containers not require refrigeration to keep their contents from spoiling, but their manufacture requires less than one-10th the energy of making glass bottles.

What is true for juice boxes is also true for other forms of synthetic packaging. The use of polystyrene, which is commonly (and mistakenly) referred to as “Styrofoam,” can reduce food waste dramatically due to its insulating properties. (Thanks to these properties, polystyrene cups are much preferred over paper for that morning cup of coffee.) Polystyrene also requires significantly fewer resources to produce than its paper counterpart.

**TRANSITIONS BETWEEN BLOCKS OF TEXT** In long essays, you will need to alert readers to connections between blocks of text that are more than one paragraph long. You can do this by inserting transitional sentences or short paragraphs at key points in the essay. Here, for example, is a transitional paragraph from a student research paper. It announces that the first part of the paper has come to a close and the second part is about to begin.

Although the great apes have demonstrated significant language skills, one central question remains: Can they be taught to use that uniquely human language tool we call grammar, to learn the difference, for instance, between “ape bite human” and “human bite ape”? In other words, can an ape create a sentence?

**C4-e If necessary, adjust paragraph length.**

Most readers feel comfortable reading paragraphs that range between one hundred and two hundred words. Shorter paragraphs can require too much starting and stopping, and longer ones can strain the reader’s attention span. There are exceptions to this guideline, however. Paragraphs longer than two hundred words frequently appear in scholarly writing, where writers explore complex ideas. Paragraphs shorter than one hundred words occur in business writing and on Web sites, where readers routinely skim for main ideas; in newspapers because of narrow columns; and in informal essays to quicken the pace.

In an essay, the first and last paragraphs will ordinarily be the introduction and the conclusion. These special-purpose paragraphs are likely to be shorter than those in the body of the essay. Typically, the body paragraphs will follow the essay’s outline: one paragraph
per point in short essays, several per point in longer ones. Some ideas require more development than others, however, so it is best to be flexible. If an idea stretches to a length unreasonable for a paragraph, you should divide the paragraph, even if you have presented comparable points in the essay in single paragraphs.

Paragraph breaks are not always made for strictly logical reasons. Writers use them for all of the following reasons.

**REASONS FOR BEGINNING A NEW PARAGRAPH**

- to mark off the introduction and the conclusion
- to signal a shift to a new idea
- to indicate an important shift in time or place
- to emphasize a point (by placing it at the beginning or the end, not in the middle, of a paragraph)
- to highlight a contrast
- to signal a change of speakers (in dialogue)
- to provide readers with a needed pause
- to break up text that looks too dense

Beware of using too many short, choppy paragraphs, however. Readers want to see how your ideas connect, and they become irritated when you break their momentum by forcing them to pause every few sentences. Here are some reasons you might have for combining some of the paragraphs in a rough draft.

**REASONS FOR COMBINING PARAGRAPHS**

- to clarify the essay’s organization
- to connect closely related ideas
- to bind together text that looks too choppy

---

**C5 Designing documents**

The term *document* is broad enough to describe anything you might write in a college class, in the business world, or in everyday life. How you design a document (format it for the printed page or for a computer screen) will affect how readers respond to it.

Good document design promotes readability, but what *readability* means depends on your purpose and audience and perhaps on other elements of your writing situation, such as your subject and any length restrictions. All of your design choices—formatting options,
headings, and lists—should be made with your writing situation in mind. Likewise, visuals—tables, charts, and images—can support your writing if they are used appropriately.

**C5-a Determine layout and format to suit your purpose and audience.**

Similar documents share common design features. Together, these features—layout, margins and line spacing, alignment, fonts, and font styles—can help guide readers through a document.

*Layout*

Most readers have set ideas about how different kinds of documents should look. Advertisements, for example, have a distinctive appearance, as do newsletters and brochures. Instructors have expectations about how a college paper should look (see C5-e). Employers, too, expect documents such as letters, résumés, memos, and e-mail messages to be presented in standard ways (see C5-f).

Unless you have a compelling reason to stray from convention, it’s best to choose a document layout that conforms to your readers’ expectations. If you’re not sure what readers expect, look at examples of the kind of document you are producing.

*Margins and line spacing*

Margins help control the look of a page. For most academic and business documents, leave a margin of one to one and a half inches on all sides. These margins create a visual frame for the text and provide room for annotations, such as an instructor’s comments or a peer’s suggestions. Tight margins generally make a page crowded and difficult to read.

Most manuscripts in progress are double-spaced to allow room for editing. Final copy is often double-spaced as well, since single-spaced text is less inviting to read. If you are unsure about margin and spacing requirements for your document, check with your instructor or consult documents similar to the one you are writing. At times, the advantages of wide margins and double-spaced lines are offset by other considerations. For example, most business and technical documents are single-spaced, with double-spacing between paragraphs, to save paper and to promote quick scanning. Keep your purpose and audience in mind as you determine appropriate margins and line spacing for your document.
Planning a document: Design checklist for purpose and audience

- What is the purpose of your document? How can your document design help you achieve this purpose?
- Who are your readers? What are their expectations?
- What format is required? What format options—layout, margins, line spacing, and font styles—will readers expect?
- How can you use visuals—charts, graphs, tables, images—to help you convey information and achieve your purpose?

Fonts

If you have a choice, select a font that fits your writing situation in an easy-to-read size (usually 10–12 points). Although offbeat fonts may seem attractive, they slow readers down and can distract them from your ideas. For example, using Comic Sans, a font with a handwritten, childish feel, can make an essay seem too informal or unpolished, regardless of how well it’s written. Fonts that are easy to read and appropriate for college and workplace documents include the following: Arial, Courier, Georgia, Times New Roman, and Verdana. Check with your instructor; he or she may expect or prefer a particular font.

Font styles

Font styles—such as **boldface**, *italics*, and underlining—can be useful for calling attention to parts of a document. On the whole, it is best to use restraint when selecting styles. Applying too many different styles within a document can result in busy-looking pages and can confuse readers.

**TIP:** Never write an academic document in all capital or all lowercase letters. Although some readers have become accustomed to instant messages and e-mails that omit capital letters entirely, their absence makes a piece of writing too informal and difficult to read.

**C5-b Use headings when appropriate.**

In short essays, you will have little need for headings, especially if you use paragraphing and clear topic sentences to guide readers. In more complex documents, however, such as longer essays, research papers,
Designing documents

business reports, and Web sites, headings can be a useful visual cue for readers.

Headings help readers see at a glance the organization of a document. If more than one level of heading is used, the headings also indicate the hierarchy of ideas—as they do throughout this book.

Headings serve a number of functions for your readers, depending on the needs of different readers. When readers are looking for specific information and don’t want to read the entire document, headings can guide them to the right place quickly. When readers are scanning, hoping to pick up a document’s meaning or message, headings can provide an overview. Even when readers are committed enough to read every word, headings can help them preview a document before they begin reading or easily revisit a specific section after they’ve read through the document once.

**TIP:** While headings can be useful, they cannot substitute for transitions between paragraphs (see p. 43).

**Phrasing headings**

Headings should be as brief and as informative as possible. Certain styles of headings—the most common being *-ing* phrases, noun phrases, questions, and imperative sentences—work better for some purposes, audiences, and subjects than for others.

Whatever style you choose, use it consistently. Headings on the same level of organization should be written in parallel structure (see S1), as in the following examples from a report, a history textbook, a financial brochure, and a nursing manual, respectively.

**ING PHRASES AS HEADINGS**

Safeguarding Earth’s atmosphere
Charting the path to sustainable energy
Conserving global forests

**NOUN PHRASES AS HEADINGS**

The civil rights movement
The antiwar movement
The feminist movement
QUESTIONS AS HEADINGS
How do I buy shares?
How do I redeem shares?
How has the fund performed in the past three years?

IMPERATIVE SENTENCES AS HEADINGS
Ask the patient to describe current symptoms.
Take a detailed medical history.
Record the patient’s vital signs.

Placing and formatting headings
Headings on the same level of organization should be placed and formatted in a consistent way. If you have more than one level of heading, you might center your first-level headings and make them boldface; then you might make the second-level headings left-aligned and italicized, like this:

First-level heading
Second-level heading

A college paper with headings typically has only one level, and the headings are often centered, as in the sample paper on pages 488–96. In a report or a brochure, important headings can be highlighted by using white space above and below them. Less important headings can be downplayed by using less white space or by running them into the text.

C5-c Use lists to guide readers.

Lists are easy to read or scan when they are displayed, item by item, rather than run into your text. You might choose to display the following kinds of lists:

- steps in a process
- advice or recommendations
- items to be discussed
- criteria for evaluation (as in checklists)
- parts of an object

Lists are usually introduced with an independent clause followed by a colon (All mammals share the following five characteristics:).
Periods are not used after items in a list unless the items are complete sentences. Lists should be in parallel grammatical form (see S1).

Use bullets (circles or squares) or dashes to draw readers’ eyes to a list and to emphasize individual items. If you are describing a sequence or a set of steps, number your list with arabic numerals (1, 2, 3) followed by periods.

Although lists can be useful visual cues, don’t overdo them. Too many will clutter a document.

**C5-d Add visuals to support your purpose.**

Visuals can convey information concisely and powerfully. Charts, graphs, and tables, for example, can simplify complex numerical information. Images—including photographs and diagrams—often express an idea more vividly than words can. With access to the Internet, digital photography, and word processing or desktop publishing software, you can download or create your own visuals to enhance your document. Keep in mind that if you download a visual—or use published information to create your own visual—you must credit your source (see R3).

*Choosing appropriate visuals*

Use visuals to supplement your writing, not to substitute for it. Always consider how a visual supports your purpose and how your audience might respond to it. A student writing about online news used two screen shots to illustrate a point about hyperlinked text (see A2-h). Another student, writing about treatments for childhood obesity, created a table to display data she had found in two different sources and discussed in her paper (see APA-5b).

In many cases, the same information can be presented visually in different formats. When you’re trying to decide whether to display data in a table or a graph, for example, think about the message you want to convey and the information your readers need.

If your discussion refers to specific numbers, a table will be more useful to readers. If, however, you want readers to grasp at a glance that sales of hybrid electric vehicles increased from 2001 to 2007 and then declined, a line graph will be more effective (see p. 51).

As you draft and revise a document, carefully choose the visuals that support your main point, and avoid overloading your text with too many images. The chart on pages 52–53 describes eight types of visuals and their purposes.
INFORMATION DISPLAYED IN TWO TYPES OF VISUALS These visuals present the same information in two different ways. The table provides exact numbers for comparison. The line graph allows readers to see the trend in sales.

**Hybrid electric vehicle sales by year in the United States**

</tr>
<tr>
<td>2008</td>
<td>312,386</td>
</tr>
</tbody>
</table>

**Placing and labeling visuals**

A visual may be placed in the text of a document, near a discussion to which it relates, or it can be put in an appendix, labeled, and referred to in the text. Placing visuals in the text of a document can be tricky. Usually you will want a visual to appear close to the sentences that relate to it, but page breaks won’t always allow this placement. At times, you may need to insert the visual at a later point and tell readers where it can be found; sometimes you can make the text flow, or wrap, around the visual. No matter where you place a visual, refer to it in your text. Don’t expect visuals to speak for themselves.

Most of the visuals you include in a document will require some sort of label. A label, which is typically placed above or below the visual, should be brief but descriptive. Most commonly, a visual is labeled with the word “Figure” or the abbreviation “Fig.,” followed by a number: Fig. 4. Sometimes a title might be included to explain how the visual relates to the text: Fig. 4. Voter turnout by age.
Choosing visuals to suit your purpose

Pie chart
Pie charts compare a part or parts to the whole. Segments of the pie represent percentages of the whole (and always total 100 percent).

Line graph
Line graphs highlight trends over a period of time or compare numerical data.

Bar graph
Bar graphs, like line graphs, show trends or comparisons at a glance. This bar graph displays the same data as in the line graph above.

Table
Tables display numbers and words in columns and rows. They can be used to organize complicated numerical information into an easily understood format.

Sources [top to bottom]: Kaiser Foundation; US Census Bureau; US Census Bureau; UNAIDS.
Photograph
Photographs can be used to vividly depict people, scenes, or objects discussed in a text.

Diagram
Diagrams, useful in scientific and technical writing, concisely illustrate processes, structures, or interactions.

Flowchart
Flowcharts show structures (the hierarchy of employees at a company, for example) or steps in a process and their relation to one another. (For another example, see p. 122.)

Map
Maps illustrate distances, historical information, or demographics and often use symbols for geographic features and points of interest.

Sources [top to bottom]: Fred Zwicky; NIAMS; Arizona Board of Regents; Lynn Hunt et al.
Using visuals responsibly

Most word processing and spreadsheet software will allow you to produce your own visuals. If you create a chart, a table, or a graph using information from your research, you must cite the source of the information even though the visual is your own. The visual at the right credits the source of its data.

If you download a photograph from the Web or scan an image from a magazine or book, you must credit the person or organization that created it, just as you would cite any other source you use in a college paper (see R3). Make sure any cropping or other changes you make to the visual do not distort the meaning of the original. If your document is written for publication outside the classroom, you will need to request permission to use any visual you borrow.

C5-e Use standard academic formatting.

Instructors have certain expectations about how a college paper should look. If your instructor provides guidelines for formatting an essay, a report, a research paper, or another document, you should follow them. Otherwise, use the manuscript format that is recommended for your academic discipline.

In most English and other humanities classes, you will be asked to use MLA (Modern Language Association) format (see pp. 55–56 and MLA-5). In most social science classes, such as psychology and sociology, and in most education, business, and health-related classes, you will be asked to use APA (American Psychological Association) format (see APA-5). In history and some other humanities classes, you will be asked to use CMS (Chicago) format (see CMS-5).
Online Monitoring: A Threat to Employee Privacy in the Wired Workplace

As the Internet has become an integral tool of businesses, company policies on Internet usage have become as common as policies regarding vacation days or sexual harassment. A 2005 study by the American Management Association and ePolicy Institute found that 76% of companies monitor employees’ use of the Web, and the number of companies that block employees’ access to certain Web sites has increased 27% since 2001 (1). Unlike other company rules, however, Internet usage policies often include language authorizing companies to secretly monitor their employees, a practice that raises questions about rights in the workplace. Although companies often have legitimate concerns that lead them to monitor employees’ Internet usage—from expensive security breaches to reduced productivity—the benefits of electronic surveillance are outweighed by its costs to employees’ privacy and autonomy.

While surveillance of employees is not a new phenomenon, electronic surveillance allows employers to monitor workers with unprecedented efficiency. In his book The Naked Employee, Frederick Lane describes offline ways in which employers have been permitted to intrude on employees’ privacy for decades, such as drug testing, background checks, psychological exams, lie detector tests, and in-store video surveillance. The difference, Lane argues, between these old methods of data gathering and electronic surveillance involves quantity:

Technology makes it possible for employers to gather enormous amounts of data about employees, often far beyond what is necessary to satisfy safety or productivity concerns. And the trends that drive technology—faster, smaller, cheaper—make it possible for larger and larger numbers of employers to gather ever-greater amounts of personal data. (3-4)

In an age when employers can collect data whenever employees use their

BUSINESS LETTER IN FULL BLOCK STYLE

March 16, 2010
Jonathan Ross
Managing Editor
Latino World Today
2971 East Oak Avenue
Baltimore, MD 21201
Dear Mr. Ross:

Thank you very much for taking the time yesterday to speak to the University of Maryland’s Latino Club. A number of students have told me that they enjoyed your presentation and found your job search suggestions to be extremely helpful.

As I mentioned to you when we first scheduled your appearance, the club publishes a monthly newsletter, Latino Voice. Our purpose is to share up-to-date information and expert advice with members of the university’s Latino population. Considering how much students benefited from your talk, I would like to publish excerpts from it in our newsletter.

I have taken the liberty of transcribing parts of your presentation and organizing them into a question-and-answer format for our readers. When you have a moment, would you mind looking through the enclosed article and letting me know if I may have your permission to print it? I would be happy, of course, to make any changes or corrections that you request. I’m hoping to include this article in our next newsletter, so I would need your response by April 4.

Once again, Mr. Ross, thank you for sharing your experiences with us. You gave an informative and entertaining speech, and I would love to be able to share it with the students who couldn’t hear it in person.

Sincerely,

Jeffrey Richardson
Associate Editor

**Business letters**

In writing a business letter, be direct, clear, and courteous. State your purpose or request at the beginning of the letter and include only relevant information in the body. By being as direct and concise as possible, you show that you value your reader's time.

For the format of the letter, use established business conventions. A sample business letter in full block style appears on page 57.

**Résumés and cover letters**

An effective résumé gives relevant information in a clear, concise form. You may be asked to produce a traditional résumé, a scannable résumé, or a Web résumé. The cover letter gives a prospective employer a reason to look at your résumé. The goal is to present yourself in a favorable light without including unnecessary details.

**COVER LETTERS** Always include a cover letter to introduce yourself, state the position you seek, and tell where you learned about it. The letter should also highlight past experiences that qualify you for the position and emphasize what you can do for the employer (not what the job will do for you). End the letter with a suggestion for a meeting, and tell your prospective employer when you will be available.

**TRADITIONAL RÉSUMÈS** Traditional résumés are produced on paper, and they are screened by people, not by computers. Because screeners often face stacks of applications, they may spend very little time looking at each résumé. Therefore, you need to make your résumé as reader-friendly as possible. Here are a few guidelines:

- Limit your résumé to one page if possible, two pages at most.
- Organize your information into clear categories—Education, Experience, and so on.
- Present the information in each category in reverse chronological order to highlight your most recent accomplishments.
- Use bulleted lists or some other simple, clear visual device to organize information.
- Use strong, active verbs to emphasize your accomplishments. For current activities, use present-tense verbs, such as *manage*; for past activities, use past-tense verbs, such as *managed*. 
TRADITIONAL RÉSUMÉ

OBJECTIVE
To obtain an editorial internship with a magazine

EDUCATION
Fall 2007–present
University of Maryland
• BA expected in June 2011
• Double major: English and Latin American studies
• GPA: 3.7 (on a 4-point scale)

EXPERIENCE
Fall 2009–present
Associate editor, Latino Voice, newsletter of Latino Club
• Assign and edit feature articles
• Coordinate community outreach

Fall 2008–present
Photo editor, The Diamondback, college paper
• Shoot and organize photos for print and online publication
• Oversee photo staff assignments; evaluate photos

Summer 2009
Intern, The Globe, Fairfax, Virginia
• Wrote stories about local issues and personalities
• Interviewed political candidates
• Edited and proofread copy
• Coedited “The Landscapes of Northern Virginia: A Photoessay”

Summers 2008, 2009
Tutor, Fairfax County ESL Program
• Tutored Latino students in English as a Second Language
• Trained new tutors

ACTIVITIES
Photographers’ Workshop, Latino Club

PORTFOLIO
Available at http://jrichardson.example.net/jrportfolio.htm

REFERENCES
Available on request

SCANNABLE RÉSUMÉS  Scannable résumés can be submitted on paper, by e-mail, or through an online employment service. The résumés are scanned and searched electronically, and a database matches keywords in the employer’s job description with keywords in the résumés. A human screener then looks through the résumés selected by the database.
A scannable résumé must be formatted simply so that the scanner can accurately pick up its content. In general, follow these guidelines when preparing a scannable résumé:

- Include a Keywords section that lists words likely to be searched by a scanner. Use nouns, such as manager, not verbs, such as manage.
- Use standard résumé headings (for example, Education, Experience, References).
- Avoid special characters, graphics, or font styles.
- Avoid formatting such as tabs, indents, columns, or tables.

WEB RÉSUMÉS  Posting your résumé on a Web site is an easy way to provide recent information about your employment goals and accomplishments. Most guidelines for traditional résumés apply to Web résumés. You may want to include a downloadable version of your résumé and link to an electronic portfolio. Always list the date that you last updated your résumé.

Memos

Usually brief and to the point, a memo reports information, makes a request, or recommends an action. The format of a memo, which varies from company to company, is designed for easy distribution, quick reading, and efficient filing.

Most memos display the date, the name of the recipient, the name of the sender, and the subject on separate lines at the top of the page. Many companies have preprinted forms for memos, and most word processing programs have memo templates.

The subject line of a memo should describe the topic as clearly and concisely as possible, and the introductory paragraph should get right to the point. In addition, the body of the memo should be well organized and easy to skim. To promote skimming, use headings where possible and set off any items that deserve special attention (in a list, for example, or in boldface).

E-mail

In business and academic contexts, you will want to show readers that you value their time. Your e-mail message may be just one of many that your readers have to wade through. Here are some strategies for writing effective e-mails:

- Use a meaningful, concise subject line to help readers sort through messages and set priorities.
February 25, 2010

To: Editorial assistants, Advertising Department  
cc: Stephen Chapman  
From: Helen Brown  
Subject: New database software

The new database software will be installed on your computers next week. I have scheduled a training program to help you become familiar with the software and with our new procedures for data entry and retrieval.

**Training program**  
A member of our IT staff will teach in-house workshops on how to use the new software. If you try the software before the workshop, please be prepared to discuss any problems you encounter.

We will keep the training groups small to encourage hands-on participation and to provide individual attention. The workshops will take place in the training room on the third floor from 10:00 a.m. to 2:00 p.m.

Lunch will be provided in the cafeteria.

**Sign-up**  
Please sign up by March 1 for one of the following dates by adding your name in the department’s online calendar:

- Wednesday, March 3
- Friday, March 5
- Monday, March 8

If you will not be in the office on any of those dates, please let me know by March 1.
• Put the most important part of your message at the beginning so that your reader sees it without scrolling.
• For long, detailed messages, provide a summary at the beginning.
• Write concisely, and keep paragraphs fairly short.
• Avoid writing in all capital letters or all lowercase letters.
• Be sparing with boldface, italics, and special characters; not all e-mail systems handle such elements consistently.
• Proofread for typos and obvious errors that are likely to slow down readers.

You will also want to use e-mail responsibly by following conventions of good etiquette and not violating standards of academic integrity. Here are some strategies for writing responsible e-mails:

• Remember that your messages can easily be forwarded to others and reproduced. Do not write anything that you would not want attributed to you. And do not forward another person’s message without asking his or her consent.
• If you write an e-mail message that includes someone else’s words—opinions, statistics, song lyrics, and so forth—it’s best to let your reader know where any borrowed material begins and ends and the source for that material.
• Remember to choose your words carefully and judiciously because e-mail messages can easily be misread. Without your voice, facial gestures, or body language, a message can be misunderstood. Pay careful attention to tone and avoid writing anything that you wouldn’t be comfortable saying directly to a reader.

C6-a Use software tools wisely.

Grammar checkers, spell checkers, and autoformatting are software tools designed to help you avoid errors and save time. These tools can alert you to possible errors in words, sentence structures, or formatting. But they’re not always right. If a program suggests or makes a change, be sure the change is one you really want to make. Familiarizing yourself with your software’s settings can help you use these tools effectively.
Grammar checkers

Grammar checkers can help with some of the sentence-level problems in a typical draft. But they will often misdiagnose errors, especially because they cannot account for your intended meaning. When the grammar checker makes a suggestion for revision, you must decide whether the change is more effective than your original.

It’s just as important to be aware of what your grammar checker isn’t picking up on. If you count on your grammar checker to identify trouble spots, you might overlook problems with coordination and subordination (see S6), sentence variety (see S7), sexist language (see W4-e), and passive verbs (see W3-a), for example.

Spell checkers

Spell checkers flag words not found in their dictionaries; they will suggest a replacement for any word they don’t recognize. They can help you spot many errors, but don’t let them be your only proofreader. If you’re writing about the health benefits of a Mediterranean diet, for example, don’t let your software change briam (a vegetable dish) to Brian. Even if your spell checker identifies a real misspelling, the replacement word it suggests might carry a different connotation or even be nonsensical. After misspelling probably, you might end up with portly. Consider changes carefully before accepting them. If you’re not sure what word or spelling you need, consult a dictionary, such as Merriam-Webster’s Collegiate Dictionary. (See also W6-a.)

Because spell checkers flag only unrecognized words, they won’t catch misused words, such as accept when you mean except. For help with commonly confused or misused words and with avoiding informal speech and jargon, consult the glossary of usage (W1).

Autoformatting

As you write, your software may attempt to save you effort with autoformatting. It might recognize that you’ve typed a URL and turn it into a link. Or if you’re building a list, it might add numbering for you. Be aware of such changes and make sure they are appropriate for your paper and applied to the right text.

Manage your files.

Your instructor may ask you to complete assignments in stages, including notes, outlines, annotated bibliographies, rough drafts, and a final draft. Keeping track of all of these documents can be challenging. Be
sure to give your files distinct names that reflect the appropriate stage of your writing process, and store them in a logical place.

Writing online or in a word processing program can make writing and revising easier. You can undo changes or return to an earlier draft if a revision misfires. Applying the following steps can help you explore revision possibilities with little risk.

- Create folders and subfolders for each assignment. Save notes, outlines, and drafts together.
- Label revised drafts with different file names and dates.
- Print hard copies, make backup copies, and press the Save button early and often. Save work every five to ten minutes.
- Always record complete bibliographic information about sources, including images.
- Use a comment function to make notes to yourself or to respond to the drafts of peers.

When you write in college, you pose questions, explore ideas, and engage in scholarly debates and conversations. To join in those conversations, you will analyze and respond to texts, evaluate other people’s arguments, and put forth your own ideas.

**A1 Writing about texts**

The word *texts* can refer to a variety of works, including essays, articles, government reports, books, Web sites, advertisements, and photographs. Most assignments that ask you to respond to a text call for a summary or an analysis or both.

A summary is neutral in tone and demonstrates that you have understood the author’s key ideas. Assignments calling for an analysis of a text vary widely, but they usually ask you to look at how the text’s parts contribute to its central argument or purpose, often with the aim of judging its evidence or overall effect.

When you write about a text, you will need to read it—or, in the case of a visual text, view it—several times to discover meaning. Two techniques will help you move beyond a superficial first reading: (1) annotating the text with your observations and questions and (2) outlining the text’s key points. These techniques will help you analyze both written and visual texts.

**A1-a Read actively: Annotate the text.**

Read actively by jotting down your questions and thoughts in a notebook or in the margins of the text or visual. Use a pencil instead of a highlighter; with a pencil you can underline key concepts, mark points, or circle elements that intrigue you. If you change your mind, you can erase your early annotations and replace them with new ones. To annotate an electronic document, take notes in a separate file or use software features to highlight, underline, or insert comments.
### Guidelines for active reading

#### Familiarize yourself with the basic features and structure of a text.
- What is the author’s purpose: To inform? To persuade? To call to action?
- Who is the audience? How does the author appeal to the audience?
- What is the author’s thesis? What question does the text attempt to answer?
- What evidence does the author provide to support the thesis?
- What key terms does the author define?

#### Note details that surprise, puzzle, or intrigue you.
- Has the author revealed a fact or made a point that counters your assumptions? Is anything surprising?
- Has the author made a generalization you disagree with? Can you think of evidence that would challenge the generalization?
- Do you see any contradictions or inconsistencies in the text?
- Does the text contain words, statements, or phrases that you don’t understand? If so, what reference materials do you need to consult?

#### Read and reread to discover meaning.
- What do you notice on a second or third reading that you didn’t notice earlier?
- Does the text raise questions that it does not resolve?
- If you could address the author directly, what questions would you pose? Where do you agree and disagree with the author? Why?

#### Apply additional critical thinking strategies to visual texts.
- What first strikes you about the visual text? What elements do you notice immediately?
- Who or what is the main subject of the visual text?
- What colors and textures dominate?
- What is in the background? In the foreground?
- What role, if any, do words or numbers play in the text?
- When was the visual created or the information collected?
On this page and on page 70 are an article from *CQ Researcher*, a newsletter about social and political issues, and an advertisement, both annotated by students. The students, Emilia Sanchez and Ren Yoshida, were assigned to analyze these texts. They began by reading actively.

**ANNOTATED ARTICLE**

**Big Box Stores Are Bad for Main Street**

**BETSY TAYLOR**

There is plenty of reason to be concerned about the proliferation of Wal-Marts and other so-called “big box” stores. The question, however, is not whether or not these types of stores create jobs (although several studies claim they produce a net job loss in local communities) or whether they ultimately save consumers money. The real concern about having a 25-acre slab of concrete with a 100,000 square foot box of stuff land on a town is whether it’s good for a community’s soul.

The worst thing about “big boxes” is that they have a tendency to produce Ross Perot’s famous “big sucking sound”—sucking the life out of cities and small towns across the country. On the other hand, small businesses are great for a community. They offer more personal service; they won’t threaten to pack up and leave town if they don’t get tax breaks, free roads and other blandishments; and small-business owners are much more responsive to a customer’s needs. (Ever try to complain about bad service or poor quality products to the president of Home Depot?)

Yet, if big boxes are so bad, why are they so successful? One glaring reason is that we’ve become a nation of hyper-consumers and the big-box boys know this. Downtown shopping districts comprised of small businesses take some of the efficiency out of overconsumption. There’s all that hassle of having to travel from store to store, and having to pull out your credit card so many times. Occasionally, we even find ourselves chatting with the shopkeeper, wandering into a coffee shop to visit with a friend or otherwise wasting precious time that could be spent on acquiring more stuff.

But let’s face it—bustling, thriving city centers are fun. They breathe life into a community. They allow cities and towns to stand out from each other. They provide an atmosphere for people to interact with each other that just cannot be found at Target, or Wal-Mart or Home Depot.

Is it anti-American to be against having a retail giant set up shop in one’s community? Some people would say so. On the other hand, if you board up Main Street, what’s left of America?
ANNOTATED ADVERTISEMENT

“Empowering”—why in an elegant font? Who is empowering farmers? “Farmers” in all capital letters—shows strength?

Straightforward design and not much text.

Outstretched hands. Is she giving a gift? Inviting a partnership?

Raw coffee is red: earthy, natural, warm.

Positive verbs: consumers choose, join, empower; farmers stay, care, farm, support, plan.

Source: Equal Exchange.
A1-b Sketch a brief outline of the text.

After reading, rereading, and annotating a text, try to outline it. Seeing how the author has constructed a text can help you understand it. As you sketch an outline, pay special attention to the text’s thesis (central idea) and its topic sentences. The thesis of a written text usually appears in the introduction, often in the first or second paragraph. Topic sentences can be found at the beginnings of most body paragraphs, where they announce a shift to a new topic. (See C2-a and C4-a.)

In your outline, put the author’s thesis and key points in your own words. Here, for example, is the outline that Emilia Sanchez developed as she prepared to write her summary and analysis of the text on page 69. Notice that Sanchez’s informal outline does not trace the author’s ideas paragraph by paragraph; instead, it sums up the article’s central points.

OUTLINE OF “BIG BOX STORES ARE BAD FOR MAIN STREET”

Thesis: Whether or not they take jobs away from a community or offer low prices to consumers, we should be worried about “big-box” stores like Wal-Mart, Target, and Home Depot because they harm communities by taking the life out of downtown shopping districts.

I. Small businesses are better for cities and towns than big-box stores are.
   A. Small businesses offer personal service, but big-box stores do not.
   B. Small businesses don’t make demands on community resources as big-box stores do.
   C. Small businesses respond to customer concerns, but big-box stores do not.

II. Big-box stores are successful because they cater to consumption at the expense of benefits to the community.
   A. Buying everything in one place is convenient.
   B. Shopping at small businesses may be inefficient, but it provides opportunities for socializing.
   C. Downtown shopping districts give each city or town a special identity.

Conclusion: Although some people say that it’s anti-American to oppose big-box stores, actually these stores threaten the communities that make up America by encouraging buying at the expense of the traditional interactions of Main Street.

A visual often doesn’t state an explicit thesis or an explicit line of reasoning. Instead, you must sometimes infer the meaning beneath the image’s surface and interpret its central point and supporting
ideas from the elements of its design. One way to outline a visual text is to try to define its purpose and sketch a list of its key elements. Here, for example, are the key features that Ren Yoshida identified for the advertisement printed on page 70.

OUTLINE OF EQUAL EXCHANGE ADVERTISEMENT

Purpose: To persuade readers that they can improve the lives of organic farmers and their families by purchasing Equal Exchange coffee.

Key features:
- The farmer’s heart-shaped hands are outstretched, offering the viewer partnership and the product of her hard work.
- The coffee beans are surprisingly red, fruitlike, and fresh—natural and healthy looking.
- Words above and below the photograph describe the equal exchange between farmers and consumers.
- Consumer support leads to a higher quality of life for the farmers and for all people, since these farmers care for the environment and plan for the future.
- The simplicity of the design echoes the simplicity of the exchange. The consumer only has to buy a cup of coffee to make a difference.
- Equal Exchange is selling more than a product—coffee. It is selling the idea that together farmers and consumers hold the future of land, environment, farms, and family in their hands.

A1-c Summarize to demonstrate your understanding.

Your goal in summarizing a text is to state the work’s main ideas and key points simply, briefly, and accurately in your own words. Writing a summary does not require you to judge the author’s ideas. If you have sketched a brief outline of the text (see A1-b), refer to it as you draft your summary.

To summarize a written text, first find the author’s central idea—the thesis. Then divide the whole piece into a few major and perhaps minor ideas. Since a summary
Guidelines for writing a summary

- In the first sentence, mention the title of the text, the name of the author, and the author’s thesis or the visual’s central point.
- Maintain a neutral tone; be objective.
- Use the third-person point of view and the present tense: Taylor argues.
- Keep your focus on the text. Don’t state the author’s ideas as if they were your own.
- Put all or most of your summary in your own words; if you borrow a phrase or a sentence from the text, put it in quotation marks and give the page number in parentheses.
- Limit yourself to presenting the text’s key points.
- Be concise; make every word count.

must be fairly short, you must make judgments about what is most important.

To summarize a visual text, begin with essential information such as who created the visual, who the intended audience is, where the visual appeared, and when it was created. Briefly explain the visual’s main point or purpose and identify its key features (see p. 72).

Following is Emilia Sanchez’s summary of the article that is printed on page 69.

In her essay “Big Box Stores Are Bad for Main Street,” Betsy Taylor argues that chain stores harm communities by taking the life out of downtown shopping districts. Explaining that a community’s “soul” is more important than low prices or consumer convenience, she argues that small businesses are better than stores like Home Depot and Target because they emphasize personal interactions and don’t place demands on a community’s resources. Taylor asserts that big-box stores are successful because “we’ve become a nation of hyper-consumers” (1011), although the convenience of shopping in these stores comes at the expense of benefits to the community. She concludes by suggesting that it’s not “anti-American” to oppose big-box stores because the damage they inflict on downtown shopping districts extends to America itself.

— Emilia Sanchez, student
A1-d Analyze to demonstrate your critical thinking.

Whereas a summary most often answers the question of what a text says, an analysis looks at how a text makes its point.

Typically, an analysis takes the form of an essay that makes its own argument about a text. Include an introduction that briefly summarizes the text, a thesis that states your own judgment about the text, and body paragraphs that support your thesis with evidence. If you are analyzing a visual, examine it as a whole and then reflect on how the individual elements contribute to its overall meaning. If you have written a summary of the text or visual, you may find it useful to refer to the main points of the summary as you write your analysis.

Using interpretation in an analysis

Student writer Emilia Sanchez begins her essay about Betsy Taylor’s article (see p. 69) by summarizing Taylor’s argument. She then states her own thesis, or claim, which offers her judgment of Taylor’s article, and begins her analysis. In her first body paragraph, Sanchez interprets Taylor’s use of language.

Taylor’s use of colorful language reveals that she has a sentimental view of American society and does not understand economic realities. In her first paragraph, Taylor refers to a big-box store as a “25-acre slab of concrete with a 100,000 square foot box of stuff” that “lands on a town,” evoking images of a powerful monster crushing the American way of life (1011). But she oversimplifies a complex issue. Taylor does not consider . . .

A1-e Sample student essay: Analysis of an article

Beginning on the next page is Emilia Sanchez’s analysis of the article by Betsy Taylor (see p. 69). Sanchez used Modern Language Association (MLA) style to format her paper and cite the source.
Rethinking Big-Box Stores

In her essay “Big Box Stores Are Bad for Main Street,” Betsy Taylor focuses not on the economic effects of large chain stores but on the effects these stores have on the “soul” of America. She argues that stores like Home Depot, Target, and Wal-Mart are bad for America because they draw people out of downtown shopping districts and cause them to focus on consumption. In contrast, she believes that small businesses are good for America because they provide personal attention, encourage community interaction, and make each city and town unique. But Taylor’s argument is unconvincing because it is based on sentimentality—on idealized images of a quaint Main Street—rather than on the roles that businesses play in consumers’ lives and communities. By ignoring the complex economic relationship between large chain stores and their communities, Taylor incorrectly assumes that simply getting rid of big-box stores would have a positive effect on America’s communities.

Taylor’s use of colorful language reveals that she has a sentimental view of American society and does not understand economic realities. In her first paragraph, Taylor refers to a big-box store as a “25-acre slab of concrete with a 100,000 square foot box of stuff” that “land[s] on a town,” evoking images of a powerful monster crushing the American way of life (1011). But she oversimplifies a complex issue. Taylor does not consider that many downtown business districts failed long before chain stores moved in, when factories and mills closed and workers lost their jobs. In cities with struggling economies, big-box stores can actually provide much-needed jobs. Similarly, while Taylor blames big-box stores for harming local economies by asking for tax breaks, free roads, and other perks, she doesn’t acknowledge that these stores also enter into economic partnerships with the surrounding communities by offering financial benefits to schools and hospitals.
Taylor’s assumption that shopping in small businesses is always better for the customer also seems driven by nostalgia for an old-fashioned Main Street rather than by the facts. While she may be right that many small businesses offer personal service and are responsive to customer complaints, she does not consider that many customers appreciate the service at big-box stores. Just as customer service is better at some small businesses than at others, it is impossible to generalize about service at all big-box stores. For example, customers depend on the lenient return policies and the wide variety of products at stores like Target and Home Depot.

Taylor blames big-box stores for encouraging American “hyper-consumerism,” but she oversimplifies by equating big-box stores with bad values and small businesses with good values. Like her other points, this claim ignores the economic and social realities of American society today. Big-box stores do not force Americans to buy more. By offering lower prices in a convenient setting, however, they allow consumers to save time and purchase goods they might not be able to afford from small businesses. The existence of more small businesses would not change what most Americans can afford, nor would it reduce their desire to buy affordable merchandise.

Taylor may be right that some big-box stores have a negative impact on communities and that small businesses offer certain advantages. But she ignores the economic conditions that support big-box stores as well as the fact that Main Street was in decline before the big-box store arrived. Getting rid of big-box stores will not bring back a simpler America populated by thriving, unique Main Streets; in reality, Main Street will not survive if consumers cannot afford to shop there.
**Guidelines for analyzing a text**

### Written texts

Instructors who ask you to analyze an essay or an article often expect you to address some of the following questions.

- What is the author’s thesis or central idea? Who is the audience?
- What questions (stated or unstated) does the author address?
- How does the author structure the text? What are the key parts, and how do they relate to one another and to the thesis?
- What strategies has the author used to generate interest in the argument and to persuade readers of its merit?
- What evidence does the author use to support the thesis? How persuasive is the evidence? (See A2-d and A2-e.)
- Does the author anticipate objections and counter opposing views? (See A2-f.)
- Does the author use any faulty reasoning? (See A3-a.)

### Visual texts

If you are analyzing a visual text, the following additional questions will help you evaluate an image’s purpose and meaning.

- What confuses, surprises, or intrigues you about the image?
- What is the source of the visual, and who created it? What is its purpose?
- What clues suggest the visual text’s intended audience? How does the image appeal to its audience?
- If the text is an advertisement, what product is it selling? Does it attempt to sell an idea or a message as well?
- If the visual text includes words, how do the words contribute to the meaning?
- How do design elements—colors, shapes, perspective, background, foreground—help convey the visual text’s meaning or serve its purpose?
In writing an argument, you take a stand on a debatable issue. The question being debated might be a matter of public policy:

- Should religious groups be allowed to meet on public school property?
- What is the least dangerous way to dispose of hazardous waste?
- Should motorists be banned from texting while driving?
- Should a state limit the number of charter schools?

On such questions, reasonable people may disagree.

Reasonable men and women also disagree about many scholarly issues. Psychologists debate the role of genes and environment in determining behavior; historians interpret the causes of the Civil War quite differently; biologists challenge one another's predictions about the effects of global warming.

When you construct a reasonable argument, your goal is not simply to win or to have the last word. Your aim is to explain your understanding of the truth about a subject or to propose the best solution to
a problem—without being needlessly combative. In constructing your argument, you join a conversation with other writers and readers. Your aim is to convince readers to reconsider their positions by offering new reasons to question existing viewpoints.

**A2-a Examine your issue’s social and intellectual contexts.**

Arguments appear in social and intellectual contexts. Public policy debates arise in social contexts and are conducted among groups with competing values and interests. For example, the debate over offshore oil drilling has been renewed in the United States in light of skyrocketing energy costs and terrorism concerns—with environmentalists, policymakers, oil company executives, and consumers all weighing in on the argument. Most public policy debates also have intellectual dimensions that address scientific or theoretical questions. In the case of the drilling issue, geologists, oceanographers, and economists all contribute their expertise.

Scholarly debates play out in intellectual contexts, but they have a social dimension as well. For example, scholars respond to the contributions of other specialists in the field, often building on others’ views and refining them, but at times challenging them.

Because many of your readers will be aware of the social and intellectual contexts in which your issue is grounded, you will be at a disadvantage if you are not informed. That’s why it is a good idea to conduct some research before preparing your argument; consulting even a few sources can deepen your understanding of the debates surrounding your topic. For example, the student whose paper appears on pages 87–91 became more knowledgeable about his issue—the shift from print to online news—at the shift from print to online news—after reading and annotating a few sources.

**A2-b View your audience as a panel of jurors.**

Do not assume that your audience already agrees with you; instead, envision skeptical readers who, like a panel of jurors, will make up their minds after listening to all sides of the argument. If you are arguing a public policy issue, aim your paper at readers who represent a variety of positions. In the case of the debate over offshore
drilling, for example, imagine a jury that represents those who have a stake in the matter: environmentalists, policymakers, oil company executives, and consumers.

At times, you can deliberately narrow your audience. If you are working within a word limit, for example, you might not have the space in which to address all the concerns surrounding the offshore drilling debate. Or you might be primarily interested in reaching one segment of a general audience, such as consumers. In such instances, you can still view your audience as a panel of jurors; the jury will simply be a less diverse group.

In the case of scholarly debates, you will be addressing readers who share your interest in a discipline, such as literature or psychology. Such readers belong to a group with an agreed-upon way of investigating and talking about issues. Though they generally agree about disciplinary methods of asking questions and share specialized vocabulary, scholars in an academic discipline often disagree about particular issues. Once you see how they disagree about your issue, you should be able to imagine a jury that reflects the variety of positions they hold.

**A2-c In your introduction, establish credibility and state your position.**

When you are constructing an argument, make sure your introduction contains a thesis that states your position on the issue you have chosen to debate (see also C2-a). In the sentences leading up to the thesis, establish your credibility with readers by showing that you are knowledgeable and fair-minded. If possible, build common ground with readers who may not at first agree with your views and show them why they should consider your thesis.

In the following introduction, student Kevin Smith presents himself as someone worth listening to. Because Smith introduces both sides of the debate, readers are likely to approach his essay with an open mind.
Although the Supreme Court has ruled against prayer in public schools on First Amendment grounds, many people still feel that prayer should be allowed. Such people value prayer as a practice central to their faith and believe that prayer is a way for schools to reinforce moral principles. They also compellingly point out a paradox in the First Amendment itself: at what point does the separation of church and state restrict the freedom of those who wish to practice their religion? What proponents of school prayer fail to realize, however, is that the Supreme Court’s decision, although it was made on legal grounds, makes sense on religious grounds as well. Prayer is too important to be trusted to our public schools.

—Kevin Smith, student

**TIP:** A good way to test a thesis while drafting and revising is to imagine a counterargument to your argument (see A2-f). If you can’t think of an opposing point of view, rethink your thesis and ask a classmate or writing center tutor to respond to your argument.

### A2-d Back up your thesis with persuasive lines of argument.

Arguments of any complexity contain lines of argument that, when taken together, might reasonably persuade readers that the thesis has merit. The following, for example, are the main lines of argument that Sam Jacobs used in his paper about the shift from print to online news (see pp. 87–91).

**CENTRAL CLAIM**

Thesis: The shift from print to online news provides unprecedented opportunities for readers to become more engaged with the news, to hold journalists accountable, and to participate as producers, not simply as consumers.

**SUPPORTING CLAIMS**

• Print news has traditionally had a one-sided relationship with its readers, delivering information for passive consumption.

(continued)
Constructing reasonable arguments

A2-e Support your claims with specific evidence.

You will need to support your central claim and any subordinate claims with evidence: facts, statistics, examples and illustrations, visuals, expert opinion, and so on. Most debatable topics require that you consult some written sources. As you read through the sources, you will learn more about the arguments and counterarguments at the center of your debate.

Remember that you must document your sources. Documentation gives credit to the authors and shows readers how to locate a source in case they want to assess its credibility or explore the issues further.

Using facts and statistics

A fact is something that is known with certainty because it has been objectively verified: The capital of Wyoming is Cheyenne. Carbon has an atomic weight of 12. John F. Kennedy was assassinated on
November 22, 1963. Statistics are collections of numerical facts: Alcohol abuse is a factor in nearly 40 percent of traffic fatalities. More than four in ten businesses in the United States are owned by women.

Most arguments are supported at least to some extent by facts and statistics. For example, in the following passage the writer uses statistics to show that college students are granted unreasonably high credit limits.

A 2009 study by Sallie Mae revealed that undergraduates are carrying record-high credit card balances and are relying on credit cards more than ever, especially in the economic downturn. The average credit card debt per college undergraduate is $3,173, and 82 percent of undergraduates carry balances and incur finance charges each month (Sallie Mae).

Writers often use statistics in selective ways to bolster their own positions. If you suspect that a writer’s handling of statistics is not quite fair, track down the original sources for those statistics or read authors with opposing views, who may give you a fuller understanding of the numbers.

**Using examples and illustrations**

Examples and illustrations (extended examples, often in story form) rarely prove a point by themselves, but when used in combination with other forms of evidence they flesh out an argument with details and specific instances and bring it to life. Because examples are often concrete and sometimes vivid, they can reach readers in ways that statistics and abstract ideas cannot.

In a paper arguing that online news provides opportunities for readers that print news does not, Sam Jacobs describes how regular citizens armed with only cell phones and laptops helped save lives during Hurricane Katrina by relaying critical news updates.

**Using visuals**

Visuals—charts, graphs, diagrams, photographs—can support your argument by providing vivid and detailed evidence and by capturing your readers’ attention. Bar or line graphs, for instance, describe and organize complex statistical data; photographs can immediately and evocatively convey abstract ideas. Writers in almost every academic field use visual evidence to support their arguments or to counter opposing
arguments. For example, to explain a conflict among Southeast Asian countries, a historian might choose a map to illustrate the geographical situation and highlight particular issues. Or to refute another scholar’s hypothesis about the dangers of a vegetarian diet, a nutritionist might support her claims by using a table to organize and highlight detailed numerical information. (See C5-d.)

As you consider using visual evidence, ask yourself the following questions:

- Is the visual accurate, credible, and relevant?
- How will the visual appeal to readers? Logically? Ethically? Emotionally?
- How will the visual evidence function? Will it provide background information? Present complex numerical information or an abstract idea? Lend authority? Anticipate or refute counter-arguments?

Like all forms of evidence, visuals don’t speak for themselves; you’ll need to analyze and interpret the evidence to show readers how the visuals inform and support your argument.

**Citing expert opinion**

Although they are no substitute for careful reasoning of your own, the views of an expert can contribute to the force of your argument. For example, to help him make the case that print journalism has a one-sided relationship with its readers, Sam Jacobs integrates an expert’s key description:

> With the rise of the Internet, however, this one-sided relationship has been criticized by journalists such as Dan Gillmor, founder of the Center for Citizen Media, who argues that traditional print journalism treats “news as a lecture,” whereas online news is “more of a conversation” (xxiv).

When you rely on expert opinion, make sure that your source is an expert in the field you are writing about. In some cases, you may need to provide credentials showing why your source is worth listening to. When including expert testimony in your paper, you can summarize or paraphrase the expert’s opinion or you can quote the expert’s exact words. You will of course need to document the source, as Jacobs did in the example just given.
Anticipating and countering opposing arguments

To anticipate a possible objection to your argument, consider the following questions:

- Could a reasonable person draw a different conclusion from your facts or examples?
- Might a reader question any of your assumptions?
- Could a reader offer an alternative explanation of this issue?
- Is there any evidence that might weaken your position?

The following questions may help you respond to a reader’s potential objection:

- Can you concede the point to the opposition but challenge the point’s importance or usefulness?
- Can you explain why readers should consider a new perspective or question a piece of evidence?
- Should you explain how your position responds to contradictory evidence?
- Can you suggest a different interpretation of the evidence?

When you write, use phrasing to signal to readers that you’re about to present an objection. Often the signal phrase can go in the lead sentence of a paragraph:

Critics of this view argue that . . .
Some readers might point out that . . .
Researchers challenge these claims by . . .

A2-f Anticipate objections; counter opposing arguments.

Readers who already agree with you need no convincing, but indifferent or skeptical readers may resist your arguments. To be willing to give up a position that seems reasonable, a reader has to see that there is an even more reasonable one. In addition to presenting your own case, therefore, you should consider the opposing arguments and attempt to counter them.

It might seem at first that drawing attention to an opposing point of view or contradictory evidence would weaken your argument. But by anticipating and countering objections, you show yourself as a reasonable and well-informed writer. You also establish your purpose, demonstrate the significance of the issue you are debating, and ultimately strengthen your argument.
There is no best place in an essay to deal with opposing views. Often it is useful to summarize the opposing position early in your essay. After stating your thesis but before developing your own arguments, you might have a paragraph that addresses the most important counterargument. Or you can anticipate objections paragraph by paragraph as you develop your case. Wherever you decide to address opposing arguments, you will enhance your credibility if you explain the arguments of others accurately and fairly.

**A2-g Build common ground.**

As you counter opposing arguments, try to seek out one or two assumptions you might share with readers who do not initially agree with your views. If you can show that you share their concerns, your readers may be more likely to acknowledge the validity of your argument. For example, to persuade people opposed to controlling the deer population with a regulated hunting season, a state wildlife commission would have to show that it too cares about preserving deer and does not want them to die needlessly. Having established these values in common, the commission might be able to persuade critics that reducing the total number of deer prevents starvation caused by overpopulation.

People believe that intelligence and decency support their side of an argument. To be persuaded, they must see these qualities in your argument. Otherwise they will persist in their opposition.

**A2-h Sample argument paper**

In the paper that begins on the next page, student Sam Jacobs argues that the shift from print to online news benefits readers by providing them with opportunities to become more engaged with the news, to hold journalists accountable, and to participate as producers, not simply as consumers. Notice that he is careful to present opposing views fairly before providing his counterarguments.

In writing the paper, Jacobs consulted both print and online sources. When he quotes or uses information from a source, he cites the source with an MLA (Modern Language Association) in-text citation. Citations in the paper refer readers to the list of works cited at the end of the paper. (For more details about citing sources, see MLA-4.)
From Lecture to Conversation: Redefining What’s “Fit to Print”

“All the news that’s fit to print,” the motto of the *New York Times* since 1896, plays with the word *fit*, asserting that a news story must be newsworthy and must not exceed the limits of the printed page. The increase in online news consumption, however, challenges both meanings of the word *fit*, allowing producers and consumers alike to rethink who decides which topics are worth covering and how extensive that coverage should be. Any cultural shift usually means that something is lost, but in this case there are clear gains. The shift from print to online news provides unprecedented opportunities for readers to become more engaged with the news, to hold journalists accountable, and to participate as producers, not simply as consumers.

Guided by journalism’s code of ethics—accuracy, objectivity, and fairness—print news reporters have gathered and delivered stories according to what editors decide is fit for their readers. Except for op-ed pages and letters to the editor, print news has traditionally had a one-sided relationship with its readers. The print news media’s reputation for objective reporting has been held up as “a stop sign” for readers, sending a clear message that no further inquiry is necessary (Weinberger). With the rise of the Internet, however, this model has been criticized by journalists such as Dan Gillmor, founder of the Center for Citizen Media, who argues that traditional print journalism treats “news as a lecture,” whereas online news is “more of a conversation” (xxiv). Print news arrives on the doorstep every morning as a fully formed lecture, a product created without participation from its readership. By contrast, online news invites readers to participate in a collaborative process—to question and even help produce the content.

One of the most important advantages online news offers over print news is the presence of built-in hyperlinks, which carry readers from one electronic document to another. If readers are curious about the definition of a term, the roots of a story, or other perspectives on a topic, links provide a path. Links help readers become more critical consumers of

Marginal annotations indicate MLA-style formatting and effective writing.
Constructing reasonable arguments

information by engaging them in a totally new way. For instance, the link embedded in the story “Window into Fed Debate over a Crucial Program” (Healy) allows readers to find out more about the trends in consumer spending and to check the journalist’s handling of an original source (see Fig. 1). This kind of link gives readers the opportunity to conduct their own evaluation of the evidence and verify the journalist’s claims.

But economists greeted the news with a small cheer because sales excluding automobiles actually grew in September, suggesting that consumer spending was stabilizing.

Over all, retail sales fell 1.5 percent in September from a month earlier, the Commerce Department reported, better than an anticipated decline of 2.1 percent.

Retail sales excluding automobiles and parts grew 0.5 percent, largely because of higher sales at gas stations and grocery stores.

Auto dealers bore the brunt of the month’s declines.

Consumers swamped dealerships in late July and August to take advantage of the government’s $3 billion cash-for-clunkers program, which offered rebates of up to $4,500 to entice people to swap their older cars for more fuel-efficient models.

Sales at auto dealers surged in August, but fell 11 percent in September.

A version of this article appeared in print on October 15, 2009, on page B5 of the New York edition.

Fig. 1. Links embedded in online news articles allow readers to move from the main story to original sources, related articles, or background materials. The link in this online article (Healy) points to a government report, the original source of the author’s data on consumer spending.
Links provide a kind of transparency impossible in print because they allow readers to see through online news to the “sources, disagreements, and the personal assumptions and values” that may have influenced a news story (Weinberger). The International Center for Media and the Public Agenda underscores the importance of news organizations letting “customers in on the often tightly held little secrets of journalism.” To do so, they suggest, will lead to “accountability and accountability leads to credibility” (“Openness”). These tools alone don’t guarantee that news producers will be responsible and trustworthy, but they encourage an open and transparent environment that benefits news consumers.

Not only has technology allowed readers to become more critical news consumers, but it also has helped some to become news producers. The Web gives ordinary people the power to report on the day’s events. Anyone with an Internet connection can publish on blogs and Web sites, engage in online discussion forums, and contribute video and audio recordings. Citizen journalists with laptops, cell phones, and digital camcorders have become news producers alongside large news organizations.

Not everyone embraces the spread of unregulated news reporting online. Critics point out that citizen journalists are not necessarily trained to be fair or ethical, for example, nor are they subject to editorial oversight. Acknowledging that citizen reporting is more immediate and experimental, critics also question its accuracy and accountability: “While it has its place . . . it really isn’t journalism at all, and it opens up information flow to the strong probability of fraud and abuse. . . . Information without journalistic standards is called gossip,” writes David Hazinski in the Atlanta Journal-Constitution (23A). In his book Losing the News, media specialist Alex S. Jones argues that what passes for news today is in fact “pseudo news” and is “far less reliable” than traditional print news (27). Even a supporter like Gillmor is willing to agree that citizen journalists are “nonexperts,” but he argues that they are “using technology to make a profound contribution, and a real difference” (140).

Citizen reporting made a difference in the wake of Hurricane Katrina in 2005. Armed with cell phones and laptops, regular citizens relayed critical news updates in a rapidly developing crisis, often before traditional journalists were even on the scene. In 2006, the enormous contributions of
citizen journalists were recognized when the New Orleans Times-Picayune received the Pulitzer Prize in public service for its online coverage—largely citizen-generated—of Hurricane Katrina. In recognizing the paper’s “meritorious public service,” the Pulitzer Prize board credited the newspaper’s blog for “heroic, multi-faceted coverage of [the storm] and its aftermath” (“2006 Pulitzer”). Writing for the Online Journalism Review, Mark Glaser emphasizes the role that blog updates played in saving storm victims’ lives. Further, he calls the Times-Picayune’s partnership with citizen journalists a “watershed for online journalism.”

The Internet has enabled consumers to participate in a new way in reading, questioning, interpreting, and reporting the news. Decisions about appropriate content and coverage are no longer exclusively in the hands of news editors. Ordinary citizens now have a meaningful voice in the conversation—a hand in deciding what’s “fit to print.” Some skeptics worry about the apparent free-for-all and loss of tradition. But the expanding definition of news provides opportunities for consumers to be more engaged with events in their communities, their nations, and the world.

Evaluating arguments

In your reading and in your own writing, evaluate all arguments for logic and fairness. Many arguments can stand up to critical scrutiny. Sometimes, however, a line of argument that at first seems reasonable turns out to be illogical, unfair, or both.

A3-a Distinguish between reasonable and fallacious argumentative tactics.

A number of unreasonable argumentative tactics are known as logical fallacies. Most of the fallacies—such as hasty generalizations and false analogies—are misguided or dishonest uses of legitimate argumentative strategies. The examples in this section suggest when such strategies are reasonable and when they are not.

Generalizing (inductive reasoning)

Writers and thinkers generalize all the time. We look at a sample of data and conclude that data we have not observed will most likely conform to what we have seen. From a spoonful of soup, we conclude just how salty the whole bowl will be. After numerous unpleasant experiences with an airline, we decide to book future flights with a competitor.

When we draw a conclusion from an array of facts, we are engaged in inductive reasoning. Such reasoning deals in probability, not certainty. For a conclusion to be highly probable, it must be based on evidence that is sufficient, representative, and relevant. (See the chart on p. 94.)

The fallacy known as hasty generalization is a conclusion based on insufficient or unrepresentative evidence.

HASTY GENERALIZATION

In a single year, scores on standardized tests in California’s public schools rose by ten points. Therefore, more children than ever are succeeding in America’s public school systems.

Data from one state do not justify a conclusion about the whole United States.

A stereotype is a hasty generalization about a group. Here are a few examples.
STEREOTYPES

Women are bad bosses.
All politicians are corrupt.
Athletes are never strong students.

Stereotyping is common because of our tendency to perceive selectively. We tend to see what we want to see; we notice evidence confirming our already formed opinions and fail to notice evidence to the contrary. For example, if you have concluded that all politicians are corrupt, this stereotype will be confirmed by news reports of legislators being indicted—even though every day the media describe conscientious officials serving the public honestly and well.

Academic English

Many hasty generalizations contain words such as all, ever, always, and never, when qualifiers such as most, many, usually, and seldom would be more accurate.

Drawing analogies

An analogy points out a similarity between two things that are otherwise different. Analogies can be an effective means of arguing a point. Our system of judicial decision making, or case law, which relies heavily on previous decisions, makes extensive use of reasoning by analogy. One lawyer may point out, for example, that specific facts or circumstances resemble those from a previous case and will thus argue for a similar result or decision. In response, the opposing lawyer may maintain that such facts or circumstances bear only a superficial resemblance to those in the previous case and that in legally relevant respects they are quite different and thus require a different result or decision.

It is not always easy to draw the line between a reasonable and an unreasonable analogy. At times, however, an analogy is clearly off base, in which case it is called a false analogy.

FALSE ANALOGY

If we can send a spacecraft to Pluto, we should be able to find a cure for the common cold.

The writer has falsely assumed that because two things are alike in one respect, they must be alike in others. Exploring the outer reaches of the solar system and finding a cure for the common cold are both scientific challenges, but the problems confronting medical researchers are quite different from those solved by space scientists.
Evaluating arguments

Tracing causes and effects

Demonstrating a connection between causes and effects is rarely simple. For example, to explain why a chemistry course has a high failure rate, you would begin by listing possible causes: inadequate preparation of students, poor teaching, lack of qualified tutors, and so on. Next you would investigate each possible cause. Only after investigating the possible causes would you be able to weigh the relative impact of each cause and suggest appropriate remedies.

Testing inductive reasoning

Though inductive reasoning leads to probable and not absolute truth, you can assess a conclusion’s likely probability by asking three questions. This chart shows how to apply those questions to a sample conclusion based on a survey.

CONCLUSION The majority of students on our campus would volunteer at least five hours a week in a community organization if the school provided a placement service for volunteers.

EVIDENCE In a recent survey, 723 of 1,215 students questioned said they would volunteer at least five hours a week in a community organization if the school provided a placement service for volunteers.

1. Is the evidence sufficient?

That depends. On a small campus (say, 3,000 students), the pool of students surveyed would be sufficient for market research, but on a large campus (say, 30,000), 1,215 students are only 4 percent of the population. If that 4 percent were known to be truly representative of the other 96 percent, however, even such a small sample would be sufficient (see question 2).

2. Is the evidence representative?

The evidence is representative if those responding to the survey reflect the characteristics of the entire student population: age, sex, race, field of study, overall number of extracurricular commitments, and so on. If most of those surveyed are majors in a field like social work, however, the researchers would be wise to question the survey’s conclusion.

3. Is the evidence relevant?

Yes. The results of the survey are directly linked to the conclusion. Evidence based on a survey about the number of hours students work for pay, by contrast, would not be relevant because it would not be about choosing to volunteer.
Because cause-and-effect reasoning is so complex, it is not surprising that writers frequently oversimplify it. In particular, writers sometimes assume that because one event follows another, the first is the cause of the second. This common fallacy is known as *post hoc*, from the Latin *post hoc, ergo propter hoc*, meaning “after this, therefore because of this.”

**POST HOC FALLACY**

Since Governor Cho took office, unemployment of minorities in the state has decreased by 7 percent. Governor Cho should be applauded for reducing unemployment among minorities.

The writer must show that Governor Cho’s policies are responsible for the decrease in unemployment; it is not enough to show that the decrease followed the governor’s taking office.

**Weighing options**

Especially when reasoning about problems and solutions, writers must weigh options. To be fair, a writer should mention the full range of options, showing why one is superior to the others or might work well in combination with others.

It is unfair to suggest that there are only two alternatives when in fact there are more. When writers set up a false choice between their preferred option and one that is clearly unsatisfactory, they create an *either . . . or* fallacy.

**EITHER . . . OR FALLACY**

Our current war against drugs has not worked. Either we should legalize drugs or we should turn the drug war over to our armed forces and let them fight it.

Clearly there are other options, such as increased funding for drug abuse prevention and treatment.

**Making assumptions**

An assumption is a claim that is taken to be true—without the need of proof. Most arguments are based to some extent on assumptions, since writers rarely have the time and space to prove all the conceivable claims on which an argument is based. For example, someone arguing about the best means of limiting population growth in developing countries might well assume that the goal of limiting population growth is worthwhile. For most audiences, there would be no need to articulate this assumption or to defend it.
There is a danger, however, in failing to spell out and prove a claim that is clearly controversial. Consider the following short argument, in which a key claim is missing.

**ARGUMENT WITH MISSING CLAIM**

Violent crime is increasing. Therefore, we should vigorously enforce the death penalty.

The writer seems to be assuming that the death penalty deters violent criminals—and that most audiences will agree. The writer also assumes that the death penalty is a fair punishment for violent crimes. These are not safe assumptions; the writer will need to state and support both claims.

When a missing claim is an assertion that few would agree with, we say that a writer is guilty of a **non sequitur** (Latin for “it does not follow”).

**NON SEQUITUR**

Leah loves good food; therefore, she will be an excellent chef.

Few people would agree with the missing claim—that lovers of good food always make excellent chefs.

**Deducing conclusions (deductive reasoning)**

When we deduce a conclusion, we—like Sherlock Holmes—put things together. We establish that a general principle is true, that a specific case is an example of that principle, and that therefore a particular conclusion about that case is a certainty. In real life, such absolute reasoning rarely happens. Approximations of it, however, sometimes occur.

Deductive reasoning can often be structured in a three-step argument called a **syllogism**. The three steps are the major premise, the minor premise, and the conclusion.

1. Anything that increases radiation in the environment is dangerous to public health. (Major premise)
2. Nuclear reactors increase radiation in the environment. (Minor premise)
3. Therefore, nuclear reactors are dangerous to public health. (Conclusion)

The major premise is a generalization. The minor premise is a specific case. The conclusion follows from applying the generalization to the specific case.
Deductive arguments break down if one of the premises is not true or if the conclusion does not logically follow from the premises. In the following argument, the major premise is very likely untrue.

**UNTRUE PREMISE**

The police do not give speeding tickets to people driving less than five miles per hour over the limit. Dominic is driving fifty-nine miles per hour in a fifty-five-mile-per-hour zone. Therefore, the police will not give Dominic a speeding ticket.

The conclusion is true only if the premises are true. If the police sometimes give speeding tickets for driving less than five miles per hour over the limit, Dominic cannot safely conclude that he will avoid a ticket.

In the following argument, both premises might be true, but the conclusion does not follow logically from them.

**CONCLUSION DOES NOT FOLLOW**

All members of our club ran in this year’s Boston Marathon. Jay ran in this year’s Boston Marathon. Therefore, Jay is a member of our club.

The fact that Jay ran the marathon is no guarantee that he is a member of the club. Presumably, many marathon runners are nonmembers.

Assuming that both premises are true, the following argument holds up.

**CONCLUSION FOLLOWS**

All members of our club ran in this year’s Boston Marathon. Jay is a member of our club. Therefore, Jay ran in this year’s Boston Marathon.

---

A3-b **Distinguish between legitimate and unfair emotional appeals.**

There is nothing wrong with appealing to readers’ emotions. After all, many issues worth arguing about have an emotional as well as a logical dimension. Even the Greek logician Aristotle lists *pathos* (emotion) as a legitimate argumentative tactic. For example, in an essay criticizing big-box stores, writer Betsy Taylor has a good reason for tugging at readers’ emotions: Her subject is the decline of city and town life. In her conclusion, Taylor appeals to readers’ emotions by invoking their national pride.
LEGITIMATE EMOTIONAL APPEAL

Is it anti-American to be against having a retail giant set up shop in one's community? Some people would say so. On the other hand, if you board up Main Street, what's left of America?

As we all know, however, emotional appeals are frequently misused. Many of the arguments we see in the media, for instance, strive to win our sympathy rather than our intelligent agreement. A TV commercial suggesting that you will be thin and sexy if you drink a certain diet beverage is making a pitch to emotions. So is a political speech that recommends electing a candidate because he is a devoted husband and father who serves as a volunteer firefighter.

The following passage illustrates several types of unfair emotional appeals.

UNFAIR EMOTIONAL APPEALS

This progressive proposal to build a ski resort in the state park has been carefully researched by Western Trust, the largest bank in the state; furthermore, it is favored by a majority of the local merchants. The only opposition comes from narrow-minded, hippie environmentalists who care more about trees than they do about people; one of their leaders was actually arrested for disturbing the peace several years ago.

Words with strong positive or negative connotations, such as progressive and hippie, are examples of biased language. Attacking the people who hold a belief (environmentalists) rather than refuting their argument is called ad hominem, a Latin term meaning “to the man.” Associating a prestigious name (Western Trust) with the writer's side is called transfer. Claiming that an idea should be accepted because a large number of people (the majority of merchants) are in favor is called the bandwagon appeal. Bringing in irrelevant issues (the arrest) is a red herring, named after a trick used in fox hunts to mislead the dogs by dragging a smelly fish across the trail.

A3-c Judge how fairly a writer handles opposing views.

The way in which a writer deals with opposing views is revealing. Some writers address the arguments of the opposition fairly, conceding points when necessary and countering others, all in a civil spirit. Other writers will do almost anything to win an argument: either ignoring opposing views altogether or misrepresenting such views and attacking their proponents.
In your own writing, you build credibility by addressing opposing arguments fairly. (See also A2-f.) In your reading, you can assess the credibility of your sources by looking at how they deal with views not in agreement with their own.

**Describing the views of others**

Writers and politicians often deliberately misrepresent the views of others. One way they do this is by setting up a “straw man,” a character so weak that he is easily knocked down. The *straw man* fallacy consists of an oversimplification or outright distortion of opposing views. For example, in a California debate over attempts to control the mountain lion population, pro-lion groups characterized their opponents as trophy hunters bent on shooting harmless lions and sticking them on the walls of their dens. In truth, such hunters were only one faction of those who saw a need to control the lion population.

During the District of Columbia’s struggle for voting representation, some politicians set up a straw man, as shown in the following example.

**STRAW MAN FALLACY**

Washington, DC, residents are lobbying for statehood. Giving a city such as the District of Columbia the status of a state would be unfair.

The straw man wanted statehood. In fact, most District citizens lobbied for voting representation in any form, not necessarily through statehood.

**Quoting opposing views**

Writers often quote the words of writers who hold opposing views. In general, this is a good idea, for it assures some level of fairness and accuracy. At times, though, both the fairness and the accuracy are an illusion.

A source may be misrepresented when it is quoted out of context. All quotations are to some extent taken out of context, but a fair writer will explain the context to readers. To select a provocative sentence from a source and to ignore the more moderate sentences surrounding it is both unfair and misleading. Sometimes a writer deliberately distorts a source through the device of ellipsis dots. Ellipsis dots tell readers that words have been omitted from the original source. When those words are crucial to an author’s meaning, omitting them is obviously unfair. (See P6-c.)
Writing in the disciplines

College courses expose you to the thinking of scholars in many disciplines, such as the humanities (literature, music, art), the social sciences (psychology, anthropology, sociology), the sciences (biology, physics, chemistry), and the professions and applied sciences (nursing, education, forestry). Writing in any discipline provides opportunities to practice the methods used by scholars in these fields and to enter into their debates. Each field has its own questions, evidence, language, and conventions, but all disciplines share certain expectations for good writing.

A4-a Find commonalities across disciplines.

A good paper in any field needs to communicate a writer’s purpose to an audience and to explore an engaging question about a subject. Effective writers make an argument and support their claims with evidence. Writers in most fields need to show the thesis they’re developing (or, in the sciences, the hypothesis they’re testing) and counter opposition from other writers. All disciplines require writers to document where they found their evidence and from whom they borrowed ideas.

A4-b Recognize the questions writers in a discipline ask.

Disciplines are characterized by the kinds of questions their scholars attempt to answer. Historians, for example, often ask questions about the causes and effects of events and about the connections between current and past events. One way to understand how disciplines ask different questions is to look at assignments on the same subject in

ORIGINAL SOURCE
Johnson’s History of the American West is riddled with inaccuracies and astonishing in its blatantly racist description of the Indian wars. —B. R., reviewer

MISLEADING QUOTATION
According to B. R., Johnson’s History of the American West is “astonishing in its . . . description of the Indian wars.”
various fields. In many disciplines, for example, writers might discuss disasters. The following are some questions that writers in different fields might ask about this subject.

**EDUCATION**  Should the elementary school curriculum teach students how to cope in disasters?

**FILM**  How has the disaster film genre changed since the advent of computer-generated imagery (CGI) in the early 1970s?

**HISTORY**  How did the formation of the American Red Cross reshape disaster relief in the United States?

**ENGINEERING**  What recent innovations in levee design are most promising?

**PSYCHOLOGY**  What are the most effective ways to identify and treat post-traumatic stress disorder (PTSD) in disaster survivors?

The questions you ask in any discipline will form the basis of the thesis for your paper. The questions themselves don’t communicate a central idea, but they may lead you to one. For an education paper, for example, you might begin with the question “Should the elementary school curriculum teach students how to cope in disasters?” After
considering the issues involved, you might draft the following working thesis.

School systems should adopt age-appropriate curriculum units that introduce children to the risks of natural and human-made disasters and that allow children to practice coping strategies.

Whenever you write for a college course, try to determine the kinds of questions scholars in the field might ask about a topic. You can find clues in assigned readings, lecture or discussion topics, e-mail discussion groups, and the paper assignment itself.

**A4-c Understand the kinds of evidence writers in a discipline use.**

Regardless of the discipline in which you’re writing, you must support any claims you make with evidence—facts, statistics, examples and illustrations, visuals, expert opinion, and so on.

The kinds of evidence used in different disciplines commonly overlap. Students of geography, media studies, and political science, for example, might use census data to explore different topics. The evidence that one discipline values, however, might not be sufficient to support an interpretation or a conclusion in another field. You might use anecdotes or interviews in an anthropology paper, for example, but such evidence would be irrelevant in a biology lab report. The chart on page 103 lists the kinds of evidence typically used in various disciplines.

**A4-d Become familiar with a discipline’s language conventions.**

Every discipline has a specialized vocabulary. As you read the articles and books in a field, you’ll notice certain words and phrases that come up repeatedly. Sociologists, for example, use terms such as *independent variables*, *political opportunity resources*, and *dyads* to describe social phenomena; computer scientists might refer to *algorithm design* and *loop invariants* to describe programming methods. Practitioners in health fields such as nursing use terms like *treatment plan* and *systemic assessment* to describe patient care. Use discipline-specific terms only when you are certain that you and your readers fully understand their meaning.

In addition to vocabulary, many fields of study have developed specialized conventions for point of view and verb tense. See the chart on page 104.
Evidence typically used in various disciplines

**Humanities: Literature, art, film, music, philosophy**
- Passages of text or lines of a poem
- Details from an image, a film, or a work of art
- Passages of a musical composition
- Critical essays that analyze original works

**Humanities: History**
- Primary sources such as photographs, letters, maps, and government documents
- Scholarly books and articles that interpret evidence

**Social sciences: Psychology, sociology, political science, anthropology**
- Data from original experiments
- Results of field research such as interviews, observations, or surveys
- Statistics from government agencies
- Scholarly books and articles that interpret data from original experiments and from other researchers’ studies

**Sciences: Biology, chemistry, physics**
- Data from original experiments
- Scholarly articles that report findings from experiments

**A4-e  Use a discipline’s preferred citation style.**

In any discipline, you must give credit to those whose ideas or words you have borrowed. Avoid plagiarism by citing sources honestly and accurately (see R3).

While all disciplines emphasize careful documentation, each follows a particular system of citation that its members have agreed on. Writers in the humanities usually use the system established by the Modern Language Association (MLA). Scholars in some social sciences, such as psychology and anthropology, follow the style guidelines of the American Psychological Association (APA); scholars in history and some humanities typically follow *The Chicago Manual of Style*. For guidance on using the MLA, APA, or *Chicago* (CMS) format, see MLA-4, APA-4, or CMS-4, respectively. (For CSE [Council of Science Editors] style, see hackerhandbooks.com/resdoc.)
Writing in the disciplines

Understand writing assignments in the disciplines.

When you are asked to write in a specific discipline, become familiar with the distinctive features of the writing in that discipline. Then read the assignment carefully and identify the purpose of the assignment and the types of evidence you are expected to use.

On the following pages are examples of assignments in four disciplines—psychology, business, biology, and nursing—along with excerpts from student papers that were written in response to the assignments.

Point of view and verb tense in academic writing

Point of view

- Writers of analytical or research essays in the humanities usually use the third-person point of view: Austen presents . . . or Castel describes the battle as . . .
- Scientists and most social scientists, who depend on quantitative research to present findings, tend to use the third-person point of view: The results indicated . . .
- Writers in the humanities and in some social sciences occasionally use the first person in discussing their own experience or in writing a personal narrative: After spending two years interviewing families affected by the war, I began to understand that . . . or Every July as we approached the Cape Cod Canal, we could sense . . .

Present or past tense

- Literature scholars use the present tense to discuss a text: Hughes effectively dramatizes different views of minority assertiveness. (See MLA-3.)
- Science and social science writers use the past tense to describe experiments and the present tense to discuss the findings: In 2003, Berkowitz released the first double-blind placebo study. . . . These results paint a murky picture. (See APA-3.)
- Writers in history use the present tense or the present perfect tense to discuss a text: Shelby Foote describes the scene like this . . . or Shelby Foote has described the scene like this . . . (See CMS-3.)

ASSIGNMENT: LITERATURE REVIEW

Write a literature review in which you report on and evaluate the published research on a behavioral disorder.

1. Key terms
2. Purpose: to report on and evaluate a body of evidence
3. Evidence: research of other psychologists

ADHD IN BOYS VS. GIRLS

Always Out of Their Seats (and Fighting):
Why Are Boys Diagnosed with ADHD More Often Than Girls?

Attention deficit hyperactivity disorder (ADHD) is a commonly diagnosed disorder in children that affects social, academic, or occupational functioning. As the name suggests, its hallmark characteristics are hyperactivity and lack of attention as well as impulsive behavior. For decades, studies have focused on the causes, expression, prevalence, and outcome of the disorder, but until recently very little research investigated gender differences. In fact, until the early 1990s most research focused exclusively on boys (Brown, Madan-Swain, & Baldwin, 1991), perhaps because many more boys than girls are diagnosed with ADHD. Researchers have speculated on the possible explanations for the disparity, citing reasons such as true sex differences in the manifestation of the disorder’s symptoms, gender biases in those who refer children to clinicians, and possibly even the diagnostic procedures themselves (Gaub & Carlson, 1997). But the most persuasive reason is that ADHD is often a comorbid condition—that is, it coexists with other behavior disorders that are not diagnosed properly and that do exhibit gender differences.

It has been suggested that in the United States children are often misdiagnosed as having ADHD when they actually suffer from a behavior disorder such as conduct disorder (CD) or a combination of ADHD and another behavior disorder (Disney, Elkins, McGue, & Iancono, 1999; Lilienfeld & Waldman, 1990). Conduct disorder is characterized by negative and criminal behavior in children and is highly correlated with adult diagnoses of antisocial personality disorder (ASPD). This paper first considers research that has dealt only with gender difference in the
ASSIGNMENT: PROPOSAL

Write a proposal, as a memo, for improving or adding a service at a company where you have worked. Address the pros and cons of your proposal; draw on relevant studies, research, and your knowledge of the company.

Key terms
Purpose: to analyze certain evidence and make a proposal based on that analysis
Appropriate evidence: relevant studies, research, personal experience

MEMORANDUM

To: Jay Crosson, Senior Vice President, Human Resources
From: Kelly Ratajczak, Intern, Purchasing Department
Subject: Proposal to Add a Wellness Program
Date: April 24, 2009

Health care costs are rising. In the long run, implementing a wellness program in our corporate culture will decrease the company’s health care costs.

Research indicates that nearly 70% of health care costs are from common illnesses related to high blood pressure, overweight, lack of exercise, high cholesterol, stress, poor nutrition, and other preventable health issues (Hall, 2006). Health care costs are a major expense for most businesses, and they do not reflect costs due to the loss of productivity or absenteeism. A wellness program would address most, if not all, of these health care issues and related costs.

Benefits of Healthier Employees
Not only would a wellness program substantially reduce costs associated with employee health care, but our company would prosper through many other benefits. Businesses that have wellness programs show a lower cost in production, fewer sick days, and healthier employees (“Workplace Health,” 2006). Our healthier employees will help to cut not only our production and absenteeism costs but also potential costs such as higher

Writer’s main idea.
Data from recent study as support for claim.
APA citation style, typical in business.
Business terms familiar to readers (costs, productivity, absenteeism).
Headings define sections of proposal.
**Biology**

**ASSIGNMENT: LABORATORY REPORT**

Write a report on an experiment you conduct on the distribution pattern of a plant species indigenous to the Northeast. Describe your methods for collecting data and interpret your experiment’s results.

1. **Key terms**
2. **Purpose:** to describe and interpret the results of an experiment
3. **Evidence:** data collected during the experiment

**ABSTRACT**

This paper reports our study of the distribution pattern of the common dandelion (*Taraxacum officinale*) on an abandoned golf course in Hilton, NY, on 10 July 2005. An area of 6 ha was sampled with 111 randomly placed 1 x 1 m² quadrats. The dandelion count from each quadrat was used to test observed frequencies against expected frequencies based on a hypothesized random distribution. [Abstract continues.]

**INTRODUCTION**

Theoretically, plants of a particular species may be aggregated, random, or uniformly distributed in space. The distribution type may be determined by many factors, such as availability of nutrients, competition, distance of seed dispersal, and mode of reproduction.

The purpose of this study was to determine if the distribution pattern of the common dandelion (*Taraxacum officinale*) on an abandoned golf course was aggregated, random, or uniform.

**METHODS**

The study site was an abandoned golf course in Hilton, NY. The vegetation was predominantly grasses, along with dandelions, broad-leaf plantain (*Plantago major*), and bird’s-eye speedwell (*Veronica chamaedrys*). We sampled an area of approximately 6 ha on 10 July 2005, approximately two weeks after the golf course had been mowed.
ASSIGNMENT: NURSING PRACTICE PAPER

Write a client history, a nursing diagnosis, recommendations for care, your rationales, and expected and actual outcomes.

Use interview notes, the client’s health records, and relevant research findings.

Key terms
Purpose: to provide client history, diagnosis, recommendations, and outcomes
Evidence: interviews, health records, and research findings

ALL AND HTN IN ONE CLIENT

Acute Lymphoblastic Leukemia and Hypertension in One Client:
A Nursing Practice Paper

Physical History

E.B. is a 16-year-old white male 5’10” tall weighing 190 lb. He was admitted to the hospital on April 14, 2006, due to decreased platelets and a need for a PRBC transfusion. He was diagnosed in October 2005 with T-cell acute lymphoblastic leukemia (ALL), after a 2-week period of decreased energy, decreased oral intake, easy bruising, and petechia. The client had experienced a 20-lb weight loss in the previous 6 months. At the time of diagnosis, his CBC showed a WBC count of 32, an H & H of 13/38, and a platelet count of 34,000. His initial chest X-ray showed an anterior mediastinal mass. Echocardiogram showed a structurally normal heart. He began induction chemotherapy on October 12, 2005, receiving vincristine, 6-mercaptopurine, doxorubicin, intrathecal methotrexate, and then high-dose methotrexate per protocol. During his hospital stay, he required packed red cells and platelets on two different occasions. He was diagnosed with hypertension (HTN) due to systolic blood pressure readings consistently ranging between 130s and 150s and was started on nifedipine. E.B. has a history of mild ADHD, migraines, and deep vein thrombosis (DVT). He has tolerated the induction and consolidation phases of chemotherapy well and is now in the maintenance phase, in which he receives a daily dose of mercaptopurine, weekly doses of methotrexate, and intermittent doses of steroids.

Parallelism

If two or more ideas are parallel, they are easier to grasp when expressed in parallel grammatical form. Single words should be balanced with single words, phrases with phrases, clauses with clauses. In headings and lists, aim for as much parallelism as the content allows. (See C5-b and C5-c.) Writers often use parallelism to create emphasis. (See p. 134.)

A kiss can be a comma, a question mark, or an exclamation point.
— Mistinguett

This novel is not to be tossed lightly aside, but to be hurled with great force.
— Dorothy Parker

In matters of principle, stand like a rock; in matters of taste, swim with the current.
— Thomas Jefferson

Balance parallel ideas in a series.

Readers expect items in a series to appear in parallel grammatical form. When one or more of the items violate readers’ expectations, a sentence will be needlessly awkward.

Children who study music also learn confidence, discipline, and creativity. They are creative.

The revision presents all the items in the series as nouns: confidence, discipline, and creativity.

Impressionist painters believed in focusing on ordinary subjects, capturing the effects of light on those subjects, and to use short brushstrokes.

The revision uses -ing forms for all the items in the series: focusing, capturing, and using.
Racing to get to work on time, Sam drove down the middle of the ignored road, ran one red light, and two stop signs.

The revision adds a verb to make the three items parallel: drove, ran, and ignored.

**Balance parallel ideas presented as pairs.**

When pairing ideas, underscore their connection by expressing them in similar grammatical form. Paired ideas are usually connected in one of these ways:
- with a coordinating conjunction such as and, but, or or
- with a pair of correlative conjunctions such as either . . . or or not only . . . but also
- with a word introducing a comparison, usually than or as

**Parallel ideas linked with coordinating conjunctions**

Coordinating conjunctions (and, but, or, nor, for, so, and yet) link ideas of equal importance. When those ideas are closely parallel in content, they should be expressed in parallel grammatical form.

Emily Dickinson’s poetry features the use of dashes and the capitalization of capitalizing common words.

The revision balances the nouns use and capitalization.

Many states are reducing property taxes for home owners extending and extend financial aid in the form of tax credits to renters.

The revision balances the verb reducing with the verb extending.

**Parallel ideas linked with correlative conjunctions**

Correlative conjunctions come in pairs: either . . . or, neither . . . nor, not only . . . but also, both . . . and, whether . . . or. Make sure that the grammatical structure following the second half of the pair is the same as that following the first half.
Thomas Edison was not only a prolific inventor but also a successful entrepreneur.

The words *prolific inventor* immediately follow *not only*, so *successful entrepreneur* should follow *but also*. Repeating *was* after *also* creates an unbalanced effect.

The clerk told me either to change my flight or take the train.

*To change*, which follows *either*, should be balanced with *to take*, which follows *or*.

**Comparisons linked with than or as**

In comparisons linked with *than* or *as*, the elements being compared should be expressed in parallel grammatical structure.

It is easier to speak in abstractions than grounding one's thoughts in reality.

*To speak* is balanced with *to ground*.

In Pueblo culture, according to Silko, to write down the stories of a tribe is not the same as "keeping track of all the stories" (290).

When you are quoting from a source, parallel grammatical structure—such as *writing ... keeping*—helps create continuity between your sentence and the words from the source.

Comparisons should also be logical and grammatically complete. (See S2-c.)

**S1-c Repeat function words to clarify parallels.**

Function words such as prepositions (*by, to*) and subordinating conjunctions (*that, because*) signal the grammatical nature of the word groups to follow. Although you can sometimes omit such function words, be sure to include them whenever they signal parallel structures that readers might otherwise miss.
Our study revealed that left-handed students were more likely to have trouble with classroom desks and rearranging desks for exam periods was useful. A second subordinating conjunction helps readers sort out the two parallel ideas: that left-handed students have trouble with classroom desks and that rearranging desks was useful.

Sometimes writers leave out words intentionally, and the meaning of the sentence is not affected. But leaving out words can occasionally cause confusion for readers or make the sentence ungrammatical. Readers need to see at a glance how the parts of a sentence are connected.

**ESL** Languages sometimes differ in the need for certain words. In particular, be alert for missing articles, verbs, subjects, or expletives. See M2, M3-a, and M3-b.

**S2-a Add words needed to complete compound structures.**

In compound structures, words are often left out for economy: Tom is a man who means what he says and [who] says what he means. Such omissions are acceptable as long as the omitted words are common to both parts of the compound structure.

If a sentence defies grammar or idiom because an omitted word is not common to both parts of the compound structure, the simplest solution is to put the word back in.

- Successful advertisers target customers whom they identify through demographic research or have purchased their product in the past.

- Mayor Davis never has and never will accept a bribe.

**PRACTICE** hackerhandbooks.com/writersref  
> Sentence style > S2–2 to S2–4
Many South Pacific islanders still believe and live by ancient laws.

Believe . . . by is not idiomatic in English. (For a list of common idioms, see W5-d.)

**NOTE:** Even when the omitted word is common to both parts of the compound structure, occasionally it must be repeated to avoid ambiguity.

*My favorite professor and mentor influenced my choice of a career.*
[Professor and mentor are the same person.]

*My favorite professor and my mentor influenced my choice of a career.*
[Professor and mentor are two different people; *my* must be repeated.]

**S2-b** Add the word *that* if there is any danger of misreading without it.

If there is no danger of misreading, the word *that* may be omitted when it introduces a subordinate clause. *The value of a principle is the number of things [that] it will explain.* Occasionally, however, a sentence might be misread without *that*.

In his famous obedience experiments, psychologist Stanley *that* Milgram discovered ordinary people were willing to inflict *physical pain on strangers.*

Milgram didn’t discover ordinary people; he discovered that ordinary people were willing to inflict pain on strangers. The word *that* tells readers to expect a clause, not just *ordinary people*, as the direct object of *discovered.*

**S2-c** Add words needed to make comparisons logical and complete.

Comparisons should be made between items that are alike. To compare unlike items is illogical and distracting.

The forests of North America are much more extensive than *those of* Europe.

Forests must be compared with forests, not with all of Europe.
The death rate of infantry soldiers in the Vietnam War was much higher than the other combat troops.

The death rate cannot logically be compared to troops. The writer could revise the sentence by inserting "that of" after "than," but the revision shown here is more concise.

Some say that Ella Fitzgerald's renditions of Cole Porter's songs are better than any other singer.

Ella Fitzgerald's renditions cannot logically be compared with a singer. The revision uses the possessive form "singer's," with the word "renditions" being implied.

Sometimes the word "other" must be inserted to make a comparison logical.

Jupiter is larger than any planet in our solar system.

Jupiter is a planet, and it cannot be larger than itself.

Sometimes the word "as" must be inserted to make a comparison grammatically complete.

The city of Lowell is as old, if not older than, the neighboring city of Lawrence.

The construction "as old" is not complete without a second "as: as old as . . . the neighboring city of Lawrence."

Comparisons should be complete enough to ensure clarity. The reader should understand what is being compared.

INCOMPLETE  Brand X is less salty.

COMPLETE  Brand X is less salty than Brand Y.

Finally, comparisons should leave no ambiguity for readers. If more than one interpretation is possible, revise the sentence to state clearly which interpretation you intend. In the following ambiguous sentence, two interpretations are possible.

AMBIGUOUS  Ken helped me more than my roommate.

CLEAR  Ken helped me more than he helped my roommate.

CLEAR  Ken helped me more than my roommate did.
**S2-d** Add the articles *a*, *an*, and *the* where necessary for grammatical completeness.

It is not always necessary to repeat articles with paired items: *We bought a computer and printer*. However, if one of the items requires *a* and the other requires *an*, both articles must be included.

> We bought a computer and *an* antivirus program.

Articles are sometimes omitted in recipes and other instructions that are meant to be followed while they are being read. In nearly all other forms of writing, whether formal or informal, such omissions are inappropriate.

**ESL** Choosing and using articles can be challenging for multilingual writers. See M2.

---

**S3** Problems with modifiers

Modifiers, whether they are single words, phrases, or clauses, should point clearly to the words they modify. As a rule, related words should be kept together.

**S3-a** Put limiting modifiers in front of the words they modify.

Limiting modifiers such as *only*, *even*, *almost*, *nearly*, and *just* should appear in front of a verb only if they modify the verb: *At first, I couldn’t even touch my toes, much less grasp them*. If modifiers limit the meaning of some other word in the sentence, they should be placed in front of that word.

> St. Vitus Cathedral, commissioned by Charles IV in the *almost* mid-fourteenth century, *almost* took six centuries to complete.

*Almost* limits the meaning of *six centuries*, not *took*.

---

**PRACTICE** Hackerhandbooks.com/writersref
> Sentence style > S3–3 to S3–5
If you just interview chemistry majors, your picture of the student body’s response to the new grading policies will be incomplete. The adverb just limits the meaning of chemistry majors, not interview.

When the limiting modifier not is misplaced, the sentence usually suggests a meaning the writer did not intend.

In the United States in 1860, all black southerners were not slaves. The original sentence says that no black southerners were slaves. The revision makes the writer’s real meaning clear: Some (but not all) black southerners were slaves.

Place phrases and clauses so that readers can see at a glance what they modify.

Although phrases and clauses can appear at some distance from the words they modify, make sure your meaning is clear. When phrases or clauses are oddly placed, absurd misreadings can result.

The soccer player returned to the clinic where he had undergone emergency surgery in 2009 in a limousine sent by Adidas.

Traveling in a limousine sent by Adidas, the soccer player returned to the clinic where he had undergone emergency surgery in 2009.

The revision corrects the false impression that the soccer player underwent emergency surgery in a limousine.

There are many pictures of comedians who have performed at Gavin’s on the walls.

The comedians weren’t performing on the walls; the pictures were on the walls.

The robber was described as a six-foot-tall man with a heavy mustache weighing 170 pounds.

The robber, not the mustache, weighed 170 pounds.
Occasionally the placement of a modifier leads to an ambiguity—a squinting modifier. In such a case, two revisions will be possible, depending on the writer’s intended meaning.

**AMBIGUOUS** The exchange students we met for coffee occasionally questioned us about our latest slang.

**CLEAR** The exchange students we occasionally met for coffee questioned us about our latest slang.

**CLEAR** The exchange students we met for coffee questioned us occasionally about our latest slang.

In the original version, it was not clear whether the meeting or the questioning happened occasionally. Both revisions eliminate the ambiguity.

**S3-c Move awkwardly placed modifiers.**

As a rule, a sentence should flow from subject to verb to object, without lengthy detours along the way. When a long adverbial word group separates a subject from its verb, a verb from its object, or a helping verb from its main verb, the result is often awkward.

**Hong Kong,** after more than 150 years of British rule, was transferred back to Chinese control in 1997.

There is no reason to separate the subject, **Hong Kong**, from the verb, **was transferred**, with a long phrase.

**Jeffrey Meyers discusses,** in his biography of F. Scott Fitzgerald, the writer’s “fascination with the superiority, the selfishness, and the emptiness of the rich” (166).

When you quote from a source, the phrase or clause that you use to introduce the source should be as straightforward as possible. There is no reason to separate the verb, **discusses**, from its object, **fascination**, with two prepositional phrases.

**ESL** English does not allow an adverb to appear between a verb and its object. See M3-f.

**Yolanda lifted easily** the fifty-pound weight.
### S3-d Avoid split infinitives when they are awkward.

An infinitive consists of *to* plus the base form of a verb: *to think, to run, to dance*. When a modifier appears between *to* and the verb, an infinitive is said to be “split”: *to carefully balance, to completely understand.*

When a long word or a phrase appears between the parts of the infinitive, the result is usually awkward.

*If possible, the* The patient should try to if possible avoid putting weight on

*his foot.*

Attempts to avoid split infinitives can result in equally awkward sentences. When alternative phrasing sounds unnatural, most experts allow — and even encourage — splitting the infinitive.

**AWKWARD** We decided actually to enforce the law.

**BETTER** We decided to actually enforce the law.

At times, neither the split infinitive nor its alternative sounds particularly awkward. In such situations, it is usually better to unsplit the infinitive, especially in formal writing.

*The patient should try to if possible avoid putting weight on his foot.*

**Nursing students learn to accurately record a patient’s vital signs.**

### S3-e Repair dangling modifiers.

A dangling modifier fails to refer logically to any word in the sentence. Dangling modifiers are easy to repair, but they can be hard to recognize, especially in your own writing.

**Recognizing dangling modifiers**

Dangling modifiers are usually word groups (such as verbal phrases) that suggest but do not name an actor. When a sentence opens with such a modifier, readers expect the subject of the next clause to name the actor. If it doesn’t, the modifier dangles.

*Understanding the need to create checks and balances on power,*

*the framers of the Constitution divided the government into three branches.*
The framers of the Constitution (not the document itself) understood the need for checks and balances.

After completing seminary training, women's access to the priesthood has often been denied. Women (not their access to the priesthood) complete the training.

The following sentences illustrate four common kinds of dangling modifiers.

**Dangling**

Deciding to join the navy, the recruiter enthusiastically pumped Joe's hand. [Participial phrase]

**Dangling**

Upon entering the doctor's office, a skeleton caught my attention. [Preposition followed by a gerund phrase]

**Dangling**

To satisfy her mother, the piano had to be practiced every day. [Infinitive phrase]

**Dangling**

Though not eligible for the clinical trial, the doctor was willing to prescribe the drug for Ethan on compassionate grounds. [Elliptical clause with an understood subject and verb]

These dangling modifiers falsely suggest that the recruiter decided to join the navy, that the skeleton entered the doctor's office, that the piano intended to satisfy the mother, and that the doctor was not eligible for the clinical trial.

Although most readers will understand the writer's intended meaning in such sentences, the inadvertent humor can be distracting.

**Repairing dangling modifiers**

To repair a dangling modifier, you can revise the sentence in one of two ways:

- Name the actor in the subject of the sentence.
- Name the actor in the modifier.

Depending on your sentence, one of these revision strategies may be more appropriate than the other.
ACTOR NAMED IN SUBJECT

- Upon entering the doctor’s office, a skeleton caught my attention.
- To satisfy her mother, the piano had to be practiced every day.

ACTOR NAMED IN MODIFIER

- Deciding to join the navy, the recruiter enthusiastically pumped his Joe’s hand.
- Though not eligible for the clinical trial, the doctor was willing to prescribe the drug for Ethan on compassionate grounds.

NOTE: You cannot repair a dangling modifier just by moving it. Consider, for example, the sentence about the skeleton. If you put the modifier at the end of the sentence (A skeleton caught my attention upon entering the doctor’s office), you are still suggesting—absurdly, of course—that the skeleton entered the office. The only way to avoid the problem is to put the word I in the sentence, either as the subject or in the modifier.
Upon entering the doctor’s office, a skeleton caught my attention.

Our class practiced rescuing a victim trapped in a wrecked car. We learned to dismantle the car with the essential tools. You were graded on your speed and your skill in freeing the victim.

You need a password and a credit card number to access the database. You will be billed at an hourly rate.
According to the National Institute of Mental Health (2007), a child with attention deficit hyperactivity disorder may have trouble sitting still and may gradually stop paying attention to their teachers (Symptoms section, para. 2).

In describing reports or results of studies, writers are often tempted to generalize with singular nouns, such as child, and then later in the passage find themselves shifting from singular to plural. Here the writer might have changed their to the singular his or her to agree with child, but the revision making both terms plural is more concise. (See also W4-e and G3-a.)

S4-b Maintain consistent verb tenses.

Consistent verb tenses clearly establish the time of the actions being described. When a passage begins in one tense and shifts without warning and for no reason to another, readers are distracted and confused.

There was no way I could fight the current and win. Just as I was losing hope, a stranger jumps off a passing boat and swims toward me.

The writer thought that the present tense (jumps, swims) would convey immediacy and drama. But having begun in the past tense (could fight, was losing), the writer should follow through in the past tense.

Writers often encounter difficulty with verb tenses when writing about literature. Because fictional events occur outside the time frames of real life, the past tense and the present tense may seem equally appropriate. The literary convention, however, is to describe fictional events consistently in the present tense. (See p. 192.)

The scarlet letter is a punishment sternly placed on Hester’s breast by the community, and yet it was a fanciful and imaginative product of Hester’s own needlework.

S4-c Make verbs consistent in mood and voice.

Unnecessary shifts in the mood of a verb can be distracting and confusing to readers. There are three moods in English: the indicative, used for facts, opinions, and questions; the imperative, used for orders or advice; and the
subjunctive, used in certain contexts to express wishes or conditions contrary to fact (see G2-g).

The following passage shifts confusingly from the indicative to the imperative mood.

- The counselor advised us to spread out our core requirements over two or three semesters. Also, pay attention to prerequisites for elective courses.

The writer began by reporting the counselor's advice in the indicative mood (counselor advised) and switched to the imperative mood (pay attention); the revision puts both sentences in the indicative.

A verb may be in either the active voice (with the subject doing the action) or the passive voice (with the subject receiving the action). (See W3-a.) If a writer shifts without warning from one to the other, readers may be left wondering why.

- Each student completes a self-assessment. The self-assessment is then given to the teacher, and a copy is exchanged with a classmate.

Because the passage began in the active voice (student completes) and then switched to the passive (self-assessment is given, copy is exchanged), readers are left wondering who gives the self-assessment to the teacher and the classmate. The active voice, which is clearer and more direct, leaves no ambiguity.

**S4-d Avoid sudden shifts from indirect to direct questions or quotations.**

An indirect question reports a question without asking it: We asked whether we could visit Miriam. A direct question asks directly: Can we visit Miriam? Sudden shifts from indirect to direct questions are awkward. In addition, sentences containing such shifts are impossible to punctuate because indirect questions must end with a period and direct questions must end with a question mark. (See P6-a.)

- I wonder whether Karla knew of the theft and, if so, did she report it to the police?
The revision poses both questions indirectly. The writer could also ask both questions directly: *Did Karla know of the theft, and, if so, did she report it to the police?*

An indirect quotation reports someone’s words without quoting word for word: *Annabelle said that she is a Virgo.* A direct quotation presents the exact words of a speaker or writer, set off with quotation marks: *Annabelle said, “I am a Virgo.”* Unannounced shifts from indirect to direct quotations are distracting and confusing, especially when the writer fails to insert the necessary quotation marks, as in the following example.

▶ The patient said she had been experiencing heart palpitations and asked me to please run as many tests as possible to find out what’s wrong.

The revision reports the patient’s words indirectly. The writer also could quote the words directly: *The patient said, “I have been experiencing heart palpitations. Please run as many tests as possible to find out what’s wrong.”*

### S5  Mixed constructions

A mixed construction contains sentence parts that do not sensibly fit together. The mismatch may be a matter of grammar or of logic.

#### S5-a  Untangle the grammatical structure.

Once you begin a sentence, your choices are limited by the range of grammatical patterns in English. (See B2 and B3.) You cannot begin with one grammatical plan and switch without warning to another. Often you must rethink the purpose of the sentence and revise.

**Mixed**

For most drivers who have a blood alcohol level of .05 percent double their risk of causing an accident.

The writer begins the sentence with a long prepositional phrase and makes it the subject of the verb *double*. But a prepositional phrase can serve only as a modifier; it cannot be the subject of a sentence.

**Revised**

For most drivers who have a blood alcohol level of .05 percent, the risk of causing an accident is doubled.

**Revised**

Most drivers who have a blood alcohol level of .05 percent double their risk of causing an accident.
In the first revision, the writer begins with the prepositional phrase and finishes the sentence with a proper subject and verb (*risk . . . is doubled*). In the second revision, the writer stays with the original verb (*double*) and heads into the sentence another way, making *drivers* the subject of *double*.

**Electing**

*When the country elects a president is the most important responsibility in a democracy.*

The adverb clause *When the country elects a president* cannot serve as the subject of the verb *is*. The revision replaces the adverb clause with a gerund phrase, a word group that can function as a subject. (See B3-e and B3-b.)

*Although the United States is one of the wealthiest nations in the world, but more than twelve million of our children live in poverty.*

The coordinating conjunction *but* cannot link a subordinate clause (*Although the United States . . . *) with an independent clause (*more than twelve million of our children live in poverty*).

Occasionally a mixed construction is so tangled that it defies grammatical analysis. When this happens, back away from the sentence, rethink what you want to say, and then rewrite the sentence.

**MIXED** In the whole-word method, children learn to recognize entire words rather than by the phonics method in which they learn to sound out letters and groups of letters.

**REVISED** The whole-word method teaches children to recognize entire words; the phonics method teaches them to sound out letters and groups of letters.

**ESL** English does not allow double subjects, nor does it allow an object or an adverb to be repeated in an adjective clause. Unlike some other languages, English does not allow a noun and a pronoun to be repeated in a sentence if they have the same grammatical function. See M3-c and M3-d.

*My father he moved to Peru before he met my mother.*

*The final exam I should really study for it to pass the course.*
S5-b Straighten out the logical connections.

The subject and the predicate (the verb and its modifiers) should make sense together; when they don’t, the error is known as faulty predication.

- We decided that Tiffany’s welfare would not be safe living with her mother.
  Tiffany, not her welfare, would not be safe.

- Under the revised plan, the elderly who now receive a double personal exemption, will be abolished.
  The exemption, not the elderly, will be abolished.

An appositive is a noun that renames a nearby noun. When an appositive and the noun it renames are not logically equivalent, the error is known as faulty apposition. (See B3-c.)

- The tax accountant, a very lucrative profession, requires intelligence, patience, and attention to mathematical detail.
  The tax accountant is a person, not a profession.

S5-c Avoid is when, is where, and reason . . . is because constructions.

In formal English, readers sometimes object to is when, is where, and reason . . . is because constructions on grammatical or logical grounds.

- The reason the experiment failed is because conditions in the lab were not sterile.
  Grammatically, the verb is should not be followed by an adverb clause beginning with because. (See B2-b and B3-e.) The writer might have changed because to that (The reason the experiment failed is that conditions in the lab were not sterile), but the preceding revision is more concise.

- Anorexia nervosa is a disorder suffered by people who a disorder suffered by people who
  to the point of starvation.
  Where refers to places. Anorexia nervosa is a disorder, not a place.
**S6  Sentence emphasis**

Within each sentence, emphasize your point by expressing it in the subject and verb of an independent clause, the words that receive the most attention from readers (see S6-a to S6-e).

Within longer stretches of prose, you can draw attention to ideas that deserve special emphasis by using a variety of techniques, often involving an unusual twist or some element of surprise (see S6-f).

**S6-a  Coordinate equal ideas; subordinate minor ideas.**

When combining two or more ideas in one sentence, you have two choices: coordination or subordination. Choose coordination to indicate that the ideas are equal or nearly equal in importance. Choose subordination to indicate that one idea is less important than another.

**Coordination**

Coordination draws attention equally to two or more ideas. To coordinate single words or phrases, join them with a coordinating conjunction or with a pair of correlative conjunctions: bananas and strawberries; not only a lackluster plot but also inferior acting (see B1-g).

To coordinate independent clauses—word groups that express a complete thought and that can stand alone as a sentence—join them with a comma and a coordinating conjunction (and, but, or, nor, for, so, yet) or with a semicolon. The semicolon is often accompanied by a conjunctive adverb such as moreover, furthermore, therefore, or however or by a transitional phrase such as for example, in other words, or as a matter of fact. (For longer lists, see P3-a.)

Social networking Web sites offer ways for people to connect in the virtual world, but they do not replace face-to-face social interaction.

Social networking Web sites offer ways for people to connect in the virtual world; however, they do not replace face-to-face social interaction.

**Subordination**

To give unequal emphasis to two or more ideas, express the major idea in an independent clause and place any minor ideas in subordinate clauses or phrases. (See B3.) Subordinate clauses, which cannot stand
alone, typically begin with one of the following subordinating conjunctions or relative pronouns.

<p>| | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>after</td>
<td>since</td>
<td>whether</td>
</tr>
<tr>
<td>although</td>
<td>so that</td>
<td>which</td>
</tr>
<tr>
<td>as</td>
<td>that</td>
<td>while</td>
</tr>
<tr>
<td>as if</td>
<td>though</td>
<td>who</td>
</tr>
<tr>
<td>because</td>
<td>unless</td>
<td>whom</td>
</tr>
<tr>
<td>before</td>
<td>until</td>
<td>whose</td>
</tr>
<tr>
<td>even though</td>
<td>when</td>
<td></td>
</tr>
<tr>
<td>if</td>
<td>where</td>
<td></td>
</tr>
</tbody>
</table>

Let your intended meaning determine which idea you emphasize. Consider the two ideas about social networking Web sites.

Social networking Web sites offer ways for people to connect in the virtual world. They do not replace face-to-face social interaction.

If your purpose is to stress the ways that people can connect in the virtual world rather than the limitations of these connections, subordinate the idea about the limitations.

Although they do not replace face-to-face social interaction, social networking Web sites offer ways for people to connect in the virtual world.

To focus on the limitations of the virtual world, subordinate the idea about the Web sites.

Although social networking Web sites offer ways for people to connect in the virtual world, they do not replace face-to-face social interaction.

**S6-b Combine choppy sentences.**

Short sentences demand attention, so you should use them primarily for emphasis. Too many short sentences, one after the other, make for a choppy style.

If an idea is not important enough to deserve its own sentence, try combining it with a sentence close by. Put any minor ideas in subordinate structures such as phrases or subordinate clauses. (See B3.)

► The Parks Department keeps the use of insecticides to a minimum/ because the city is concerned about the environment.
The writer wanted to emphasize that the Parks Department minimizes its use of chemicals, so she put the reason in a subordinate clause beginning with because.

- The Chesapeake and Ohio Canal, is a 184-mile waterway constructed in the 1800s. It was a major source of transportation for goods during the Civil War.

A minor idea is now expressed in an appositive phrase (a 184-mile waterway constructed in the 1800s).

- Sister Consilio was enveloped in a black robe with only her face and hands visible. She was an imposing figure.

Because Sister Consilio’s overall impression was more important to the writer’s purpose, the writer put the description of the clothing in a participial phrase beginning with Enveloped.

Although subordination is ordinarily the most effective technique for combining short, choppy sentences, coordination is appropriate when the ideas are equal in importance.

- At 3:30 p.m., Forrest displayed a flag of truce. Forrest sent in a demand for unconditional surrender.

Combining two short sentences by joining their predicates (displayed . . . sent) is an effective coordination technique.

**ESL** Unlike some other languages, English does not repeat objects or adverbs in adjective clauses. The relative pronoun (that, which, whom) or relative adverb (where) in the adjective clause represents the object or adverb. See M3-d.

- The apartment that we rented it needed repairs.

  The pronoun it cannot repeat the relative pronoun that.

- The small town where my grandfather was born there is now a big city.

  The adverb there cannot repeat the relative adverb where.
S6-c Avoid ineffective or excessive coordination.

Coordinate structures are appropriate only when you intend to draw readers’ attention equally to two or more ideas: *Professor Sakellarios praises loudly, and she criticizes softly.* If one idea is more important than another—or if a coordinating conjunction does not clearly signal the relationship between the ideas—you should subordinate the less important idea.

**INEFFECTIVE**

Closets were taxed as rooms, and most colonists stored their clothes in chests or clothespresses.

**COORDINATION**

Because closets were taxed as rooms, most colonists stored their clothes in chests or clothespresses.

**IMPROVED WITH SUBORDINATION**

Because it is so easy to string ideas together with *and*, writers often rely too heavily on coordination in their rough drafts. Revising for excessive coordination is important: Look for opportunities to tuck minor ideas into subordinate clauses or phrases.

*After four hours,*

▶ Four hours went by, and a rescue truck finally arrived, but by that time we had been evacuated in a helicopter.

Three independent clauses were excessive. The least important idea has become a prepositional phrase.

S6-d Do not subordinate major ideas.

If a sentence buries its major idea in a subordinate construction, readers may not give the idea enough attention. Make sure to express your major idea in an independent clause and to subordinate any minor ideas.

*defeated Thomas E. Dewey,*

▶ Harry S. Truman, who was the unexpected winner of the 1948 presidential election, defeated Thomas E. Dewey.

The writer wanted to focus on Truman’s unexpected victory, but the original sentence buried this information in an adjective clause. The revision puts the more important idea in an independent clause and tucks the less important idea into an adjective clause (*who defeated Thomas E. Dewey*).

▶ I was driving home from my new job, heading down Ranchitos Road, when my car suddenly overheated.
The writer wanted to emphasize that the car overheated, not the fact of driving home. The revision expresses the major idea in an independent clause and places the less important idea in an adverb clause (As I was driving home from my new job).

S6-e  Do not subordinate excessively.

In attempting to avoid short, choppy sentences, writers sometimes go to the opposite extreme, putting more subordinate ideas into a sentence than its structure can bear. Sentences that become too complicated can sometimes be restructured. More often, however, such sentences must be divided.

► In Animal Liberation, Peter Singer argues that animals possess nervous systems and can feel pain. and that he therefore believes that “the ethical principle on which human equality rests requires us to extend equal consideration to animals” (1).

Excessive subordination makes it difficult for the reader to focus on the quoted passage. By splitting the original sentence into two separate sentences, the writer draws attention to Peter Singer’s main claim, that animals should be given “equal consideration” to humans.

S6-f  Experiment with techniques for gaining special emphasis.

By experimenting with certain techniques, usually involving some element of surprise, you can draw attention to ideas that deserve special emphasis. Use such techniques sparingly, however, or they will lose their punch. The writer who tries to emphasize everything ends up emphasizing nothing.

Using sentence endings for emphasis

You can highlight an idea simply by withholding it until the end of a sentence. The technique works something like a punch line. In the following example, the sentence’s meaning is not revealed until its very last word.

The only completely consistent people are the dead.

— Aldous Huxley
Using parallel structure for emphasis

Parallel grammatical structure draws special attention to paired ideas or to items in a series. (See S1.) When parallel ideas are paired, the emphasis falls on words that underscore comparisons or contrasts, especially when they occur at the end of a phrase or clause.

We must stop talking about the American dream and start listening to the dreams of Americans. — Reubin Askew

In a parallel series, the emphasis falls at the end, so it is generally best to end with the most dramatic or climactic item in the series.

Sister Charity enjoyed passing out writing punishments: translate the Ten Commandments into Latin, type a thousand-word essay on good manners, copy the New Testament with a quill pen.

— Marie Visosky, student

Using an occasional short sentence for emphasis

Too many short sentences in a row will fast become monotonous (see S6-b), but an occasional short sentence, when played off against longer sentences in the same passage, will draw attention to an idea.

The great secret, known to internists and learned early in marriage by internists’ wives [or husbands], but still hidden from the general public, is that most things get better by themselves. Most things, in fact, are better by morning. — Lewis Thomas

S7 Sentence variety

When a rough draft is filled with too many sentences that begin the same way or have the same structure, try injecting some variety—as long as you can do so without sacrificing clarity or ease of reading.

S7-a Use a variety of sentence structures.

A writer should not rely too heavily on simple sentences and compound sentences, for the effect tends to be both monotonous and choppy. (See S6-b and S6-c.) Too many complex or compound-complex sentences, however, can be equally monotonous. If your style tends to one or the other extreme, try to achieve a better mix of sentence types. For a discussion of sentence types, see B4-a.
S7-b Vary your sentence openings.

Most sentences in English begin with the subject, move to the verb, and continue to the object, with modifiers tucked in along the way or put at the end. For the most part, such sentences are fine. Put too many of them in a row, however, and they become monotonous.

Adverbial modifiers are easily movable when they modify verbs; they can often be inserted ahead of the subject. Such modifiers might be single words, phrases, or clauses.

Eventually a

A few drops of sap eventually began to trickle into the bucket.

Like most adverbs, eventually does not need to appear close to the verb it modifies (began).

Just as the sun was coming up, a

A pair of black ducks flew over the pond, just as the sun was coming up.

The adverb clause, which modifies the verb flew, is as clear at the beginning of the sentence as it is at the end.

Adjectives and participial phrases can frequently be moved to the beginning of a sentence without loss of clarity.

Dejected and withdrawn,

Edward, dejected and withdrawn, nearly gave up his search for a job.

John and I

John and I, anticipating a peaceful evening, sat down at the campfire to brew a cup of coffee.

TIP: When beginning a sentence with an adjective or a participial phrase, make sure that the subject of the sentence names the person or thing described in the introductory phrase. If it doesn’t, the phrase will dangle. (See S3-e.)

S7-c Try inverting sentences occasionally.

A sentence is inverted if it does not follow the normal subject-verb-object pattern. Many inversions sound artificial and should be avoided except in the most formal contexts. But if an inversion sounds natural, it can provide a welcome touch of variety.
Opposite the produce section is a refrigerated case of cheeses. The revision inverts the normal subject-verb order by moving the verb, is, ahead of its subject, case.

Placed at the top two corners of the stage were huge lavender hearts outlined in bright white lights. In the revision, the subject, hearts, appears after the verb, were placed. The two parts of the verb are also inverted—and separated from each other (Placed . . . were)—without any awkwardness or loss of meaning.

Inverted sentences are used for emphasis as well as for variety (see S6-f).
Word Choice
Glossary of usage, 139

Wordy sentences, 153
  a Redundancies, 153
  b Unnecessary repetition, 153
  c Empty or inflated phrases, 154
  d Simplified structure, 155
  e Reducing clauses to phrases, phrases to single words, 156

Active verbs, 156

The dictionary and thesaurus, 169
  a The dictionary, 169
  b The thesaurus, 172
This glossary includes words commonly confused (such as accept and except), words commonly misused (such as aggravate), and words that are nonstandard (such as hisself). It also lists colloquialisms and jargon. Colloquialisms are casual expressions that may be appropriate in informal speech but are inappropriate in formal writing. Jargon is needlessly technical or pretentious language that is inappropriate in most contexts. If an item is not listed here, consult the index. For irregular verbs (such as sing, sang, sung), see G2-a. For idiomatic use of prepositions, see W5-d.

**a, an** Use *an* before a vowel sound, *a* before a consonant sound: *an apple, a peach*. Problems sometimes arise with words beginning with *h* or *u*. If the *h* is silent, the word begins with a vowel sound, so use *an*: *an hour, an honorable deed*. If the *h* is pronounced, the word begins with a consonant sound, so use *a*: *a hospital, a historian, a hotel*. Words such as *university* and *union* begin with a consonant sound (*a y sound*), so use *a*: *a union*. Words such as *uncle* and *umbrella* begin with a vowel sound, so use *an*: *an underground well*. When an abbreviation or an acronym begins with a vowel sound, use *an*: *an EKG, an MRI, an AIDS prevention program*.

**accept, except** *Accept* is a verb meaning “to receive.” *Except* is usually a preposition meaning “excluding.” *I will accept all the packages except that one.* *Except* is also a verb meaning “to exclude.” *Please except that item from the list.*

**adapt, adopt** *Adapt* means “to adjust or become accustomed”; it is usually followed by *to*. *Adopt* means “to take as one’s own.” *Our family adopted a Vietnamese child, who quickly adapted to his new life.*

**adverse, averse** *Adverse* means “unfavorable.” *Averse* means “opposed” or “reluctant”; it is usually followed by *to*. *I am averse to your proposal because it could have an adverse impact on the economy.*

**advice, advise** *Advice* is a noun, *advise* a verb. *We advise you to follow John’s advice.*

**affect, effect** *Affect* is usually a verb meaning “to influence.” *Effect* is usually a noun meaning “result.” *The drug did not affect the disease, and it had adverse side effects.* *Effect* can also be a verb meaning “to bring about.” *Only the president can effect such a dramatic change.*

**aggravate** *Aggravate* means “to make worse or more troublesome.” *Over-grazing aggravated the soil erosion.* In formal writing, avoid the use of *aggravate* meaning “to annoy or irritate.” *Her babbling annoyed (not aggravated) me.*
agree to, agree with  Agree to means “to give consent to.” Agree with means “to be in accord with” or “to come to an understanding with.” He agrees with me about the need for change, but he won’t agree to my plan.

ain’t  Ain’t is nonstandard. Use am not, are not (aren’t), or is not (isn’t). I am not (not ain’t) going home for spring break.

all ready, already  All ready means “completely prepared.” Already means “previously.” Susan was all ready for the concert, but her friends had already left.

all right  All right is written as two words. Alright is nonstandard.

all together, altogether  All together means “everyone or everything in one place.” Altogether means “entirely.” We were not altogether certain that we could bring the family all together for the reunion.

allude  To allude to something is to make an indirect reference to it. Do not use allude to mean “to refer directly.” In his lecture, the professor referred (not alluded) to several pre-Socratic philosophers.

allusion, illusion  An allusion is an indirect reference. An illusion is a misconception or false impression. Did you catch my allusion to Shakespeare? Mirrors give the room an illusion of depth.

a lot  A lot is two words. Do not write alot. Sam lost a lot of weight. See also lots, lots of.

among, between  See between, among.

amongst  In American English, among is preferred.

amoral, immoral  Amoral means “neither moral nor immoral”; it also means “not caring about moral judgments.” Immoral means “morally wrong.” Until recently, most business courses were taught from an amoral perspective. Murder is immoral.

amount, number  Use amount with quantities that cannot be counted; use number with those that can. This recipe calls for a large amount of sugar. We have a large number of toads in our garden.

an  See a, an.

and etc.  Et cetera (etc.) means “and so forth”; and etc. is redundant. See also etc.

and/or  Avoid the awkward construction and/or except in technical or legal documents.

angry at, angry with  Use angry with, not angry at, when referring to a person. The coach was angry with the referee.

ante-, anti-  The prefix ante- means “earlier” or “in front of”; the prefix anti- means “against” or “opposed to.” William Lloyd Garrison was a leader of the antislavery movement during the antebellum period. Anti- should be
used with a hyphen when it is followed by a capital letter or a word beginning with i.

**anxious**  
**Anxious** means “worried” or “apprehensive.” In formal writing, avoid using **anxious** to mean “eager.” We are eager (not anxious) to see your new house.

**anybody, anyone**  
**Anybody** and **anyone** are singular. (See G1-e and G3-a.)

**anymore**  
Use the adverb **anymore** in a negative context to mean “any longer” or “now.” The factory isn’t producing shoes anymore. Using anymore in a positive context is colloquial; in formal writing, use now instead. We order all our food online now (not anymore).

**anyone**  
See anybody, anyone.

**anyone, any one**  
**Anyone**, an indefinite pronoun, means “any person at all.” **Any one**, the pronoun **one** preceded by the adjective **any**, refers to a particular person or thing in a group. Anyone from the winning team may choose any one of the games on display.

**anyplace**  
In formal writing, use anywhere.

**anyways, anywheres**  
**Anyways** and **anywheres** are nonstandard. Use any-way and anywhere.

**as**  
Do not use as to mean “because” if there is any chance of ambiguity. We canceled the picnic because (not as) it began raining. As here could mean either “because” or “when.”

**as, like**  
See like, as.

**as to**  
As to is jargon for about. He inquired about (not as to) the job.

**averse**  
See adverse, averse.

**awful**  
The adjective **awful** and the adverb **awfully** are not appropriate in formal writing.

**awhile, a while**  
**Awhile** is an adverb; it can modify a verb, but it cannot be the object of a preposition such as for. The two-word form a **while** is a noun preceded by an article and therefore can be the object of a preposition. Stay awhile. Stay for a while.

**back up, backup**  
**Back up** is a verb phrase. **Back up the car carefully.** Be sure to **back up your hard drive.** **Backup** is a noun meaning “a copy of electronically stored data.” **Keep your backup in a safe place.** **Backup** can also be used as an adjective. I regularly create **backup disks.**

**bad, badly**  
**Bad** is an adjective, **badly** an adverb. They felt bad about ruining the surprise. **Her arm hurt badly af-“ter she slid into second base.** (See G4-a and G4-b.)

**being as, being that**  
**Being as** and **being that** are nonstandard expressions. Write because instead. Because (not Being as) I slept late, I had to skip breakfast.
beside, besides  Beside is a preposition meaning “at the side of” or “next to.” Annie Oakley slept with her gun beside her bed. Besides is a preposition meaning “except” or “in addition to.” No one besides Terrie can have that ice cream. Besides is also an adverb meaning “in addition.” I’m not hungry; besides, I don’t like ice cream.

between, among  Ordinarily, use among with three or more entities, between with two. The prize was divided among several contestants. You have a choice between carrots and beans.

bring, take  Use bring when an object is being transported toward you, take when it is being moved away. Please bring me a glass of water. Please take these forms to Mr. Scott.

burst, bursted; bust, busted  Burst is an irregular verb meaning “to come open or fly apart suddenly or violently.” Its past tense is burst. The past-tense form bursted is nonstandard. Bust and busted are slang for burst and, along with bursted, should not be used in formal writing.

can, may  The distinction between can and may is fading, but some writers still observe it in formal writing. Can is traditionally reserved for ability, may for permission. Can you speak French? May I help you?

capital, capitol  Capital refers to a city, capitol to a building where lawmakers meet. Capital also refers to wealth or resources. The residents of the state capital protested plans to close the streets surrounding the capitol.

censor, censure  Censor means “to remove or suppress material considered objectionable.” Censure means “to criticize severely.” The administration’s policy of censoring books has been censured by the media.

cite, site  Cite means “to quote as an authority or example.” Site is usually a noun meaning “a particular place.” He cited the zoning law in his argument against the proposed site of the gas station. Locations on the Internet are usually referred to as sites. The library’s Web site improves every week.

climactic, climatic  Climactic is derived from climax, the point of greatest intensity in a series or progression of events. Climatic is derived from climate and refers to meteorological conditions. The climactic period in the dinosaurs’ reign was reached just before severe climatic conditions brought on an ice age.

coarse, course  Coarse means “crude” or “rough in texture.” The coarse weave of the wall hanging gave it a three-dimensional quality. Course usually refers to a path, a playing field, or a unit of study; the expression of course means “certainly.” I plan to take a course in car repair this summer. Of course, you are welcome to join me.

compare to, compare with  Compare to means “to represent as similar.” She compared him to a wild stallion. Compare with means “to examine
similarities and differences. The study compared the language ability of apes with that of dolphins.

**complement, compliment**  
Complement is a verb meaning “to go with or complete” or a noun meaning “something that completes.” As a verb, complement means “to flatter”; as a noun, it means “flattering remark.” Her skill at rushing the net complements his skill at volleying. Martha’s flower arrangements receive many compliments.

**conscience, conscious**  
Conscience is a noun meaning “moral principles.” Conscious is an adjective meaning “aware or alert.” Let your conscience be your guide. Were you conscious of his love for you?

**continual, continuous**  
Continual means “repeated regularly and frequently.” She grew weary of the continual telephone calls. Continuous means “extended or prolonged without interruption.” The broken siren made a continuous wail.

**could care less**  
Could care less is nonstandard. Write couldn’t care less instead. He couldn’t (not could) care less about his psychology final.

**could of**  
Could of is nonstandard for could have. We could have (not could of) taken the train.

**council, counsel**  
A council is a deliberative body, and a counselor is a member of such a body. Counsel usually means “advice” and can also mean “lawyer”; a counselor is one who gives advice or guidance. The counselors met to draft the council’s position paper. The pastor offered wise counsel to the troubled teenager.

**criteria**  
Criteria is the plural of criterion, which means “a standard or rule or test on which a judgment or decision can be based.” The only criterion for the scholarship is ability.

**data**  
Data is a plural noun technically meaning “facts or propositions.” But data is increasingly being accepted as a singular noun. The new data suggest (or suggests) that our theory is correct. (The singular datum is rarely used.)

**different from, different than**  
Ordinarily, write different from. Your sense of style is different from Jim’s. However, different than is acceptable to avoid an awkward construction. Please let me know if your plans are different than (to avoid from what) they were six weeks ago.

**differ from, differ with**  
Differ from means “to be unlike”; differ with means “to disagree with.” My approach to the problem differed from hers. She differed with me about the wording of the agreement.

**disinterested, uninterested**  
Disinterested means “impartial, objective”; uninterested means “not interested.” We sought the advice of a disinterested counselor to help us solve our problem. Mark was uninterested in anyone’s opinion but his own.
don’t  *Don’t* is the contraction for *do not*. *I don’t want any.* *Don’t* should not be used as the contraction for *does not*, which is *doesn’t*. *He doesn’t (not don’t) want any.*

due to  *Due to* is an adjective phrase and should not be used as a preposition meaning “because of.” *The trip was canceled because of (not due to) lack of interest.* *Due to* is acceptable as a subject complement and usually follows a form of the verb *be*. *His success was due to hard work.*

each  *Each* is singular. (See G1-e and G3-a.)

effect  See *affect*, *effect*.

e.g.  In formal writing, replace the Latin abbreviation *e.g.* with its English equivalent: *for example* or *for instance*.

either  *Either* is singular. (See G1-e and G3-a.) For *either . . . or* constructions, see G1-d and G-3a.

elicit, illicit  *Elicit* is a verb meaning “to bring out” or “to evoke.” *Illicit* is an adjective meaning “unlawful.” *The reporter was unable to elicit any information from the police about illicit drug traffic.*

emigrate from, immigrate to  *Emigrate* means “to leave one country or region to settle in another.” *In 1903, my great-grandfather emigrated from Russia to escape the religious pogroms. Immigrate* means “to enter another country and reside there.” *More than fifty thousand Bosnians immigrated to the United States in the 1990s.*

eminent, imminent  *Eminent* means “outstanding” or “distinguished.” *We met an eminent professor of Greek history. Imminent* means “about to happen.” *The snowstorm is imminent.*

enthused  Many people object to the use of *enthused* as an adjective. Use *enthusiastic* instead. *The children were enthusiastic (not enthused) about going to the circus.*

etc.  Avoid ending a list with *etc.* It is more emphatic to end with an example, and in most contexts readers will understand that the list is not exhaustive. When you don’t wish to end with an example, *and so on* is more graceful than *etc.* (See also *and etc.*)

eventually, ultimately  Often used interchangeably, *eventually* is the better choice to mean “at an unspecified time in the future,” and *ultimately* is better to mean “the furthest possible extent or greatest extreme.” *He knew that eventually he would complete his degree. The existentialists considered suicide the ultimately rational act.*

everybody, everyone  *Everybody* and *everyone* are singular. (See G1-e and G3-a.)

everyone, every one  *Everyone* is an indefinite pronoun. *Every one*, the pronoun *one* preceded by the adjective *every*, means “each individual or thing in a particular group.” *Every one* is usually followed by *of*. *Everyone wanted to go. Every one of the missing books was found.*
except  See accept, except.

expect  Avoid the informal use of expect meaning “to believe, think, or suppose.” *I think (not expect) it will rain tonight.*

explicit, implicit  Explicit means “expressed directly” or “clearly defined”; implicit means “implied, unstated.” *I gave him explicit instructions not to go swimming. My mother’s silence indicated her implicit approval.*

farther, further  Farther usually describes distances. Further usually suggests quantity or degree. *Chicago is farther from Miami than I thought. I would be grateful for further suggestions.*

fewer, less  Use fewer for items that can be counted; use less for items that cannot be counted. *Fewer people are living in the city. Please put less sugar in my tea.*

finalize  Finalize is jargon meaning “to make final or complete.” Use ordinary English instead. *The architect prepared final drawings (not finalized the drawings).*

firstly  Firstly sounds pretentious, and it leads to the ungainly series firstly, secondly, thirdly, and so on. Write first, second, third instead.

further  See farther, further.

get  Get has many colloquial uses. In writing, avoid using get to mean the following: “to evoke an emotional response” (*That music always gets to me*); “to annoy” (*After a while his sulking got to me*); “to take revenge on” (*I got back at her by leaving the room*); “to become” (*He got sick*); “to start or begin” (*Let’s get going*). Avoid using have got to in place of must. *I must (not have got to) finish this paper tonight.*

good, well  Good is an adjective, well an adverb. (See G4-a and G4-b.) He hasn’t felt good about his game since he sprained his wrist last season. She performed well on the uneven parallel bars.

graduate  Both of the following uses of graduate are standard: *My sister was graduated from UCLA last year. My sister graduated from UCLA last year.* It is nonstandard, however, to drop the word from: *My sister graduated UCLA last year.* Though this usage is common in informal English, many readers object to it.

grow  Phrases such as to grow the economy and to grow a business are jargon. Usually the verb grow is intransitive (it does not take a direct object). *Our business has grown very quickly.* Use grow in a transitive sense, with a direct object, to mean “to cultivate” or “to allow to grow.” *We plan to grow tomatoes this year. John is growing a beard.*

hanged, hung  Hanged is the past-tense and past-participle form of the verb hang meaning “to execute.” *The prisoner was hanged at dawn.* Hung is the past-tense and past-participle form of the verb hang meaning “to fasten or suspend.” *The stockings were hung by the chimney with care.*
hardly  Avoid expressions such as can’t hardly and not hardly, which are considered double negatives. I can (not can’t) hardly describe my surprise at getting the job. (See G4-d.)

has got, have got  Got is unnecessary and awkward in such constructions. It should be dropped. We have (not have got) three days to prepare for the opening.

he  At one time he was commonly used to mean “he or she.” Today such usage is inappropriate. (See W4-e and G3-a.)

he/she, his/her  In formal writing, use he or she or his or her. For alternatives to these wordy constructions, see W4-e and G3-a.

hisself  Hisself is nonstandard. Use himself.

hopefully  Hopefully means “in a hopeful manner.” We looked hopefully to the future. Some usage experts object to the use of hopefully as a sentence adverb, apparently on grounds of clarity. To be safe, avoid using hopefully in sentences such as the following: Hopefully, your son will recover soon. Instead, indicate who is doing the hoping: I hope that your son will recover soon.

however  In the past, some writers objected to the conjunctive adverb however at the beginning of a sentence, but current experts allow placing the word according to the intended meaning and emphasis. All of the following sentences are correct. Pam decided, however, to attend the lecture. However, Pam decided to attend the lecture. (She had been considering other activities.) Pam, however, decided to attend the lecture. (Unlike someone else, Pam chose to attend the lecture.) (See P1-f.)

hung  See hanged, hung.

i.e.  In formal writing, replace the Latin abbreviation i.e. with its English equivalent: that is.

if, whether  Use if to express a condition and whether to express alternatives. If you go on a trip, whether to Nebraska or Italy, remember to bring traveler’s checks.

illusion  See allusion, illusion.

immigrate  See emigrate from, immigrate to.

imminent  See eminent, imminent.

immoral  See amoral, immoral.

implement  Implement is a pretentious way of saying “do,” “carry out,” or “accomplish.” Use ordinary language instead. We carried out (not implemented) the director’s orders.

imply, infer  Imply means “to suggest or state indirectly”; infer means “to draw a conclusion.” John implied that he knew all about computers, but the interviewer inferred that John was inexperienced.
**in, into**  
*In* indicates location or condition; *into* indicates movement or a change in condition. They found the lost letters in a box after moving into the house.

**in regards to**  
*In regards to* confuses two different phrases: *in regard to* and *as regards*. Use one or the other. *In regard to* (or *As regards*) the contract, ignore the first clause.

**irregardless**  
*Irregardless* is nonstandard. Use *regardless*.

**is when, is where**  
These mixed constructions are often incorrectly used in definitions. A run-off election is a second election held to break a tie (not *is when a second election is held to break a tie*). (See S5-c.)

**its, it’s**  
*Its* is a possessive pronoun; *it’s* is a contraction for *it is*. (See P4-a and P4-b.) *It’s* always fun to watch a dog chase *its* tail.

**kind(s)**  
*Kind* is singular and should be treated as such. Don’t write *These kind of chairs are rare*. Write instead *This kind of chair is rare*. *Kinds* is plural and should be used only when you mean more than one kind. *These kinds of chairs are rare*.

**kind of, sort of**  
Avoid using *kind of* or *sort of* to mean “somewhat.” *The movie was somewhat* (not *sort of*) boring. Do not put *a* after either phrase. *That kind of* (not *kind of a*) salesclerk annoys me.

**lay, lie**  
See *lie*, *lay*.

**lead, led**  
*Lead* is a metallic element; it is a noun. *Led* is the past tense of the verb *lead*. He led me to the treasure.

**learn, teach**  
*Learn* means “to gain knowledge”; *teach* means “to impart knowledge.” I must teach (not *learn*) my sister to read.

**leave, let**  
*Leave* means “to exit.” Avoid using it with the nonstandard meaning “to permit.” *Let* (not *Leave*) me help you with the dishes.

**less**  
See *fewer*, *less*.

**let, leave**  
See *leave*, *let*.

**liable**  
*Liable* means “obligated” or “responsible.” Do not use it to mean “likely.” You’re likely (not *liable*) to trip if you don’t tie your shoelaces.

**lie, lay**  
*Lie* is an intransitive verb meaning “to recline or rest on a surface.” Its forms are *lie*, *lay*, *lain*. *Lay* is a transitive verb meaning “to put or place.” Its forms are *lay*, *laid*, *laid*. (See G2-b.)

**like, as**  
*Like* is a preposition, not a subordinating conjunction. It can be followed only by a noun or a noun phrase. *As* is a subordinating conjunction that introduces a subordinate clause. In casual speech, you may say *She looks like she hasn’t slept* or *You don’t know her like I do*. But in formal writing, use *as*. *She looks as if she hasn’t slept. You don’t know her as I do*. (See also B1-f and B1-g.)
loose, lose  
*Loose* is an adjective meaning “not securely fastened.” *Lose* is a verb meaning “to misplace” or “to not win.” *Did you lose your only loose pair of work pants?*

lots, lots of  
Lots and lots of are informal substitutes for many, much, or a lot. Avoid using them in formal writing.

mankind  
Avoid *mankind* whenever possible. It offenders many readers because it excludes women. Use humanity, humans, the human race, or humankind instead. (See W4-e.)

may  
See can, may.

maybe, may be  
*Maybe* is an adverb meaning “possibly.” *Maybe the sun will shine tomorrow.* May be is a verb phrase. *Tomorrow may be brighter.*

may of, might of  
May of and might of are nonstandard for may have and might have. We might have (not might of) had too many cookies.

media, medium  
Media is the plural of medium. Of all the media that cover the Olympics, television is the medium that best captures the spectacle of the events.

most  
Most is informal when used to mean “almost” and should be avoided.

must of  
See may of.

myself  
*Myself* is a reflexive or intensive pronoun. Reflexive: *I cut myself.* Intensive: *I will drive you myself.* Do not use myself in place of I or me. *He gave the flowers to Melinda and me (not myself).* (See also G3-c.)

neither  
*Neither* is singular. (See G1-e and G3-a.) For neither . . . nor constructions, see G1-d and G3-a.

none  
None may be singular or plural. (See G1-e.)

nowheres  
*Nowheres* is nonstandard. Use nowhere instead.

number  
See amount, number.

of  
Use the verb have, not the preposition of, after the verbs could, should, would, may, might, and must. *They must have (not must of) left early.*

off of  
Off is sufficient. Omit of. *The ball rolled off (not off of) the table.*

OK, O.K., okay  
All three spellings are acceptable, but avoid these expressions in formal speech and writing.

parameters  
*Parameter* is a mathematical term that has become jargon for “fixed limit,” “boundary,” or “guideline.” Use ordinary English instead. *The task force worked within certain guidelines (not parameters).*

passed, past  
*Passed* is the past tense of the verb pass. *Ann passed me another slice of cake.* Past usually means “belonging to a former time” or
“beyond a time or place.” Our past president spoke until past midnight. The hotel is just past the next intersection.

**percent, per cent, percentage** Percent (also spelled per cent) is always used with a specific number. Percentage is used with a descriptive term such as large or small, not with a specific number. The candidate won 80 percent of the primary vote. A large percentage of registered voters turned out for the election.

**phenomena** Phenomena is the plural of phenomenon, which means “an observable occurrence or fact.” Strange phenomena occur at all hours of the night in that house, but last night’s phenomenon was the strangest of all.

**plus** Plus should not be used to join independent clauses. This raincoat is dirty; moreover (not plus), it has a hole in it.

**precede, proceed** Precede means “to come before.” Proceed means “to go forward.” As we proceeded up the mountain path, we noticed fresh tracks in the mud, evidence that a group of hikers had preceded us.

**principal, principle** Principal is a noun meaning “the head of a school or an organization” or “a sum of money.” It is also an adjective meaning “most important.” Principle is a noun meaning “a basic truth or law.” The principal expelled her for three principal reasons. We believe in the principle of equal justice for all.

**proceed, precede** See precede, proceed.

**quote, quotation** Quote is a verb; quotation is a noun. Avoid using quote as a shortened form of quotation. Her quotations (not quotes) from current movies intrigued us.

**raise, rise** Raise is a transitive verb meaning “to move or cause to move upward.” It takes a direct object. I raised the shades. Rise is an intransitive verb meaning “to go up.” Heat rises.

**real, really** Real is an adjective; really is an adverb. Real is sometimes used informally as an adverb, but avoid this use in formal writing. She was really (not real) angry. (See G4-b.)

**reason . . . is because** Use that instead of because. The reason she’s cranky is that (not because) she didn’t sleep last night. (See S5-c.)

**reason why** The expression reason why is redundant. The reason (not The reason why) Jones lost the election is clear.

**relation, relationship** Relation describes a connection between things. Relationship describes a connection between people. There is a relation between poverty and infant mortality. Our business relationship has cooled over the years.

**respectfully, respectively** Respectfully means “showing or marked by respect.” Respectively means “each in the order given.” He respectfully
submitted his opinion to the judge. John, Tom, and Larry were a butcher, a baker, and a lawyer, respectively.

**sensual, sensuous** Sensual means “gratifying the physical senses,” especially those associated with sexual pleasure. Sensuous means “pleasing to the senses,” especially those involved in the experience of art, music, and nature. The sensuous music and balmy air led the dancers to more sensual movements.

**set, sit** Set is a transitive verb meaning “to put” or “to place.” Its past tense is set. Sit is an intransitive verb meaning “to be seated.” Its past tense is sat. She set the dough in a warm corner of the kitchen. The cat sat in the doorway.

**shall, will** Shall was once used in place of the helping verb will with I or we: I shall, we shall. Today, however, will is generally accepted even when the subject is I or we. The word shall occurs primarily in polite questions (Shall I find you a pillow?) and in legalistic sentences suggesting duty or obligation (The applicant shall file form A by December 31).

**should of** Should of is nonstandard for should have. They should have (not should of) been home an hour ago.

**since** Do not use since to mean “because” if there is any chance of ambiguity. Because (not Since) we won the game, we have been celebrating with a pitcher of root beer. Since here could mean “because” or “from the time that.”

**sit** See set, sit.

**site** See cite, site.

**somebody, someone** Somebody and someone are singular. (See G1-e and G3-a.)

**something** Something is singular. (See G1-e.)

**sometime, some time, sometimes** Sometime is an adverb meaning “at an indefinite or unstated time.” Some time is the adjective some modifying the noun time and means “a period of time.” Sometimes is an adverb meaning “at times, now and then.” I’ll see you sometime soon. I haven’t lived there for some time. Sometimes I see him at the library.

**suppose to** Write supposed to.

**sure and** Write sure to. We were all taught to be sure to (not sure and) look both ways before crossing a street.

**take** See bring, take.

**than, then** Than is a conjunction used in comparisons; then is an adverb denoting time. That pizza is more than I can eat. Tom laughed, and then we recognized him.

**that** See who, which, that.
that, which  Many writers reserve *that* for restrictive clauses, *which* for nonrestrictive clauses. (See P1-e.)

themselves  *Themselves* is nonstandard for *themselves*. *The crash victims pushed the car out of the way themselves* (not *themselves*).

them  The use of *them* in place of *those* is nonstandard. *Please take those (not *them*) flowers to the patient in room 220.*

then, than  See *than*, *then*.

there, their, they’re  *There* is an adverb specifying place; it is also an expletive (placeholder). Adverb: *Sylvia is lying there unconscious*. Expletive: *There are two plums left*. *Their* is a possessive pronoun. *Fred and Jane finally washed their car. They’re is a contraction of *they* are. They’re later than usual today.*

they  The use of *they* to indicate possession is nonstandard. Use *their* instead. *Cindy and Sam decided to sell their (not *they*) 1975 Corvette.*

they, their  The use of the plural pronouns *they* and *their* to refer to singular nouns or pronouns is nonstandard. *No one handed in his or her (not *their*) draft on time.* (See G3-a.)

this kind  See *kind(s).*

to, too, two  *To* is a preposition; *too* is an adverb; *two* is a number. *Too many of your shots slice to the left, but the last two were just right.*

toward, towards  *Toward* and *towards* are generally interchangeable, although *toward* is preferred in American English.

try and  *Try and* is nonstandard for *try to*. *The teacher asked us all to try to (not *try and*) write an original haiku.*

ultimately, eventually  See *eventually, ultimately.*

unique  Avoid expressions such as *most unique*, *more straight*, *less perfect*, *very round*. Either something is unique or it isn’t. It is illogical to suggest degrees of uniqueness. (See G4-c.)

usage  The noun *usage* should not be substituted for *use* when the meaning is “employment of.” *The use (not *usage*) of insulated shades has cut fuel costs dramatically.*

use to  Write *used to*.

utilize  *Utilize* means “to make use of.” It often sounds pretentious; in most cases, *use* is sufficient. *I used (not utilized) the laser printer.*

wait for, wait on  *Wait for* means “to be in readiness for” or “to await.” *Wait on* means “to serve.” *We’re only waiting for (not waiting on) Ruth to take us to the museum.*

ways  Ways is colloquial when used to mean “distance.” *The city is a long way (not *ways*) from here.*
weather, whether  The noun weather refers to the state of the atmosphere. Whether is a conjunction referring to a choice between alternatives. We wondered whether the weather would clear.

well, good  See good, well.

where  Do not use where in place of that. I heard that (not where) the crime rate is increasing.

which  See that, which and who, which, that.

while  Avoid using while to mean “although” or “whereas” if there is any chance of ambiguity. Although (not While) Gloria lost money in the slot machine, Tom won it at roulette. Here While could mean either “although” or “at the same time that.”

who, which, that  Do not use which to refer to persons. Use who instead. That, though generally used to refer to things, may be used to refer to a group or class of people. The player who (not that or which) made the basket at the buzzer was named MVP. The team that scores the most points in this game will win the tournament.

who, whom  Who is used for subjects and subject complements; whom is used for objects. (See G3-d.)

who’s, whose  Who’s is a contraction of who is; whose is a possessive pronoun. Who’s ready for more popcorn? Whose coat is this? (See P4-b and P4-a.)

will  See shall, will.

would of  Would of is nonstandard for would have. She would have (not would of) had a chance to play if she had arrived on time.

you  In formal writing, avoid you in an indefinite sense meaning “anyone.” (See G3-b.) Any spectator (not You) could tell by the way John caught the ball that his throw would be too late.

your, you’re  Your is a possessive pronoun; you’re is a contraction of you are. Is that your new bike? You’re in the finals. (See P4-a and P4-b.)
W2 Wordy sentences

Long sentences are not necessarily wordy, nor are short sentences always concise. A sentence is wordy if it can be tightened without loss of meaning.

W2-a Eliminate redundancies.

Writers often repeat themselves unnecessarily, thinking that expressions such as *cooperate together*, *yellow in color*, or *basic essentials* add emphasis to their writing. In reality, such redundancies do just the opposite. There is no need to say the same thing twice.

- Daniel is now employed at a private rehabilitation center working as a registered physical therapist.

  Though modifiers ordinarily add meaning to the words they modify, occasionally they are redundant.

- Sylvia very hurriedly scribbled her name, address, and phone number on a greasy napkin.

  The word *scribbled* already suggests that Sylvia wrote very hurriedly.

- Gabriele Muccino’s film *The Pursuit of Happyness* tells the story of a single father determined in his mind to pull himself and his son out of homelessness.

  The word *determined* contains the idea that his resolution formed in his mind.

W2-b Avoid unnecessary repetition of words.

Though words may be repeated deliberately, for effect, repetitions will seem awkward if they are clearly unnecessary. When a more concise version is possible, choose it.
Our fifth patient, in room six, is a mentally ill patient.

A study by the Henry J. Kaiser Family Foundation (2004) measured studied the effects of diet and exercise on childhood obesity.

The repetition of study . . . studied is awkward and redundant. By using the descriptive verb measured instead, the writer conveys more precisely the purpose of the study and suggests its function in the paper.

**W2-c Cut empty or inflated phrases.**

An empty phrase can be cut with little or no loss of meaning. Common examples are introductory word groups that weaken the writer’s authority by apologizing or hedging: *in my opinion, I think that, it seems that, one must admit that,* and so on.

In my opinion, our current immigration policy is misguided.

Inflated phrases can be reduced to a word or two without loss of meaning.

We are unable to provide funding at this point in time.

**W2-d Simplify the structure.**

If the structure of a sentence is needlessly indirect, try simplifying it. Look for opportunities to strengthen the verb.

- The financial analyst claimed that because of volatile market conditions she could not make an estimate of the company's future profits.
  
  The verb *estimate* is more vigorous and concise than *make an estimate of*.

  The colorless verbs *is, are, was,* and *were* frequently generate excess words. (See also W3-b.)

- Investigators were involved in examining the effect of classical music on unborn babies.
  
  The revision is more direct and concise. The action (*examining*), originally appearing in a subordinate structure, has become a strong verb, *examined*.

  The expletive constructions *there is* and *there are* (or *there was* and *there were*) can also generate excess words. The same is true of expletive constructions beginning with *it*.

- There is another module that tells the story of Charles Darwin and introduces the theory of evolution.

- It is imperative that all night managers follow strict procedures when locking the safe.

  Finally, verbs in the passive voice may be needlessly indirect. When the active voice expresses your meaning as effectively, use it. (See also W3-a.)

- All too often, athletes with marginal academic skills, have been recruited by our coaches.
W2-e Reduce clauses to phrases, phrases to single words.

Word groups functioning as modifiers can often be made more compact. Look for any opportunities to reduce clauses to phrases or phrases to single words.

- We took a side trip to Monticello, **which was** the home of Thomas Jefferson.

- In the essay, **that follows**, I argue against Immanuel Kant's **problematic** claim that we should not lie under any circumstances, **which is** a **problematic** assertion.

W3 Active verbs

As a rule, choose an active verb and pair it with a subject that names the person or thing doing the action. Active verbs express meaning more emphatically and vigorously than their weaker counterparts—forms of the verb *be* or verbs in the passive voice.

- **PASSIVE**  The pumps *were destroyed* by a surge of power.

- **BE VERB**  A surge of power *was responsible for* the destruction of the pumps.

- **ACTIVE**  A surge of power *destroyed* the pumps.

Verbs in the passive voice lack strength because their subjects receive the action instead of doing it. Forms of the verb *be* (*be, am, is, are, was, were, being, been*) lack vigor because they convey no action.

Although passive verbs and the forms of *be* have legitimate uses, choose an active verb if it can carry your meaning. Even among active verbs, some convey action more vigorously than others. Carefully selected verbs can energize a piece of writing.

- The goalie crouched low, **reached** out his stick, and **sent** the rebound away from the mouth of the net.
W3-a Use the active voice unless you have a good reason for choosing the passive.

In the active voice, the subject of the sentence does the action; in the passive voice, the subject receives the action. Although both voices are grammatically correct, the active voice is usually more effective because it is clearer and more direct.

**ACTIVE**
Hernando caught the fly ball.

**PASSIVE**
The fly ball was caught by Hernando.

Passive sentences often identify the actor in a phrase beginning with *by*, as in the preceding example. Sometimes, however, that phrase is omitted, and who or what is responsible for the action becomes unclear: *The fly ball was caught.*

Most of the time, you will want to emphasize the actor, so you should use the active voice. To replace a passive verb with an active one, make the actor the subject of the sentence.

The settlers stripped the land of timber before realizing the consequences of their actions.

The revision emphasizes the actors (*settlers*) by naming them in the subject.

The contractor removed the debris from the construction site.

Sometimes the actor does not appear in a passive-voice sentence. To turn such a sentence into the active voice, the writer must determine an appropriate subject, in this case *contractor*.

The passive voice is appropriate if you wish to emphasize the receiver of the action or to minimize the importance of the actor.
Active verbs

Many Hawaiians were forced to leave their homes after the earthquake.

As the time for harvest approaches, the tobacco plants are sprayed with a chemical to retard the growth of suckers.

The writer of the first sentence wished to emphasize the receiver of the action, Hawaiians. The writer of the second sentence wished to focus on the tobacco plants, not on the people spraying them.

In much scientific writing, the passive voice properly emphasizes the experiment or process being described, not the researcher. Check with your instructor for the preference in your discipline.

The solution was heated to the boiling point, and then it was reduced in volume by 50%.

W3-b Replace be verbs that result in dull or wordy sentences.

Not every be verb needs replacing. The forms of be (be, am, is, are, was, were, being, been) work well when you want to link a subject to a noun that clearly renames it or to an adjective that describes it: Orchard House was the home of Louisa May Alcott. The harvest will be bountiful after the summer rains. And be verbs are essential as helping verbs before present participles (is flying, are disappearing) to express ongoing action: Derrick was fighting the fire when his wife went into labor. (See G2-f.)

If using a be verb makes a sentence needlessly dull and wordy, however, consider replacing it. Often a phrase following the verb will contain a noun or an adjective (such as violation, resistant) that suggests a more vigorous, active verb (violate, resist).

- Burying nuclear waste in Antarctica would be in violation of an international treaty.
  
  Violate is less wordy and more vigorous than be in violation of.

- When Rosa Parks was resistant to giving up her seat on the bus, she became a civil rights hero.
  
  Resisted is stronger than was resistant to.
Appropriate language

Language is appropriate when it suits your subject, engages your audience, and blends naturally with your own voice.

Stay away from jargon.

Jargon is specialized language used among members of a trade, profession, or group. Use jargon only when readers will be familiar with it; even then, use it only when plain English will not do as well.

**JARGON**

We outsourced the work to a firm in Ohio because we didn’t have the bandwidth to tackle it in-house.

**REVISED**

We hired a company in Ohio because we had too few employees to do the work.

Broadly defined, jargon includes puffed-up language designed more to impress readers than to inform them. The following are common examples from business, government, higher education, and the military, with plain English alternatives in parentheses.

- ameliorate (improve)
- commence (begin)
- components (parts)
- endeavor (try)
- facilitate (help)
- impact (v.) (affect)
- indicator (sign)
- optimal (best, most favorable)
- parameters (boundaries, limits)
- peruse (read, look over)
- prior to (before)
- utilize (use)

Sentences filled with jargon are hard to read and often wordy.

- All employees functioning in the capacity of work-study students must prove that they are currently enrolled.  
  are required to give evidence of current enrollment.

- The CEO should dialogue with investors about partnering with clients to buy land in economically deprived zones.

Avoid pretentious language, most euphemisms, and “doublespeak.”

Hoping to sound profound or poetic, some writers embroider their thoughts with large words and flowery phrases. Such pretentious language is so ornate and wordy that it obscures the writer’s meaning.
Taylor’s employment of multihued means of expression draws back the curtains and lets slip the sentimental vantage point from which she observes American society as well as her lack of comprehension of economic realities.

Euphemisms — nice-sounding words or phrases substituted for words thought to sound harsh or ugly — are sometimes appropriate. Many cultures, for example, accept euphemisms when speaking or writing about excretion (I have to go to the bathroom), sexual intercourse (They did not sleep together), and the like.

Most euphemisms, however, are needlessly evasive or even deceitful. Like pretentious language, they obscure the intended meaning.

<table>
<thead>
<tr>
<th>EUPHEMISM</th>
<th>PLAIN ENGLISH</th>
</tr>
</thead>
<tbody>
<tr>
<td>adult entertainment</td>
<td>pornography</td>
</tr>
<tr>
<td>preowned automobile</td>
<td>used car</td>

</tr>
<tr>
<td>chemical dependency</td>
<td>drug addiction</td>
</tr>
<tr>
<td>downsize</td>
<td>lay off, fire</td>
</tr>
<tr>
<td>correctional facility</td>
<td>prison</td>
</tr>
</tbody>
</table>

The term doublespeak applies to any deliberately evasive or deceptive language, including euphemisms. Doublespeak is especially common in politics and business. A military retreat is described as tactical redeployment, enhanced interrogation is a euphemism for “torture,” and downsizing really means “firing employees.”

In most contexts, avoid slang, regional expressions, and nonstandard English.

Slang is an informal and sometimes private vocabulary that expresses the solidarity of a group such as teenagers, rock musicians, or football fans; it is subject to more rapid change than standard English. For example, the slang teenagers use to express approval changes every few years; cool, groovy, neat, awesome, phat, and sick have replaced one another within the last four decades. Sometimes slang becomes so widespread that it is accepted as standard vocabulary. Jazz, for example, started out as slang but is now a standard term for a style of music.
Although slang has a certain vitality, it is a code that not everyone understands, and it is very informal. Therefore, it is inappropriate in most written work.

- When the server crashed unexpectedly, three hours of unsaved data went down the tubes.
- The government’s “filth” guidelines for food will disgust you.

Regional expressions are common to a group in a geographic area. *Let’s talk with the bark off* (for *Let’s speak frankly*) is an expression in the southern United States, for example. Regional expressions have the same limitations as slang and are therefore inappropriate in most writing.

- John was four blocks from the house before he remembered to turn on the headlights.
- Seamus wasn’t for sure, but he thought the whales might be migrating during his visit to Oregon.

Standard English is the language used in all academic, business, and professional fields. Nonstandard English is spoken by people with a common regional or social heritage. Although nonstandard English may be appropriate when spoken within a close group, it is out of place in most formal and informal writing.

- The governor said he doesn’t know if he will approve the budget without the clean air provision.

If you speak a nonstandard dialect, try to identify the ways in which your dialect differs from standard English. Look especially for the following features of nonstandard English, which commonly cause problems in writing.

- Misusing verb forms such as *began* and *begun* (See G2-a.)
- Leaving -s endings off verbs (See G2-c.)
- Leaving -ed endings off verbs (See G2-d.)
- Leaving out necessary verbs (See G2-e.)
- Using double negatives (See G4-d.)
Choose an appropriate level of formality.

In deciding on a level of formality, consider both your subject and your audience. Does the subject demand a dignified treatment, or is a relaxed tone more suitable? Will readers be put off if you assume too close a relationship with them, or might you alienate them by seeming too distant?

For most college and professional writing, some degree of formality is appropriate. In a job application letter, for example, it is a mistake to sound too breezy and informal.

**Too informal**  
I’d like to get that sales job you’ve got in the paper.

**More formal**  
I would like to apply for the position of sales associate advertised in the *Peoria Journal Star*.

Informal writing is appropriate for private letters, personal e-mail and text messages, and business correspondence between close associates. In choosing a level of formality, above all be consistent. When a writer’s voice shifts from one level of formality to another, readers receive mixed messages.

> Once a pitcher for the Blue Jays, Jorge shared with me the secrets of his trade. His lesson commenced with his famous curveball, thrown implemented by tucking the little finger behind the ball. Next revealed he elucidated the mysteries of the sucker pitch, a slow ball coming behind a fast windup.

*Commenced* and *elucidated* are inappropriate for the subject, and they clash with informal terms such as *sucker pitch* and *fast windup*.

Avoid sexist language.

Sexist language is language that stereotypes, excludes, or demeans women or men. Using nonsexist language is a matter of courtesy — of respect for and sensitivity to the feelings of others.

**Recognizing sexist language**

Some sexist language is easy to recognize because it reflects genuine contempt for women: referring to a woman as a “chick,” for example, or calling a lawyer a “lady lawyer.”

---

*PRACTICE*  
[hyperlink](https://hackerhandbooks.com/writersref)  
> Word choice > W4–6 and W4–7
Other forms of sexist language are less blatant. The following practices, while they may not result from conscious sexism, reflect stereotypical thinking: referring to members of one profession as exclusively male or exclusively female (teachers as women or computer engineers as men, for instance) or using different conventions when naming or identifying women and men.

**STEREOTYPICAL LANGUAGE**

After a nursing student graduates, *she* must face a difficult state board examination. [Not all nursing students are women.]

Running for city council are Boris Stotsky, an attorney, and *Mrs*. Cynthia Jones, a professor of English and *mother of three*. [The title *Mrs.* and the description *mother of three* are irrelevant.]

Still other forms of sexist language result from outdated traditions. The pronouns *he*, *him*, and *his*, for instance, were traditionally used to refer generically to persons of either sex. Some writers now use *she*, *her*, and *hers* generically or substitute the female pronouns alternately with the male pronouns.

**GENERIC PRONOUNS**

A journalist is motivated by *his* deadline.

A good interior designer treats *her* clients’ ideas respectfully.

But both forms are sexist—for excluding one sex entirely and for making assumptions about the members of particular professions.

Similarly, the nouns *man* and *men* were once used to refer generically to persons of either sex. Current usage demands gender-neutral terms for references to both men and women.

</tr>
</tbody>
</table>

**Revising sexist language**

When revising sexist language, you may be tempted to substitute *he or she* and *his or her*. These terms are inclusive but wordy; fine in small doses, they can become awkward when repeated throughout an essay. A
better revision strategy is to write in the plural; yet another strategy is to recast the sentence so that the problem does not arise.

SEXIST
A journalist is motivated by his deadline.
A good interior designer treats her clients’ ideas respectfully.

ACCEPTABLE BUT WORDY
A journalist is motivated by his or her deadline.
A good interior designer treats his or her clients’ ideas respectfully.

BETTER: USING THE PLURAL
Journalists are motivated by their deadlines.
Good interior designers treat their clients’ ideas respectfully.

BETTER: RECASTING THE SENTENCE
A journalist is motivated by a deadline.
A good interior designer treats clients’ ideas respectfully.

For more examples of these revision strategies, see G3-a.

W4-f Revise language that may offend groups of people.

Obviously it is impolite to use offensive terms such as Polack and redneck, but biased language can take more subtle forms. Because language evolves over time, names once thought acceptable may become offensive. When describing groups of people, choose names that the groups currently use to describe themselves.

- North Dakota takes its name from the Lakota Indian word meaning “friend” or “ally.”
- Many Oriental immigrants have recently settled in our town.

Negative stereotypes (such as “drives like a teenager” or “sour as a spinster”) are of course offensive. But you should avoid stereotyping a person or a group even if you believe your generalization to be positive.

- an excellent math and science student.
- It was no surprise that Greer, a Chinese American, was selected for the honors chemistry program.
Two reference works will help you find words to express your meaning exactly: a good dictionary, such as *Merriam-Webster’s Online Dictionary* or *The American Heritage Dictionary*, and a thesaurus, such as *Roget’s International Thesaurus*. (See W6.)

**TIP:** Do not turn to a thesaurus in search of flowery or impressive language. Look instead for words that exactly express your meaning.

### W5-a Select words with appropriate connotations.

In addition to their strict dictionary meanings (or *denotations*), words have *connotations*, emotional colorings that affect how readers respond to them. The word *steel* denotes “commercial iron that contains carbon,” but it also calls up a cluster of images associated with steel. These associations give the word its connotations—cold, hard, smooth, unbending.

If the connotation of a word does not seem appropriate for your purpose, your audience, or your subject matter, you should change the word. When a more appropriate synonym does not come quickly to mind, consult a dictionary or a thesaurus. (See W6.)

> When American soldiers returned home after World War II, many *left* women *abandoned* their jobs in favor of marriage.

The word *abandoned* is too negative for the context.

### W5-b Prefer specific, concrete nouns.

Unlike general nouns, which refer to broad classes of things, specific nouns point to particular items. *Film*, for example, names a general class, *fantasy film* names a narrower class, and *The Golden Compass* is more specific still.

Unlike abstract nouns, which refer to qualities and ideas (*justice, beauty, realism, dignity*), concrete nouns point to immediate, often sensory experience and to physical objects (*steeple, asphalt, lilac, stone, garlic*).

Specific, concrete nouns express meaning more vividly than general or abstract ones. Although general and abstract language is sometimes
necessary to convey your meaning, use specific, concrete words whenever possible.

The senator spoke about the challenges of our state’s future: pollution, dwindling natural resources, and overcrowded prisons. The environment and crime.

Nouns such as thing, area, aspect, factor, and individual are especially dull and imprecise.

Toni Morrison’s Beloved is about slavery, among other things.

Try pairing a new employee with an individual with technical experience.

W5-c Do not misuse words.

If a word is not in your active vocabulary, you may find yourself misusing it, sometimes with embarrassing consequences. When in doubt, check the dictionary.

Fans who arrived late were migrating up the bleachers in search of seats.

Marie Winn quarrels that television viewing is bad for families because it “serves to anesthetize parents into accepting their family’s diminished state” (357).

When you are introducing a quotation with a signal phrase, be sure to choose a verb that clearly reflects the source’s intention. Quarrel suggests a heated or angry dispute; argue is a more neutral word. (See also MLA-3b on using signal phrases.)

Be especially alert for misused word forms—using a noun such as absence, significance, or persistence, for example, when your meaning requires the adjective absent, significant, or persistent.

Most dieters are not persistence enough to make a permanent change in their eating habits.
W5-d Use standard idioms.

Idioms are speech forms that follow no easily specified rules. The English say “Bernadette went to hospital,” an idiom strange to American ears, which are accustomed to hearing to the hospital. Native speakers of a language seldom have problems with idioms, but prepositions (such as with, to, at, and of) sometimes cause trouble, especially when they follow certain verbs and adjectives. When in doubt, consult a dictionary.

ESL Because idioms follow no particular rules, you must learn them individually. You may find it helpful to keep a list of idioms that you frequently encounter in conversation and in reading. See M5.

W5-e Do not rely heavily on clichés.

The pioneer who first announced that he had “slept like a log” no doubt amused his companions with a fresh, unlikely comparison. Today, however, that comparison is a cliché, a saying that can no longer add emphasis or surprise.
To see just how dully predictable clichés are, put your hand over the right-hand column in the following list and then finish the phrases on the left.

- cool as a cucumber
- beat around the bush
- blind as a bat
- busy as a bee, beaver
- crystal clear
- out of the frying pan and into the fire
- light as a feather
- like a bull in a china shop
- playing with fire
- nutty as a fruitcake
- selling like hotcakes
- starting out at the bottom of the ladder
- water under the bridge
- white as a sheet, ghost
- avoid clichés like the plague

The solution for clichés is simple: Just delete them or rewrite them.

► When I received a full scholarship from my second-choice school, I felt squeezed to settle for second best. Sometimes you can write around a cliché by adding an element of surprise. One student, for example, who had written that she had butterflies in her stomach, revised her cliché like this:

If all of the action in my stomach is caused by butterflies, there must be a horde of them, with horseshoes on.

The image of butterflies wearing horseshoes is fresh and unlikely, not predictable like the original cliché.

**W5-f Use figures of speech with care.**

A figure of speech is an expression that uses words imaginatively (rather than literally) to make abstract ideas concrete. Most often, figures of speech compare two seemingly unlike things to reveal surprising similarities.

In a *simile*, the writer makes the comparison explicitly, usually by introducing it with *like* or *as*: *By the time cotton had to be picked, Grandfather’s neck was as red as the clay he plowed.* In a *metaphor*, the *like* or *as* is omitted, and the comparison is implied. For example,
in the Old Testament Song of Solomon, a young woman compares the man she loves to a fruit tree: *With great delight I sat in his shadow, and his fruit was sweet to my taste.*

Although figures of speech are useful devices, writers sometimes use them without thinking through the images they evoke. The result is sometimes a *mixed metaphor*, the combination of two or more images that don’t make sense together.

▶ Our manager decided to put all controversial issues in a holding pattern on a back burner until after the annual meeting.

Here the writer is mixing airplanes (*holding pattern*) and stoves (*back burner*). Simply deleting one of the images corrects the problem.

---

**W6 The dictionary and thesaurus**

**W6-a The dictionary**

A good dictionary, whether print or online—such as *The American Heritage Dictionary of the English Language*, *The Random House College Dictionary*, or *Merriam-Webster’s Collegiate Dictionary*—is an indispensable writer’s aid.

A sample print dictionary entry, taken from *The American Heritage Dictionary*, appears on page 170. Labels show where various kinds of information about a word can be found in that dictionary.

A sample online dictionary entry, taken from *Merriam-Webster Online Dictionary*, appears on page 171.

**Spelling, word division, and pronunciation**

The main entry (*re•gard* in the sample entries) shows the correct spelling of the word. When there are two correct spellings of a word (as in *collectible, collectable*, for example), both are given, with the preferred spelling usually appearing first.

The main entry also shows how the word is divided into syllables. The dot between *re* and *gard* separates the two syllables and indicates where the word should be divided if it can’t fit at the end of a line of type (see P7-h). When a word is compound, the main entry shows how to write it: as one word (*crossroad*), as a hyphenated word (*cross-stitch*), or as two words (*cross section*).
The word's pronunciation is given just after the main entry. The accents indicate which syllables are stressed; the other marks are explained in the dictionary's pronunciation key. In print dictionaries, this key usually appears at the bottom of every page or every other page. Many online entries include an audio link to a person's voice pronouncing the word. And most online dictionaries have an audio pronunciation guide.

**PRINT DICTIONARY ENTRY**

</tbody>
</table>

**Synonyms** regard, esteem, admiration, respect  These nouns refer to a feeling based on perception of and approval for the worth of a person or thing. **Regard** is the most general: "I once thought you had a kind of regard for her" (George Borrow). **Esteem** connotes considered appraisal and positive regard: "The near-unanimity of esteem he enjoyed during his lifetime has by no means been sustained since" (William Crutchfield). **Admiration** is a feeling of keen approbation: "Greatness is a spiritual condition worthy to excite love, interest, and admiration" (Matthew Arnold). **Respect** implies appreciative, often deferential regard resulting from careful assessment: "I have a great respect for any man who makes his own way in life" (Winston Churchill). See also synonyms at consider.

**Usage Note**  **Regard** is traditionally used in the singular in the phrase in regard (not in regards) to. **Regarding** and as regards are also standard in the sense "with reference to." In the same sense with respect to is acceptable, but regarding is not. **Respect** is sometimes considered preferable to regards in the sense of "particulars": *In some respects (not regards) the books are alike.*
Word endings and grammatical labels

When a word takes endings to indicate grammatical functions (called *inflections*), the endings are listed in boldface, as with *-garded, -garding*, and *-gards* in the sample print entry (p. 170).

Labels for the parts of speech and for other grammatical terms are sometimes abbreviated, as they are in the print entry. The most commonly used abbreviations are these:

- **n.** noun
- **pl.** plural
- **sing.** singular
- **v.** verb
- **tr.** transitive verb
- **intr.** intransitive verb
- **adj.** adjective
- **adv.** adverb
- **pron.** pronoun
- **prep.** preposition
- **conj.** conjunction
- **interj.** interjection

ONLINE DICTIONARY ENTRY

Merriam-Webster Online Dictionary

3 entries found for *regard*.
To select an entry, click on it.

Main Entry: *regard*

Pronunciation: *ri-gard*

Function: noun

Etymology: Middle English, from Middle French, from *regarde*.

1 archaic: APPEARANCE

2 a: ATTENTION, CONSIDERATION <due regard should be given to all facets of the question> b: a protective interest: CARE <ought to have more regard for his health>

3: LOOK, GAZE

4 a: the worth or estimation in which something or someone is held <a man of small regard> b (1): a feeling of respect and affection: ESTEEM <his hard work won him the regard of his colleagues> (2) plural: friendly greetings implying such feeling <give him my regards>

5: a basis of action or opinion: MOTIVE

6: an aspect to be taken into consideration: RESPECT <is a small school, and is fortunate in this regard>

7 obsolete: INTENTION

- in regard to: with respect to:
- CONCERNING
- with regard to: in regard to
**Meanings, word origin, synonyms, and antonyms**

Each meaning for the word is given a number. Occasionally a word’s use is illustrated in a quoted sentence. Sometimes a word can be used as more than one part of speech (regard, for instance, can be used as either a verb or a noun). In such a case, all the meanings for one part of speech are given before all the meanings for another, as in the sample entries. The entries also give idiomatic uses of the word.

The origin of the word, called its etymology, appears in brackets after all the meanings in the print version; in the online version, it appears before the meanings.

Synonyms, words similar in meaning to the main entry, are frequently listed. In the sample print entry (p. 170), the dictionary draws distinctions in meaning among the various synonyms. In the online entry (p. 171), synonyms appear as hyperlinks. Antonyms, which do not appear in the sample entries, are words having a meaning opposite from that of the main entry.

**Usage**

Usage labels indicate when, where, or under what conditions a particular meaning for a word is appropriately used. Common labels are informal (or colloquial), slang, archaic, poetic, nonstandard, dialect, obsolete, and British. In the sample print entry (p. 170), two meanings of regard are labeled obsolete because they are no longer in use. The sample online entry (p. 171) has meanings labeled both archaic and obsolete.

Dictionaries sometimes include usage notes as well. In the sample print entry, the dictionary offers advice on several uses of regard not specifically covered by the meanings. Such advice is based on the opinions of many experts and on actual usage in current magazines, newspapers, and books.

**W6-b The thesaurus**

When you are looking for just the right word, you may want to consult a collection of synonyms and antonyms such as Roget's International Thesaurus. Look up the adjective still, for example, and you will find synonyms such as tranquil, quiet, quiescent, reposeful, calm, pacific, halcyon, placid, and unruffled. The list will likely contain words you've never heard of or with which you are only vaguely familiar. Whenever you are tempted to use one of these words, first look it up in the dictionary to avoid misusing it.

Do not turn to a thesaurus in search of exotic, fancy words to embellish your essays. Look instead for words that express your meaning exactly and that are familiar to both you and your readers.

Subject-verb agreement

In the present tense, verbs agree with their subjects in number (singular or plural) and in person (first, second, or third): I sing, you sing, he sings, she sings, we sing, they sing. Even if your ear recognizes the standard subject-verb combinations presented in G1-a, you will no doubt encounter tricky situations such as those described in G1-b to G1-k.

G1-a Consult this section for standard subject-verb combinations.

This section describes the basic guidelines for making present-tense verbs agree with their subjects. The present-tense ending -s (or -es) is used on a verb if its subject is third-person singular (he, she, it, and singular nouns); otherwise the verb takes no ending. Consider, for example, the present-tense forms of the verbs love and try, given at the beginning of the chart on the following page.

The verb be varies from this pattern; unlike any other verb, it has special forms in both the present and the past tense. These forms appear at the end of the chart on page 176.

If you aren’t confident that you know the standard forms, use the charts on pages 176 and 177 as you proofread for subject-verb agreement. You may also want to look at G2-c on -s endings of regular and irregular verbs.

G1-b Make the verb agree with its subject, not with a word that comes between.

Word groups often come between the subject and the verb. Such word groups, usually modifying the subject, may contain a noun that at first appears to be the subject. By mentally stripping away such modifiers, you can isolate the noun that is in fact the subject.

The samples on the tray in the lab need testing.

High levels of air pollution caused damage to the respiratory tract.

The subject is levels, not pollution. Strip away the phrase of air pollution to hear the correct verb: levels cause.
The slaughter of pandas for their pelts has caused the panda population to decline drastically.

The subject is slaughter, not pandas or pelts.

**NOTE:** Phrases beginning with the prepositions as well as, in addition to, accompanied by, together with, and along with do not make a singular subject plural.
When to use the -s (or -es) form of a present-tense verb

EXCEPTION: Choosing the correct present-tense form of be (am, is, or are) is not always so simple. See the chart on the previous page for both present- and past-tense forms of be.

ESL TIP: Do not use the -s form of a verb if it follows a modal verb such as can, must, or should or another helping verb. (See M1-c.)

The governor as well as his press secretary were on the plane.

To emphasize that two people were on the plane, the writer could use and instead: The governor and his press secretary were on the plane.
G1-c Treat most subjects joined with *and* as plural.

A subject with two or more parts is said to be compound. If the parts are connected with *and*, the subject is nearly always plural.

Leon and Jan often jog together.

- The Supreme Court’s willingness to hear the case and its *have* affirmation of the lower court’s decision has set a new precedent.

EXCEPTIONS: When the parts of the subject form a single unit or when they refer to the same person or thing, treat the subject as singular.

Fish and chips was a last-minute addition to the menu.

Sue’s friend and adviser was surprised by her decision.

When a compound subject is preceded by *each* or *every*, treat it as singular.

Each tree, shrub, and vine needs to be sprayed.

This exception does not apply when a compound subject is followed by *each*: *Alan and Marcia each have different ideas.*

G1-d With subjects joined with *or* or *nor* (or with *either . . . or* or *neither . . . nor*), make the verb agree with the part of the subject nearer to the verb.

A driver’s license or credit card is required.

A driver’s license or two credit cards are required.

- If an infant or a child are having difficulty breathing, seek medical attention immediately.

- Neither the chief financial officer nor the marketing managers *were* able to convince the client to reconsider.

The verb must be matched with the part of the subject closer to it: *child is* in the first sentence, *managers were* in the second.

**NOTE:** If one part of the subject is singular and the other is plural, put the plural one last to avoid awkwardness.
Treat most indefinite pronouns as singular.

Indefinite pronouns are pronouns that do not refer to specific persons or things. The following commonly used indefinite pronouns are singular.

- anybody, each, everyone, nobody, somebody
- anyone, either, everything, no one, someone
- anything, everybody, neither, nothing, something

Many of these words appear to have plural meanings, and they are often treated as plural in casual speech. In formal written English, however, they are nearly always treated as singular.

- Everyone on the team supports the coach.
- Each of the furrows has been seeded.
- Nobody who participated in the clinical trials was given a placebo.

The subjects of these sentences are Each and Nobody. These indefinite pronouns are third-person singular, so the verbs must be has and was.

A few indefinite pronouns (all, any, none, some) may be singular or plural depending on the noun or pronoun they refer to.

**SINGULAR**

- Some of our luggage was lost.
- None of his advice makes sense.

**PLURAL**

- Some of the rocks are slippery.
- None of the eggs were broken.

**NOTE:** When the meaning of none is emphatically “not one,” none may be treated as singular: None [meaning “Not one”] of the eggs was broken. Using not one instead is sometimes clearer: Not one of the eggs was broken.

Treat collective nouns as singular unless the meaning is clearly plural.

Collective nouns such as jury, committee, audience, crowd, troop, family, and couple name a class or a group. In American English, collective nouns are nearly always treated as singular: They emphasize the group as a unit. Occasionally, when there is some reason to draw
attention to the individual members of the group, a collective noun may be treated as plural. (See also p. 198.)

**SINGULAR** The class respects the teacher.

**PLURAL** The class are debating among themselves.

To emphasize the notion of individuality in the second sentence, many writers would add a clearly plural noun.

**PLURAL** The class members are debating among themselves.

- The board of trustees meet in Denver twice a year.

The board as a whole meets; there is no reason to draw attention to its individual members.

- A young couple were arguing about politics while holding hands.

The meaning is clearly plural. Only separate individuals can argue and hold hands.

**NOTE:** The phrase the number is treated as singular, a number as plural.

**SINGULAR** The number of school-age children is declining.

**PLURAL** A number of children are attending the wedding.

**NOTE:** In general, when fractions or units of measurement are used with a singular noun, treat them as singular; when they are used with a plural noun, treat them as plural.

**SINGULAR** Three-fourths of the salad has been eaten.

Twenty inches of wallboard was covered with mud.

**PLURAL** One-fourth of the drivers were texting.

Two pounds of blueberries were used to make the pie.

**G1-g** Make the verb agree with its subject even when the subject follows the verb.

Verbs ordinarily follow subjects. When the normal order is reversed, it is easy to be confused. Sentences beginning with there is or there are (or there was, there were) are inverted; the subject follows the verb.
There are surprisingly few honeybees left in southern China.

There were a social worker and a neighbor at the scene of the crash.

The subject, worker and neighbor, is plural, so the verb must be were.

Occasionally you may invert a sentence for variety or effect. If you do, check to make sure that your subject and verb agree.

Of particular concern is penicillin and tetracycline, antibiotics used to make animals more resistant to disease.

The subject, penicillin and tetracycline, is plural, so the verb must be are.

Make the verb agree with its subject, not with a subject complement.

One basic sentence pattern in English consists of a subject, a linking verb, and a subject complement: Jack is a lawyer. Because the subject complement (lawyer) names or describes the subject (Jack), it is sometimes mistaken for the subject. (See B2-b on subject complements.)

A major force in today’s economy are children—as consumers, decision makers, and trend spotters.

Force is the subject, not children. If the corrected version seems too awkward, make children the subject: Children are a major force in today’s economy—as consumers, decision makers, and trend spotters.

A tent and a sleeping bag is the required equipment for all campers.

Tent and bag is the subject, not equipment.

Who, which, and that take verbs that agree with their antecedents.

Like most pronouns, the relative pronouns who, which, and that have antecedents, nouns or pronouns to which they refer. Relative pronouns used as subjects of subordinate clauses take verbs that agree with their antecedents.

Take a course that prepares you for classroom management.
One of the

Constructions such as *one of the students who* [or *one of the things that*] may cause problems for writers. Do not assume that the antecedent must be *one*. Instead, consider the logic of the sentence.

► Our ability to use language is one of the things that set us apart from animals.

The antecedent of *that* is *things*, not *one*. Several things set us apart from animals.

Only one of the

When the word *only* comes before *one*, you are safe in assuming that *one* is the antecedent of the relative pronoun.

► Veronica was the only one of the first-year Spanish students who were fluent enough to apply for the exchange program.

The antecedent of *who* is *one*, not *students*. Only one student was fluent enough.

G1-j. Words such as *athletics, economics, mathematics, physics, politics, statistics, measles, and news* are usually singular, despite their plural form.

► Politics are among my mother’s favorite pastimes.

EXCEPTION: Occasionally some of these words, especially *economics, mathematics, politics, and statistics*, have plural meanings:

Office politics often sway decisions about hiring and promotion.

The economics of the building plan are prohibitive.

G1-k Titles of works, company names, words mentioned as words, and gerund phrases are singular.

► *Lost Cities* describe the discoveries of fifty ancient civilizations.

► Delmonico Brothers specialize in organic produce and additive-free meats.
Controlled substances are a euphemism for illegal drugs.

A gerund phrase consists of an -ing verb form followed by any objects, complements, or modifiers (see B3-b). Treat gerund phrases as singular.

Encountering long hold times makes customers impatient with telephone tech support.

G2 Verb forms, tenses, and moods

Section G-1 deals with subject-verb agreement, and section W3 offers advice on active and passive verbs. This section describes other potential challenges with verbs:

a. irregular verb forms (such as drive, drove, driven)
b. lie and lay
c. -s (or -es) endings on verbs
d. -ed endings on verbs
e. omitted verbs
f. tense
g. subjunctive mood

If English is not your native language, see also M1 for more help with verbs.

G2-a Choose standard English forms of irregular verbs.

Except for the verb be, all verbs in English have five forms. The following list shows the five forms and provides a sample sentence in which each might appear.

<table>
<thead>
<tr>
<th>Form</th>
<th>Sample Sentence</th>
</tr>
</thead>
<tbody>
<tr>
<td>BASE FORM</td>
<td>Usually I (walk, ride).</td>
</tr>
<tr>
<td>PAST TENSE</td>
<td>Yesterday I (walked, rode).</td>
</tr>
<tr>
<td>PAST PARTICIPLE</td>
<td>I have (walked, ridden) many times before.</td>
</tr>
<tr>
<td>PRESENT PARTICIPLE</td>
<td>I am (walking, riding) right now.</td>
</tr>
<tr>
<td>-S FORM</td>
<td>He/she/it (walks, rides) regularly.</td>
</tr>
</tbody>
</table>
The verb be has eight forms instead of the usual five: be, am, is, are, was, were, being, been.

For all regular verbs, the past-tense and past-participle forms are the same (ending in -ed or -d), so there is no danger of confusion. This is not true, however, for irregular verbs, such as the following.

<table>
<thead>
<tr>
<th>BASE FORM</th>
<th>PAST TENSE</th>
<th>PAST PARTICIPLE</th>
</tr>
</thead>
<tbody>
<tr>
<td>go</td>
<td>went</td>
<td>gone</td>
</tr>
<tr>
<td>break</td>
<td>broke</td>
<td>broken</td>
</tr>
<tr>
<td>fly</td>
<td>flew</td>
<td>flown</td>
</tr>
<tr>
<td>sing</td>
<td>sang</td>
<td>sung</td>
</tr>
</tbody>
</table>

The past-tense form always occurs alone, without a helping verb. It expresses action that occurred entirely in the past: *I rode to work yesterday. I walked to work last Tuesday.* The past participle is used with a helping verb. It forms the perfect tenses with has, have, or had; it forms the passive voice with be, am, is, are, was, were, being, or been. (See B1-c for a complete list of helping verbs and G2-f for a survey of tenses.)

**PAST TENSE**

Last July, we *went* to Paris.

**HELPING VERB + PAST PARTICIPLE**

We *have gone* to Paris twice.

The list of common irregular verbs beginning at the bottom of this page will help you distinguish between the past tense and the past participle. Choose the past-participle form if the verb in your sentence requires a helping verb; choose the past-tense form if the verb does not require a helping verb. (See verb tenses in G2-f.)

▶ Yesterday we *seen* a documentary about Isabel Allende.

The past-tense *saw* is required because there is no helping verb.

▶ The truck was apparently *stole* while the driver ate lunch.

▶ By Friday, the stock market had *fell* two hundred points.

Because of the helping verbs *was* and *had*, the past-participle forms are required: *was stolen, had fallen.*

### Common irregular verbs

teach | taught | taught
throw | threw | thrown
wake | woke, waked | waked, woken
wear | wore | worn
wring | wrung | wrung
write | wrote | written

**G2-b** Distinguish among the forms of *lie* and *lay*.

Writers and speakers frequently confuse the various forms of *lie* (meaning “to recline or rest on a surface”) and *lay* (meaning “to put or place something”). *Lie* is an intransitive verb; it does not take a direct object: *The tax forms lie on the table.* The verb *lay* is transitive; it takes a direct object: *Please lay the tax forms on the table.* (See B2-b.)
In addition to confusing the meaning of *lie* and *lay*, writers and speakers are often unfamiliar with the standard English forms of these verbs.

<table>
<thead>
<tr>
<th>BASE FORM</th>
<th>PAST TENSE</th>
<th>PRESENT PARTICIPLE</th>
<th>BASE FORM (past participle)</th>
</tr>
</thead>
<tbody>
<tr>
<td>lie (“recline”)</td>
<td>lay</td>
<td>lain</td>
<td>lying</td>
</tr>
<tr>
<td>lay (“put”)</td>
<td>laid</td>
<td>laid</td>
<td>laying</td>
</tr>
</tbody>
</table>

>Sue was so exhausted that she **laid** down for a nap.

The past-tense form of *lie* (“to recline”) is **lay**.

>The patient had **lain** in an uncomfortable position all night.

The past-participle form of *lie* (“to recline”) is **lain**. If the correct English seems too stilted, recast the sentence: *The patient had been lying in an uncomfortable position all night.*

>The prosecutor **laid** the pistol on a table close to the jurors.

The past-tense form of *lay* (“to place”) is **laid**.

>Letters dating from the Civil War were **laying** in the corner of the chest.

The present participle of *lie* (“to rest on a surface”) is **lying**.

### G2-c

**Use -s (or -es) endings on present-tense verbs that have third-person singular subjects.**

All singular nouns (*child*, *tree*) and the pronouns *he*, *she*, and *it* are third-person singular; indefinite pronouns such as *everyone* and *neither* are also third-person singular. When the subject of a sentence is third-person singular, its verb takes an **-s** or **-es** ending in the present tense. (See also G1.)

<table>
<thead>
<tr>

<td>you know</td>
</tr>
<tr>
<td>THIRD PERSON</td>
<td>he/she/it knows</td>
</tr>
<tr>
<td>child</td>
<td>knows</td>
</tr>
<tr>
<td>everyone</td>
<td>knows</td>
</tr>
</tbody>
</table>

**PRACTICE**

[https://hackerhandbooks.com/writersref](https://hackerhandbooks.com/writersref)

> Grammatical sentences > G2–6 and G2–7
My neighbor drives to Marco Island every weekend.

Sulfur dioxide turns leaves yellow, dissolves marble, and eats away iron and steel.

The subjects neighbor and sulfur dioxide are third-person singular, so the verbs must end in -s.

**TIP:** Do not add the -s ending to the verb if the subject is not third-person singular. The writers of the following sentences, knowing they sometimes dropped -s endings from verbs, overcorrected by adding the endings where they don’t belong.

I prepares program specifications and logic diagrams.

The writer mistakenly concluded that the -s ending belongs on present-tense verbs used with all singular subjects, not just third-person singular subjects. The pronoun I is first-person singular, so its verb does not require the -s.

The dirt floors require continual sweeping.

The writer mistakenly thought that the verb needed an -s ending because of the plural subject. But the -s ending is used only on present-tense verbs with third-person singular subjects.

In nonstandard speech, the -s verb form has, does, or doesn’t is sometimes replaced with have, do, or don’t. In standard English, use has, does, or doesn’t with a third-person singular subject. (See also G1-a.)

This respected musician always have a message in his work.

Do she know the correct procedure for the experiment?

My uncle don’t want to change jobs right now.

**G2-d** Do not omit -ed endings on verbs.

Speakers who do not fully pronounce -ed endings sometimes omit them unintentionally in writing. Leaving off -ed endings is common in many dialects and in informal speech even in standard English. In the following frequently used words and phrases, for example, the -ed ending is not always fully pronounced.
When a verb is regular, both the past tense and the past participle are formed by adding -ed (or -d) to the base form of the verb.

**Past tense**

Use an -ed or -d ending to express the past tense of regular verbs. The past tense is used when the action occurred entirely in the past.

- **fixed**
  - Over the weekend, Ed fix his brother's skateboard and tuned up his mother's 1991 Fiat.

- **advised**
  - Last summer, my counselor advise me to ask my chemistry instructor for help.

**Past participles**

Past participles are used in three ways: (1) following have, has, or had to form one of the perfect tenses; (2) following be, am, is, are, was, were, being, or been to form the passive voice; and (3) as adjectives modifying nouns or pronouns. The perfect tenses are listed on page 191, and the passive voice is discussed in W3. For a discussion of participles as adjectives, see B3-b.

- **asked**
  - Robin has ask for more housing staff for next year.
  - *Has asked* is present perfect tense (*have* or *has* followed by a past participle).

- **publicized**
  - Though it is not a new phenomenon, domestic violence is now publicize more than ever.
  - *Is publicized* is a verb in the passive voice (a form of *be* followed by a past participle).

- **tightened**
  - All kickboxing classes end in a cool-down period to stretch tighten muscles.
  - The past participle *tightened* functions as an adjective modifying the noun *muscles*. 
G2-e  Do not omit needed verbs.

Although standard English allows some linking verbs and helping verbs to be contracted in informal contexts, it does not allow them to be omitted.

Linking verbs, used to link subjects to subject complements, are frequently a form of be: be, am, is, are, was, were, being, been. (See B2-b.) Some of these forms may be contracted (I'm, she's, we're, you're, they're), but they should not be omitted altogether.

\[\text{are}\]

When we quiet in the evening, we can hear crickets in the woods.

Helping verbs, used with main verbs, include forms of be, do, and have and the modal verbs can, will, shall, could, would, should, may, might, and must. (See B1-c.) Some helping verbs may be contracted (he's leaving, we'll celebrate, they've been told), but they should not be omitted altogether.

\[\text{have}\]

We been in Chicago since last Thursday.

ESL  Some languages do not require a linking verb between a subject and its complement. English, however, requires a verb in every sentence. See M3-a.

\[\text{am}\]

Every night, I read a short book to my daughter. When I too busy, my husband reads to her.

G2-f  Choose the appropriate verb tense.

Tenses indicate the time of an action in relation to the time of the speaking or writing about that action.

The most common problem with tenses—shifting confusingly from one tense to another—is discussed in section S4. Other problems with tenses are detailed in this section, after the following survey of tenses.

Survey of tenses

Tenses are classified as present, past, and future, with simple, perfect, and progressive forms for each.
SIMPLE TENSES  The simple tenses indicate relatively simple time relations. The *simple present* tense is used primarily for actions occurring at the same time they are being discussed or for actions occurring regularly. The *simple past* tense is used for actions completed in the past. The *simple future* tense is used for actions that will occur in the future. In the following table, the simple tenses are given for the regular verb *walk*, the irregular verb *ride*, and the highly irregular verb *be*.

<table>
<thead>
<tr>
<th>SIMPLE PRESENT</th>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>walk, ride, am</td>
<td>we</td>
</tr>
<tr>
<td>you</td>
<td>walk, ride, are</td>
<td>you</td>
</tr>
<tr>
<td>he/she/it</td>
<td>walks, rides, is</td>
<td>they</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>SIMPLE PAST</th>
<th>SINGULAR</th>
<th>PLURAL</th>
</tr>
</thead>
<tbody>
<tr>
<td>I</td>
<td>walked, rode, was</td>
<td>we</td>
</tr>
<tr>
<td>you</td>
<td>walked, rode, were</td>
<td>you</td>
</tr>
<tr>
<td>he/she/it</td>
<td>walked, rode, was</td>
<td>they</td>
</tr>
</tbody>
</table>

| SIMPLE FUTURE | | |
|---------------| | |
| I, you, he/she/it, we, they | will walk, ride, be |

PERFECT TENSES  More complex time relations are indicated by the perfect tenses. A verb in one of the perfect tenses (a form of *have* plus the past participle) expresses an action that was or will be completed at the time of another action.

| PRESENT PERFECT | | |
|----------------| | |
| I, you, we, they | have walked, ridden, been |
| he/she/it       | has walked, ridden, been |

| PAST PERFECT | | |
|--------------| | |
| I, you, he/she/it, we, they | had walked, ridden, been |

| FUTURE PERFECT | | |
|----------------| | |
| I, you, he/she/it, we, they | will have walked, ridden, been |

PROGRESSIVE FORMS  The simple and perfect tenses have progressive forms that describe actions in progress. A progressive verb consists of a form of *be* followed by a present participle. The progressive forms are not normally used with certain verbs, such as *believe, know, hear, seem,* and *think.*
### Present Progressive

- **I** am walking, riding, being
- **he/she/it** is walking, riding, being
- **you, we, they** are walking, riding, being

### Past Progressive

- **I, he/she/it** was walking, riding, being
- **you, we, they** were walking, riding, being

### Future Progressive

- **I, you, he/she/it, we, they** will be walking, riding, being

### Present Perfect Progressive

- **I, you, we, they** have been walking, riding, being
- **he/she/it** has been walking, riding, being

### Past Perfect Progressive

- **I, you, he/she/it, we, they** had been walking, riding, being

### Future Perfect Progressive

- **I, you, he/she/it, we, they** will have been walking, riding, being

---

**ESL** See M1-a for more specific examples of verb tenses that can be challenging for multilingual writers.

---

**Special uses of the present tense**

Use the present tense when expressing general truths, when writing about literature, and when quoting, summarizing, or paraphrasing an author’s views.

General truths or scientific principles should appear in the present tense unless such principles have been disproved.

- Galileo taught that the earth **revolved** around the sun.

Because Galileo’s teaching has not been discredited, the verb should be in the present tense. The following sentence, however, is acceptable: **Ptolemy taught that the sun revolved around the earth.**

When writing about a work of literature, you may be tempted to use the past tense. The convention, however, is to describe fictional events in the present tense.
In Masuji Ibuse’s *Black Rain*, a child reached for a pomegranate in his mother’s garden, and a moment later he was dead, killed by the blast of the atomic bomb.

When you are quoting, summarizing, or paraphrasing the author of a nonliterary work, use present-tense verbs such as *writes*, *reports*, *asserts*, and so on to introduce the source. This convention is usually followed even when the author is dead (unless a date or the context specifies the time of writing).

Dr. Jerome Groopman argued that doctors are “susceptible to the subtle and not so subtle efforts of the pharmaceutical industry to sculpt our thinking” (9).

In MLA style, signal phrases are written in the present tense, not the past tense. (See also MLA-3b.)

**APA NOTE:** When you are documenting a paper with the APA (American Psychological Association) style of in-text citations, use past tense verbs such as *reported* or *demonstrated* or present perfect verbs such as *has reported* or *has demonstrated* to introduce the source.

E. Wilson (1994) reported that positive reinforcement alone was a less effective teaching technique than a mixture of positive reinforcement and constructive criticism.

**The past perfect tense**

The past perfect tense consists of a past participle preceded by *had* (*had worked, had forgotten*). This tense is used for an action already completed by the time of another past action or for an action already completed at some specific past time.

Everyone had spoken by the time I arrived.

I pleaded my case, but Paula had made up her mind.

Writers sometimes use the simple past tense when they should use the past perfect.

We built our cabin high on a pine knoll, forty feet above an abandoned quarry that had been flooded in 1920 to create a lake.
The building of the cabin and the flooding of the quarry both occurred in the past, but the flooding was completed before the time of building.

\[ \text{By the time dinner was served, the guest of honor left.} \]

The past perfect tense is needed because the action of leaving was already completed at a specific past time (when dinner was served).

Some writers tend to overuse the past perfect tense. Do not use the past perfect if two past actions occurred at the same time.

\[ \text{When Ernest Hemingway lived in Cuba, he had written } \textit{For Whom the Bell Tolls}. \]

**Sequence of tenses with infinitives and participles**

An infinitive is the base form of a verb preceded by to. (See B3-b.) Use the present infinitive to show action occurring at the same time as or later than the action of the verb in the sentence.

\[ \text{The club had hoped to have raised fifteen thousand dollars by April 1.} \]

The action expressed in the infinitive (to raise) occurred later than the action of the sentence’s verb (had hoped).

Use the perfect form of an infinitive (to have followed by the past participle) for an action occurring earlier than that of the verb in the sentence.

\[ \text{Dan would like to join the navy, but he did not pass the physical.} \]

The liking occurs in the present; the joining would have occurred in the past.

Like the tense of an infinitive, the tense of a participle is governed by the tense of the sentence’s verb. Use the present participle (ending in -ing) for an action occurring at the same time as that of the sentence’s verb.

\[ \text{Hiking the Appalachian Trail in early spring, we spotted many wildflowers.} \]

Use the past participle (such as given or helped) or the present perfect participle (having plus the past participle) for an action occurring before that of the verb.
Discovered off the coast of Florida, the Spanish galleon yielded many treasures.

Having worked her way through college, Lee graduated debt-free.

**G2-g** Use the subjunctive mood in the few contexts that require it.

There are three moods in English: the *indicative*, used for facts, opinions, and questions; the *imperative*, used for orders or advice; and the *subjunctive*, used in certain contexts to express wishes, requests, or conditions contrary to fact. For many writers, the subjunctive causes the most problems.

*Forms of the subjunctive*

In the subjunctive mood, present-tense verbs do not change form to indicate the number and person of the subject (see G1-a). Instead, the subjunctive uses the base form of the verb (*be, drive, employ*) with all subjects.

- It is important that you *be* [not *are*] prepared for the interview.
- We asked that she *drive* [not *drives*] more slowly.

Also, in the subjunctive mood, there is only one past-tense form of *be*: *were* (never *was*).

- If I *were* [not *was*] you, I'd try a new strategy.

*Uses of the subjunctive*

The subjunctive mood appears in only a few contexts: in contrary-to-fact clauses beginning with *if* or expressing a wish; in *that* clauses following verbs such as *ask, insist, recommend, request, and suggest*; and in certain set expressions.

**IN CONTRARY-TO-FACT CLAUSES BEGINNING WITH IF** When a subordinate clause beginning with *if* expresses a condition contrary to fact, use the subjunctive *were* in place of *was*.

- The astronomers would be able to see the moons of Jupiter *were* tonight if the weather *was* clearer.

The verb in the subordinate clause expresses a condition that does not exist: The weather is not clear.
If I was a member of Congress, I would vote for that bill.

The writer is not a member of Congress, so the verb in the if clause must be were.

Do not use the subjunctive mood in if clauses expressing conditions that exist or may exist.

If Dana wins the contest, she will leave for Barcelona in June.

IN CONTRARY-TO-FACT CLAUSES EXPRESSING A WISH In formal English, use the subjunctive were in clauses expressing a wish or desire. While use of the indicative is common in informal speech, it is not appropriate in academic writing.

INFORMAL I wish that Dr. Vaughn was my professor.
FORMAL I wish that Dr. Vaughn were my professor.

IN THAT CLAUSES FOLLOWING VERBS SUCH AS ASK, INSIST, REQUEST, AND SUGGEST Because requests have not yet become reality, they are expressed in the subjunctive mood.

Professor Moore insists that her students be on time.

We recommend that Lambert file form 1050 soon.

IN CERTAIN SET EXPRESSIONS The subjunctive mood appears in certain expressions: be that as it may, as it were, far be it from me, and so on.

Pronouns are words that substitute for nouns (see B1-b). Pronoun errors are typically related to the four topics discussed in this section:

a. pronoun-antecedent agreement (singular vs. plural)
b. pronoun reference (clarity)
c. pronoun case (personal pronouns such as I vs. me, she vs. her)
d. pronoun case (who vs. whom)

For more help with pronouns, consult the glossary of usage (W1).
G3-a Make pronouns and antecedents agree.

Many pronouns have antecedents, nouns or pronouns to which they refer. A pronoun and its antecedent agree when they are both singular or both plural.

**SINGULAR**

Dr. Ava Berto finished her rounds.

**PLURAL**

The hospital interns finished their rounds.

**ESL**

The pronouns he, his, she, her, it, and its must agree in gender (masculine, feminine, or neuter) with their antecedents, not with the words they modify.

Steve visited his [not her] sister in Seattle.

**Indefinite pronouns**

Indefinite pronouns refer to nonspecific persons or things. Even though some of the following indefinite pronouns may seem to have plural meanings, treat them as singular in formal English.

- anybody each everyone nobody somebody
- anyone either everything no one someone
- anything everybody neither nothing something

Everyone performs at his or her [not their] own fitness level.

When a plural pronoun refers mistakenly to a singular indefinite pronoun, you can usually choose one of three options for revision:

1. Replace the plural pronoun with he or she (or his or her).
2. Make the antecedent plural.
3. Rewrite the sentence so that no agreement problem exists.

► When someone travels outside the United States for the first time, **he or she needs** they need to apply for a passport.

► When someone travels outside the United States for the first time, **people travel** they need to apply for a passport.
Anyone who travels outside the United States for the first time needs to apply for a passport.

Because the *he or she* construction is wordy, often the second or third revision strategy is more effective. Using *he* (or *his*) to refer to persons of either sex, while less wordy, is considered sexist, as is using *she* (or *her*) for all persons. See W4-e for strategies that avoid sexist usage.

**NOTE:** If you change a pronoun from singular to plural (or vice versa), check to be sure that the verb agrees with the new pronoun (see G1-e).

**Generic nouns**

A generic noun represents a typical member of a group, such as a typical student, or any member of a group, such as any lawyer. Although generic nouns may seem to have plural meanings, they are singular.

Every runner must train rigorously if *he or she* wants [not *they* want] to excel.

When a plural pronoun refers mistakenly to a generic noun, you will usually have the same revision options as on page 197.

A medical student must study hard if *they* want to succeed.

Collective nouns

Collective nouns such as *jury, committee, audience, crowd, class, troop, family, team, and couple* name a group. Ordinarily the group functions as a unit, so the noun should be treated as singular; if the members of the group function as individuals, however, the noun should be treated as plural. (See also G1-f.)

**AS A UNIT** The committee granted *its* permission to build.

**AS INDIVIDUALS** The committee put *their* signatures on the letter.

When treating a collective noun as plural, many writers prefer to add a clearly plural antecedent such as *members* to the sentence: *The members of the committee put their signatures on the letter.*
Defense attorney Clarence Darrow urged the jury to find his client, John Scopes, guilty so that he could appeal the case to a higher court. The jury complied, returning their verdict in nine minutes. There is no reason to draw attention to the individual members of the jury, so jury should be treated as singular.

**Compound antecedents**

Treat most compound antecedents joined with and as plural.

In 1987, Reagan and Gorbachev held a summit where they signed the Intermediate-Range Nuclear Forces Treaty. With compound antecedents joined with or or nor (or with either . . . or or neither . . . nor), make the pronoun agree with the nearer antecedent.

Either Bruce or Tom should receive first prize for his poem.

Neither the mouse nor the rats could find their way through the maze.

**NOTE:** If one of the antecedents is singular and the other plural, as in the second example, put the plural one last to avoid awkwardness.

**EXCEPTION:** If one antecedent is male and the other female, do not follow the traditional rule. The sentence Either Bruce or Elizabeth should receive first prize for her short story makes no sense. A better solution is to recast the sentence: The prize for best short story should go to either Bruce or Elizabeth.

**G3-b Make pronoun references clear.**

In a sentence like After Andrew intercepted the ball, he kicked it as hard as he could, the pronouns he and it substitute for the nouns Andrew and ball. The word a pronoun refers to is called its antecedent.

**Ambiguous reference**

Ambiguous pronoun reference occurs when a pronoun could refer to two possible antecedents.
The pitcher broke when Gloria set it.

When Gloria set the pitcher on the glass-topped table, it broke.

“You have Tom told James, that he had won the lottery.”

What broke—the pitcher or the table? Who won the lottery—Tom or James? The revisions eliminate the ambiguity.

Implied reference

A pronoun should refer to a specific antecedent, not to a word that is implied but not present in the sentence.

After braiding Ann’s hair, Sue decorated them with colorful silk ribbons.

The pronoun them referred to Ann’s braids (implied by the term braiding), but the word braids did not appear in the sentence.

Modifiers, such as possessives, cannot serve as antecedents. A modifier may strongly imply the noun that a pronoun might logically refer to, but it is not itself that noun.

In Jamaica Kincaid’s “Girl,” she describes the advice a mother gives her daughter, including the mysterious warning not to be “the kind of woman who the baker won’t let near the bread” (454).

Using the possessive form of an author’s name to introduce a source leads to a problem later in this sentence: The pronoun she cannot refer logically to a possessive modifier (Jamaica Kincaid’s). The revision substitutes the noun Jamaica Kincaid for the pronoun she, thereby eliminating the problem.

Broad reference of this, that, which, and it

For clarity, the pronouns this, that, which, and it should ordinarily refer to specific antecedents rather than to whole ideas or sentences. When a pronoun’s reference is needlessly broad, either replace the pronoun with a noun or supply an antecedent to which the pronoun clearly refers.

By advertising on television, pharmaceutical companies gain exposure for their prescription drugs. Patients respond to this by requesting drugs they might not need.
For clarity, the writer substituted the noun ads for the pronoun this, which referred broadly to the idea expressed in the preceding sentence.

- Romeo and Juliet were both too young to have acquired much wisdom, and that accounts for their rash actions.

The writer added an antecedent (fact) that the pronoun that clearly refers to.

**Indefinite use of they, it, and you**

Do not use the pronoun they to refer indefinitely to persons who have not been specifically mentioned. They should always refer to a specific antecedent.

- In June, they announced that parents would have to pay a fee for their children to participate in sports and music programs starting in September.

The word it should not be used indefinitely in constructions such as It is said on television . . . or In the article, it says that . . .

- In the encyclopedia it states that male moths can smell female moths from several miles away.

The pronoun you is appropriate only when the writer is addressing the reader directly: Once you have kneaded the dough, let it rise in a warm place. Except in informal contexts, however, you should not be used to mean “anyone in general.” Use a noun instead.

- Ms. Pickersgill’s Guide to Etiquette stipulates that you should not arrive at a party too early or leave too late.

**G3-c Distinguish between pronouns such as I and me.**

The personal pronouns in the following chart change what is known as case form according to their grammatical function in a sentence. Pronouns functioning as subjects or subject complements appear in the subjective case; those functioning as objects appear in the objective case; and those showing ownership appear in the possessive case.
Pronouns in the subjective and objective cases are frequently confused. Most of the rules in this section specify when to use one or the other of these cases (I or me, he or him, and so on). See page 205 for a special use of pronouns and nouns in the possessive case.

**Subjective case (I, you, he, she, it, we, they)**

When a pronoun functions as a subject or a subject complement, it must be in the subjective case.

- **SUBJECT** Sylvia and *he* shared the award.
- **SUBJECT** Greg announced that the winners were Sylvia and *he*.

Subject complements—words following linking verbs that complete the meaning of the subject—frequently cause problems for writers, since we rarely hear the correct form in casual speech. (See B2-b.)

> During the Lindbergh trial, Bruno Hauptmann repeatedly denied *he* that the kidnapper was *him*.

If *kidnapper was he* seems too stilted, rewrite the sentence: *During the Lindbergh trial, Bruno Hauptmann repeatedly denied that he was the kidnapper.*

**Objective case (me, you, him, her, it, us, them)**

When a personal pronoun is used as a direct object, an indirect object, or the object of a preposition, it must be in the objective case.

- **DIRECT OBJECT** Bruce found Tony and brought *him* home.
- **INDIRECT OBJECT** Alice gave *me* a surprise party.
- **OBJECT OF A PREPOSITION** Jessica wondered if the call was for *her*. 
Compound word groups

When a subject or an object appears as part of a compound structure, you may occasionally become confused. To test for the correct pronoun, mentally strip away all of the compound word group except the pronoun in question.

- **Joel ran away from home because his stepfather and him had quarreled.**
  
  *His stepfather and he* is the subject of the verb *had quarreled*. If we strip away the words *his stepfather and*, the correct pronoun becomes clear: *he had quarreled* (not *him had quarreled*).

- **The most traumatic experience for her father and I occurred long after her operation.**
  
  *Her father and me* is the compound object of the preposition *for*. Strip away the words *her father and* to test for the correct pronoun: *for me* (not *for I*).

  When in doubt about the correct pronoun, some writers try to avoid making the choice by using a reflexive pronoun such as *myself*. Using a reflexive pronoun in such situations is nonstandard.

- **The Indian cab driver gave my cousin and myself some good tips on traveling in New Delhi.**
  
  *My cousin and me* is the indirect object of the verb *gave*. For correct uses of *myself*, see the glossary of usage (W1).

Appositives

Appositives are noun phrases that rename nouns or pronouns. A pronoun used as an appositive has the same function (usually subject or object) as the word(s) it renames.

- **The chief strategists, Dr. Bell and me, could not agree on a plan.**
  
  The appositive *Dr. Bell and I* renames the subject, *strategists*. Test: *I could not agree* (not *me could not agree*).

- **The newspaper reporter interviewed only two witnesses, the bicyclist me and I.**
The appositive *the bicyclist and me* renames the direct object, *witnesses*. Test: *interviewed me* (not interviewed *I*).

**We or us before a noun**

When deciding whether *we* or *us* should precede a noun, choose the pronoun that would be appropriate if the noun were omitted.

- **We**
  - Us tenants would rather fight than move.
  - Management is shortchanging **we** tenants.

- **us**
  - No one would say *Us would rather fight than move* or *Management is shortchanging we*.

**Comparisons with than or as**

When a comparison begins with *than* or *as*, your choice of a pronoun will depend on your meaning. To test for the correct pronoun, mentally complete the sentence: *My roommate likes football more than I [do]*.

- In our position paper supporting nationalized health care in the United States, we argued that Canadians are much better off **we** than us.

  - We is the subject of the verb *are*, which is understood: *Canadians are much better off than we [are]*. If the correct English seems too formal, you can always add the verb.

- We respected no other candidate for the city council as much **her** as she.

  - This sentence means that we respected no other candidate as much as we respected her. *Her* is the direct object of the understood verb respected.

**Subjects and objects of infinitives**

An infinitive is the word *to* followed by the base form of a verb. (See B3-b.) Subjects of infinitives are an exception to the rule that subjects must be in the subjective case. Whenever an infinitive has a subject, it must be in the objective case. Objects of infinitives also are in the objective case.

- Ms. Wilson asked John and I to drive the senator and she to the airport.
John and me is the subject of the infinitive to drive; senator and her is the direct object of the infinitive.

**Possessive case to modify a gerund**

A pronoun that modifies a gerund or a gerund phrase should be in the possessive case (my, your, his, her, its, our, their). A gerund is a verb form ending in -ing that functions as a noun. Gerunds frequently appear in phrases; when they do, the whole gerund phrase functions as a noun. (See B3-b.)

- The chances of your being hit by lightning are about two million to one.

  Your modifies the gerund phrase being hit by lightning.

  Nouns as well as pronouns may modify gerunds. To form the possessive case of a noun, use an apostrophe and an -s (victim’s) or just an apostrophe (victims’). (See P4-a.)

- The old order in France paid a high price for the aristocracy exploiting the lower classes.

  The possessive noun aristocracy’s modifies the gerund phrase exploiting the lower classes.

**G3-d  Distinguish between who and whom.**

The choice between who and whom (or whoever and whomever) occurs primarily in subordinate clauses and in questions. Who and whoever, subjective-case pronouns, are used for subjects and subject complements. Whom and whomever, objective-case pronouns, are used for objects.

An exception to this general rule occurs when the pronoun functions as the subject of an infinitive (see p. 207).

**In subordinate clauses**

When who and whom (or whoever and whomever) introduce subordinate clauses, their case is determined by their function within the clause they introduce.
In the following two examples, the pronouns *who* and *whoever* function as the subjects of the clauses they introduce.

- **First prize goes to the runner whom earns the most points.**
  The subordinate clause is *who earns the most points*. The verb of the clause is *earns*, and its subject is *who*.

- **Maya Angelou’s *I Know Why the Caged Bird Sings* should be read by whomever is interested in the effects of racial prejudice on children.**
  The writer selected the pronoun *whomever*, thinking that it was the object of the preposition *by*. However, the object of the preposition is the entire subordinate clause *whoever is interested in the effects of racial prejudice on children*. The verb of the clause is *is*, and the subject of the verb is *whoever*.

When functioning as an object in a subordinate clause, *whom* (or *whomever*) appears out of order, before the subject and verb. To choose the correct pronoun, you can mentally restructure the clause.

- **You will work with our senior traders, whom you will meet after your orientation.**
  The subordinate clause is *whom you will meet after your orientation*. The subject of the clause is *you*, and the verb is *will meet*. Whom is the direct object of the verb. The correct choice becomes clear if you mentally restructure the clause: *you will meet whom*.

When functioning as the object of a preposition in a subordinate clause, *whom* is often separated from its preposition.

- **The tutor whom I was assigned to was very supportive.**
  Whom is the object of the preposition to. In this sentence, the writer might choose to drop whom: *The tutor I was assigned to was very supportive.*

**NOTE:** Inserted expressions such as *they know, I think*, and *she says* should be ignored in determining whether to use *who* or *whom*.

- **The speech pathologist reported a particularly difficult session with a stroke patient whom she knew was suffering from aphasia.**
  *Who* is the subject of *was suffering*, not the object of *knew*. 
In questions

The case of an interrogative pronoun is determined by its function within the question.

\[ \text{Who} \]

\[ \text{Whom was responsible for creating that computer virus?} \]

\[ \text{Who is the subject of the verb was.} \]

When \textit{whom} functions as the object in a question, it appears out of normal order. To choose the correct pronoun, you can mentally restructure the question.

\[ \text{Whom} \]

\[ \text{Who did the Democratic Party nominate in 2004?} \]

\[ \text{Whom is the direct object of the verb did nominate. This becomes clear if you restructure the question: The Democratic Party did nominate whom in 2004?} \]

For subjects or objects of infinitives

An infinitive is the word to followed by the base form of a verb. (See B3-b.) Subjects of infinitives are an exception to the rule that subjects must be in the subjective case. The subject of an infinitive must be in the objective case. Objects of infinitives also are in the objective case. (See also p. 204.)

\[ \text{When it comes to money, I know who to believe.} \]

The infinitive phrase \textit{whom to believe} is the direct object of the verb \textit{know}, and \textit{whom} is the subject of the infinitive \textit{to believe}.

G4 Adjectives and adverbs

Adjectives modify nouns or pronouns. They usually come before the word they modify; occasionally they function as complements following the word they modify. Adverbs modify verbs, adjectives, or other adverbs. (See B1-d and B1-e.)

Many adverbs are formed by adding \textit{-ly} to adjectives (\textit{normal, normally; smooth, smoothly}). But don’t assume that all words ending in \textit{-ly} are adverbs or that all adverbs end in \textit{-ly}. Some adjectives end in \textit{-ly} (\textit{lovely, friendly}), and some adverbs don’t (\textit{always, here, there}). When in doubt, consult a dictionary.
Use adjectives to modify nouns.

Adjectives ordinarily precede the nouns they modify. But they can also function as subject complements or object complements, following the nouns they modify.

Subject complements

A subject complement follows a linking verb and completes the meaning of the subject. (See B2-b.) When an adjective functions as a subject complement, it describes the subject.

*Justice is blind.*

Problems can arise with verbs such as *smell, taste, look, and feel,* which sometimes, but not always, function as linking verbs. If the word following one of these verbs describes the subject, use an adjective; if the word following the verb modifies the verb, use an adverb.

**ADJECTIVE** The detective looked *cautious.*

**ADVERB** The detective looked *cautiously* for fingerprints.

The adjective *cautious* describes the detective; the adverb *cautiously* modifies the verb *looked.*

Linking verbs suggest states of being, not actions. Notice, for example, the different meanings of *looked* in the preceding examples. To look cautious suggests the state of being cautious; to look cautiously is to perform an action in a cautious way.

The lilacs in our backyard smell especially sweetly this year.

The verb *smell* suggests a state of being, not an action. Therefore, it should be followed by an adjective, not an adverb.

The drawings looked well after the architect made a few changes.
The verb *looked* is a linking verb suggesting a state of being, not an action. The adjective *good* is appropriate following the linking verb to describe *drawings*. (See also the note on p. 210.)

When the verb *feel* refers to the state of a person’s health or emotions, it is a linking verb and should be followed by an adjective (such as *bad*) instead of an adverb (such as *badly*).

*bad*

We felt badly when we heard of your grandmother’s death.

**Object complements**

An object complement follows a direct object and completes its meaning. (See B2-b.) When an adjective functions as an object complement, it describes the direct object.

Sorrow makes *us* wise.

Object complements occur with verbs such as *call*, *consider*, *create*, *find*, *keep*, and *make*. When a modifier follows the direct object of one of these verbs, use an adjective to describe the direct object; use an adverb to modify the verb.

**ADJECTIVE**  The referee called the plays *perfect*.

**ADVERB**  The referee called the plays *perfectly*.

The first sentence means that the referee considered the plays to be perfect; the second means that the referee did an excellent job of calling the plays.

**G4-b Use adverbs to modify verbs, adjectives, and other adverbs.**

When adverbs modify verbs (or verbals), they nearly always answer the question When? Where? How? Why? Under what conditions? How often? or To what degree? When adverbs modify adjectives or other adverbs, they usually qualify or intensify the meaning of the word they modify. (See B1-e.)

Adjectives are often used incorrectly in place of adverbs in casual or nonstandard speech.

The transportation arrangement worked out *perfect* for everyone.

The manager must see that the office runs *smooth* and *efficient*. 
The adverb *perfectly* modifies the verb *worked out*; the adverbs *smoothly* and *efficiently* modify the verb *runs*.

The chance of recovering any property lost in the fire looks *really* real slim.

Only adverbs can modify adjectives or other adverbs. *Really* intensifies the meaning of the adjective *slim*.

**NOTE:** The incorrect use of the adjective *good* in place of the adverb *well* to modify a verb is especially common in casual and nonstandard speech. Use *well*, not *good*, to modify a verb in your writing.

We were glad that Sanya had done *good* on the CPA exam.

The adverb *well* should be used to modify the verb *had done*.

The word *well* is an adjective, however, when it means “healthy,” “satisfactory,” or “fortunate”: *I feel very well today. All is well. It is just as well.*

For more help with *well* and *good*, consult the glossary of usage (W1).

**ESL** The placement of adverbs varies from language to language. Unlike some languages, such as French and Spanish, English does not allow an adverb between a verb (*poured*) and its direct object (*the liquid*). See M3-f.

In the last stage of our experiment, we poured *slowly* the liquid into the container.

**G4-c Use comparatives and superlatives with care.**

Most adjectives and adverbs have three forms: the positive, the comparative, and the superlative.

<table>
<thead>
<tr>
<th>POSITIVE</th>
<th>COMPARATIVE</th>
<th>SUPERLATIVE</th>
</tr>
</thead>
<tbody>
<tr>
<td>soft</td>
<td>softer</td>
<td>softest</td>
</tr>
<tr>
<td>fast</td>
<td>faster</td>
<td>fastest</td>
</tr>
<tr>
<td>careful</td>
<td>more careful</td>
<td>most careful</td>
</tr>
<tr>
<td>bad</td>
<td>worse</td>
<td>worst</td>
</tr>
<tr>
<td>good</td>
<td>better</td>
<td>best</td>
</tr>
</tbody>
</table>
Comparative versus superlative

Use the comparative to compare two things, the superlative to compare three or more.

► Which of these two low-carb drinks is best?

► Though Shaw and Jackson are impressive, Hobbs is the more qualified of the three candidates running for mayor.

Forming comparatives and superlatives

To form comparatives and superlatives of one-syllable adjectives, use the endings -er and -est: smooth, smoother, smoothest; dark, darker, darkest. For adjectives with three or more syllables, use more and most (or less and least for downward comparisons): exciting, more exciting, most exciting; interesting, less interesting, least interesting. Two-syllable adjectives form comparatives and superlatives in both ways: lovely, lovelier, loveliest; helpful, more helpful, most helpful.

Some one-syllable adverbs take the endings -er and -est (fast, faster, fastest), but longer adverbs and all of those ending in -ly form the comparative and superlative with more and most (or less and least).

The comparative and superlative forms of some adjectives and adverbs are irregular: good, better, best; well, better, best; bad, worse, worst; badly, worse, worst.

► The Kirov is the talentedest ballet company we have seen.

► According to our projections, sales at local businesses will be worse than those at the chain stores this winter.

Double comparatives or superlatives

Do not use double comparatives or superlatives. When you have added -er or -est to an adjective or adverb, do not also use more or most (or less or least).

► Of all her family, Julia is the most happiest about the move.

► All the polls indicated that Gore was more likelier to win than Bush.
Absolute concepts

Avoid expressions such as more straight, less perfect, very round, and most unique. Either something is unique or it isn’t. It is illogical to suggest that absolute concepts come in degrees.

- That is the most unique wedding gown I have ever seen.
- The painting would have been even more priceless had it been signed.

G4-d Avoid double negatives.

Standard English allows two negatives only if a positive meaning is intended: The orchestra was not unhappy with its performance (meaning that the orchestra was happy). Using a double negative to emphasize a negative meaning is nonstandard. Negative modifiers such as never, no, and not should not be paired with other negative modifiers or with negative words such as neither, none, no one, nobody, and nothing.

- Management is not doing nothing to see that the trash is picked up.

The double negative not . . . nothing is nonstandard.

- The modifiers hardly, barely, and scarcely are considered negatives in standard English, so they should not be used with negatives such as not, no one, or never.

- Maxine is so weak that she can’t hardly climb stairs.

G5 Sentence fragments

A sentence fragment is a word group that pretends to be a sentence. Sentence fragments are easy to recognize when they appear out of context, like these:

- When the cat leaped onto the table.
- Running for the bus.
- And immediately popped their flares and life vests.
When fragments appear next to related sentences, however, they are harder to spot.

We had just sat down to dinner. When the cat leaped onto the table.
I tripped and twisted my ankle. Running for the bus.
The pilots ejected from the burning plane, landing in the water not far from the ship. And immediately popped their flares and life vests.
Recognizing sentence fragments

To be a sentence, a word group must consist of at least one full independent clause. An independent clause includes a subject and a verb, and it either stands alone or could stand alone.

To test whether a word group is a complete sentence or a fragment, use the flowchart on page 213. By using the flowchart, you can see exactly why *When the cat leaped onto the table* is a fragment: It has a subject (*cat*) and a verb (*leaped*), but it begins with a subordinating word (*When*). *Running for the bus* is a fragment because it lacks a subject and a verb (*Running* is a verbal, not a verb). *And immediately popped their flares and life vests* is a fragment because it lacks a subject. (See also B3-b and B3-e.)

ESL Unlike some other languages, English requires a subject and a verb in every sentence (except in commands, where the subject *you* is understood but not present: *Sit down*). See M3-a and M3-b.

- *It is* often hot and humid during the summer.
- *are* Students usually very busy at the end of the semester.

Repairing sentence fragments

You can repair most fragments in one of two ways:

1. Pull the fragment into a nearby sentence.
2. Rewrite the fragment as a complete sentence.

- *We had just sat down to dinner/When the cat leaped onto the table.*

*Running for the bus,*

- *The pilots ejected from the burning plane, landing in the water not far from the ship. And immediately popped their flares and life vests.*
G5-a Attach fragmented subordinate clauses or turn them into sentences.

A subordinate clause is patterned like a sentence, with both a subject and a verb, but it begins with a word that marks it as subordinate. The following words commonly introduce subordinate clauses.

- after
- although
- as
- because
- before
- even though
- how
- if
- so that
- than
- that
- unless
- until
- when
- whom
- whose
- while
- who
- whom
- whether
- whose
- why

Subordinate clauses function within sentences as adjectives, as adverbs, or as nouns. They cannot stand alone. (See B3-e.)

Most fragmented clauses beg to be pulled into a sentence nearby.

- Americans have come to fear the West Nile virus because it is transmitted by the common mosquito.
  
  *Because* introduces a subordinate clause, so it cannot stand alone. (For punctuation of subordinate clauses at the end of a sentence, see P2-f.)

If a fragmented clause cannot be attached to a nearby sentence or if you feel that attaching it would be awkward, try turning the clause into a sentence. The simplest way to do this is to delete the opening word or words that mark it as subordinate.

- Population increases and uncontrolled development are taking a deadly toll on the environment. So that across the globe, fragile ecosystems are collapsing.

G5-b Attach fragmented phrases or turn them into sentences.

Like subordinate clauses, phrases function within sentences as adjectives, as adverbs, or as nouns. They cannot stand alone. Fragmented phrases are often prepositional or verbal phrases; sometimes they are appositives, words or word groups that rename nouns or pronouns. (See B3-a, B3-b, and B3-c.)

Often a fragmented phrase may simply be pulled into a nearby sentence.
The archaeologists worked slowly, examining and labeling every pottery shard they uncovered. The word group beginning with Examining is a verbal phrase.

The patient displayed symptoms of ALS, a neurodegenerative disease.

A neurodegenerative disease is an appositive renaming the noun ALS. (For punctuation of appositives, see P1-e.)

If a fragmented phrase cannot be pulled into a nearby sentence effectively, turn the phrase into a sentence. You may need to add a subject, a verb, or both.

She also taught us how to submit expense reports and request vendor payments.

The revision turns the fragmented phrase into a sentence by adding a subject and a verb.

Other word groups that are commonly fragmented include parts of compound predicates, lists, and examples introduced by for example, in addition, or similar expressions.

Parts of compound predicates

A predicate consists of a verb and its objects, complements, and modifiers (see B2-b). A compound predicate includes two or more predicates joined with a coordinating conjunction such as and, but, or or. Because the parts of a compound predicate have the same subject, they should appear in the same sentence.

The woodpecker finch of the Galápagos Islands carefully selects a twig of a certain size and shape, and then uses this tool to pry out grubs from trees.

The subject is finch, and the compound predicate is selects . . . and . . . uses. (For punctuation of compound predicates, see P2-a.)
Lists

To correct a fragmented list, often you can attach it to a nearby sentence with a colon or a dash. (See P3-d and P6-b.)

- It has been said that there are only three indigenous American musical art forms: Musical comedy, jazz, and soap opera.

  Sometimes terms like especially, like, and such as introduce fragmented lists. Such fragments can usually be attached to the preceding sentence.

- In the twentieth century, the South produced some great American writers, such as Flannery O’Connor, William Faulkner, Alice Walker, and Tennessee Williams.

Examples introduced by for example, in addition, or similar expressions

Expressions that introduce examples or explanations can lead to fragments. Although a sentence may begin with a word or phrase like the following, the rest of the sentence must include a subject and a verb.

- also for example mainly
- and for instance or
- but in addition that is

Often the easiest solution is to turn the fragment into a sentence.

- A streaming gauge is useful for measuring a river’s height and flow. In addition, providing residents with early flood warnings.

  The writer corrected this fragment by adding a subject—it—and substituting the verb provides for the verbal providing.

- Tannen claims that men and women have different ideas about communication. For example, that a woman “expects her husband to be a new and improved version of her best friend” (441).

  A quotation must be part of a complete sentence. That a woman “expects her husband to be a new and improved version of her best friend” is a fragment—a subordinate clause. Adding a signal phrase that includes a subject and a verb (she explains) corrects the fragment.
Exception: A fragment may be used for effect.

Writers occasionally use sentence fragments for special purposes.

**FOR EMPHASIS**
Following the dramatic Americanization of their children, even my parents grew more publicly confident. *Especially my mother.* —Richard Rodriguez

**TO ANSWER A QUESTION**
Are these new drug tests 100 percent reliable? *Not in the opinion of most experts.*

**TRANSITIONS**
And now the opposing arguments.

**EXCLAMATIONS**
Not again!

**IN ADVERTISING**
Fewer carbs. Improved taste.

Although fragments are sometimes effective, writers and readers do not always agree on when they are appropriate. That’s why you will find it safer to write in complete sentences.

Run-on sentences

Run-on sentences are independent clauses that have not been joined correctly. An independent clause is a word group that can stand alone as a sentence. (See B4-a.) When two independent clauses appear in one sentence, they must be joined in one of these ways:

- with a comma and a coordinating conjunction (*and, but, or, nor, for, so, yet*)
- with a semicolon (or occasionally with a colon or a dash)

**Recognizing run-on sentences**

There are two types of run-on sentences. When a writer puts no mark of punctuation and no coordinating conjunction between independent clauses, the result is called a *fused sentence.*

<table>
<thead>
<tr>
<th>INDEPENDENT CLAUSE</th>
<th>FUSED</th>
<th>INDEPENDENT CLAUSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air pollution poses risks to all humans it can be</td>
<td>deadly for asthma sufferers.</td>
<td></td>
</tr>
</tbody>
</table>

A far more common type of run-on sentence is the *comma splice*—two or more independent clauses joined with a comma but without a coordinating conjunction. In some comma splices, the comma appears alone.
Air pollution poses risks to all humans, it can be deadly for asthma sufferers.

In other comma splices, the comma is accompanied by a joining word that is *not* a coordinating conjunction (*and*, *but*, *or*, *nor*, *for*, *so*, and *yet*).

Air pollution poses risks to all humans, however, it can be deadly for asthma sufferers.

*However* is a transitional expression and cannot be used with only a comma to join two independent clauses (see G6-b).

**Revising run-on sentences**

To revise a run-on sentence, you have four choices.

1. Use a comma and a coordinating conjunction (*and*, *but*, *or*, *nor*, *for*, *so*, *yet*).

   ▶ Air pollution poses risks to all humans, it can be deadly for asthma sufferers.

2. Use a semicolon (or, if appropriate, a colon or a dash). A semicolon may be used alone or with a transitional expression.

   ▶ Air pollution poses risks to all humans; it can be deadly for asthma sufferers.

3. Make the clauses into separate sentences.

   ▶ It Air pollution poses risks to all humans; it can be deadly for asthma sufferers.

4. Restructure the sentence, perhaps by subordinating one of the clauses.

   ▶ Although air

   ▶ Air pollution poses risks to all humans, it can be deadly for asthma sufferers.

One of these revision techniques usually works better than the others for a particular sentence. The fourth technique, the one requiring the most extensive revision, is often the most effective.
G6-a  Consider separating the clauses with a comma and a coordinating conjunction.

There are seven coordinating conjunctions in English: *and, but, or, nor, for, so,* and *yet.* When a coordinating conjunction joins independent clauses, it is usually preceded by a comma. (See P1-a.)

Some lesson plans include exercises, completing them should not be the focus of all class periods.

G6-b  Consider separating the clauses with a semicolon (or, if appropriate, with a colon or a dash).

When the independent clauses are closely related and their relation is clear without a coordinating conjunction, a semicolon is an acceptable method of revision. (See P3-a.)

Tragedy depicts the individual confronted with the fact of death; comedy depicts the adaptability of human society.

A semicolon is required between independent clauses that have been linked with a transitional expression (such as *however, therefore, moreover, in fact,* or *for example*). For a longer list, see P3-a.

In his film adaptation of the short story “Killings,” director Todd Field changed key details of the plot; as a matter of fact, he added whole scenes that do not appear in the story.

A colon or a dash may be more appropriate if the first independent clause introduces the second or if the second clause summarizes or explains the first. (See P3-d and P6-b.) In formal writing, the colon is usually preferred to the dash.

Nuclear waste is hazardous: this is an indisputable fact.

The female black widow spider is often a widow of her own making; she has been known to eat her partner after mating.
A colon is an appropriate method of revision if the first independent clause introduces a quoted sentence.

Nobel Peace Prize winner Al Gore had this to say about climate change:

“The truth is that our circumstances are not only new; they are completely different than they have ever been in all of human history.”
G6-c Consider making the clauses into separate sentences.

- Why should we spend money on expensive space exploration, we have enough underfunded programs here on Earth.

Since one independent clause is a question and the other is a statement, they should be separate sentences.

- Some studies have suggested that the sexual relationships of bonobos set them apart from common chimpanzees. According to Stanford (1998), these differences have been exaggerated.

Using a comma to join two independent clauses creates a comma splice. In this example, an effective revision is to separate the first independent clause (Some studies . . .) from the second independent clause (these differences . . .) and to keep the signal phrase with the second clause. (See also APA-3.)

NOTE: When two quoted independent clauses are divided by explanatory words, make each clause its own sentence.

- “It’s always smart to learn from your mistakes,” quipped my boss. “It’s even smarter to learn from the mistakes of others.”

G6-d Consider restructuring the sentence, perhaps by subordinating one of the clauses.

If one of the independent clauses is less important than the other, turn it into a subordinate clause or a phrase. (For more about subordination, see S6, especially the list on p. 130.)

- One of the most famous advertising slogans is Wheaties cereal’s “Breakfast of Champions,” it was penned in 1933.

- Mary McLeod Bethune, was the seventeenth child of former slaves, she founded the National Council of Negro Women in 1935.

This section of *A Writer’s Reference* is primarily for multilingual writers. You may find this section helpful if you learned English as a second language (ESL) or if you speak a language other than English with your friends and family.

## M1 Verbs

Both native and nonnative speakers of English encounter challenges with verbs. Section M1 focuses on specific challenges that multilingual writers sometimes face. You can find more help with verbs in other sections in the book:

- making subjects and verbs agree (G1)
- using irregular verb forms (G2-a, G2-b)
- leaving off verb endings (G2-c, G2-d)
- choosing the correct verb tense (G2-f)
- avoiding inappropriate uses of the passive voice (W3-a)

### M1-a Use the appropriate verb form and tense.

This section offers a brief review of English verb forms and tenses. For additional help, see G2-f and B1-c.

#### Basic verb forms

Every main verb in English has five forms, which are used to create all of the verb tenses in standard English. The chart on page 226 shows these forms for the regular verb *help* and the irregular verbs *give* and *be*. See G2-a for the forms of other common irregular verbs.

#### Verb tenses

Section G2-f describes all the verb tenses in English, showing the forms of a regular verb, an irregular verb, and the verb *be* in each tense. The chart on pages 227–28 provides more details about the tenses commonly used in the active voice in writing; the chart on page 229 gives details about tenses commonly used in the passive voice.

> Sample student paper (draft and final)  
> Exercises  
> Links to online resources
To write a verb in the passive voice, use a form of be with the past participle.

When a sentence is written in the passive voice, the subject receives the action instead of doing it. (See B2-b.)

The solution was measured by the lab assistant.
Melissa was taken to the hospital.

To form the passive voice, use a form of be—am, is, are, was, were, being, be, or been—followed by the past participle of the main verb: was chosen, are remembered. (Sometimes a form of be follows another helping verb: will be stopped, could have been broken.)

For details on forming the passive in various tenses, consult the chart on page 229. (For appropriate uses of the passive voice, see W3-a.)

Dreaming in Cuban was writing by Cristina García.

In the passive voice, the past participle written, not the present participle writing, must follow was (the past tense of be).

Senator Dixon will defeated.

The passive voice requires a form of be before the past participle.

The child was being tease.

The past participle teased, not the base form tease, must be used with was being to form the passive voice.

</tr>
</tbody>
</table>
Verb tenses commonly used in the active voice (continued)

NOTE: Some verbs are not normally used in the progressive: appear, believe, belong, contain, have, hear, know, like, need, see, seem, taste, understand, and want.

want

► I am wanting to see August Wilson’s Radio Golf.

Perfect tenses

For actions that happened or will happen before another time

Present perfect

- repetitive or constant actions that began in the past and continue to the present

I have loved cats since I was a child.

Alicia has worked in Kenya for ten years.

- actions that happened at an unknown or unspecified time in the past

Stephen has visited Wales three times.

Past perfect

- actions that began or occurred before another time in the past

She had just crossed the street when the runaway car crashed into the building.

NOTE: For more discussion of uses of the past perfect tense, see G2-f. For advice about using the past perfect in conditional sentences, see M1-e.

Perfect progressive forms

For continuous past actions before another time

Present perfect progressive

- continuous actions that began in the past and continue to the present

Yolanda has been trying to get a job in Boston for five years.

Past perfect progressive

- actions that began and continued in the past until some other past action

By the time I moved to Georgia, I had been supporting myself for five years.
Verb tenses commonly used in the passive voice

For details about verb tenses in the active voice, see pages 227–28.

### Simple tenses (passive voice)

**Simple present**  
*am, is, are + past participle*  
- general facts  
  Breakfast *is served* daily.  
- habitual, repetitive actions  
  The receipts *are counted* every night.

**Simple past**  
*was, were + past participle*  
- completed past actions  
  He *was punished* for being late.

**Simple future**  
*will be + past participle*  
- future actions, promises, or predictions  
  The decision *will be made* by the committee next week.

### Simple progressive forms (passive voice)

**Present progressive**  
*am, is, are + being + past participle*  
- actions in progress at the present time  
  The new stadium *is being built* with private money.  
- future actions (with *go, leave, come, move, etc.*)  
  *Jo is being moved* to a new class next month.

**Past progressive**  
*was, were + being + past participle*  
- actions in progress at a specific time in the past  
  We thought we *were being followed*.

### Perfect tenses (passive voice)

**Present perfect**  
*has, have + been + past participle*  
- actions that began in the past and continue to the present  
  The flight *has been delayed* because of violent storms in the Midwest.  
- actions that happened at an unknown or unspecified time in the past  
  Wars *have been fought* throughout history.

**Past perfect**  
*had + been + past participle*  
- actions that began or occurred before another time in the past  
  He *had been given* all the hints he needed to complete the puzzle.

**NOTE:** The future progressive, future perfect, and perfect progressive forms are not used in the passive voice.
NOTE: Only transitive verbs, those that take direct objects, may be used in the passive voice. Intransitive verbs such as occur, happen, sleep, die, become, and fall are not used in the passive. (See B2-b.)

- The accident was happened suddenly.
  - fell
- Stock prices were fallen all week.

M1-c Use the base form of the verb after a modal.

The modal verbs are can, could, may, might, must, shall, should, will, and would. (Ought to is also considered a modal verb.) The modals are used with the base form of a verb to show certainty, necessity, or possibility.

- The art museum will launches its fundraising campaign next month.
  - launch
- The translator could spoke many languages, so the ambassador hired her for the European tour.
  - speak

TIP: Do not use to in front of a main verb that follows a modal.

- Gina can to drive us home if we miss the last train.

For the use of modals in conditional sentences, see M1-e.

M1-d To make negative verb forms, add not in the appropriate place.

If the verb is the simple present or past tense of be (am, is, are, was, were), add not after the verb.

Mario is not a member of the club.
For simple present-tense verbs other than be, use do or does plus not before the base form of the verb. (For the correct forms of do and does, see the chart in G1-a.)

\textit{does not}

- Mariko \textbf{not} want more dessert.
- Mariko \textbf{does not want} more dessert.

For simple past-tense verbs other than be, use did plus not before the base form of the verb.

\textit{plant}

- They \textbf{did not} planted corn this year.

In a verb phrase consisting of one or more helping verbs and a present or past participle (is watching, were living, has played, could have been driven), use the word not after the first helping verb.

\textit{not}

- Inna should have \textbf{not} gone dancing last night.
- Bonnie is \textbf{no} singing this weekend.

\textbf{NOTE:} English allows only one negative in an independent clause to express a negative idea; using more than one is an error known as a double negative (see G4-d).

\textit{any}

- We could not find \textbf{no} books about the history of our school in the public library.

\textbf{M1-e In a conditional sentence, choose verb tenses according to the type of condition expressed in the sentence.}

Conditional sentences contain two clauses: a subordinate clause (usually starting with if, when, or unless) and an independent clause. The subordinate clause (sometimes called the if or unless clause) states the condition or cause; the independent clause states the result or effect. In each example in this section, the subordinate clause (if clause) is marked SUB, and the independent clause is marked IND. (See B3-e on clauses.)
# Modals and their meanings

<table>
<thead>
<tr>
<th>Verb</th>
<th>Meaning</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>can</strong></td>
<td>general ability (present)</td>
<td>Ants <em>can survive</em> anywhere, even in space. Jorge <em>can run</em> a marathon faster than his brother.</td>
</tr>
<tr>
<td></td>
<td>informal requests or permission</td>
<td><em>Can you</em> tell me where the light is? Sandy <em>can borrow</em> my calculator.</td>
</tr>
<tr>
<td><strong>could</strong></td>
<td>general ability (past)</td>
<td>Lea <em>could read</em> when she was only three years old.</td>
</tr>
<tr>
<td></td>
<td>polite, informal requests or permission</td>
<td><em>Could you</em> give me that pen?</td>
</tr>
<tr>
<td><strong>may</strong></td>
<td>formal requests or permission</td>
<td><em>May I</em> see the report? Students <em>may park</em> only in the yellow zone.</td>
</tr>
<tr>
<td></td>
<td>possibility</td>
<td><em>I may try</em> to finish my homework tonight, or <em>I may wake up</em> early and <em>finish</em> it tomorrow.</td>
</tr>
<tr>
<td><strong>might</strong></td>
<td>possibility</td>
<td>Funding for the language lab <em>might double</em> by 2017.</td>
</tr>
<tr>
<td><strong>must</strong></td>
<td>necessity (present or future)</td>
<td>To be effective, welfare-to-work programs <em>must provide</em> access to job training.</td>
</tr>
<tr>
<td></td>
<td>strong probability</td>
<td>Amy <em>must be</em> sick. [She is probably sick.]</td>
</tr>
<tr>
<td></td>
<td>near certainty (present or past)</td>
<td><em>I must have left</em> my wallet at home. [I almost certainly left my wallet at home.]</td>
</tr>
<tr>
<td><strong>should</strong></td>
<td>suggestions or advice</td>
<td>Diabetics <em>should drink</em> plenty of water every day.</td>
</tr>
<tr>
<td></td>
<td>obligations or duties</td>
<td>The government <em>should protect</em> citizens’ rights.</td>
</tr>
<tr>
<td></td>
<td>expectations</td>
<td>The books <em>should arrive</em> soon. [We expect the books to arrive soon.]</td>
</tr>
</tbody>
</table>
**will**

- certainty  
  If you don’t leave now, you will be late.

- requests  
  Will you help me study for my test?

- promises and offers  
  Jonah will arrange the carpool.

**would**

- polite requests  
  Would you help me carry these books?  
  I would like some coffee. [Would like is more polite than want.]

- habitual or repeated  
  actions (past)  
  Whenever Elena needed help with sewing, she would call her aunt.

**Factual**

Factual conditional sentences express relations based on fact. If the relationship is a scientific truth, use the present tense in both clauses.

If water cools to 32° Fahrenheit, it freezes.

If the sentence describes a condition that is or was habitually true, use the same tense in both clauses.

When Sue jogs along the canal, her dog runs ahead of her.

Whenever the coach asked for help, I volunteered.

**Predictive**

Predictive conditional sentences are used to predict the future or to express future plans or possibilities. To form a predictive sentence, use a present-tense verb in the subordinate clause; in the independent clause, use the modal will, can, may, should, or might plus the base form of the verb.

If you practice regularly, your tennis game should improve.

We will lose our remaining wetlands unless we act now.

**TIP:** In all types of conditional sentences (factual, predictive, and speculative), if or unless clauses do not use the modal verb will.

► If Jenna will pass her history test, she will graduate this year.
**Speculative**

Speculative conditional sentences express unlikely, contrary-to-fact, or impossible conditions. English uses the past or past perfect tense in the *if* clause, even for conditions in the present or the future.

**UNLIKELY POSSIBILITIES** If the condition is possible but unlikely in the present or the future, use the past tense in the subordinate clause; in the independent clause, use *would*, *could*, or *might* plus the base form of the verb.

```
<table>
<thead>
<tr>
<th>SUB</th>
<th>IND</th>
</tr>
</thead>
</table>
If I *won* the lottery, I *would travel* to Egypt.
```

The writer does not expect to win the lottery. Because this is a possible but unlikely present or future situation, the subordinate clause uses the past tense.

**CONDITIONS CONTRARY TO FACT** In conditions that are currently unreal or contrary to fact, use the past-tense verb *were* (not *was*) in the *if* clause for all subjects. (See also G2-g, on the subjunctive mood.)

```
<table>
<thead>
<tr>
<th>SUB</th>
<th>IND</th>
</tr>
</thead>
</table>
If I *was* president, I *would make* children’s issues a priority.
```

The writer is not president, so *were* is correct in the *if* clause.

**EVENTS THAT DID NOT HAPPEN** In a conditional sentence that speculates about an event that did not happen or was impossible in the past, use the past perfect tense in the *if* clause; in the independent clause, use *would have*, *could have*, or *might have* with the past participle. (See also past perfect tense, p. 228.)

```
<table>
<thead>
<tr>
<th>SUB</th>
<th>IND</th>
</tr>
</thead>
</table>
If I *had saved* more money, I *would have visited* Laos last year.
```

The writer did not save more money and did not travel to Laos. This sentence shows a possibility that did not happen.

```
<table>
<thead>
<tr>
<th>SUB</th>
<th>IND</th>
</tr>
</thead>
</table>
If Aunt Grace *had been* alive for your graduation, she *would have been* very proud.
```

Aunt Grace was not alive at the time of the graduation. This sentence shows an impossible situation in the past.
Become familiar with verbs that may be followed by gerunds or infinitives.

A gerund is a verb form that ends in -\textit{ing} and is used as a noun: \textit{sleeping}, \textit{dreaming}. (See B3-b.) An infinitive is the word \textit{to} plus the base form of the verb: \textit{to sleep}, \textit{to dream}. (The word \textit{to} is an infinitive marker, not a preposition, in this use.)

A few verbs may be followed by either a gerund or an infinitive; others may be followed by a gerund but not by an infinitive; still others may be followed by an infinitive but not by a gerund.

\textbf{Verb + gerund or infinitive (no change in meaning)}

The following commonly used verbs may be followed by a gerund or an infinitive, with little or no difference in meaning:

\begin{itemize}
  \item begin
  \item hate
  \item love
  \item continue
  \item like
  \item start
\end{itemize}

I love \textit{skiing}. I love \textit{to ski}.

\textbf{Verb + gerund or infinitive (change in meaning)}

With a few verbs, the choice of a gerund or an infinitive changes the meaning dramatically:

\begin{itemize}
  \item forget
  \item remember
  \item stop
  \item try
\end{itemize}

She stopped \textit{speaking} to Lucia. [She no longer spoke to Lucia.]

She stopped \textit{to speak} to Lucia. [She paused so that she could speak to Lucia.]

\textbf{Verb + gerund}

These verbs may be followed by a gerund but not by an infinitive:

\begin{itemize}
  \item admit
  \item enjoy
  \item postpone
  \item resist
  \item appreciate
  \item escape
  \item practice
  \item risk
  \item avoid
  \item finish
  \item put off
  \item suggest
  \item deny
  \item imagine
  \item quit
  \item tolerate
  \item discuss
  \item miss
  \item recall
\end{itemize}

Bill enjoys \textit{playing} [not \textit{to play}] the piano.

Jamie quit \textit{smoking}.  

\textcolor{blue}{PRACTICE hackinghandbooks.com/writersref
> Multilingual/ESL > M1–8 and M1–9}
**Verb + infinitive**

These verbs may be followed by an infinitive but not by a gerund:

- agree  
- expect  
- need  
- refuse  
- ask  
- help  
- offer  
- wait  
- beg  
- hope  
- plan  
- want  
- claim  
- manage  
- pretend  
- wish  
- decide  
- mean  
- promise  
- would like

Jill has offered *to water* [not *watering*] the plants while we are away.

Joe finally managed *to find* a parking space.

The man refused *to join* the rebellion.

A few of these verbs may be followed either by an infinitive directly or by a noun or pronoun plus an infinitive:

- ask  
- help  
- promise  
- would like  
- expect  
- need  
- want

We asked *to speak* to the congregation.

We asked *Rabbi Abrams to speak* to our congregation.

Alex expected *to get* the lead in the play.

Ira expected *Alex to get* the lead in the play.

**Verb + noun or pronoun + infinitive**

With certain verbs in the active voice, a noun or pronoun must come between the verb and the infinitive that follows it. The noun or pronoun usually names a person who is affected by the action of the verb.

- advise  
- convince  
- order  
- tell  
- allow  
- encourage  
- persuade  
- urge  
- cause  
- have ("own")  
- remind  
- warn  
- command  
- instruct  
- require

The class encouraged Luis to tell the story of his escape.

The counselor *advised Haley to take* four courses instead of the usual five.

Professor Howlett *instructed us to write* our names on the left side of the paper.
Verb + noun or pronoun + unmarked infinitive

An unmarked infinitive is an infinitive without to. A few verbs (often called causative verbs) may be followed by a noun or pronoun and an unmarked infinitive.

- have (“cause”)
- let (“allow”)
- help
- make (“force”)

Jorge had the valet park his car.

► Please let me to pay for the tickets.

► Frank made me to carry his book for him.

NOTE: Help can be followed by a noun or pronoun and either an unmarked or a marked infinitive:

Emma helped Brian wash the dishes.
Emma helped Brian to wash the dishes.

M2 Articles

Articles (a, an, the) are part of a category of words known as noun markers or determiners.

M2-a Be familiar with articles and other noun markers.

Standard English uses noun markers to help identify the nouns that follow. In addition to articles (a, an, and the), noun markers include:

- possessive nouns, such as Elena’s (See P4-a.)
- possessive pronoun/adjectives: my, your, his, her, its, our, their (See B1-b.)
- demonstrative pronoun/adjectives: this, that, these, those (See B1-b.)
- quantifiers: all, any, each, either, every, few, many, more, most, much, neither, several, some, and so on (See M2-d.)
- numbers: one, twenty-three, and so on
Types of nouns

<table>

<tr>
<td>women achievements</td>
</tr>
</tbody>
</table>
Specific (definite) or general (indefinite) (count and noncount)

Specific nouns
- name persons, places, things, or ideas that can be identified within a group of the same type

Examples
- The students in Professor Martin’s class should study.
- The airplane carrying the senator was late.
- The furniture in the truck was damaged.

General nouns
- name categories of persons, places, things, or ideas (often plural)

Examples
- Students should study.
- Books help cultures connect.
- The airplane has made commuting between cities easy.

Using articles and other noun markers

Articles and other noun markers always appear before nouns; sometimes other modifiers, such as adjectives, come between a noun marker and a noun.

\[ \text{ART N} \]
Felix is reading a book about mythology.

\[ \text{ART ADJ N} \]
We took an exciting trip to Alaska last summer.

\[ \text{NOUN MARKER ADV ADJ N} \]
That very delicious meal was expensive.

In most cases, do not use an article with another noun marker.

\[ \text{My} \]
\[ \text{The my older brother lives in Wisconsin.} \]

Expressions like a few, the most, and all the are exceptions: a few potatoes, all the rain. See also M2-d.

Types of articles and types of nouns

To choose an appropriate article for a noun, you must first determine whether the noun is common or proper, count or noncount, singular or plural, and specific or general. The chart on pages 238–39 describes the types of nouns.
Articles are classified as *indefinite* and *definite*. The indefinite articles, *a* and *an*, are used with general nouns. The definite article, *the*, is used with specific nouns. (The last section of the chart, on p. 239, explains general and specific nouns.)

*A and an both mean “one” or “one among many.” Use a before a consonant sound: *a banana, a tree, a picture, a happy child, a united family.* Use *an* before a vowel sound: *an eggplant, an occasion, an uncle, an honorable person.* (See also *a, an* in W1.)

*The* shows that a noun is specific; use *the* with one or more than one specific thing: *the newspaper, the soldiers.*

### M2-b Use *the* with most specific common nouns.

The definite article, *the*, is used with most nouns—both count and noncount—that the reader can identify specifically. Usually the identity will be clear to the reader for one of the following reasons. (See also the chart on p. 242.)

1. The noun has been previously mentioned.

   ► A truck cut in front of our van. When *truck* skidded a few seconds later, we almost crashed into it.

   The article *A* is used before *truck* when the noun is first mentioned. When the noun is mentioned again, it needs the article *the* because readers can now identify which *truck* skidded—the one that cut in front of the van.

2. A phrase or clause following the noun restricts its identity.

   ► Bryce warned me that *computer on his desk* had just crashed.

   The phrase *on his desk* identifies the specific *computer*.

**NOTE:** Descriptive adjectives do not necessarily make a noun specific. A specific noun is one that readers can identify within a group of nouns of the same type.

► If I win the lottery, I will buy *the* brand-new bright red sports car.

The reader cannot identify which specific brand-new bright red sports car the writer will buy. Even though *car* has several adjectives in front of it, it is a general noun in this sentence.
3. A superlative adjective such as best or most intelligent makes the noun’s identity specific. (See also G4-c on comparatives and superlatives.)

   the

   Our petite daughter dated tallest boy in her class.
   The superlative tallest makes the noun boy specific. Although there might be several tall boys, only one boy can be the tallest.

4. The noun describes a unique person, place, or thing.

   the

   During an eclipse, one should not look directly at sun.
   There is only one sun in our solar system, so its identity is clear.

5. The context or situation makes the noun’s identity clear.

   the

   Please don’t slam door when you leave.
   Both the speaker and the listener know which door is meant.

6. The noun is singular and refers to a scientific class or category of items (most often animals, musical instruments, and inventions).

   The tin

   Tin whistle is common in traditional Irish music.
   The writer is referring to the tin whistle as a class of musical instruments.

M2-c Use a (or an) with common singular count nouns that refer to “one” or “any.”

If a count noun refers to one unspecific item (not a whole category), use the indefinite article, a or an. A and an usually mean “one among many” but can also mean “any one.” (See the chart on p. 242.)

   a

   My English professor asked me to bring dictionary to class.
   The noun dictionary refers to “one unspecific dictionary” or “any dictionary.”

   an

   We want to rent apartment close to the lake.
   The noun apartment refers to “any apartment close to the lake,” not a specific apartment.
### Choosing articles for common nouns

#### Use the

- if the reader has enough information to identify the noun specifically
  
  **COUNT:** Please turn on the lights. We’re going to the beach tomorrow.
  
  **NONCOUNT:** The food throughout Italy is excellent.

#### Use a or an

- if the noun refers to one item
  
  **COUNT:** Bring a pencil to class. Charles wrote an essay about his first job.

- if the item is singular but not specific

**NOTE:** Do not use *a* or *an* with plural or noncount nouns.

#### Use a quantifier (*enough, many, some, etc.*)

- if the noun represents an unspecified amount of something
  
  **COUNT (PLURAL):** Amir showed us some photos of his trip to India. Many turtles return to the same nesting site each year.

- if the amount is more than one but not all items in a category
  
  **NONCOUNT:** We didn’t get enough rain this summer.

**NOTE:** Sometimes no article conveys an unspecified amount: Amir showed us photos of his trip to India.

#### Use no article

- if the noun represents all items in a category
  
  **COUNT (PLURAL):** Students can attend the show for free. Runners must report to the officials’ table at 7:00 a.m.

- if the noun represents a category in general
  
  **NONCOUNT:** Coal is a natural resource.

**NOTE:** *The* is occasionally used when a singular count noun refers to all items in a class or a specific category: The bald eagle is no longer endangered in the United States.
Commonly used noncount nouns

**Food and drink**

beef, bread, butter, candy, cereal, cheese, cream, meat, milk, pasta, rice, salt, sugar, water, wine

**Nonfood substances**

air, cement, coal, dirt, gasoline, gold, paper, petroleum, plastic, rain, silver, snow, soap, steel, wood, wool

**Abstract nouns**

advice, anger, beauty, confidence, courage, employment, fun, happiness, health, honesty, information, intelligence, knowledge, love, poverty, satisfaction, wealth

**Other**

biology (and other areas of study), clothing, equipment, furniture, homework, jewelry, luggage, machinery, mail, money, news, poetry, pollution, research, scenery, traffic, transportation, violence, weather, work

NOTE: A few noncount nouns (such as love) can also be used as count nouns: He had two loves: music and archery.

---

M2-d Use a quantifier such as **some** or **more**, not **a** or **an**, with a noncount noun to express an approximate amount.

Do not use **a** or **an** with noncount nouns. Also do not use numbers or words such as **several** or **many** because they must be used with plural nouns, and noncount nouns do not have plural forms. (See the chart on this page for a list of commonly used noncount nouns.)

- Dr. Snyder gave us **an** information about the Peace Corps.

- Do you have **many** money with you?

You can use quantifiers such as **enough**, **less**, and **some** to suggest approximate amounts or nonspecific quantities of noncount nouns: **any homework**, **enough wood**, **less information**, **much pollution**.

- Vincent’s mother told him that she had **a** news that would **^** surprise him.
**M2-e**  Do not use articles with nouns that refer to all of something or something in general.

When a noncount noun refers to all of its type or to a concept in general, it is not marked with an article.

- **Kindness**
  - The kindness is a virtue. The noun represents kindness in general; it does not represent a specific type of kindness.

- **In some parts of the world, the rice is preferred to all other grains.**
  - The noun rice represents rice in general, not a specific type or portion of rice.

  In most cases, when you use a count noun to represent a general category, make the noun plural. Do not use unmarked singular count nouns to represent whole categories.

- **Fountains are**
  - Fountain is an expensive element of landscape design. *Fountains* is a count noun that represents fountains in general.

**EXCEPTION:** In some cases, *the* can be used with singular count nouns to represent a class or specific category: *The Chinese alligator is smaller than the American alligator.* See also number 6 in M2-b.

**M2-f**  Do not use articles with most singular proper nouns. Use *the* with most plural proper nouns.

Since singular proper nouns are already specific, they typically do not need an article: *Prime Minister Cameron, Jamaica, Lake Huron, Mount Etna.*

There are, however, many exceptions. In most cases, if the proper noun consists of a common noun with modifiers (adjectives or an *of* phrase), use *the* with the proper noun.

- **We visited Great Wall of China last year.**

- **Rob wants to be a translator for Central Intelligence Agency.**

  *The* is used with most plural proper nouns: *the McGregorors, the Bahamas, the Finger Lakes, the United States.*
### Using *the* with geographic nouns

<table>
<thead>
<tr>
<th>When to omit <em>the</em></th>
<th>Streets, squares, parks</th>
<th>Ivy Street, Union Square, Denali National Park</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cities, states, counties</td>
<td>Miami, New Mexico, Bee County</td>
<td></td>
</tr>
<tr>
<td>Most countries, continents</td>
<td>Italy, Nigeria, China, South America, Africa</td>
<td></td>
</tr>
<tr>
<td>Bays, single lakes</td>
<td>Tampa Bay, Lake Geneva</td>
<td></td>
</tr>
<tr>
<td>Single mountains, islands</td>
<td>Mount Everest, Crete</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>When to use <em>the</em></th>
<th>Country names with <em>of</em> phrase</th>
<th>the United States (of America), the People's Republic of China</th>
</tr>
</thead>
<tbody>
<tr>
<td>Large regions, deserts</td>
<td>the East Coast, the Sahara</td>
<td></td>
</tr>
<tr>
<td>Peninsulas</td>
<td>the Baja Peninsula, the Sinai Peninsula</td>
<td></td>
</tr>
<tr>
<td>Oceans, seas, gulfs</td>
<td>the Pacific Ocean, the Dead Sea, the Persian Gulf</td>
<td></td>
</tr>
<tr>
<td>Canals and rivers</td>
<td>the Panama Canal, the Amazon</td>
<td></td>
</tr>
<tr>
<td>Mountain ranges</td>
<td>the Rocky Mountains, the Alps</td>
<td></td>
</tr>
<tr>
<td>Groups of islands</td>
<td>the Solomon Islands</td>
<td></td>
</tr>
</tbody>
</table>

Geographic names create problems because there are so many exceptions to the rules. When in doubt about whether or not to use an article, consult the chart on this page, check a dictionary, or ask a native speaker.

---

### M3 Sentence structure

Although their structure can vary widely, sentences in English generally flow from subject to verb to object or complement: *Bears eat fish*. This section focuses on the major challenges that multilingual students face when writing sentences in English. For more details on the parts of speech and the elements of sentences, consult sections B1–B4.
M3-a **Use a linking verb between a subject and its complement.**

Some languages, such as Russian and Turkish, do not use linking verbs (*is, are, was, were*) between subjects and complements (nouns or adjectives that rename or describe the subject). Every English sentence, however, must include a verb. For more on linking verbs, see G2-e.

- Jim intelligent.
- Many streets in San Francisco very steep.

M3-b **Include a subject in every sentence.**

Some languages, such as Spanish and Japanese, do not require a subject in every sentence. Every English sentence, however, must have a subject. Commands are an exception: The subject *you* is understood but not present (*You give me the book*).

- Your aunt is very energetic. *Seems* young for her age.

The word *it* is used as the subject of a sentence describing the weather or temperature, stating the time, indicating distance, or suggesting an environmental fact.

- It is raining in the valley and snowing in the mountains.
- It is 9:15 a.m.
- It is three hundred miles to Chicago.

In most English sentences, the subject appears before the verb. Some sentences, however, are inverted: The subject comes after the verb. In these sentences, a placeholder called an expletive (*there or it*) often comes before the verb.

There are many people here today. (Many people are here today.)

- Is an apple in the refrigerator.
- As you know, many religious sects in India.
Notice that the verb agrees with the subject that follows it: *apple is, sects are.* (See G1-g.)

Sometimes an inverted sentence has an infinitive (*to work*) or a noun clause (*that she is intelligent*) as the subject. In such sentences, the placeholder *it* is needed before the verb. (Also see B3-b and B3-e.)

\[
\text{EXP V} \quad \underline{\text{S}} \quad \underline{\text{S}} \quad \underline{\text{V}}
\]

It is important to study daily. (To study daily is important.)

- *Because the road is flooded, it is necessary to change our route.*

  The placeholder *it* is required before the verb *is* because the subject *to change our route* follows the verb.

**TIP:** The words *here* and *there* are not used as subjects. When they mean “in this place” (*here*) or “in that place” (*there*), they are adverbs, not nouns.

- *I just returned from a vacation in Japan. There is very beautiful.*

- *This school that school*  

- *Here offers a master’s degree; there has only a bachelor’s program.*

**M3-c**  
**Do not use both a noun and a pronoun to perform the same grammatical function in a sentence.**

English does not allow a subject to be repeated in its own clause.

- *The doctor she advised me to cut down on salt.*

  The pronoun *she* cannot repeat the subject, *doctor.*

  Do not add a pronoun even when a word group comes between the subject and the verb.

- *The watch that I bought on vacation it was not expensive.*

  The pronoun *it* cannot repeat the subject, *watch.*

Some languages allow “topic fronting,” placing a word or phrase (a “topic”) at the beginning of a sentence and following it with an independent clause that explains something about the topic. This form is not allowed in English because the sentence seems to start with one subject but then introduces a new subject in an independent clause.

\[
\underline{\text{TOPIC}} \quad \underline{\text{IND CLAUSE}}
\]

**INCORRECT**  
The seeds I planted them last fall.
The sentence can be corrected by bringing the topic (*seeds*) into the independent clause.

```
the seeds
```

```
The seeds I planted them last fall.
```

**M3-d  Do not repeat an object or an adverb in an adjective clause.**

Adjective clauses begin with relative pronouns (*who, whom, whose, which, that*) or relative adverbs (*when, where*). Relative pronouns usually serve as subjects or objects in the clauses they introduce; another word in the clause cannot serve the same function. Relative adverbs should not be repeated by other adverbs later in the clause.

```
ADJ CLAUSE
```

```
The cat ran under the car that was parked on the street.
```

```
The cat ran under the car that it was parked on the street.
```

The relative pronoun *that* is the subject of the adjective clause, so the pronoun *it* cannot be added as a subject.

```
Myrna enjoyed the investment seminars that she attended them last week.
```

```
Myrna enjoyed the investment seminars that she attended them last week.
```

The relative pronoun *that* is the object of the verb *attended*. The pronoun *them* cannot also serve as an object.

Sometimes the relative pronoun is understood but not present in the sentence. In such cases, do not add another word with the same function as the understood pronoun.

```
Myrna enjoyed the investment seminars she attended them last week.
```

```
Myrna enjoyed the investment seminars she attended them last week.
```

The relative pronoun *that* is understood after *seminars* even though it is not present in the sentence.

If the clause begins with a relative adverb, do not use another adverb with the same meaning later in the clause.

```
The office where I work there is one hour from the city.
```

```
The office where I work there is one hour from the city.
```

The adverb *there* cannot repeat the relative adverb *where*. 
M3-e  Avoid mixed constructions beginning with although or because.

A word group that begins with although cannot be linked to a word group that begins with but or however. The result is an error called a mixed construction (see also S5-a). Similarly, a word group that begins with because cannot be linked to a word group that begins with so or therefore.

If you want to keep although or because, drop the other linking word.

► Although Nikki Giovanni is best known for her poetry for adults, but she has written several books for children.

► Because German and Dutch are related languages, therefore tourists from Berlin can usually read a few signs in Amsterdam.

If you want to keep the other linking word, omit although or because.

► Although Nikki Giovanni is best known for her poetry for adults, but she has written several books for children.

► Because German and Dutch are related languages, therefore tourists from Berlin can usually read a few signs in Amsterdam.

For advice about using commas and semicolons with linking words, see P1-a, P1-b, and P3-a.

M3-f  Do not place an adverb between a verb and its direct object.

Adverbs modifying verbs can appear in various positions: at the beginning or end of a sentence, before or after a verb, or between a helping verb and the main verb.

Slowly, we drove along the rain-slick road.

Mia handled the teapot very carefully.
Using adjectives

Martin *always* wins our tennis matches.
Christina is *rarely* late for our lunch dates.
My daughter has *often* spoken of you.
The election results were being *closely* followed by analysts.

An adverb cannot appear between a verb and its direct object.

*carefully*

Mother wrapped *carefully* the gift.

The adverb *carefully* cannot appear between the verb, *wrapped*, and its direct object, *the gift*.

---

### M4 Using adjectives

**M4-a Distinguish between present participles and past participles used as adjectives.**

Both present and past participles may be used as adjectives. The present participle always ends in *-ing*. Past participles usually end in *-ed*, *-d*, *-en*, *-n*, or *-t*. (See G2-a.)

- **PRESENT PARTICIPLES**
  - confusing, speaking, boring

- **PAST PARTICIPLES**
  - confused, spoken, bored

Like all other adjectives, participles can come before nouns; they also can follow linking verbs, in which case they describe the subject of the sentence. (See B2-b.)

Use a present participle to describe a person or thing *causing or stimulating an experience*.

The printer came with *confusing instructions*. [The instructions caused confusion.]

Use a past participle to describe a person or thing *undergoing an experience*.

*Rachel was confused* by the instructions. [Rachel experienced confusion.]
Participles that describe emotions or mental states often cause the most confusion.

- annoying/annoyed
- boring/bored
- confusing/confused
- depressing/depressed
- exciting/excited
- exhausting/exhausted
- fascinating/fascinated
- frightening/frightened
- satisfying/satisfied
- surprising/surprised

Our hike was exhausted.

Exhausting suggests that the hike caused exhaustion.

The exhausting hikers reached the campground just before sunset.

Exhausted describes how the hikers felt.

**M4-b Place cumulative adjectives in an appropriate order.**

Adjectives usually come before the nouns they modify and may also come after linking verbs. (See B1-d and B2-b.)

*ADJ N V ADJ*

Janine wore new shoes. Janine’s shoes were new.

Cumulative adjectives, which cannot be joined by the word *and* or separated by commas, must come in a particular order. If you use cumulative adjectives before a noun, the chart on page 252 can help you determine their order. The chart is only a guide; don’t be surprised if you encounter exceptions. (See also P2-d.)

My dorm room has only a small desk and a plastic red smelly chair.

Nice weather, blue clear water, and ancient monuments attract many people to Italy.
Prepositions and idiomatic expressions

M5-a Become familiar with prepositions that show time and place.

The most frequently used prepositions in English are at, by, for, from, in, of, on, to, and with. Prepositions can be difficult to master because the differences among them are subtle and idiomatic. The chart on page 253 is limited to three troublesome prepositions that show time and place: at, on, and in.

Not every possible use is listed in the chart, so don’t be surprised when you encounter exceptions and idiomatic uses that you must learn one at a time. For example, in English a person rides in a car but on a bus, plane, train, or subway.

PRACTICE hackerhandbooks.com/writersref
> Multilingual/ESL > M5–2
At, on, and in to show time and place

Showing time

**AT**  at a specific time: at 7:20, at dawn, at dinner

**ON**  on a specific day or date: on Tuesday, on June 4

**IN**  in a part of a 24-hour period: in the afternoon, in the daytime [but at night]

- in a year or month: in 1999, in July
- in a period of time: finished in three hours

Showing place

**AT**  at a meeting place or location: at home, at the club

- at the edge of something: sitting at the desk
- at the corner of something: turning at the intersection
- at a target: throwing the snowball at Lucy

**ON**  on a surface: placed on the table, hanging on the wall

- on a street: the house on Spring Street
- on an electronic medium: on television, on the Internet

**IN**  in an enclosed space: in the garage, in an envelope

- in a geographic location: in San Diego, in Texas
- in a print medium: in a book, in a magazine

- My first class starts **on** 8:00 a.m.
- The farmers go to market **on**  Wednesday.
- I want to work at one of the biggest companies **in**  the world.

**M5-b**  Use nouns (including -ing forms) after prepositions.

In a prepositional phrase, use a noun (not a verb) after the preposition. Sometimes the noun will be a gerund, the -ing verb form that functions as a noun (see B3-b).

- Our student government is good at **saving**  money.
Distinguish between the preposition *to* and the infinitive marker *to*. If *to* is a preposition, it should be followed by a noun or a gerund.

► We are dedicated to help the poor.

If *to* is an infinitive marker, it should be followed by the base form of the verb.

► We want to helping the poor.

To test whether *to* is a preposition or an infinitive marker, insert a word that you know is a noun after the word *to*. If the noun makes sense in that position, *to* is a preposition. If the noun does not make sense after *to*, then *to* is an infinitive marker.

Zoe is addicted *to* _________________.

They are planning *to* _________________.

In the first sentence, a noun (such as *magazines*) makes sense after *to*, so *to* is a preposition and should be followed by a noun or a gerund: Zoe is addicted *to magazines*. Zoe is addicted *to running*.

In the second sentence, a noun (such as *magazines*) does not make sense after *to*, so *to* is an infinitive marker and must be followed by the base form of the verb: They are planning *to build* a new school.

**M5-c  Become familiar with common adjective + preposition combinations.**

Some adjectives appear only with certain prepositions. These expressions are idiomatic and may be different from the combinations used in your native language.

► Paula is married *to* Jon.

Check an ESL dictionary for combinations that are not listed in the chart on page 255.
M5-d Become familiar with common verb + preposition combinations.

Many verbs and prepositions appear together in idiomatic phrases. Pay special attention to the combinations that are different from the combinations used in your native language.

- Your success depends on your effort.

Check an ESL dictionary for combinations that are not listed in the chart below.

### Adjective + preposition combinations

- accustomed to
- addicted to
- afraid of
- angry with
- ashamed of
- aware of
- committed to
- concerned about
- concerned with
- connected to
- covered with
- dedicated to
- devoted to
- different from
- engaged in
- engaged to
- excited about
- familiar with
- full of
- guilty of
- interested in
- involved in
- involved with
- known as
- known for
- made of (or made from)
- married to
- opposed to
- preferable to
- proud of
- responsible for
- satisfied with
- scared of
- similar to
- tired of
- worried about

### Verb + preposition combinations

- agree with
- apply to
- approve of
- arrive at
- arrive in
- ask for
- believe in
- belong to
- care about
- care for
- compare to
- compare with
- concentrate on
- consist of
- count on

   f  Abbreviations, 299

P9  Abbreviations and numbers, 300
   a  Titles with names, 300
   b  Familiar abbreviations, 300
   c  BC, a.m., No., etc., 301
   d  Latin abbreviations, 301
   e  Misuses, 302
   f  Spelling out numbers, 302
   g  Using numerals, 303

P10  Italicics, 304
   a  Titles of works, 304
   b  Other terms, 305
The comma was invented to help readers. Without it, sentence parts can collide into one another unexpectedly, causing misreadings.

**CONFUSING**
If you cook Elmer will do the dishes.

**CONFUSING**
While we were eating a rattlesnake approached our campsite.

Add commas in the logical places (after *cook* and *eating*), and suddenly all is clear. No longer is Elmer being cooked, the rattlesnake being eaten.

Various rules have evolved to prevent such misreadings and to speed readers along through complex grammatical structures. Those rules are detailed in this section. (P2 explains when not to use commas.)

### P1-a Use a comma before a coordinating conjunction joining independent clauses.

When a coordinating conjunction connects two or more independent clauses—word groups that could stand alone as separate sentences—a comma must precede the conjunction. There are seven coordinating conjunctions in English: *and, but, or, nor, for, so,* and *yet.*

A comma tells readers that one independent clause has come to a close and that another is about to begin.

- The department sponsored a seminar on college survival skills, and it also hosted a barbecue for new students.

**EXCEPTION:** If the two independent clauses are short and there is no danger of misreading, the comma may be omitted.

- The plane took off and we were on our way.

**TIP:** As a rule, do *not* use a comma to separate coordinate word groups that are not independent clauses. (See P2-a.)

- A good money manager controls expenses/ and invests surplus dollars to meet future needs.

The word group following *and* is not an independent clause; it is the second half of a compound predicate (*controls . . . and invests*).
P1-b Use a comma after an introductory phrase or clause.

The most common introductory word groups are phrases and clauses functioning as adverbs. Such word groups usually tell when, where, how, why, or under what conditions the main action of the sentence occurred. (See B3-a, B3-b, and B3-e.)

A comma tells readers that the introductory phrase or clause has come to a close and that the main part of the sentence is about to begin.

- Near a small stream at the bottom of the canyon, the park rangers discovered an abandoned mine.
  The comma tells readers that the introductory prepositional phrase has come to a close.

- When Irwin was ready to iron, his cat tripped on the extension cord.
  Without the comma, readers may have Irwin ironing his cat. The comma signals that his cat is the subject of a new clause, not part of the introductory one.

**EXCEPTION:** The comma may be omitted after a short adverb clause or phrase if there is no danger of misreading.

  In no time we were at 2,800 feet.

  Sentences also frequently begin with participial phrases describing the noun or pronoun immediately following them. The comma tells readers that they are about to learn the identity of the person or thing described; therefore, the comma is usually required even when the phrase is short. (See B3-b.)

- Thinking his motorcade drive through Dallas was routine, President Kennedy smiled and waved at the crowds.

- Buried under layers of younger rocks, the earth’s oldest rocks contain no fossils.

**NOTE:** Other introductory word groups include transitional expressions and absolute phrases (see P1-f).
**P1-c Use a comma between all items in a series.**

When three or more items are presented in a series, those items should be separated from one another with commas. Items in a series may be single words, phrases, or clauses.

- Bubbles of air, leaves, ferns, bits of wood, and insects are often found trapped in amber.

- Langston Hughes’s poetry is concerned with racial pride, social justice, and the diversity of the African American experience.

Although some writers view the comma between the last two items as optional, most experts advise using the comma because its omission can result in ambiguity or misreading.

- David willed his oldest niece all of his property, houses, and warehouses.

  Did Uncle David will his property and houses and warehouses—or simply his property, consisting of houses and warehouses? If the former meaning is intended, a comma is necessary to prevent ambiguity.

- The activities include touring the White House, visiting the Air and Space Museum, attending a lecture about the Founding Fathers, and kayaking on the Potomac River.

  Without the comma, the activities might seem to include a lecture about kayaking, not participating in kayaking. The comma makes it clear that kayaking on the Potomac River is a separate item in the series.

**P1-d Use a comma between coordinate adjectives not joined with and. Do not use a comma between cumulative adjectives.**

When two or more adjectives each modify a noun separately, they are coordinate.

  Roberto is a warm, gentle, affectionate father.
TEST: If the adjectives can be joined with *and*, the adjectives are coordinate, so you should use commas: *warm and gentle and affectionate (warm, gentle, affectionate).*

Adjectives that do not modify the noun separately are cumulative.

*Three large gray shapes* moved slowly toward us.

Beginning with the adjective closest to the noun *shapes*, these modifiers lean on one another, piggyback style, with each modifying a larger word group. *Gray* modifies *shapes*, *large* modifies *gray shapes*, and *three* modifies *large gray shapes*. Cumulative adjectives cannot be joined with *and* (not *three and large and gray shapes*).

**COORDINATE ADJECTIVES**

- Should patients with severe, irreversible brain damage be put on life support systems?

**CUMULATIVE ADJECTIVES**

- Ira ordered a rich, chocolate, layer cake.

**P1-e Use commas to set off nonrestrictive elements. Do not use commas to set off restrictive elements.**

Certain word groups that modify nouns or pronouns can be restrictive or nonrestrictive—that is, essential or not essential to the meaning of a sentence. These word groups are usually adjective clauses, adjective phrases, or appositives.

**Restrictive elements**

A restrictive element defines or limits the meaning of the word it modifies; it is therefore essential to the meaning of the sentence and is not set off with commas. If you remove a restrictive modifier from a sentence, the meaning changes significantly, becoming more general than you intended.

**RESTRICTIVE (NO COMMAS)**

- The campers need clothes that are durable.

- Scientists *who study the earth’s structure* are called geologists.

The first sentence does not mean that the campers need clothes in general. The intended meaning is more limited: The campers need durable
clothes. The second sentence does not mean that scientists in general are called geologists; only those scientists who specifically study the earth’s structure are called geologists. The italicized word groups are essential and are therefore not set off with commas.

**Nonrestrictive elements**

A nonrestrictive modifier describes a noun or pronoun whose meaning has already been clearly defined or limited. Because the modifier contains nonessential or parenthetical information, it is set off with commas. If you remove a nonrestrictive element from a sentence, the meaning does not change dramatically. Some meaning may be lost, but the defining characteristics of the person or thing described remain the same.

**NONRESTRICTIVE (WITH COMMAS)**

The campers need sturdy shoes, *which are expensive.*

The scientists, *who represented eight different universities,* met to review applications for the prestigious O’Hara Award.

In the first sentence, the campers need sturdy shoes, and the shoes happen to be expensive. In the second sentence, the scientists met to review applications for the O’Hara Award; that they represented eight different universities is informative but not critical to the meaning of the sentence. The nonessential information in both sentences is set off with commas.

**NOTE:** Often it is difficult to tell whether a word group is restrictive or nonrestrictive without seeing it in context and considering the writer’s meaning. Both of the following sentences are grammatically correct, but their meaning is slightly different.

The dessert made with fresh raspberries was delicious.

The dessert, made with fresh raspberries, was delicious.

In the first example, the phrase *made with fresh raspberries* tells readers which of two or more desserts the writer is referring to. In the example with commas, the phrase merely adds information about the dessert.

**Adjective clauses**

Adjective clauses are patterned like sentences, containing subjects and verbs, but they function within sentences as modifiers of nouns or pronouns. They always follow the word they modify, usually immediately. Adjective clauses begin with a relative pronoun (*who, whom, whose, which, that*) or with a relative adverb (*where, when*). (See B3-e.)
Nonrestrictive adjective clauses are set off with commas; restrictive adjective clauses are not.

**NONRESTRICTIVE CLAUSE (WITH COMMAS)**

► Ed’s house, which is located on thirteen acres, was completely 
  furnished with bats in the rafters and mice in the kitchen.

The adjective clause *which is located on thirteen acres* does not restrict 
the meaning of *Ed’s house*; the information is nonessential and is therefore 
enclosed in commas.

**RESTRICTIVE CLAUSE (NO COMMAS)**

► The giant panda *that was born at the San Diego Zoo in 2003* was 
  sent to China in 2007.

Because the adjective clause *that was born at the San Diego Zoo in 2003* 
identifies one particular panda out of many, the information is essential 
and is therefore not enclosed in commas.

**NOTE:** Use *that* only with restrictive (essential) clauses. Many writers 
prefer to use *which* only with nonrestrictive (nonessential) clauses, but usage varies.

**Adjective phrases**

Prepositional or verbal phrases functioning as adjectives may be restrictive or nonrestrictive. (See B3-a and B3-b.) Nonrestrictive phrases are set off with commas; restrictive phrases are not.

**NONRESTRICTIVE PHRASE (WITH COMMAS)**

► The helicopter, with its million-candlepower spotlight 
  illuminating the area, circled above.

The *with* phrase is nonessential because its purpose is not to specify 
which of two or more helicopters is being discussed.

**RESTRICTIVE PHRASE (NO COMMAS)**

► One corner of the attic was filled with newspapers *dating from 
  the early 1900s.*
Dating from the early 1900s restricts the meaning of newspapers, so the comma should be omitted.

The bill/ proposed by the Illinois representative/ would lower taxes and provide services for middle-income families.

Proposed by the Illinois representative identifies exactly which bill is meant.

**Appositives**

An appositive is a noun or noun phrase that renames a nearby noun. Nonrestrictive appositives are set off with commas; restrictive appositives are not.

**NONRESTRICTIVE APPOSITIVE (WITH COMMAS)**

Darwin’s most important book, On the Origin of Species, was the result of many years of research.

*Most important restricts the meaning to one book, so the appositive On the Origin of Species is nonrestrictive and should be set off with commas.*

**RESTRICTIVE APPOSITIVE (NO COMMAS)**

The song/ “Viva la Vida/” was blasted out of huge amplifiers at the concert.

*Once they’ve read song, readers still don’t know precisely which song the writer means. The appositive following song restricts its meaning, so the appositive should not be enclosed in commas.*

**P1-f Use commas to set off transitional and parenthetical expressions, absolute phrases, and word groups expressing contrast.**

**Transitional expressions**

Transitional expressions serve as bridges between sentences or parts of sentences. They include conjunctive adverbs such as however, therefore, and moreover and transitional phrases such as for example, as a matter of fact, and in other words. (For complete lists of these expressions, see P3-a.)
When a transitional expression appears between independent clauses in a compound sentence, it is preceded by a semicolon and is usually followed by a comma. (See P3-a.)

- Minh did not understand our language; moreover, he was unfamiliar with our customs.

When a transitional expression appears at the beginning of a sentence or in the middle of an independent clause, it is usually set off with commas.

- As a matter of fact, American football was established by fans who wanted to play a more organized game of rugby.

- Natural foods are not always salt free; celery, for example, contains more sodium than most people would imagine.

**EXCEPTION:** If a transitional expression blends smoothly with the rest of the sentence, calling for little or no pause in reading, it does not need to be set off with a comma. Expressions such as also, at least, certainly, consequently, indeed, of course, moreover, no doubt, perhaps, then, and therefore do not always call for a pause.

Alice’s bicycle is broken; therefore you will need to borrow Sue’s.

**Parenthetical expressions**

Expressions that are distinctly parenthetical, providing only supplemental information, should be set off with commas.

- Evolution, as far as we know, doesn’t work this way.

- The bass weighed about twelve pounds, give or take a few ounces.

**Absolute phrases**

An absolute phrase, which modifies the whole sentence, usually consists of a noun followed by a participle or participial phrase. (See B3-d.) Absolute phrases may appear at the beginning or at the end of a sentence. Wherever they appear, they should be set off with commas.

The sun appearing for the first time in a week, we were at last able to begin the archaeological dig.
Elvis Presley made music industry history in the 1950s, his records having sold more than ten million copies.

**NOTE:** Do not insert a comma between the noun and the participle in an absolute construction.

The next contestant, being five years old, the emcee adjusted the height of the microphone.

**Word groups expressing contrast**

Sharp contrasts beginning with words such as *not*, *never*, and *unlike* are set off with commas.

The Epicurean philosophers sought mental, not bodily, pleasures.

Unlike Robert, Celia loved dance contests.

**P1-g Use commas to set off words and phrases according to convention.**

**Direct address, yes and no**

Forgive me, Angela, for forgetting your birthday.

Yes, the loan will probably be approved.

**Interrogative tags, mild interjections**

The film was faithful to the book, wasn’t it?

Well, cases like these are difficult to decide.

**Direct quotations**

In his “Letter from Birmingham Jail,” Martin Luther King Jr. wrote, “We know through painful experience that freedom is never voluntarily given by the oppressor; it must be demanded by the oppressed” (225).
“Happiness in marriage is entirely a matter of chance,” says Charlotte Lucas in *Pride and Prejudice*, a novel that ends with two happy marriages (ch. 6; 69).

See P5-a on the use of quotation marks and pages 397–98 on citing literary sources in MLA style.

**Dates**

In dates, the year is set off from the rest of the sentence with a pair of commas.

- On December 12, 1890, orders were sent out for the arrest of Sitting Bull.

**EXCEPTIONS:** Commas are not necessary if the date is inverted or if only the month and year are given.

- The security alert system went into effect on 15 April 2009.
- January 2008 was an extremely cold month.

**Addresses**

The elements of an address or a place name are separated with commas. A zip code, however, is not preceded by a comma.

- John Lennon was born in Liverpool, England, in 1940.

- Please send the package to Greg Tarvin at 708 Spring Street, Washington, IL 61571.

**Personal titles**

If a title follows a name, separate the title from the rest of the sentence with a pair of commas.

- Sandra Belinsky, MD, has been appointed to the hospital board.

**Numbers**

In numbers more than four digits long, use commas to separate the numbers into groups of three, starting from the right. In numbers four digits long, a comma is optional.
3,500 [or 3500]
100,000
5,000,000

**EXCEPTIONS:** Do not use commas in street numbers, zip codes, telephone numbers, or years with four or fewer digits.

**P1-h Use a comma to prevent confusion.**

In certain situations, a comma is necessary to prevent confusion. If the writer has intentionally left out a word or phrase, for example, a comma may be needed to signal the omission.

► To err is human; to forgive, divine.

If two words in a row echo each other, a comma may be needed for ease of reading.

► All of the catastrophes that we had feared might happen,

happened.

Sometimes a comma is needed to prevent readers from grouping words in ways that do not match the writer's intention.

► Patients who can, walk up and down the halls several times

a day.

**P2 Unnecessary commas**

Many common misuses of the comma result from misunderstanding of the major comma rules presented in P1.

**P2-a Do not use a comma between compound elements that are not independent clauses.**

Though a comma should be used before a coordinating conjunction joining independent clauses (see P1-a), this rule should not be extended to other compound word groups.
Marie Curie discovered radium and later applied her work on radioactivity to medicine. *And* links two verbs in a compound predicate: *discovered* and *applied*.

Jake told us that his illness is serious but that changes in his lifestyle can improve his chances for survival. The coordinating conjunction *but* links two subordinate clauses, each beginning with *that*: *that his illness is serious* and *that changes in his lifestyle* . . .

**P2-b Do not use a comma to separate a verb from its subject or object.**

A sentence should flow from subject to verb to object without unnecessary pauses. Commas may appear between these major sentence elements only when a specific rule calls for them.

Zoos large enough to give the animals freedom to roam are becoming more popular. The comma should not separate the subject, *Zoos*, from the verb, *are becoming*.

Maxine Hong Kingston writes that many Chinese American families struggle “to figure out how the invisible world the emigrants built around our childhoods fits in solid America” (107). The comma should not separate the verb, *writes*, from its object, the subordinate clause beginning with *that*. A signal phrase ending in a word like *writes* or *says* is followed by a comma only when a direct quotation immediately follows: *Kingston writes, “Those of us in the first American generations have had to figure out how the invisible world . . .”* (107). (See also P5-e.)

**P2-c Do not use a comma before the first or after the last item in a series.**

Though commas are required between items in a series (P1-c), do not place them either before or after the whole series.
Other causes of asthmatic attacks are stress, change in temperature, and cold air.

Ironically, even novels that focus on horror, evil, and alienation often have themes of spiritual renewal and redemption.

P2-d **Do not use a comma between cumulative adjectives, between an adjective and a noun, or between an adverb and an adjective.**

Commas are required between coordinate adjectives (those that can be joined with *and*), but they do not belong between cumulative adjectives (those that cannot be joined with *and*). (For a full discussion, see P1-d.)

In the corner of the closet, we found an old maroon hatbox.

A comma should never be used between an adjective and the noun that follows it.

It was a senseless, dangerous mission.

Nor should a comma be used between an adverb and an adjective that follows it.

The Hillside is a good home for severely disturbed youths.

P2-e **Do not use commas to set off restrictive or mildly parenthetical elements.**

Restrictive elements are modifiers or appositives that restrict the meaning of the nouns they follow. Because they are essential to the meaning of the sentence, they are not set off with commas. (For a full discussion of restrictive and nonrestrictive elements, see P1-e.)

Drivers who think they own the road make cycling a dangerous sport.

The modifier *who think they own the road* restricts the meaning of *Drivers* and is therefore essential to the meaning of the sentence. Putting commas around the *who* clause falsely suggests that all drivers think they own the road.
Margaret Mead’s book, *Coming of Age in Samoa*, stirred up considerable controversy when it was published in 1928.

Since Mead wrote more than one book, the appositive contains information essential to the meaning of the sentence.

Although commas should be used with distinctly parenthetical expressions (see P1-f), do not use them to set off elements that are only mildly parenthetical.

Texting has essentially replaced e-mail for casual communication.

**P2-f** Do not use a comma to set off a concluding adverb clause that is essential to the meaning of the sentence.

When adverb clauses introduce a sentence, they are nearly always followed by a comma (see P1-b). When they conclude a sentence, however, they are not set off by commas if their content is essential to the meaning of the earlier part of the sentence. Adverb clauses beginning with *after, as soon as, because, before, if, since, unless, until,* and *when* are usually essential.

Don’t visit Paris at the height of the tourist season unless you have booked hotel reservations.

Without the *unless* clause, the meaning of the sentence might at first seem broader than the writer intended.

When a concluding adverb clause is nonessential, it should be preceded by a comma. Clauses beginning with *although, even though, though,* and *whereas* are usually nonessential.

The lecture seemed to last only a short time, although the clock said it had gone on for more than an hour.

**P2-g** Do not use a comma after a phrase that begins an inverted sentence.

Though a comma belongs after most introductory phrases (see P1-b), it does not belong after phrases that begin an inverted sentence. In an inverted sentence, the subject follows the verb, and a phrase that ordinarily would follow the verb is moved to the beginning.
Avoid other common misuses of the comma.

Do not use a comma in the following situations.

AFTER A COORDINATING CONJUNCTION (AND, BUT, OR, NOR, FOR, SO, YET)

Occasionally TV talk shows are performed live, but more often they are taped.

AFTER SUCH AS OR LIKE

Shade-loving plants such as begonias, impatiens, and coleus can add color to a shady garden.

BEFORE THAN

Touring Crete was more thrilling for us than visiting the Greek islands frequented by the rich.

AFTER ALTHOUGH

Although the air was balmy, the water was too cold for swimming.

BEFORE A PARENTHESIS

At InterComm, Sylvia began at the bottom (with only three and a half walls and a swivel chair), but within three years she had been promoted to supervisor.

TO SET OFF AN INDIRECT (REPORTED) QUOTATION

Samuel Goldwyn once said that a verbal contract isn’t worth the paper it’s written on.

WITH A QUESTION MARK OR AN EXCLAMATION POINT

“Why don’t you try it?” she coaxed. “You can’t do any worse than the rest of us.”
The semicolon is used to connect major sentence elements of equal grammatical rank (see P3-a and P3-b). The colon is used primarily to call attention to the words that follow it (see P3-d). In addition, the colon has some conventional uses (see P3-e).

**P3-a Use a semicolon with independent clauses.**

*Between independent clauses with no coordinating conjunction*

When two independent clauses appear in one sentence, they are usually linked with a comma and a coordinating conjunction (and, but, or, nor, for, so, yet). The coordinating conjunction signals the relation between the clauses. If the clauses are closely related and the relation is clear without a conjunction, they may be linked with a semicolon instead.

In film, a low-angle shot makes the subject look powerful; a high-angle shot does just the opposite.

A semicolon must be used whenever a coordinating conjunction has been omitted between independent clauses. To use merely a comma creates a type of run-on sentence known as a *comma splice*. (See G6.)

► In 1800, a traveler needed six weeks to get from New York City to Chicago; in 1860, the trip by railroad took as little as two days.

*Between independent clauses with a transitional expression*

Transitional expressions include conjunctive adverbs and transitional phrases.

**CONJUNCTIVE ADVERBS**

accordingly furthermore moreover still
also hence nevertheless subsequently
anyway however next then
besides incidentally nonetheless therefore
consequently instead otherwise thus
certainly indeed now conversely likewise similarly
finally meanwhile specifically

[practicereference](hackerhandbooks.com/writersref)
TRANSITIONAL PHRASES

- after all
- even so
- in fact
- as a matter of fact
- for example
- in other words
- as a result
- for instance
- in the first place
- at any rate
- in addition
- on the contrary
- at the same time
- in conclusion
- on the other hand

When a transitional expression appears between independent clauses, it is preceded by a semicolon and usually followed by a comma.

- Many corals grow very gradually; in fact, the creation of a coral reef can take centuries.

When a transitional expression appears in the middle or at the end of the second independent clause, the semicolon goes between the clauses.

- Biologists have observed laughter in primates other than humans; chimpanzees, however, sound more like they are panting than laughing.

Transitional expressions should not be confused with the coordinating conjunctions and, but, or, nor, for, so, and yet, which are preceded by a comma when they link independent clauses. (See P1-a.)

P3-b Use a semicolon between items in a series containing internal punctuation.

- Classic science fiction sagas include Star Trek, with Captain Kirk, Dr. McCoy, and Mr. Spock; Battlestar Galactica, with its Cylons; and Star Wars, with Han Solo, Luke Skywalker, and Darth Vader.

Without the semicolons, the reader would have to sort out the major groupings, distinguishing between important and less important pauses according to the logic of the sentence. By inserting semicolons at the major breaks, the writer does this work for the reader.
**P3-c** Avoid common misuses of the semicolon.

Do not use a semicolon in the following situations.

**BETWEEN A SUBORDINATE CLAUSE AND THE REST OF THE SENTENCE**

- Although children’s literature was added to the National Book Awards in 1969, it has had its own award, the Newbery Medal, since 1922.

**BETWEEN AN APPOSITIVE AND THE WORD IT REFERS TO**

- The scientists were fascinated by the species *Argyroneta aquatica*, a spider that lives underwater.

**TO INTRODUCE A LIST**

- Some of my favorite celebrities have their own blogs: Lindsay Lohan, Rosie O’Donnell, and Zach Braff.

**BETWEEN INDEPENDENT CLAUSES JOINED BY **AND, **BUT, **OR, **NOR, **FOR, **SO, **OR YET**

- Five of the applicants had worked with spreadsheets, but only one was familiar with database management.

**P3-d** Use a colon after an independent clause to direct attention to a list, an appositive, a quotation, or a summary or an explanation.

**A LIST**

The daily routine should include at least the following: twenty knee bends, fifty sit-ups, fifteen leg lifts, and five minutes of running in place.

**AN APPOSITIVE**

My roommate is guilty of two of the seven deadly sins: gluttony and sloth.

**A QUOTATION**

Consider the words of Benjamin Franklin: “There never was a good war or a bad peace.”

---

**PRACTICE** [hackerhandbooks.com/writersref](http://hackerhandbooks.com/writersref)  
> Punctuation and mechanics  >  P3–6
A SUMMARY OR AN EXPLANATION

Faith is like love: It cannot be forced.

The novel is clearly autobiographical: The author even gives his own name to the main character.

NOTE: For other ways of introducing quotations, see “Introducing quoted material” on pages 284–85. When an independent clause follows a colon, it may begin with a capital or a lowercase letter (see P8-e).

P3-e Use a colon according to convention.

SALUTATION IN A LETTER Dear Sir or Madam:

HOURS AND MINUTES 5:30 p.m.

PROPORTIONS The ratio of women to men was 2:1.

TITLE AND SUBTITLE The Glory of Hera: Greek Mythology and the Greek Family

BIBLIOGRAPHIC ENTRIES Boston: Bedford, 2011

P3-f Avoid common misuses of the colon.

A colon must be preceded by a full independent clause. Therefore, avoid using it in the following situations.

BETWEEN A VERB AND ITS OBJECT OR COMPLEMENT

► Some important vitamins found in vegetables are vitamin A, thiamine, niacin, and vitamin C.

BETWEEN A PREPOSITION AND ITS OBJECT

► The heart’s two pumps each consist of an upper chamber, or atrium, and a lower chamber, or ventricle.

AFTER SUCH AS, INCLUDING, OR FOR EXAMPLE

► The NCAA regulates college athletic teams, including basketball, baseball, softball, and football.
P4 The apostrophe

P4-a Use an apostrophe to indicate that a noun or an indefinite pronoun is possessive.

The possessive form of a noun or an indefinite pronoun usually indicates ownership, as in Tim’s hat, the lawyer’s desk, or someone’s glove. Frequently, however, ownership is only loosely implied: the tree’s roots, a day’s work. If you are not sure whether a word is possessive, try turning it into an of phrase: the roots of the tree, the work of a day.

When to add -’s to a noun

1. If the noun does not end in -s, add ’s.

   Luck often propels a rock musician’s career.

   The Children’s Defense Fund is a nonprofit organization that supports programs for poor and minority children.

2. If the noun is singular and ends in -s or an s sound, add ’s.

   Lois’s sister spent last year in India.

   Her article presents an overview of Marx’s teachings.

NOTE: To avoid potentially awkward pronunciation, some writers use only the apostrophe with a singular noun ending in -s: Sophocles’.

When to add only an apostrophe to a noun

If the noun is plural and ends in -s, add only an apostrophe.

   Both diplomats’ briefcases were searched by guards.

Joint possession

To show joint possession, use ’s or (-’s) with the last noun only; to show individual possession, make all nouns possessive.

   Have you seen Joyce and Greg’s new camper?

   John’s and Marie’s expectations of marriage couldn’t have been more different.

   Joyce and Greg jointly own one camper. John and Marie individually have different expectations.

PRACTICE hackerhandbooks.com/writersref
   > Punctuation and mechanics  > P4–3 and P4–4
**Compound nouns**

If a noun is compound, use 's (or -s’) with the last element.

My father-in-law’s memoir about his childhood in Sri Lanka was published in October.

**Indefinite pronouns**

Indefinite pronouns refer to no specific person or thing: everyone, somebody, no one, something. (See B1-b.)

Someone’s raincoat has been left behind.

**P4-b Use an apostrophe to mark omissions in contractions and numbers.**

In a contraction, the apostrophe takes the place of one or more missing letters.

It's a shame that Frank can’t go on the tour.

*It’s* stands for *it is*, can’t for cannot.

The apostrophe is also used to mark the omission of the first two digits of a year (*the class of ’08*) or years (*the ’60s generation*).

**P4-c Do not use an apostrophe to form the plural of numbers, letters, abbreviations, and words mentioned as words.**

An apostrophe typically is not used to pluralize numbers, letters, abbreviations, and words mentioned as words. Note the few exceptions and be consistent throughout your paper.

**Plural of numbers**

Do not use an apostrophe in the plural of any numbers, including decades.

Oksana skated nearly perfect figure 8s.

The 1920s are known as the Jazz Age.

**Plural of letters**

Italicize the letter and use roman (regular) font style for the -s ending. Do not italicize academic grades.
Two large Js were painted on the door.
He received two Ds for the first time in his life.

**EXCEPTIONS:** To avoid misreading, use an apostrophe to form the plural of lowercase letters and the capital letters A and I: p’s, A’s.

Beginning readers often confuse b’s and d’s.

**MLA NOTE:** The Modern Language Association recommends using an apostrophe for the plural of both capital and lowercase letters: J’s, p’s.

**Plural of abbreviations**

Do not use an apostrophe to pluralize an abbreviation.

Harriet has thirty DVDs on her desk.
Marco earned two PhDs before his thirtieth birthday.

**Plural of words mentioned as words**

Generally, omit the apostrophe to form the plural of words mentioned as words. If the word is italicized, the -s ending appears in roman (regular) type.

We’ve heard enough *maybes*.

Words mentioned as words may also appear in quotation marks. When you choose this option, use the apostrophe.

We’ve heard enough “maybe’s.”

**P4-d Avoid common misuses of the apostrophe.**

Do not use an apostrophe in the following situations.

**WITH NOUNS THAT ARE NOT POSSESSIVE**

Some outpatients have special parking permits.

**IN THE POSSESSIVE PRONOUNS ITS, WHOSE, HIS, HERS, OURS, YOURS, AND THEIRS**

Each area has it’s own conference room.

*It’s* means “it is.” The possessive pronoun *its* contains no apostrophe despite the fact that it is possessive.
P5-a

Use quotation marks to enclose direct quotations.

Direct quotations of a person’s words, whether spoken or written, must be in quotation marks.

“The contract negotiations are stalled,” the airline executive told reporters, “but I am prepared to work night and day to bring both sides together.”

In dialogue, begin a new paragraph to mark a change in speaker.

“Mom, his name is Willie, not William. A thousand times I’ve told you, it’s Willie.”

“Willie is a derivative of William, Lester. Surely his birth certificate doesn’t have Willie on it, and I like calling people by their proper names.”

“Yes, it does, ma’am. My mother named me Willie K. Mason.”

— Gloria Naylor

PRACTICE hackerhandbooks.com/writersref
> Punctuation and mechanics > P5–3 and P5–4
If a single speaker utters more than one paragraph, introduce each paragraph with a quotation mark, but do not use a closing quotation mark until the end of the speech.

**Exception: indirect quotations**

Do not use quotation marks around indirect quotations. An indirect quotation reports someone’s ideas without using that person’s exact words. In academic writing, indirect quotation is called *paraphrase* or *summary*. (See R3-c.)

The airline executive told reporters that although contract negotiations were at a standstill, she was prepared to work hard with both labor and management to bring about a settlement.

**Exception: long quotations**

Long quotations of prose or poetry are generally set off from the text by indenting. Quotation marks are not used because the indented format tells readers that the quotation is taken word-for-word from the source.

After making an exhaustive study of the historical record, James Horan evaluates Billy the Kid like this:

> The portrait that emerges of [the Kid] from the thousands of pages of affidavits, reports, trial transcripts, his letters, and his testimony is neither the mythical Robin Hood nor the stereotyped adenoidal moron and pathological killer. Rather Billy appears as a disturbed, lonely young man, honest, loyal to his friends, dedicated to his beliefs, and betrayed by our institutions and the corrupt, ambitious, and compromising politicians in his time. (158)

The number in parentheses is a citation handled according to MLA style. (See MLA-4a.)

MLA, APA, and CMS (*Chicago*) have specific guidelines for what constitutes a long quotation and how it should be indented (see pp. 381, 485, and 506, respectively).

**P5-b Use single quotation marks to enclose a quotation within a quotation.**

Megan Marshall notes that what Elizabeth Peabody “hoped to accomplish in her school was not merely ‘teaching’ but ‘educating children morally and spiritually as well as intellectually from the first’” (107).
P5-c  **Use quotation marks around the titles of short works.**

Short works include newspaper and magazine articles, poems, short stories, songs, episodes of television and radio programs, and chapters or subdivisions of books.

James Baldwin’s story “Sonny’s Blues” tells the story of two brothers who come to understand each other’s suffering.

**NOTE:** Titles of books, plays, Web sites, television and radio programs, films, magazines, and newspapers are put in italics. (See P10-a.)

P5-d  **Quotation marks may be used to set off words used as words.**

Although words used as words are ordinarily italicized (see P10-b), quotation marks are also acceptable. Be consistent throughout your paper.

The words “accept” and “except” are frequently confused.

The words *accept* and *except* are frequently confused.

P5-e  **Use punctuation with quotation marks according to convention.**

This section describes the conventions American publishers use in placing various marks of punctuation inside or outside quotation marks. It also explains how to punctuate when introducing quoted material.

**Periods and commas**

Place periods and commas inside quotation marks.

“I’m here as part of my service-learning project,” I told the classroom teacher. “I’m hoping to become a reading specialist.”

This rule applies to single quotation marks as well as double quotation marks. (See P5-b.) It also applies to all uses of quotation marks: for quoted material, for titles of works, and for words used as words.

**EXCEPTION:** In the Modern Language Association’s style of parenthetical in-text citations (see MLA-4a), the period follows the citation in parentheses. (See the example on p. 284.)
James M. McPherson comments, approvingly, that the Whigs “were not averse to extending the blessings of American liberty, even to Mexicans and Indians” (48).

**Colons and semicolons**

Put colons and semicolons outside quotation marks.

Harold wrote, “I regret that I am unable to attend the fundraiser for AIDS research”; his letter, however, came with a substantial contribution.

**Question marks and exclamation points**

Put question marks and exclamation points inside quotation marks unless they apply to the whole sentence.

Contrary to tradition, bedtime at my house is marked by “Mommy, can I tell you a story now?”

Have you heard the old proverb “Do not climb the hill until you reach it”?

In the first sentence, the question mark applies only to the quoted question. In the second sentence, the question mark applies to the whole sentence.

**NOTE:** In MLA style for a quotation that ends with a question mark or an exclamation point, the parenthetical citation and a period should follow the entire quotation.

Rosie Thomas asks, “Is nothing in life ever straight and clear, the way children see it?” (77).

**Introducing quoted material**

After a word group introducing a quotation, choose a colon, a comma, or no punctuation at all, whichever is appropriate in context.

**FORMAL INTRODUCTION** If a quotation is formally introduced, a colon is appropriate. A formal introduction is a full independent clause, not just an expression such as *he said* or *she remarked*.

Thomas Friedman provides a challenging yet optimistic view of the future: “We need to get back to work on our country and on our planet. The hour is late, the stakes couldn’t be higher, the project couldn’t be harder, the payoff couldn’t be greater” (25).
**EXPRESSION SUCH AS HE SAID** If a quotation is introduced with an expression such as he said or she remarked—or if it is followed by such an expression—a comma is needed.

About New England’s weather, Mark Twain once declared, “In the spring I have counted one hundred and thirty-six different kinds of weather within four and twenty hours” (55).

“Oh unless another war is prevented it is likely to bring destruction on a scale never before held possible and even now hardly conceived,” Albert Einstein wrote in the aftermath of the atomic bomb (29).

**BLENDED QUOTATION** When a quotation is blended into the writer’s own sentence, either a comma or no punctuation is appropriate, depending on the way in which the quotation fits into the sentence structure.

The future champion could, as he put it, “float like a butterfly and sting like a bee.”

Virginia Woolf wrote in 1928 that “a woman must have money and a room of her own if she is to write fiction” (4).

**BEGINNING OF SENTENCE** If a quotation appears at the beginning of a sentence, use a comma after it unless the quotation ends with a question mark or an exclamation point.

“I’ve always thought of myself as a reporter,” claimed American poet Gwendolyn Brooks (162).

“What is it?” she asked, bracing herself.

**INTERRUPTED QUOTATION** If a quoted sentence is interrupted by explanatory words, use commas to set off the explanatory words.

“With regard to air travel,” Stephen Ambrose notes, “Jefferson was a full century ahead of the curve” (53).

If two successive quoted sentences from the same source are interrupted by explanatory words, use a comma before the explanatory words and a period after them.

“Everyone agrees journalists must tell the truth,” Bill Kovach and Tom Rosenstiel write. “Yet people are befuddled about what ‘the truth’ means” (37).

**P5-f** Avoid common misuses of quotation marks.

Do not use quotation marks to draw attention to familiar slang, to disown trite expressions, or to justify an attempt at humor.
The economist estimated that single-family home prices would decline another 5 percent by the end of the year, emphasizing that this was only a "ballpark figure."

Do not use quotation marks around the title of your own essay.

P6 Other punctuation marks

P6-a End punctuation

The period

Use a period to end all sentences except direct questions or genuine exclamations. Also use periods in abbreviations according to convention.

TO END SENTENCES  Most sentences should end with a period. Problems sometimes arise when a writer must choose between a period and a question mark or between a period and an exclamation point.

If a sentence reports a question instead of asking it directly, it should end with a period, not a question mark.

The professor asked whether talk therapy was more beneficial than antidepressants.

If a sentence is not a genuine exclamation, it should end with a period, not an exclamation point. (See also p. 287.)

After years of working her way through school, Geeta finally graduated with high honors.

IN ABBREVIATIONS  A period is conventionally used in abbreviations of titles and Latin words or phrases, including the time designations for morning and afternoon.

Mr.  i.e.  a.m. (or AM)
Ms.  e.g.  p.m. (or PM)
Dr.  etc.

NOTE: If a sentence ends with a period marking an abbreviation, do not add a second period.
Do not use a period with US Postal Service abbreviations for states: MD, TX, CA.

Current usage is to omit the period in abbreviations of organization and country names, academic degrees, and designations for eras.

NATO UNESCO UCLA BS BC
IRS AFL-CIO NIH PhD BCE

**The question mark**

A direct question should be followed by a question mark.

What is the horsepower of a 777 engine?

If a polite request is written in the form of a question, it may be followed by a period.

Would you please send me your catalog of lilies.

**TIP:** Do not use a question mark after an indirect question, one that is reported rather than asked directly. Use a period instead.

► He asked me who was teaching the mythology course this year?.

**NOTE:** Questions in a series may be followed by question marks even when they are not complete sentences.

We wondered where Calamity had hidden this time. Under the sink? Behind the furnace? On top of the bookcase?

**The exclamation point**

Use an exclamation point after a word group or sentence to express exceptional feeling or to provide special emphasis. The exclamation point is rarely appropriate in academic writing.

When Gloria entered the room, I switched on the lights, and we all yelled, “Surprise!”

**TIP:** Do not overuse the exclamation point.

► In the fisherman’s memory, the fish lives on, increasing in length and weight with each passing year, until at last it is big enough to shade a fishing boat!.

This sentence doesn’t need to be pumped up with an exclamation point. It is emphatic enough without it.
Whenever I see my favorite hitter, Derrek Lee, in the batter’s box, I dream of making it to the big leagues. My team would win every time!

The first exclamation point should be deleted so that the second one will have more force.

P6-b The dash, parentheses, and brackets

The dash

When typing, use two hyphens to form a dash (–). Do not put spaces before or after the dash. If your word processing program has what is known as an “em-dash” (—), you may use it instead, with no space before or after it.

A dash can be used to set off parenthetical material that deserves emphasis.

Everything that went wrong—from the peeping Tom at Theodora’s window last night to my head-on collision today—we blamed on our move.

A pair of dashes is useful to enclose an appositive that contains commas. An appositive is a noun or noun phrase that renames a nearby noun. Ordinarily appositives are set off with commas (see P1-e), but when the appositive itself contains commas, a pair of dashes helps readers see the relative importance of all the pauses.

In my hometown, the basic needs of people—food, clothing, and shelter—are less costly than in a big city like Los Angeles.

A dash is a dramatic, somewhat informal way to introduce a list, a restatement, an amplification, or a striking shift in tone or thought.

Along the wall are the bulk liquids—sesame seed oil, honey, safflower oil, and that half-liquid “peanuts only” peanut butter.

In his last semester, Peter tried to pay more attention to his priorities—applying to graduate school, getting financial aid, and finding a roommate.

Everywhere we looked there were little kids—a box of Cracker Jacks in one hand and Mommy or Daddy’s sleeve in the other.

Kiere took a few steps back, came running full speed, kicked a mighty kick—and missed the ball.
In the first two examples, the writer could also use a colon. (See P3-d.) The colon is more formal than the dash and not quite as dramatic.

**TIP:** Unless there is a specific reason for using the dash, avoid it. Unnecessary dashes create a choppy effect.

- Insisting that students use computers as instructional tools for information retrieval makes good sense. Herding them sheeplike into computer technology does not.

**Parentheses**

Use parentheses to enclose supplemental material, minor digressions, and afterthoughts.

Nurses record patients’ vital signs (temperature, pulse, and blood pressure) several times a day.

Use parentheses to enclose letters or numbers labeling items in a series.

Regulations stipulated that only the following equipment could be used on the survival mission: (1) a knife, (2) thirty feet of parachute line, (3) a book of matches, (4) a poncho, (5) an E tool, and (6) a signal flare.

**TIP:** Do not overuse parentheses. Rough drafts are likely to contain more afterthoughts than necessary. As writers head into a sentence, they often think of additional details, occasionally working them in as best they can with parentheses. Usually such sentences should be revised so that the additional details no longer seem to be afterthoughts.

- Researchers have said that seventeen million (estimates run as high as twenty-three million) Americans have diabetes.

**Brackets**

Use brackets to enclose any words or phrases that you have inserted into an otherwise word-for-word quotation.

*Audubon* reports that “if there are not enough young to balance deaths, the end of the species [California condor] is inevitable” (4).

The sentence quoted from the *Audubon* article did not contain the words *California condor* (since the context of the full article made clear
what species was meant), so the writer needed to add the name in brackets.

The Latin word “sic” in brackets indicates that an error in a quoted sentence appears in the original source.

According to the review, Nelly Furtado’s performance was brilliant, “exceeding [sic] the expectations of even her most loyal fans.”

Do not overuse “sic,” however, since calling attention to others’ mistakes can appear snobbish. The preceding quotation, for example, might have been paraphrased instead: According to the review, even Nelly Furtado’s most loyal fans were surprised by the brilliance of her performance.

**P6-c The ellipsis mark**

The ellipsis mark consists of three spaced periods. Use an ellipsis mark to indicate that you have deleted words from an otherwise word-for-word quotation.

Reuben reports that “when the amount of cholesterol circulating in the blood rises over . . . 300 milligrams per 100, the chances of a heart attack increase dramatically.”

If you delete a full sentence or more in the middle of a quoted passage, use a period before the three ellipsis dots.

“Most of our efforts,” writes Dave Erikson, “are directed toward saving the bald eagle’s wintering habitat along the Mississippi River. . . . It’s important that the wintering birds have a place to roost, where they can get out of the cold wind.”

**TIP:** Ordinarily, do not use the ellipsis mark at the beginning or at the end of a quotation. Readers will understand that the quoted material is taken from a longer passage. If you have cut some words from the end of the final quoted sentence, however, MLA requires an ellipsis mark, as in the first example on page 381.

In quoted poetry, use a full line of ellipsis dots to indicate that you have dropped a line or more from the poem, as in this example from “To His Coy Mistress” by Andrew Marvell:

Had we but world enough, and time,
This coyness, lady, were no crime.

But at my back I always hear
Time’s wingèd chariot hurrying near; (1-2, 21-22)
The ellipsis mark may also be used to indicate a hesitation or an interruption in speech or to suggest unfinished thoughts.

“The apartment building next door . . . it’s going up in flames!” yelled Marcia.

Before falling into a coma, the victim whispered, “It was a man with a tattoo on his . . .”

**P6-d The slash**

Use the slash to separate two or three lines of poetry that have been run into your text. Add a space both before and after the slash.

In the opening lines of “Jordan,” George Herbert pokes gentle fun at popular poems of his time: “Who says that fictions only and false hair / Become a verse? Is there in truth no beauty?” (1-2).

More than three lines of poetry should be handled as an indented quotation. (See p. 282.)

The slash may occasionally be used to separate paired terms such as pass/fail and producer/director. Do not use a space before or after the slash. Be sparing in this use of the slash. In particular, avoid the use of and/or, he/she, and his/her. Instead of using he/she and his/her to solve sexist language problems, you can usually find more graceful alternatives. (See W4-e and G3-a.)

**P7 Spelling and hyphenation**

You learned to spell from repeated experience with words in both reading and writing, but especially writing. Words have a look, a sound, and even a feel to them as the hand moves across the page. As you proofread, you can probably tell if a word doesn’t look quite right. In such cases, the solution is obvious: Look up the word in the dictionary. (See W6-a.)

**P7-a Become familiar with the major spelling rules.**

*i before e except after c*

Use *i* before *e* except after *c* or when sounded like *ay*, as in *neighbor* and *weigh*.

- **I BEFORE E** relieve, believe, sieve, niece, fierce, frieze
- **E BEFORE I** receive, deceive, sleigh, freight, eight
- **EXCEPTIONS** seize, either, weird, height, foreign, leisure
Suffixes

**FINAL SILENT -E**  Generally, drop a final silent -e when adding a suffix that begins with a vowel. Keep the final -e if the suffix begins with a consonant.

- combine, combination
- desire, desiring
- prude, prudish
- remove, removable
- achieve, achievement
- care, careful
- entire, entirety
- gentle, gentleness

Words such as changeable, acknowledgment, judgment, argument, and truly are exceptions.

**FINAL -Y**  When adding -s or -d to words ending in -y, ordinarily change -y to -ie when the -y is preceded by a consonant but not when it is preceded by a vowel.

- comedy, comedies
- dry, dried
- monkey, monkeys
- play, played

With proper names ending in -y, however, do not change the -y to -ie even if it is preceded by a consonant: the Dougherty family, the Doughertys.

**FINAL CONSONANTS**  If a final consonant is preceded by a single vowel and the consonant ends a one-syllable word or a stressed syllable, double the consonant when adding a suffix beginning with a vowel.

- bet, betting
- commit, committed
- occur, occurrence

Plurals

**-S OR -ES**  Add -s to form the plural of most nouns; add -es to singular nouns ending in -s, -sh, -ch, and -x.

- table, tables
- paper, papers
- church, churches
- dish, dishes

Ordinarily add -s to nouns ending in -o when the -o is preceded by a vowel. Add -es when it is preceded by a consonant.

- radio, radios
- video, videos
- hero, heroes
- tomato, tomatoes

**OTHER PLURALS**  To form the plural of a hyphenated compound word, add -s to the chief word even if it does not appear at the end.

- mother-in-law, mothers-in-law
English words derived from other languages such as Latin, Greek, or French sometimes form the plural as they would in their original language.

- medium, media
- criterion, criteria
- chateau, chateaux

**ESL** Spelling varies slightly among English-speaking countries. This can be particularly confusing for multilingual students in the United States, who may have learned British English. Following is a list of some common words spelled differently in American and British English. Consult a dictionary for others.

<table>
<thead>
<tr>
<th>AMERICAN</th>
<th>BRITISH</th>
</tr>
</thead>
<tbody>
<tr>
<td>canceled, traveled</td>
<td>cancelled, travelled</td>
</tr>
<tr>
<td>color, humor</td>
<td>colour, humour</td>
</tr>
<tr>
<td>judgment</td>
<td>judgement</td>
</tr>
<tr>
<td>check</td>
<td>cheque</td>
</tr>
<tr>
<td>realize, apologize</td>
<td>realise, apologise</td>
</tr>
<tr>

<tr>
<td>connection, inflexion</td>
<td>connexion, inflexion</td>
</tr>
<tr>
<td>licorice</td>
<td>liquorice</td>
</tr>
</tbody>
</table>

**P7-b** Discriminate between words that sound alike but have different meanings.

Words that sound alike or nearly alike but have different meanings and spellings are called *homophones*. The following sets of words are so commonly confused that a good writer will double-check their every use.

- affect (verb: to exert an influence)
- effect (verb: to accomplish; noun: result)
- its (possessive pronoun: of or belonging to it)
- it’s (contraction for *it is* or *it has*)
- loose (adjective: free, not securely attached)
- lose (verb: to fail to keep, to be deprived of)
principal (adjective: most important; noun: head of a school)
principle (noun: a fundamental guideline or truth)
their (possessive pronoun: belonging to them)
they’re (contraction for they are)
there (adverb: that place or position)
who’s (contraction for who is or who has)
whose (possessive form of who)
your (possessive pronoun: belonging to you)
you’re (contraction for you are)

To check for correct use of these and other commonly confused words, consult the glossary of usage (W1).

**P7-c Consult the dictionary to determine whether to hyphenate a compound word.**

The dictionary will tell you whether to treat a compound word as a hyphenated compound (*water-repellent*), one word (*waterproof*), or two words (*water table*). If the compound word is not in the dictionary, treat it as two words.

- The prosecutor chose not to cross-examine any witnesses.

- All students are expected to record their data in a small note book.

- Alice walked through the looking/glass into a backward world.

**P7-d Hyphenate two or more words used together as an adjective before a noun.**

- Mrs. Douglas gave Toshiko a seashell and some newspaper-wrapped fish to take home to her mother.

- Richa Gupta is not yet a well-known candidate.

    *Newspaper-wrapped* and *well-known* are adjectives used before the nouns *fish* and *candidate*.

    Generally, do not use a hyphen when such compounds follow the noun.
After our television campaign, Richa Gupta will be well-known.

Do not use a hyphen to connect -ly adverbs to the words they modify.

A slowly-moving truck tied up traffic.

**NOTE:** When two or more hyphenated adjectives in a row modify the same noun, you can suspend the hyphens.

Do you prefer first-, second-, or third-class tickets?

**P7-e** *Hyphenate fractions and certain numbers when they are spelled out.*

For numbers written in words, use a hyphen in all fractions and in compound numbers from twenty-one to ninety-nine.

One-fourth of my income pays for child care, and one-third pays the rent.

**P7-f** *Use a hyphen with the prefixes all-, ex- (meaning “former”), and self- and with the suffix -elect.*

The private foundation is funneling more money into self-help projects.

The Student Senate bylaws require the president-elect to attend all senate meetings between the election and the official transfer of office.

**P7-g** *Use a hyphen in certain words to avoid ambiguity or to separate awkward double or triple letters.*

Without the hyphen, there would be no way to distinguish between words such as re-creation and recreation.

Bicycling in the city is my favorite form of recreation.

The film was praised for its astonishing re-creation of nineteenth-century London.
Hyphens are sometimes used to separate awkward double or triple letters in compound words (anti-intellectual, cross-stitch). Always check a dictionary for the standard form of the word.

**P7-h Check for correct hyphenation at the ends of lines.**

Some word processing programs and other computer applications automatically generate word breaks at the ends of lines. When you’re writing an academic paper, it’s best to set your computer application not to hyphenate automatically. This setting will ensure that only words already containing a hyphen (such as long-distance, pre-Roman) will be hyphenated at the ends of lines. (See also C6.)

E-mail addresses, URLs, and other electronic addresses need special attention when they occur at the end of a line of text or in bibliographic citations. You can’t rely on your computer application to divide these terms correctly, so you must make a decision in each case. Do not insert a hyphen to divide electronic addresses. Instead, break an e-mail address after the @ symbol or before a period. Break a URL after a slash or a double slash or before any other punctuation mark.

I repeatedly e-mailed Janine at janine.r.rose@dunbaracademy.org before I gave up and called her cell phone.

For breaks in URLs in MLA, APA, and CMS (Chicago) documentation styles, see MLA-5a, APA-5a, and CMS-5a, respectively.

**P8 Capitalization**

In addition to the rules in this section, a good dictionary can tell you when to use capital letters.

**P8-a Capitalize proper nouns and words derived from them; do not capitalize common nouns.**

Proper nouns are the names of specific persons, places, and things. All other nouns are common nouns. The following types of words are usually capitalized: names of deities, religions, religious followers, sacred books; words of family relationship used as names; particular places;
nationalities and their languages, races, tribes; educational institutions, departments, degrees, particular courses; government departments, organizations, political parties; historical movements, periods, events, documents; specific electronic sources; and trade names.

PROPER NOUNS
- God (used as a name)
- Book of Common Prayer
- Uncle Pedro
- Father (used as a name)
- Lake Superior
- the Capital Center
- the South
- Wrigley Field
- University of Wisconsin
- Geology 101
- Environmental Protection Agency
- Phi Kappa Psi
- a Democrat
- the Enlightenment
- the Treaty of Versailles
- the World Wide Web, the Web
- the Internet, the Net
- Advil

COMMON NOUNS
- a god
- a sacred book
- my uncle
- my father
- a picturesque lake
- a center for advanced studies
- a southern state
- a baseball stadium
- a state university
- geology
- a federal agency
- a fraternity
- an independent
- the eighteenth century
- a treaty
- a home page
- a computer network
- a painkiller

Names of school subjects are capitalized only if they are names of languages. Names of particular courses are capitalized.

This semester Austin is taking math, geography, geology, French, and English.

Professor Obembe offers Modern American Fiction 501 to graduate students.

CAUTION: Do not capitalize common nouns to make them seem important: Our company is currently hiring computer programmers (not Company, Computer Programmers).
P8-b Capitalize titles of persons when used as part of a proper name but usually not when used alone.

Professor Margaret Barnes; Dr. Sinyee Sein; John Scott Williams Jr.
District Attorney Marshall was reprimanded for badgering the witness.
The district attorney was elected for a two-year term.

Usage varies when the title of an important public figure is used alone: The *president* [or *President*] vetoed the bill.

P8-c Capitalize the first, last, and all major words in titles and subtitles of works.

In both titles and subtitles of works (books, articles, songs, artwork, and online documents) major words—nouns, pronouns, verbs, adjectives, and adverbs—should be capitalized. Minor words—articles, prepositions, and coordinating conjunctions—are not capitalized unless they are the first or last word of a title or subtitle.

Capitalize the second part of a hyphenated term in a title if it is a major word but not if it is a minor word. Capitalize chapter titles and the titles of other major divisions of a work following the same guidelines used for titles of complete works.

*Seizing the Enigma: The Race to Break the German U-Boat Codes*
*A River Runs through It*
“I Want to Hold Your Hand”
*The Canadian Green Page*

To learn why some of the titles in the list are italicized and some are put in quotation marks, see P10-a and P5-c.

P8-d Capitalize the first word of a sentence.

The first word of a sentence should be capitalized. When a sentence appears within parentheses, capitalize its first word unless the parentheses appear within another sentence.

Early detection of breast cancer significantly increases survival rates. (See table 2.)
Early detection of breast cancer significantly increases survival rates (see table 2).
Capitalize the first word of a quoted sentence but not a quoted phrase.

Robert Hughes writes, “There are only about sixty Watteau paintings on whose authenticity all experts agree” (102).

Russell Baker has written that in this country, sports are “the opiate of the masses” (46).

If a quoted sentence is interrupted by explanatory words, do not capitalize the first word after the interruption. (See P5-e.)

“If you want to go out,” he said, “tell me now.”

When quoting poetry, copy the poet’s capitalization exactly. Many poets capitalize the first word of every line of poetry; a few contemporary poets dismiss capitalization altogether.

it was the week that
i felt the city’s narrow breezes rush about
me
—Don L. Lee

P8-e Capitalize the first word after a colon if it begins an independent clause.

If a word group following a colon could stand on its own as a complete sentence, capitalize the first word.

Clinical trials called into question the safety profile of the drug:
A high percentage of participants reported hypertension and kidney problems.

Preferences vary among academic disciplines. See MLA-5a, APA-5a, and CMS-5a for MLA, APA, and CMS (Chicago) style, respectively.
Always use lowercase for a list or an appositive that follows a colon.

Students were divided into two groups: residents and commuters.

P8-f Capitalize abbreviations according to convention.

Abbreviations for government agencies, companies, and other organizations as well as call numbers for radio and television stations are capitalized.

EPA, FBI, DKNY, IBM, WCRB, KNBC-TV
Use standard abbreviations for titles immediately before and after proper names.

<table>
<thead>
<tr>
<th>TITLES BEFORE PROPER NAMES</th>
<th>TITLES AFTER PROPER NAMES</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mr. Rafael Zabala</td>
<td>William Albert Sr.</td>
</tr>
<tr>
<td>Ms. Nancy Linehan</td>
<td>Thomas Hines Jr.</td>
</tr>
<tr>
<td>Mrs. Edward Horn</td>
<td>Anita Lor, PhD</td>
</tr>
<tr>
<td>Dr. Margaret Simmons</td>
<td>Robert Simkowski, MD</td>
</tr>
<tr>
<td>Rev. John Stone</td>
<td>Margaret Chin, LLB</td>
</tr>
<tr>
<td>Prof. James Russo</td>
<td>Polly Stein, DDS</td>
</tr>
</tbody>
</table>

Abbreviate a title only if it is used with a proper name.

My history professor is an expert on twentieth-century race relations in South Africa.

Avoid redundant titles such as Dr. Amy Day, MD. Choose one title or the other: Dr. Amy Day or Amy Day, MD.

Use abbreviations only when you are sure your readers will understand them.

Familiar abbreviations, written without periods, are acceptable.

<table>
<thead>
<tr>
<th>CIA</th>
<th>FBI</th>
<th>MD</th>
<th>NAACP</th>
</tr>
</thead>
<tbody>
<tr>
<td>NBA</td>
<td>NEA</td>
<td>PhD</td>
<td>CD-ROM</td>
</tr>
<tr>
<td>YMCA</td>
<td>CBS</td>
<td>USA</td>
<td>ESL</td>
</tr>
</tbody>
</table>

Talk show host Conan O’Brien is a Harvard graduate with a BA in history.

The YMCA has opened a new gym close to my office.

NOTE: When using an unfamiliar abbreviation (such as NASW for National Association of Social Workers) throughout a paper, write the full name followed by the abbreviation in parentheses at the first mention of the name. Then use just the abbreviation throughout the rest of the paper.
P9-c Use BC, AD, a.m., p.m., No., and $ only with specific dates, times, numbers, and amounts.

The abbreviation BC (“before Christ”) follows a date, and AD (“anno Domini”) precedes a date. Acceptable alternatives are BCE (“before the common era”) and CE (“common era”), both of which follow a date.

- 40 BC (or 40 BCE) 4:00 a.m. (or AM)  No. 12 (or no. 12)
- AD 44 (or 44 CE)  6:00 p.m. (or PM)  $150

Avoid using a.m., p.m., No., or $ when not accompanied by a specific figure.

▶ The governor argued that the new sales tax would raise much-needed $ for the state.

P9-d Be sparing in your use of Latin abbreviations.

Latin abbreviations are acceptable in footnotes and bibliographies and in informal writing for comments in parentheses.

- cf. (Latin confer, “compare”)
- e.g. (Latin exempli gratia, “for example”)
- et al. (Latin et alia, “and others”)
- etc. (Latin et cetera, “and so forth”)
- i.e. (Latin id est, “that is”)
- N.B. (Latin nota bene, “note well”)

The text for our sociology class is Harold Simms et al., *Introduction to Social Systems*.

Alfred Hitchcock directed many classic thrillers (e.g., *Psycho, Rear Window,* and *Vertigo*).

In formal writing, use the appropriate English phrases.

▶ Many obsolete laws remain on the books; e.g., a law in Vermont forbids an unmarried man and woman to sit closer than six inches apart on a park bench.
P9-e *Avoid inappropriate abbreviations.*

In formal writing, abbreviations for the following are not commonly accepted.

- **PERSONAL NAMES**  Charles (not Chas.)
- **UNITS OF MEASUREMENT**  feet (not ft.)
- **DAYS OF THE WEEK**  Monday (not Mon.)
- **HOLIDAYS**  Christmas (not Xmas)
- **MONTHS**  January, February, March (not Jan., Feb., Mar.)
- **COURSES OF STUDY**  political science (not poli. sci.)
- **DIVISIONS OF WRITTEN WORKS**  chapter, page (not ch., p.)
- **STATES AND COUNTRIES**  Massachusetts (not MA or Mass.)
- **PARTS OF A BUSINESS NAME**  Adams Lighting Company (not Adams Lighting Co.); Kim and Brothers (not Kim and Bros.)

The American Red Cross requires that blood donors be at least seventeen yrs. old, weigh at least 110 lb., and not have given blood in the past eight wks.

**EXCEPTION:** Abbreviate states and provinces in complete addresses, and always abbreviate DC when used with Washington.

P9-f *Follow the conventions in your discipline for spelling out or using numerals to express numbers.*

In the humanities, which generally follow either Modern Language Association (MLA) style or CMS (Chicago) style, use numerals only for specific numbers above one hundred: 353; 1,020. Spell out numbers one hundred and below and large round numbers: eleven, thirty-five, sixty, fifteen million.

The social sciences and sciences, which follow the style guidelines of the American Psychological Association (APA) or the Council of Science Editors (CSE), use numerals for all but the numbers one through nine.

In all fields, treat related numbers in a passage consistently: *The survey found that 89 of 157 respondents had not taken any courses related to alcohol use.*
When one number immediately follows another, spelling out one number and using numerals for the other is usually effective: *three 100-meter events, 25 four-poster beds*.

- *It's been eight years since I visited Peru.*

- Enrollment in the charter school in its first year will be limited to *three hundred forty students*.

If a sentence begins with a number, spell out the number or rewrite the sentence.

- *One hundred fifty children in our program need expensive dental treatment.*

Rewriting the sentence will also correct the error and may be less awkward if the number is long: *In our program, 150 children need expensive dental treatment.*

P9-g Use numerals according to convention in dates, addresses, and so on.

**DATES**  July 4, 1776; 56 BC
**ADDRESSES**  77 Latches Lane, 519 West 42nd Street
**PERCENTAGES**  55 percent (or 55%)
**FRACTIONS, DECIMALS**  $\frac{1}{2}, 0.047$
**SCORES**  7 to 3, 21–18
**STATISTICS**  average age 37, average weight 180
**SURVEYS**  4 out of 5
**EXACT AMOUNTS OF MONEY**  $105.37, $106,000
**DIVISIONS OF BOOKS**  volume 3, chapter 4, page 189
**DIVISIONS OF PLAYS**  act 3, scene 3 (or act III, scene iii)
**IDENTIFICATION NUMBERS**  serial number 10988675
**TIME OF DAY**  4:00 p.m., 1:30 a.m.

- The foundation raised *four hundred thirty thousand dollars* for cancer research.

**NOTE:** When not using *a.m.* or *p.m.*, write out the time in words (*two o’clock in the afternoon, twelve noon, seven in the morning*).
This section describes conventional uses for italics. While italics is recommended by all three style guides covered in this book (MLA, APA, and CMS), some instructors may prefer underlining in student papers. If that is the case in your course, simply substitute underlining for italics in the examples in this section.

Some computer and online applications do not allow for italics. To indicate words that should be italicized, you can use underscore marks or asterisks before and after the italic words.

I am planning to write my senior thesis on _Memoirs of a Geisha_.

**NOTE:** Excessive use of italics to emphasize words or ideas, especially in academic writing, is distracting and should be avoided.

**P10-a Italicize the titles of works according to convention.**

Titles of the following types of works, including electronic works, should be italicized.

- **TITLES OF BOOKS**  *The Known World, Middlesex, Encarta*
- **MAGAZINES**  *Time, Scientific American, Salon.com*
- **NEWSPAPERS**  *the Baltimore Sun, the Orlando Sentinel Online*
- **PAMPHLETS**  *Common Sense, Facts about Marijuana*
- **LONG POEMS**  *The Waste Land, Beowulf*
- **PLAYS**  *'Night Mother, Wicked*
- **FILMS**  *Casablanca, The Hurt Locker*
- **TELEVISION PROGRAMS**  *American Idol, Frontline*
- **RADIO PROGRAMS**  *All Things Considered*
- **MUSICAL COMPOSITIONS**  *Porgy and Bess*
- **CHOREOGRAPHIC WORKS**  *Brief Fling*
- **WORKS OF VISUAL ART**  *American Gothic*
- **ELECTRONIC DATABASES**  *ProQuest*
- **WEB SITES**  *ZDNet, Google*
- **ELECTRONIC GAMES**  *Everquest, Call of Duty*
The titles of other works, such as short stories, essays, episodes of radio and television programs, songs, and short poems, are enclosed in quotation marks. (See P5-c.)

**NOTE:** Do not use italics when referring to the Bible, titles of books in the Bible (Genesis, not *Genesis*), or titles of legal documents (the Constitution, not the *Constitution*). Do not italicize the titles of computer software (Keynote, Photoshop). Do not italicize the title of your own paper.

**P10-b** *Italicize other terms according to convention.*

**SPACECRAFT, SHIPS, AIRCRAFT**

*Challenger, Queen Mary 2, Spirit of St. Louis*

The success of the Soviets’ *Sputnik* energized the US space program.

**FOREIGN WORDS**

Shakespeare’s Falstaff is a comic character known for both his excessive drinking and his general *joie de vivre*.

**EXCEPTION:** Do not italicize foreign words that have become a standard part of the English language—“laissez-faire,” “fait accompli,” “modus operandi,” and “per diem,” for example.

**WORDS, LETTERS, NUMBERS AS THEMSELVES**

Tomás assured us that the chemicals could probably be safely mixed, but his *probably* stuck in our minds.

Some toddlers have trouble pronouncing the letter *s*.

A big 3 was painted on the stage door.

**NOTE:** Quotation marks may be used instead of italics to set off words mentioned as words. (See P5-d.)

- c) Appositive phrases, 323
- d) Absolute phrases, 323
- e) Subordinate clauses, 323

### B4 Sentence types, 325
- a) Sentence structures, 326
- b) Sentence purposes, 327
B1 Parts of speech

Traditional grammar recognizes eight parts of speech: noun, pronoun, verb, adjective, adverb, preposition, conjunction, and interjection. Many words can function as more than one part of speech. For example, depending on its use in a sentence, the word paint can be a noun (The paint is wet) or a verb (Please paint the ceiling next).

B1-a Nouns

A noun is the name of a person, place, thing, or concept.

N N N
The lion in the cage growled at the zookeeper.

Nouns sometimes function as adjectives modifying other nouns. Because of their dual roles, nouns used in this manner may be called noun/adjectives.

N/ADJ N/ADJ
The leather notebook was tucked in the student’s backpack.

Nouns are classified in a variety of ways. Proper nouns are capitalized, but common nouns are not (see P8-a). For clarity, writers choose between concrete and abstract nouns (see W5-b). The distinction between count nouns and noncount nouns can be especially helpful to multilingual writers (see M2-a). Most nouns have singular and plural forms; collective nouns may be either singular or plural, depending on how they are used (see G1-f and G3-a). Possessive nouns require an apostrophe (see P4-a).

B1-b Pronouns

A pronoun is a word used in place of a noun. Usually the pronoun substitutes for a specific noun, known as its antecedent.

When the battery wears down, we recharge it.

Although most pronouns function as substitutes for nouns, some can function as adjectives modifying nouns. Because they have the
form of a pronoun and the function of an adjective, such pronouns may be called *pronoun/adjectives*.

**PN/ADJ**

*This* bird was at the same window yesterday morning.

Pronouns are classified as personal, possessive, intensive and reflexive, relative, interrogative, demonstrative, indefinite, and reciprocal.

**PERSONAL PRONOUNS** Personal pronouns refer to specific persons or things. They always function as noun equivalents.

* Singular: I, me, you, she, her, he, him, it
* Plural: we, us, you, they, them

**POSSESSIVE PRONOUNS** Possessive pronouns indicate ownership.

* Singular: my, mine, your, yours, her, hers, his, its
* Plural: our, ours, your, yours, their, theirs

Some of these possessive pronouns function as adjectives modifying nouns: *my, your, her, his, its, our, their*.

**INTENSIVE AND REFLEXIVE PRONOUNS** Intensive pronouns emphasize a noun or another pronoun (The senator *herself* met us at the door). Reflexive pronouns, which have the same form as intensive pronouns, name a receiver of an action identical with the doer of the action (Paula cut *herself*).

* Singular: myself, yourself, himself, herself, itself
* Plural: ourselves, yourselves, themselves

**RELATIVE PRONOUNS** Relative pronouns introduce subordinate clauses functioning as adjectives (The writer *who won the award* refused to accept it). In addition to introducing the clause, the relative pronoun (in this case *who*) points back to a noun or pronoun that the clause modifies (*writer*). (See B3-e.)

who, whom, whose, which, that

**INTERROGATIVE PRONOUNS** Interrogative pronouns introduce questions (*Who is expected to win the election?*).

who, whom, whose, which, what
**DEMONSTRATIVE PRONOUNS** Demonstrative pronouns identify or point to nouns. Frequently they function as adjectives (*This* chair is my favorite), but they may also function as noun equivalents (*This* is my favorite chair).

- this, that, these, those

**INDEFINITE PRONOUNS** Indefinite pronouns refer to nonspecific persons or things. Most are always singular (*everyone, each*); some are always plural (*both, many*); a few may be singular or plural (see G1-e). Most indefinite pronouns function as noun equivalents (*Something* is burning), but some can also function as adjectives (*All* campers must check in at the lodge).

- all, anyone, anybody, anyone
- another, anything, everything, everybody
- any, each, every
- anybody, either, many, neither
- everyone, nobody, none
- nobody, one, nothing
- some, several, somebody, something

**RECIPROCAL PRONOUNS** Reciprocal pronouns refer to individual parts of a plural antecedent (By turns, the penguins fed *one another*).

- each other, one another

**NOTE:** Using pronouns correctly can be challenging. See pronoun-antecedent agreement (G3-a), pronoun reference (G3-b), distinguishing between pronouns such as *I* and *me* (G3-c), and distinguishing between *who* and *whom* (G3-d).

**B1-c Verbs**

The verb of a sentence usually expresses action (*jump, think*) or being (*is, become*). It is composed of a main verb possibly preceded by one or more helping verbs.

- **MV**
  - The horses *exercise* every day.

- **HV** **MV**
  - The task force report *was not completed* on schedule.

Notice that words, usually adverbs, can intervene between the helping verb and the main verb (*was not completed*). (See B1-e.)
Helping verbs

There are twenty-three helping verbs in English: forms of have, do, and be, which may also function as main verbs; and nine modals, which function only as helping verbs. Have, do, and be change form to indicate tense; the nine modals do not.

FORMS OF HAVE, DO, AND BE
have, has, had
do, does, did
be, am, is, are, was, were, being, been

MODALS
can, could, may, might, must, shall, should, will, would

The verb phrase ought to is often classified as a modal as well.

Main verbs

The main verb of a sentence is always the kind of word that would change form if put into these test sentences:

| BASE FORM | Usually I (walk, ride). |
| PAST TENSE | Yesterday I (walked, rode). |
| PAST PARTICIPLE | I have (walked, ridden) many times before. |
| PRESENT PARTICIPLE | I am (walking, riding) right now. |
| -S FORM | Usually he/she/it (walks, rides). |

If a word doesn’t change form when slipped into the test sentences, you can be certain that it is not a main verb. For example, the noun revolution, though it may seem to suggest an action, can never function as a main verb. Just try to make it behave like one (Today I revolution . . . Yesterday I revolutioned . . .) and you’ll see why.

When both the past-tense and the past-participle forms of a verb end in -ed, the verb is regular (walked, walked). Otherwise, the verb is irregular (rode, ridden). (See G2-a.)

The verb be is highly irregular, having eight forms instead of the usual five: the base form be; the present-tense forms am, is, and are; the past-tense forms was and were; the present participle being; and the past participle been.

Helping verbs combine with the various forms of main verbs to create tenses. For a survey of tenses, see G2-f.

NOTE: Some verbs are followed by words that look like prepositions but are so closely associated with the verb that they are a part of its
meaning. These words are known as particles. Common verb-particle combinations include bring up, call off, drop off, give in, look up, run into, and take off.

Sharon packed up her broken laptop and sent it off to the repair shop.

**TIP:** You can find more information about using verbs in other sections of the handbook: active verbs (W3), subject-verb agreement (G1), standard English verb forms (G2-a to G2-d), verb tense and mood (G2-f and G2-g), and multilingual/ESL challenges with verbs (M1).

**B1-d Adjectives**

An adjective is a word used to modify, or describe, a noun or pronoun. An adjective usually answers one of these questions: Which one? What kind of? How many?

```
ADJ
the frisky horse [Which horse?]
```

```
ADJ ADJ
cracked old plates [What kind of plates?]
```

```
ADJ
nine months [How many months?]
```

Adjectives usually precede the words they modify. They may also follow linking verbs, in which case they describe the subject. (See B2-b.)

```
ADJ
The decision was unpopular.
```

The definite article the and the indefinite articles a and an are also classified as adjectives.

```
ART
A defendant should be judged on the evidence provided to the jury, not on hearsay.
```

Some possessive, demonstrative, and indefinite pronouns can function as adjectives: their, its, this, all, and so on (see B1-b). And nouns can function as adjectives when they modify other nouns: apple pie (the noun apple modifies the noun pie; see B1-a).

**TIP:** You can find more details about using adjectives in G4. If you are a multilingual writer, you may also find help with articles and specific uses of adjectives in M2 and M4.
B1-e Adverbs

An adverb is a word used to modify, or qualify, a verb (or verbal), an adjective, or another adverb. It usually answers one of these questions: When? Where? How? Why? Under what conditions? To what degree?

Pull *firmly* on the emergency handle. [Pull how?]

Read the text *first* and *then* work the exercises. [Read when? Work when?]

Adverbs modifying adjectives or other adverbs usually intensify or limit the intensity of the word they modify.

Be *extremely* kind, and you will *probably* have many friends.

The words *not and never* are classified as adverbs.

B1-f Prepositions

A preposition is a word placed before a noun or pronoun to form a phrase modifying another word in the sentence. The prepositional phrase nearly always functions as an adjective or as an adverb.

The road *to the summit* travels *past craters from* an extinct volcano.

*To the summit* functions as an adjective modifying the noun *road*; *past craters* functions as an adverb modifying the verb *travels*; *from an extinct volcano* functions as an adjective modifying the noun *craters*. (For more on prepositional phrases, see B3-a.)

English has a limited number of prepositions. The most common are included in the following list.

<table>
<thead>
<tr>
<th>about</th>
<th>beside</th>
<th>from</th>
<th>outside</th>
<th>toward</th>
</tr>
</thead>
<tbody>
<tr>
<td>above</td>
<td>besides</td>
<td>in</td>
<td>over</td>
<td>under</td>
</tr>
<tr>
<td>across</td>
<td>between</td>
<td>inside</td>
<td>past</td>
<td>underneath</td>
</tr>
<tr>
<td>after</td>
<td>beyond</td>
<td>into</td>
<td>plus</td>
<td>unlike</td>
</tr>
<tr>
<td>against</td>
<td>but</td>
<td>like</td>
<td>regarding</td>
<td>until</td>
</tr>
<tr>
<td>along</td>
<td>by</td>
<td>near</td>
<td>respecting</td>
<td>unto</td>
</tr>
<tr>
<td>among</td>
<td>concerning</td>
<td>next</td>
<td>round</td>
<td>up</td>
</tr>
<tr>
<td>around</td>
<td>considering</td>
<td>of</td>
<td>since</td>
<td>upon</td>
</tr>
<tr>
<td>as</td>
<td>despite</td>
<td>off</td>
<td>than</td>
<td>with</td>
</tr>
<tr>
<td>at</td>
<td>down</td>
<td>on</td>
<td>through</td>
<td>within</td>
</tr>
<tr>
<td>before</td>
<td>during</td>
<td>onto</td>
<td>throughout</td>
<td>without</td>
</tr>
<tr>
<td>behind</td>
<td>except</td>
<td>opposite</td>
<td>till</td>
<td></td>
</tr>
<tr>
<td>below</td>
<td>for</td>
<td>out</td>
<td>to</td>
<td></td>
</tr>
</tbody>
</table>
Some prepositions are more than one word long. Along with, as well as, in addition to, next to, and rather than are common examples.

**TIP:** Prepositions are used in idioms such as capable of and dig up (see W5-d). For a discussion of specific issues for multilingual writers, see M5.

### B1-g Conjunctions

Conjunctions join words, phrases, or clauses, and they indicate the relation between the elements they join.

**COORDINATING CONJUNCTIONS** A coordinating conjunction is used to connect grammatically equal elements. (See S1-b and S6.) The coordinating conjunctions are **and**, **but**, **or**, **nor**, **for**, **so**, and **yet**.

**CORRELATIVE CONJUNCTIONS** Correlative conjunctions come in pairs. Like coordinating conjunctions, they connect grammatically equal elements. (See S1-b.)

- either . . . or
- neither . . . nor
- not only . . . but also
- whether . . . or
- both . . . and

**SUBORDINATING CONJUNCTIONS** A subordinating conjunction introduces a subordinate clause and indicates the relation of the clause to the rest of the sentence. (See B3-e.) The most common subordinating conjunctions are **after**, **although**, **as**, **as if**, **because**, **before**, **if**, **in order that**, **once**, **since**, **so that**, **than**, **that**, **though**, **unless**, **until**, **when**, **where**, **whether**, and **while**. (For a complete list, see p. 325.)

**CONJUNCTIVE ADVERBS** Conjunctive adverbs connect independent clauses and indicate the relation between the clauses. The most common conjunctive adverbs are **finally**, **furthermore**, **however**, **moreover**, **nevertheless**, **similarly**, **then**, **therefore**, and **thus**. (See P3-a for a complete list.)

**TIP:** The ability to distinguish between conjunctive adverbs and coordinating conjunctions will help you avoid run-on sentences and make punctuation decisions (see G6, P1-a, and P1-b). The ability to recognize subordinating conjunctions will help you avoid sentence fragments (see G5).
B1-h Interjections

An interjection is a word used to express surprise or emotion (Oh! Hey! Wow!).

B2 Parts of sentences

Most English sentences flow from subject to verb to any objects or complements. The part of the sentence containing the verb plus its objects, complements, and modifiers is called the predicate.

B2-a Subjects

The subject of a sentence names who or what the sentence is about. The simple subject is always a noun or a pronoun; the complete subject consists of the simple subject and any words or word groups modifying the simple subject.

The complete subject

To find the complete subject, ask Who? or What?, insert the verb, and finish the question. The answer is the complete subject.

COMPLETE SUBJECT

The devastating effects of famine can last for many years.

Who or what lasts for many years? The devastating effects of famine.

COMPLETE SUBJECT

Adventure novels that contain multiple subplots are often made into successful movies.

Who or what are made into movies? Adventure novels that contain multiple subplots.

COMPLETE SUBJECT

In our program, student teachers work full-time for ten months.

What or who works full-time for ten months? Student teachers. Notice that In our program, student teachers is not a sensible answer to the question. (It is not safe to assume that the subject must always appear first in a sentence.)
**The simple subject**

To find the simple subject, strip away all modifiers in the complete subject. This includes single-word modifiers such as *the* and *devastating*, phrases such as *of famine*, and subordinate clauses such as *that contain multiple subplots*.

\[
\text{The devastating effects of famine can last for many years.}
\]

A sentence may have a compound subject containing two or more simple subjects joined with a coordinating conjunction such as *and*, *but*, or *or*.

\[
\text{Great commitment and a little luck make a successful actor.}
\]

**Understood subjects**

In imperative sentences, which give advice or issue commands, the subject is understood to be *you*.

[You] Put your clothes in the hamper.

**Subject after the verb**

Although the subject ordinarily comes before the verb (*The planes took off*), occasionally it does not. When a sentence begins with *There is* or *There are* (or *There was* or *There were*), the subject follows the verb. In such inverted constructions, the word *There* is an expletive, an empty word serving merely to get the sentence started.

\[
\text{There are eight planes waiting to take off.}
\]

Occasionally a writer will invert a sentence for effect.

\[
\text{Joyful is the child whose school closes for snow.}
\]

In questions, the subject frequently appears between the helping verb and the main verb.

\[
\text{Do Kenyan marathoners train year-round?}
\]

**TIP:** The ability to recognize the subject of a sentence will help you edit for a variety of problems: sentence fragments (G5), subject-verb agreement (G1), choice of pronouns such as *I* and *me* (G3-c), missing subjects (M3-b), and repeated subjects (M3-c).
Verbs, objects, and complements

Section B1-c explains how to find the verb of a sentence. A sentence’s verb is classified as linking, transitive, or intransitive, depending on the kinds of objects or complements the verb can (or cannot) take.

**Linking verbs and subject complements**

Linking verbs connect the subject to a subject complement, a word or word group that completes the meaning of the subject by renaming or describing it.

If the subject complement renames the subject, it is a noun or noun equivalent (sometimes called a *predicate noun*).

\[ \text{S V SC} \]

An e-mail requesting personal information may be a scam.

If the subject complement describes the subject, it is an adjective or adjective equivalent (sometimes called a *predicate adjective*).

\[ \text{S V SC} \]

Last month’s temperatures were mild.

Whenever they appear as main verbs (rather than helping verbs), the forms of *be*—be, am, is, are, was, were, being, been—usually function as linking verbs. In the preceding examples, for instance, the main verbs are *be* and *were*.

Verbs such as *appear, become, feel, grow, look, make, seem, smell, sound*, and *taste* are linking when they are followed by a word group that renames or describes the subject.

\[ \text{S V SC} \]

As it thickens, the sauce will look unappealing.

**Transitive verbs and direct objects**

A transitive verb takes a direct object, a word or word group that names a receiver of the action.

\[ \text{S V DO} \]

The hungry cat clawed the bag of dry food.

The simple direct object is always a noun or pronoun, in this case *bag*. To find it, simply strip away all modifiers.

Transitive verbs usually appear in the active voice, with the subject doing the action and a direct object receiving the action. Active-voice
sentences can be transformed into the passive voice, with the subject receiving the action instead. (See also W3-a.)

**ACTIVE VOICE**  Volunteers distributed food and clothing.

**PASSIVE VOICE**  Food and clothing were distributed by volunteers.

*Transitive verbs, indirect objects, and direct objects*

The direct object of a transitive verb is sometimes preceded by an indirect object, a noun or pronoun telling to whom or for whom the action of the sentence is done.

\[
\text{S} \quad \text{V} \quad \text{IO} \quad \text{DO} \quad \text{S} \quad \text{V} \quad \text{IO} \quad \text{DO} \\
\]

You give her some yarn, and she will knit you a scarf.

*Transitive verbs, direct objects, and object complements*

The direct object of a transitive verb is sometimes followed by an object complement, a word or word group that renames or describes the object.

\[
\text{S} \quad \text{V} \quad \text{DO} \quad \text{OC} \\
\]

People often consider chivalry a thing of the past.

\[
\text{S} \quad \text{V} \quad \text{DO} \quad \text{OC} \\
\]

The kiln makes clay firm and strong.

When the object complement renames the direct object, it is a noun or pronoun (such as *thing*). When it describes the direct object, it is an adjective (such as *firm* and *strong*).

*Intransitive verbs*

Intransitive verbs take no objects or complements.

\[
\text{S} \quad \text{V} \\
\]

The audience laughed.

\[
\text{S} \quad \text{V} \\
\]

The driver accelerated in the straightaway.

Nothing receives the actions of laughing and accelerating in these sentences, so the verbs are intransitive. Notice that such verbs may or may not be followed by adverbial modifiers. In the second sentence, *in the straightaway* is an adverbial prepositional phrase modifying accelerated.
NOTE: The dictionary will tell you whether a verb is transitive or intransitive. Some verbs have both transitive and intransitive functions.

TRANSITIVE  Sandra flew her small plane over the canyon.
INTRANSITIVE  A flock of geese flew overhead.

In the first example, flew has a direct object that receives the action: her small plane. In the second example, the verb is followed by an adverb (overhead), not by a direct object.

Subordinate word groups include phrases and clauses. Phrases are subordinate because they lack a subject and a verb; they are classified as prepositional, verbal, appositive, and absolute (see B3-a to B3-d). Subordinate clauses have a subject and a verb, but they begin with a word (such as although, that, or when) that marks them as subordinate (see B3-e; see also B4-a).

B3-a Prepositional phrases

A prepositional phrase begins with a preposition such as at, by, for, from, in, of, on, to, or with (see B1-f) and usually ends with a noun or noun equivalent: on the table, for him, by sleeping late. The noun or noun equivalent is known as the object of the preposition.

Prepositional phrases function either as adjectives or as adverbs. When functioning as an adjective, a prepositional phrase nearly always appears immediately following the noun or pronoun it modifies.

The hut had walls of mud.

Adjective phrases usually answer one or both of the questions Which one? and What kind of? If we ask Which walls? or What kind of walls? we get a sensible answer: walls of mud.

Adverbial prepositional phrases usually modify the verb, but they can also modify adjectives or other adverbs. When a prepositional phrase modifies the verb, it can appear nearly anywhere in a sentence.

James walked his dog on a leash.
Sabrina will in time adjust to life in Ecuador.

During a mudslide, the terrain can change drastically.

Adverbial word groups usually answer one of these questions: When? Where? How? Why? Under what conditions? To what degree?

James walked his dog how? On a leash.

Sabrina will adjust to life in Ecuador when? In time.

The terrain can change drastically under what conditions? During a mudslide.

B3-b Verbal phrases

A verbal is a verb form that does not function as the verb of a clause. Verbals include infinitives (the word to plus the base form of the verb), present participles (the -ing form of the verb), and past participles (the verb form usually ending in -d, -ed, -n, -en, or -t). (See G2-a.) Instead of functioning as the verb of a clause, a verbal functions as an adjective, a noun, or an adverb.

ADJECTIVE Broken promises cannot be fixed.

NOUN Constant complaining becomes wearisome.

ADVERB Can you wait to celebrate?

Verbals with objects, complements, or modifiers form verbal phrases. Like verbals, verbal phrases function as adjectives, nouns, or adverbs. Verbal phrases are ordinarily classified as participial, gerund, and infinitive.

Participial phrases

Participial phrases always function as adjectives. Their verbals are either present participles (such as dreaming, asking) or past participles (such as stolen, reached).

Participial phrases frequently appear immediately following the noun or pronoun they modify.

Congress shall make no law abridging the freedom of speech or of the press.

PRACTICE hackerhandbooks.com/writersref
> Basic grammar > B3–7 and B3–8
Unlike other word groups that function as adjectives (prepositional phrases, infinitive phrases, adjective clauses), which must always follow the noun or pronoun they modify, participial phrases are often movable. They can precede the word they modify.

Being a weight-bearing joint, the knee is among the most often injured.

They may also appear at some distance from the word they modify.

Last night we saw a play that affected us deeply, written with profound insight into the lives of immigrants.

**Gerund phrases**

Gerund phrases are built around present participles (verb forms that end in -ing), and they always function as nouns: usually as subjects, subject complements, direct objects, or objects of a preposition.

Lizards usually enjoy sunning themselves.

**Infinitive phrases**

Infinitive phrases, usually constructed around to plus the base form of the verb (to call, to drink), can function as nouns, as adjectives, or as adverbs. When functioning as a noun, an infinitive phrase may appear in almost any noun slot in a sentence, usually as a subject, subject complement, or direct object.

To live without health insurance is risky.

Infinitive phrases functioning as adjectives usually appear immediately following the noun or pronoun they modify.

The Twentieth Amendment gave women the right to vote.

Adverbial infinitive phrases usually qualify the meaning of the verb, telling when, where, how, why, under what conditions, or to what degree an action occurred.
Volunteers rolled up their pants to wade through the flood waters.

NOTE: In some constructions, the infinitive is unmarked; in other words, the to does not appear. (See also M1-f.)

Graphs and charts can help researchers to present complex data.

B3-c Appositive phrases

Appositive phrases describe nouns or pronouns. Instead of modifying nouns or pronouns, however, appositive phrases rename them. In form they are nouns or noun equivalents.

Bloggers, conversationalists at heart, are the online equivalent of radio talk show hosts.

B3-d Absolute phrases

An absolute phrase modifies a whole clause or sentence, not just one word. It consists of a noun or noun equivalent usually followed by a participial phrase.

Her words reverberating in the hushed arena, the senator urged the crowd to support her former opponent.

B3-e Subordinate clauses

Subordinate clauses are patterned like sentences, having subjects and verbs and sometimes objects or complements. But they function within sentences as adjectives, adverbs, or nouns. They cannot stand alone as complete sentences.

Adjective clauses

Adjective clauses modify nouns or pronouns, usually answering the question Which one? or What kind of? They begin with a relative pronoun (who, whom, whose, which, or that) or occasionally with a relative adverb (usually when, where, or why). (See p. 325.)

The coach chose players who would benefit from intense drills.
In addition to introducing the clause, the relative pronoun points back to the noun that the clause modifies.

A book that goes unread is a writer’s worst nightmare.

Relative pronouns are sometimes “understood.”

The things [that] we cherish most are the things [that] we might lose.

The parts of an adjective clause are often arranged as in sentences (subject/verb/object or complement).

Sometimes it is our closest friends who disappoint us.

Frequently, however, the object or complement appears first.

They can be the very friends whom we disappoint.

**TIP:** For punctuation of adjective clauses, see P1-e and P2-e. For advice about avoiding repeated words in adjective clauses, see M3-d.

**Adverb clauses**

Adverb clauses modify verbs, adjectives, or other adverbs, usually answering one of these questions: When? Where? Why? How? Under what conditions? To what degree? They always begin with a subordinating conjunction (such as after, although, because, that, though, unless, or when). (For a complete list, see p. 325.)

When the sun went down, the hikers prepared their camp.

Kate would have made the team if she hadn’t broken her ankle.

**Noun clauses**

A noun clause functions just like a single-word noun, usually as a subject, a subject complement, a direct object, or an object of a preposition. It usually begins with one of the following words: how, if, that, what, whatever, when, where, whether, which, who, whoever, whom, whomever, whose, why. (For a complete list, see p. 325.)
Words that introduce subordinate clauses

**Words introducing adverb clauses**

*Subordinating conjunctions:* after, although, as, as if, because, before, even though, if, in order that, since, so that, than, that, though, unless, until, when, where, whether, while

**Words introducing adjective clauses**

*Relative pronouns:* that, which, who, whom, whose

*Relative adverbs:* when, where, why

**Words introducing noun clauses**

*Relative pronouns:* that, which, who, whom, whose

*Other pronouns:* what, whatever, whichever, whoever, whomever

*Other subordinating words:* how, if, when, whenever, where, wherever, whether, why

Whoever leaves the house last must double-lock the door.

Copernicus argued that the sun is the center of the universe.

The subordinating word introducing the clause may not play a significant role in the clause. In the preceding example sentences, *Whoever* is the subject of its clause, but *that* does not perform a function in its clause.

As with adjective clauses, the parts of a noun clause may appear in normal order (subject/verb/object or complement) or out of normal order.

Loyalty is what keeps a friendship strong.

New Mexico is where we live.

---

**Sentence types**

Sentences are classified in two ways: according to their structure (simple, compound, complex, and compound-complex) and according to their purpose (declarative, imperative, interrogative, and exclamatory).
B4-a  Sentence structures

Depending on the number and types of clauses they contain, sentences are classified as simple, compound, complex, or compound-complex.

Clauses come in two varieties: independent and subordinate. An independent clause contains a subject and a predicate, and it either stands alone or could stand alone as a sentence. A subordinate clause also contains a subject and a predicate, but it functions within a sentence as an adjective, an adverb, or a noun; it cannot stand alone. (See B3-e.)

Simple sentences

A simple sentence is one independent clause with no subordinate clauses.

INDEPENDENT CLAUSE
Without a passport, Eva could not visit her parents in Lima.

A simple sentence may contain compound elements—a compound subject, verb, or object, for example—but it does not contain more than one full sentence pattern. The following sentence is simple because its two verbs (comes in and goes out) share a subject (Spring).

INDEPENDENT CLAUSE
Spring comes in like a lion and goes out like a lamb.

Compound sentences

A compound sentence is composed of two or more independent clauses with no subordinate clauses. The independent clauses are usually joined with a comma and a coordinating conjunction (and, but, or, nor, for, so, yet) or with a semicolon. (See P1-a and P3-a.)

INDEPENDENT CLAUSE
The car broke down, but a rescue van arrived within minutes.

INDEPENDENT CLAUSE
A shark was spotted near shore; people left immediately.
**Complex sentences**

A complex sentence is composed of one independent clause with one or more subordinate clauses. (See B3-e.)

```
If you leave late, take a cab home.

What matters most to us is a quick commute.
```

**Compound-complex sentences**

A compound-complex sentence contains at least two independent clauses and at least one subordinate clause. The following sentence contains two independent clauses, each of which contains a subordinate clause.

```
Tell the doctor how you feel, and she will decide whether you

  can go home.
```

**B4-b Sentence purposes**

Writers use declarative sentences to make statements, imperative sentences to issue requests or commands, interrogative sentences to ask questions, and exclamatory sentences to make exclamations.

College research assignments ask you to pose a question worth exploring, to read widely in search of possible answers, to interpret what you read, to draw reasoned conclusions, and to support those conclusions with valid and well-documented evidence. The process takes time—for researching and for drafting, revising, and documenting the paper in the style recommended by your instructor (see the tabbed dividers marked MLA and APA/CMS). Before beginning a research project, set a realistic schedule of deadlines.

One student created a calendar to map out her tasks for a paper assigned on October 3 and due October 31, keeping in mind that some tasks might overlap or need to be repeated.

**RESEARCH TIP:** Think of research as a process. As your topic evolves, you may find new questions arising that require you to create a new

Conducting research

Throughout this tabbed section, you will encounter examples related to three sample research papers:

- A paper on Internet surveillance in the workplace, written by a student in an English composition class (see pp. 436–40). The student, Anna Orlov, uses the MLA (Modern Language Association) style of documentation. (See highlights of Orlov’s research process on pp. 432–35.)

- A paper on the limitations of medications to treat childhood obesity, written by a student in a psychology class (see pp. 488–96). The student, Luisa Mirano, uses the APA (American Psychological Association) style of documentation.

- A paper on the extent to which Civil War general Nathan Bedford Forrest can be held responsible for the Fort Pillow massacre, written by a student in a history class (see pp. 532–37). The student, Ned Bishop, uses the CMS (Chicago Manual of Style) documentation system.

R1-a Pose questions worth exploring.

Working within the guidelines of your assignment, pose a few questions that seem worth researching—questions that you want to explore, that you feel would interest your audience, and about which there is a substantial debate. Here, for example, are some preliminary questions jotted down by students enrolled in a variety of courses in different disciplines.

- Should the FCC broaden its definition of indecency to include violence?
- Which geological formations are the safest repositories for nuclear waste?
- What was Marcus Garvey’s contribution to the fight for racial equality?
- How can governments and zoos help preserve Asia’s endangered snow leopard?
• Why was amateur archaeologist Heinrich Schliemann such a controversial figure in his own time?

Approaching your topic with a series of worthwhile questions can help you focus your research and guide you toward developing an answer. As you think about possible questions, make sure that they are appropriate lines of inquiry for a research paper. Choose questions that are narrow (not too broad), challenging (not too bland), and grounded (not too speculative).

**Choosing a narrow question**

If your initial question is too broad, given the length of the paper you plan to write, look for ways to restrict your focus. Here, for example, is how two students narrowed their initial questions.

<table>
<thead>
<tr>
<th>TOO BROAD</th>
<th>NARROWER</th>
</tr>
</thead>
<tbody>
<tr>
<td>What are the hazards of fad diets?</td>
<td>Why are low-carbohydrate diets hazardous?</td>
</tr>
<tr>
<td>What are the benefits of stricter auto emissions standards?</td>
<td>How will stricter auto emissions standards create new, more competitive auto industry jobs?</td>
</tr>
</tbody>
</table>

**Choosing a challenging question**

Your research paper will be more interesting to both you and your audience if you base it on an intellectually challenging line of inquiry. Draft questions that provoke thought or engage readers in a debate.

<table>
<thead>
<tr>
<th>TOO BLAND</th>
<th>CHALLENGING</th>
</tr>
</thead>
<tbody>
<tr>
<td>What is obsessive-compulsive disorder?</td>
<td>Why is obsessive-compulsive disorder so difficult to treat?</td>
</tr>
<tr>
<td>How does DNA testing work?</td>
<td>How reliable is DNA testing?</td>
</tr>
</tbody>
</table>

You may need to address a bland question in the course of answering a more challenging one. For example, if you were writing about promising treatments for obsessive-compulsive disorder, you would no doubt answer the question “What is obsessive-compulsive disorder?” at some point in your paper. It would be a mistake, however, to use the bland question as the focus for the whole paper.

**Choosing a grounded question**

Finally, you will want to make sure that your research question is grounded, not too speculative. Although speculative questions—such as those that address morality or beliefs—are worth asking and may
Conducting research

receive some attention in a research paper, they are inappropriate central questions. For most college courses, the central argument of a research paper should be grounded in facts.

T.OO SPECULATIVE
Is it wrong to share pornographic personal photos by cell phone?

Do medical scientists have the right to experiment on animals?

GROUNDED
What role should the US government play in regulating mobile content?

How have technology breakthroughs made medical experiments on animals increasingly unnecessary?

**R1-b Map out a search strategy.**

A search strategy is a systematic plan for tracking down sources. To create a search strategy appropriate for your research question, consult a reference librarian and take a look at your library’s Web site, which will give you an overview of available resources.

**Including the library in your plan**

Reference librarians are information specialists who can save you time by steering you toward relevant and reliable sources. With the help of an expert, you can make the best use of electronic databases, Web search engines, your library’s catalog, and other reference tools.

Before you ask a reference librarian for help, be sure you have thought through the following questions:

- What is your assignment?
- In which academic discipline are you writing?
- What is your tentative research question?
- How long will the paper be?
- How much time can you spend on the project?

It’s a good idea to bring a copy of the assignment with you.

In addition to speaking with a reference librarian, take some time to explore your library’s Web site. You will typically find links to the library’s catalog and to a variety of databases and electronic sources. You may also find resources listed by subject, research guides, information about interlibrary loans, and links to Web sites selected by librarians for their quality. Many libraries also offer online reference assistance to help you locate information and refine your search strategy.
NOTE FOR ONLINE STUDENTS: Even if you are unable to visit the library, as an enrolled student you can still use its resources. Most libraries offer chat reference services and remote access to online databases, though you may have to follow special procedures to use them. Check your library’s Web site for information for distance learners.

Starting with your library’s databases

You may be tempted to go straight to the Internet and ignore your library’s resources, but using them early and often in the research process can save you time in the end. Libraries make a wide range of quality materials readily available, and they weed out questionable sources.

While a general Internet search might seem quick and convenient, it is often more time-consuming and can be less reliable than a search in a library’s databases. Initial Internet searches may generate thousands of results. Figuring out which of these are credible, relevant, and worth further investigation can require many additional steps:

- Refining search terms (See the chart on refining keyword searches on p. 338.)
- Narrowing the domain name to include only .org, .gov, or .edu sites
- Weeding out any advertisements associated with results
- Scanning titles and sometimes content for relevant results
- Combing through sites to determine their currency and relevance as well as the credibility of their authors

Starting with your library’s collection of databases can save time and effort. Because you can limit library database searches to only academic databases, you can count on finding reliable sources. Not all of the results will be worth examining in detail, but many library searches automatically sort them into subject categories that allow you to view narrowed results with just one click.

Choosing an appropriate search strategy

No single search strategy works for every topic. For some topics, it may be appropriate to search for information in newspapers, magazines, and Web sites. For others, the best sources might be found in scholarly journals and books and specialized reference works. Still other topics might be enhanced by field research—interviews, surveys, or direct observation.

With the help of a reference librarian, each of the students mentioned on page 332 constructed a search strategy appropriate for his or her research question.
ANA ORLOV  Anna Orlov’s topic, Internet surveillance in the workplace, was current and influenced by technological changes, so she relied heavily on recent sources, especially those online. To find information on her topic, Orlov decided to

- search her library’s general database for articles in magazines, newspapers, and journals
- check the library’s catalog for recently published books
- use Web search engines, such as Google, to locate articles and government publications that might not show up in a database search

LUISA MIRANO  Luisa Mirano’s topic, the limitations of medications for childhood obesity, is the subject of psychological studies as well as articles in newspapers and magazines aimed at the general public. Thinking that both scholarly and popular works would be appropriate, Mirano decided to

- locate books through the library’s online catalog
- check a specialized encyclopedia, Encyclopedia of Psychology
- search a specialized database, PsycINFO, for scholarly articles
- search her library’s general database for popular articles

NED BISHOP  Ned Bishop’s topic, Nathan Bedford Forrest’s role in the Fort Pillow massacre, has been investigated and debated by professional historians. Given the nature of his historical topic, Ned Bishop decided to

- locate books through the library’s online catalog
- locate scholarly articles by searching a specialized database, America: History and Life
- locate newspaper articles from 1864 by searching the historical archive at the New York Times Web site
- search the Web for other historical primary sources (See p. 353.)

R1-c To locate articles, search a database or consult a print index.

Libraries subscribe to a variety of electronic databases (sometimes called periodical or article databases) that give students access to articles and other materials without charge. Because many databases are limited to relatively recent works, you may need to consult a print index as well.
What databases offer

Your library has access to databases that can lead you to articles in periodicals such as newspapers, magazines, and scholarly or technical journals. General databases cover several subject areas; subject-specific databases cover one subject area in depth.

Many databases, especially general databases, include the full text of at least some articles; others list only citations or citations with short summaries called abstracts (see also p. 352). When the full text is not available, a citation usually will give you enough information to track down an article. Your library’s Web site will help you determine which articles are available in your library, either in print or in electronic form.

Your library might subscribe to some of the following databases.

GENERAL DATABASES
The information in general databases is not restricted to a specific discipline or subject area. You may find searching a general database helpful in the early stages of your research process.

Academic Search Premier. An interdisciplinary database that indexes thousands of popular and scholarly journals on all subjects.

Expanded Academic ASAP. An interdisciplinary database that indexes the contents of magazines, newspapers, and scholarly journals in all subject areas.

JSTOR. A full-text archive of scholarly journals from many disciplines; unlike most databases, it includes articles published decades ago but does not include articles from the most recent issues of publications.

LexisNexis. A database that is particularly strong in coverage of news, business, legal, and political topics.

ProQuest. A database of periodical articles. Through ProQuest, your library may subscribe to databases in subjects such as nursing, biology, and psychology.

SUBJECT-SPECIFIC DATABASES
Libraries have access to dozens of specialized databases, each of which covers a specific area of research. To find out what’s available, consult your library’s Web site or ask your reference librarian. The following are examples of subject-specific databases.

ERIC. A database offering education-related documents and abstracts of articles published in education journals.
Refining keyword searches in databases and search engines

Although command terms and characters vary in electronic databases and Web search engines, some common functions are listed here.

- Use quotation marks around words that are part of a phrase: “gateway drug”.
- Use AND to connect words that must appear in a document: hyperactivity AND children. In some search engines—Google, for example—AND is assumed, so typing it is unnecessary. Other search engines require a plus sign instead: hyperactivity + children.
- Use OR if only one of the terms must appear in a document: “mountain lion” OR cougar.
- Use an asterisk as a substitute for letters that might vary: “marine biolog*” (to find marine biology or marine biologist, for example).
- Use parentheses to group a search expression and combine it with another: (standard OR student OR test*) AND reform.

NOTE: Many search engines and databases offer an advanced search option for refining your search with filters for exact phrases that must appear, specific words that should not appear, date restrictions, and so on.

*MLA Bibliography.* A database of literary criticism, with citations to help researchers find articles, books, and dissertations.

*PsycINFO.* A comprehensive database of psychology research, including abstracts of articles in journals and books.

*Public Affairs Information Service (PAIS).* A database that indexes books, journals, government documents, statistical directories, and research reports in the social sciences.

*PubMed.* A database offering millions of abstracts of medical research studies.

*How to search a database*

To find articles on your topic in a database, start by searching with keywords, terms that describe the information you need. If the first keyword you try results in too few or no matches, experiment with synonyms or ask a librarian for suggestions. For example, if you’re searching for sources on a topic related to education, you might also want to
try the terms teaching, learning, and curriculum. If your keyword search results in too many matches, narrow it by using one of the strategies in the chart on page 338.

For her paper on Internet surveillance in the workplace, Anna Orlov conducted a keyword search in a general database. She typed in “internet use” and employee and surveillance (see the database screen on this page). This search brought up twenty possible articles, some of which looked promising. (See p. 433 for Orlov’s annotated list of search results.) Orlov e-mailed several full-text articles to herself and printed citations to other sources so that she could locate them in the library.

When to use a print index

A print index to periodical articles is a useful tool when you are researching a historical topic, especially from the early to mid-twentieth century. The Readers’ Guide to Periodical Literature and Poole’s Index to Periodical Literature index magazine articles beginning around

DATABASE SCREEN: KEYWORD SEARCH
1900, many of which are too old to appear in electronic databases. You can usually access the print articles themselves in your library’s shelves or on microfilm.

To locate books, consult the library’s catalog.

The books your library owns are listed along with other resources in its catalog. You can search the catalog by author, title, or subject.

If your first search calls up too few results, try different keywords or search for books on broader topics. If your search gives you too many results, use the strategies in the chart on page 338 or try an advanced search tool to combine concepts and limit your results. If those strategies don’t work, ask a librarian for suggestions.

When Luisa Mirano, whose topic was childhood obesity, entered the term obesity into the library’s catalog, she was faced with an unmanageable number of hits. She narrowed her search by adding two more specific terms to obesity: child* (to include the terms child, children, and childhood) and treatment. When she still got too many results, she limited the first two terms to subject searches to find books that had obesity in children as their primary subject (see screen 1). Screen 2 shows the complete record for one of the books she found. The call number, listed beside Availability, is the book’s address on the shelf. When you’re retrieving a book from the shelf, take time to scan other books in the area since they are likely to be on the same topic.

RESEARCH TIP: The catalog record for a book lists related subject headings. These headings are a good way to locate other books on your
subject. For example, the record in screen 2 lists the terms *obesity in children* and *obesity in adolescence* as related subject headings. By clicking on these new terms, Mirano found more books on her subject. Subject headings can be useful terms for a database search as well.

**R1-e** To locate other sources, use a variety of online tools.

You can find a variety of reliable sources using online tools beyond those offered by your library. For example, most government agencies post information on their Web sites, and federal and state governments use Web sites to communicate with citizens. The sites of many private organizations, such as Doctors without Borders and the Sierra Club, contain useful information about current issues. Museums and libraries often post digital versions of primary sources, such as photographs, political speeches, and classic literary texts.

Although the Internet at large can be a rich source of information, some of which can’t be found anywhere else, it lacks quality control. The material on many sites has not necessarily been reviewed by
experts. So when you’re not working with your library’s tools to locate online sources, carefully evaluate what you find (see R2).

This section describes the following Web resources: search engines, directories, digital archives, government and news sites, blogs, and wikis.

**Search engines**

When using a search engine, such as Google or Yahoo!, focus your search as narrowly as possible. You can refine your search by using many of the tips in the chart on page 338 or by using the search engine’s advanced search form. For her paper on Internet surveillance in the workplace, Anna Orlov had difficulty restricting the number of hits. When she typed the words *Internet, surveillance, workplace, and privacy* into a search engine, she received more than 80,000 matches. After examining the first page of her results and viewing some that looked promising, Orlov grouped her search terms into the phrases “Internet surveillance” and “workplace privacy” and added the term employee to narrow the focus. The result was 422 matches. To refine her search further, Orlov clicked on Advanced Search and restricted her search to sites with URLs ending in .org and to those updated in the last three months. (See the results screen on p. 343.)

**Directories**

If you want to find good resources on topics too broad for a search engine, try a directory. Unlike search engines, directories are put together by information specialists who choose reputable sites and arrange them by topic: education, health, politics, and so on.

Try the following directories for scholarly research.

- **Internet Scout Project:** http://scout.wisc.edu/Archives
- **Librarian’s Internet Index:** http://www.lii.org
- **Open Directory Project:** http://www.dmoz.org
- **WWW Virtual Library:** http://www.vlib.org

**Digital archives**

Archives are a good place to find primary sources: the texts of poems, books, speeches, and historically significant documents; photographs; and political cartoons. (See p. 353.)

The materials in these sites are usually limited to official documents and older works because of copyright laws.
American Memory: http://memory.loc.gov
Avalon Project: http://www.yale.edu/lawweb/avalon/avalon.htm
Eurodocs: http://library.byu.edu/~rdh/eurodocs
Google Books: http://books.google.com
Google Scholar: http://scholar.google.com
The Making of America: http://quod.lib.umich.edu/m/moagrp
Online Books Page: http://digital.library.upenn.edu/books

Government and news sites

For current topics, both government and news sites can prove useful. Many government agencies at every level provide online information. Government-maintained sites include resources such as legal texts,
facts and statistics, government reports, and searchable reference databases. Here are just a few government sites:

Fedstats: http://www.fedstats.gov
University of Michigan Documents Center: http://www.lib.umich.edu/m/moagrp
US Census Bureau: http://www.census.gov

Many news organizations offer up-to-date information on the Web. Some require registration and may charge fees for some articles. (Find out if your library subscribes to news sites so that you can access them at no charge.) The following news sites offer many free resources.

BBC: http://www.bbc.co.uk
Google News: http://news.google.com
Kidon Media-Link: http://www.kidon.com/media-link
Reuters: http://www.reuters.com

Blogs
A blog (short for Weblog) is a site that contains text or multimedia entries usually written and maintained by one person, with comments contributed by readers. Though some blogs are personal diaries and others are devoted to partisan politics, many journalists and academics maintain blogs that cover topics of interest to researchers. Some blogs feature short essays that provide useful insights or analysis; others point to new developments in a particular area of interest. The following Web sites can lead you to a wide range of blogs.

Academic Blog Portal: http://academicblogs.org
Google Blog Search: http://www.google.com/blogsearch
Science Blogs: http://scienceblogs.com
Technorati: http://technorati.com

Wikis
A wiki is a collaborative Web site with many contributions and with content that may change frequently. Wikipedia, the collaborative online encyclopedia, is one of the most frequently consulted wikis.
In general, *Wikipedia* may be helpful if you’re checking for something that is common knowledge (facts available in multiple sources, such as dates and well-known historical events) or looking for current information about a topic in contemporary culture that isn’t covered elsewhere. However, many scholars do not consider *Wikipedia* and wikis in general to be appropriate sources for college research. Authorship is not limited to experts; articles may be written by amateurs who are not well informed. And because the articles can be changed by anyone, controversial texts are often altered to reflect a particular perspective and are susceptible to bias. When possible, locate and cite another, more reliable source for any useful information you find in a wiki.

**R1-f Use other search tools.**

In addition to articles, books, and online sources, you may want to consult references such as encyclopedias and almanacs. Citations in scholarly works can also lead you to additional sources.

**Reference works**

The reference section of the library holds both general and specialized encyclopedias, dictionaries, almanacs, atlases, and biographical references, some available in electronic form through the library’s Web site. Such works often provide a good overview of your subject and include references to the most significant works on a topic. Check with a reference librarian to see which works are most appropriate for your project.

**GENERAL REFERENCE WORKS**  General reference works are good places to check facts and get basic information. Here are a few frequently used general references:

- *American National Biography*
- *National Geographic Atlas of the World*
- *The New Encyclopaedia Britannica*
- *The Oxford English Dictionary*
- *Statistical Abstract of the United States*

Although general encyclopedias are often a good place to find background for your topic, you should rarely use them in your final paper. Most instructors expect you to rely on more specialized sources.

**SPECIALIZED REFERENCE WORKS**  Specialized reference works often explore a topic in depth, usually in the form of articles written by leading
Conducting research

authorities. They offer a quick way to gain an expert’s overview of a complex topic. Many specialized works are available, including these:

- Contemporary Authors
- Encyclopedia of Bioethics
- Encyclopedia of Crime and Justice
- Encyclopedia of Psychology
- Encyclopedia of World Environmental History
- International Encyclopedia of Communication
- New Encyclopedia of Africa

Bibliographies and scholarly citations as shortcuts

Scholarly books and articles list the works the author has cited, usually at the end. These lists can be useful shortcuts to additional reliable sources on your topic. For example, most of the scholarly articles Luisa Mirano consulted contained citations to related research studies; through these citations, she quickly located other sources related to her topic, treatments for childhood obesity.

**R1-g** Conduct field research, if appropriate.

Your own field research can enhance or be the focus of a writing project. For a composition class, for example, you might want to interview a local politician about a current issue, such as the use of alternative energy sources. For a sociology class, you might decide to conduct a survey regarding campus trends in community service. At work, you might need to learn how food industry executives have responded to reports that their products are contributing to health problems.

**NOTE:** Colleges and universities often require researchers to submit projects to an institutional review board (IRB) if the research involves human subjects outside of a classroom setting. Before administering a survey or conducting other fieldwork, check with your instructor to see if IRB approval is required.

**R2** Evaluating sources

You can often locate dozens or even hundreds of potential sources for your topic—far more than you will have time to read. Your challenge will be to determine what kinds of sources you need and to zero in on a
reasonable number of quality sources, those truly worthy of your time and attention.

Later, once you have decided on some sources worth consulting, your challenge will be to read them with an open mind and a critical eye.

R2-a Think about how sources might contribute to your writing.

How you plan to use sources will affect how you evaluate them. Not every source must directly support your thesis; sources can have other functions in a paper. They can

- provide background information or context for your topic
- explain terms or concepts that your readers might not understand
- provide evidence for your argument
- lend authority to your argument
- offer alternative interpretations and counterevidence to your argument

For examples of how student writers use sources for a variety of purposes, see MLA-1c, APA-1c, and CMS-1c.

R2-b Select sources worth your time and attention.

Sections R1-c through R1-e show how to refine your searches in databases, in the library’s catalog, and in search engines. This section explains how to scan through the results for the most promising sources and how to preview them to see whether they are likely to live up to your expectations and meet your needs.

Scanning search results

As you scan through a list of search results, watch for clues indicating whether a source might be useful for your purposes or is not worth pursuing. (For an annotated list of one student’s search results, see p. 433.) You will need to use somewhat different strategies when scanning search results from a database, a library catalog, and a Web search engine.

Making the most of your handbook

Annotating bibliography entries can help you evaluate sources.

- Maintain a working bibliography: R3-a
- Summarize sources: A1-c
- Analyze sources: A1-d
- Consider how sources inform your argument: MLA-1c, APA-1c, CMS-1c
DATABASES  
Most databases (see p. 337) list at least the following information, which can help you decide if a source is relevant, current, scholarly enough (see the chart on p. 352), and a suitable length for your purposes.

Title and brief description (How relevant?)
Date (How current?)
Name of periodical (How scholarly?)
Length (How extensive in coverage?)

At the bottom of this page are just a few of the hits Ned Bishop came up with when he consulted a general database for articles on the Fort Pillow massacre, using the search term *Fort Pillow*.

Many databases allow you to sort your list of results by relevance or date; sorting may help you scan the information more efficiently. By scanning the titles in his search results, Bishop saw that only one contained the words *Fort Pillow*. The name of the periodical in which it appeared, *Journal of American History*, suggested that the source was scholarly. The 1989 publication date was not a problem, since currency is not necessarily a criterion for historical sources. The article's length (eight pages) is given in parentheses at the end of the citation. While the article may seem short, the topic—a statistical note—is narrow enough to ensure adequate depth of coverage. Bishop decided that the article was worth consulting. Because the other sources were irrelevant or too broad, he decided not to consult them.

LIBRARY CATALOGS  
A library's catalog usually lists enough basic information about books, periodicals, DVDs, and other material to give you a first impression. A book's title and date of publication, for example, will often be your first clues as to whether the book is worth consulting. If a title looks interesting, you can click on it for further information about
the book’s subject matter and its length. The table of contents may also be available, offering a glimpse of what’s inside. (See also p. 341.)

WEB SEARCH ENGINES Because anyone can publish a Web site, legitimate sources and unreliable sources live side-by-side online. As you scan through search results, look for the following clues about the probable relevance, currency, and reliability of a site—but be aware that the clues are by no means foolproof.

The title, keywords, and lead-in text (How relevant?)
A date (How current?)
An indication of the site’s sponsor or purpose (How reliable?)
The URL, especially the domain name extension: for example, .com, .edu, .gov, or .org (How relevant? How reliable?)

At the top of this page are a few of the results that Luisa Mirano retrieved after typing the keywords childhood obesity into a search engine; she limited her search to works with those words in the title.

Mirano found the first site, sponsored by a research-based organization, promising enough to explore for her paper. The second and fourth sites held less promise because they seemed to offer popular rather than scholarly information. In addition, the second site was full of distracting commercial advertisements. Mirano rejected the third source not because she doubted its reliability—in fact, research from the National Institutes of Health was what she hoped to find—but because a skim of its contents revealed that the information was too general for her purposes.
This study examined cyberbullying in three distinct phases to facilitate a multifaceted understanding of cyberbullying. The phases included (a) a quantitative survey, (b) a qualitative focus group, and (c) development of educational scenarios/simulations (within the Second Life virtual environment). Phase III was based on adolescent feedback from Phases I and II of this study. In all three phases, adolescent reactions to cyberbullying were examined and reported to raise awareness and to enhance teaching and learning. She has helped initiate and develop projects such as the Master Technology Teacher and Technology on Wheels. Dr. Wright’s scholarship includes publications and presentations in the research areas of K-12 technology integration, emerging technologies, and asynchronous education.
COMMON FEATURES OF A POPULAR SOURCE

1. Often has a provocative title.
2. Author is typically a staff reporter, not an expert.
3. The bulk of the article presents anecdotes about the topic.
4. Presents a summary of research but no original research.
5. No consistent citation of sources.

---

The cyber-bullies are always with you...

The anonymity of the internet makes it easy to ruin the lives of their teenage victims

PHIL MCKENNA

RTAN HALLIGAN was taunted for months. Classmates spread rumours via instant messaging that the 13-year-old boy was gay. A popular female classmate pretended to like him and chatted with him online only to copy their personal exchanges and share them with her friends. Unable to cope, Halligan, of Essex Junction, Vermont, killed himself.

A study last month by the Pew Internet & American Life Project based in Washington DC found that one-third of US teenage internet users have been targets.

"The lack of face-to-face contact might tempt bullies to new levels of cruelty"

Meanwhile, some governments have taken legislative action. In January 2006, the US Congress passed a law making it a federal crime to "annoy, abuse, threaten or harass" another person over the internet. Approximately 36 states have enacted similar legislation. And in South Korea, the "Internet real
Evaluating sources

Selecting appropriate versions of electronic sources

An online source may appear as an abstract, an excerpt, or a full-text article or book. It is important to distinguish among these versions of sources and to use a complete version of a source for your research.

Abstracts and excerpts are shortened versions of complete works. An abstract—a summary of a work’s contents—might appear in a database record for a periodical article. An excerpt is the first few sentences or paragraphs of a newspaper or magazine article; it sometimes appears in a list of hits in an online search. Abstracts and excerpts often provide enough information for you to determine whether the complete article would be useful for your paper. Both are brief (usually fewer than five hundred words) and generally do not contain enough information to function alone as sources in a research paper. Reading the complete article is the best way to understand the author’s argument before referring to it in your own writing. A full-text work may appear online as a PDF (portable document format) file or as an HTML file (sometimes called a text file). If your source is available in both formats, choose the PDF file for your research because it will include page numbers for your citations.

Determining if a source is scholarly

For many college assignments, you will be asked to use scholarly sources. These are written by experts for a knowledgeable audience and usually go into more depth than books and articles written for a general audience. (Scholarly sources are sometimes called refereed or peer-reviewed because the work is evaluated by experts in the field before publication.) To determine if a source is scholarly, look for the following:

- Formal language and presentation
- Authors with academic or scientific credentials
- Footnotes or a bibliography documenting the works cited by the author in the source
- Original research and interpretation (rather than a summary of other people’s work)
- Quotations from and analysis of primary sources (in humanities disciplines such as literature, history, and philosophy)
- A description of research methods or a review of related research (in the sciences and social sciences)

See pages 350–51 for a sample scholarly source and popular source.

NOTE: In some databases, searches can be limited to refereed or peer-reviewed journals.
R2-c Read with an open mind and a critical eye.

As you begin reading the sources you have chosen, keep an open mind. Do not let your personal beliefs prevent you from listening to new ideas and opposing viewpoints. Your research question—not a snap judgment about the question—should guide your reading.

When you read critically, you are not necessarily judging an author’s work harshly; you are simply examining its assumptions, assessing its evidence, and weighing its conclusions. (For one student’s careful reading of a source text, see p. 434.)

Academic English When you research on the Web, it is easy to ignore views different from your own. Web pages that appeal to you will often link to other pages that support the same viewpoint. If your sources all seem to agree with you—and with one another—seek out opposing views and evaluate them with an open mind.

Distinguishing between primary and secondary sources

As you begin assessing evidence in a source, determine whether you are reading a primary or a secondary source. Primary sources are original documents such as letters, diaries, photographs, legislative bills, laboratory studies, field research reports, and eyewitness accounts. Secondary sources are commentaries on primary sources—another writer’s opinions about or interpretation of a primary source. A primary source for Ned Bishop was Nathan Bedford Forrest’s official report on the battle at Fort Pillow. Bishop also consulted a number of secondary sources, some of which relied heavily on primary sources such as letters.

Although a primary source is not necessarily more reliable than a secondary source, it has the advantage of being a firsthand account. Naturally, you can better evaluate what a secondary source says if you have first read any primary sources it discusses.

Being alert for signs of bias

Some sources are more objective than others. Even publications that are considered reputable can be editorially biased. For example, USA Today, National Review, and the Economist are all credible sources, but they are also likely to interpret events quite differently from one another. If you are uncertain about a periodical’s special interests, consult Magazines for Libraries. To check for bias in a book, see what book reviewers have written about it. A reference librarian can help you locate reviews and assess the credibility of both the book and the reviewers.
**Evaluating all sources**

**Checking for signs of bias**

- Does the author or publisher endorse political or religious views that could affect objectivity?
- Is the author or publisher associated with a special-interest group, such as Greenpeace or the National Rifle Association, that might present only one side of an issue?
- Are alternative views presented and addressed? How fairly does the author treat opposing views? (See A3-c.)
- Does the author’s language show signs of bias?

**Assessing an argument**

- What is the author’s central claim or thesis?
- How does the author support this claim—with relevant and sufficient evidence or with just a few anecdotes or emotional examples?
- Are statistics consistent with those you encounter in other sources? Have they been used fairly? (It is possible to “lie” with statistics by using them selectively or by omitting details.) Does the author explain where the statistics come from?
- Are any of the author’s assumptions questionable?
- Does the author consider opposing arguments and refute them persuasively? (See A3-c.)
- Does the author fall prey to any logical fallacies? (See A3-a.)

Like publishers, some authors are more objective than others. If you have reason to believe that a writer is particularly biased, you will want to assess his or her arguments with special care. For questions to ask about a source’s possible bias, see the chart on this page.

**Assessing the author’s argument**

In nearly all academic writing, there is some element of argument, so don’t be surprised to encounter experts who disagree. When you find areas of disagreement, you will want to read each source’s arguments with special care, testing them with your own critical intelligence. The questions in the chart on this page can help you weigh the strengths and weaknesses of each author’s argument.
Evaluating Web sources

Authorship

- Does the Web site or document have an author? You may need to do some clicking and scrolling to find the author’s name. If you have landed directly on an internal page of a site, for example, you may need to navigate to the home page or find an “about this site” link to learn the name of the author.
- If there is an author, can you tell whether he or she is knowledgeable and credible? When the author’s qualifications aren’t listed on the site itself, look for links to the author’s home page, which may provide evidence of his or her interests and expertise.

Sponsorship

- Who, if anyone, sponsors the site? The sponsor of a site is often named and described on the home page and is sometimes listed alongside the copyright date: © 2009 Plymouth State College.
- What does the URL tell you? The domain name extension often indicates the type of group hosting the site: commercial (.com), educational (.edu), nonprofit (.org), governmental (.gov), military (.mil), or network (.net). URLs may also indicate a country of origin: .uk (United Kingdom) or .jp (Japan), for instance.

Purpose and audience

- Why was the site created: To argue a position? To sell a product? To inform readers?
- Who is the site’s intended audience?

Currency

- How current is the site? Check for the date of publication or the latest update, often located at the bottom of the home page or at the beginning or end of an internal page.
- How current are the site’s links? If many of the links no longer work, the site may be too dated for your purposes.

R2-d Assess Web sources with special care.

Web sources can provide valuable information, but verifying their credibility may take time. Before using a Web source in your paper, make sure you know who created the material and for what purpose. Many sophisticated-looking sites contain questionable information. Even a well-designed hate site may at first appear unbiased and
Evaluating sources

In researching Internet surveillance and workplace privacy, Anna Orlov encountered sites that raised her suspicions. In particular, some sites were authored by surveillance software companies, which have an obvious interest in emphasizing the benefits of such software to company management. When you know something about the creator of a site and have a sense of the site’s purpose, you can quickly determine whether a source is reliable, credible, and worth a closer look. Consider, for example, the two sites pictured on this page and on page 357. Anna Orlov decided that the first Web site would be more useful for her project than sites like the second.

informative. Sites with reliable information, however, can stand up to careful scrutiny. For a checklist on evaluating Web sources, see the chart on page 355.

EVALUATING A WEB SITE: CHECKING RELIABILITY

1 This article on Internet monitoring is on a site sponsored by the Massachusetts Nurses Association, a professional health care association and union whose staff and members advocate for nurses in the workplace. The URL ending .org marks this sponsor as a nonprofit organization.

2 Clear dates of publication show currency.

3 The author is a credible expert whose credentials can be verified.
Evaluating a Web site: checking purpose

1. The site is sponsored by a company that specializes in employee monitoring software.

2. Repeated links for trial downloads and purchase suggest the site’s intended audience: consumers seeking to purchase software (probably not researchers seeking detailed information about employees’ use of the Internet in the workplace).

3. The site appears to provide information and even shows statistics from studies, but ultimately the purpose of the site is to sell a product.

Managing information; avoiding plagiarism

An effective researcher is a good record keeper. Whether you decide to keep records on paper or on your computer—or both—your challenge as a researcher will be to find systematic ways of managing information. More specifically, you will need methods for maintaining a working bibliography, keeping track of source materials, and taking notes without plagiarizing your sources. (For more on avoiding plagiarism, see MLA-2 for MLA style, APA-2 for APA style, and CMS-2 for CMS style.)
Maintain a working bibliography.

Keep a record of any sources you decide to consult. You will need this record, called a *working bibliography*, when you compile the list of sources that will appear at the end of your paper. The format of this list depends on the documentation style you are using. (For MLA style, see MLA-4b; for APA style, see APA-4b; for CMS style, see CMS-4c.) Using the proper style in your working bibliography will ensure that you have all the information you need to correctly cite any sources you use. Your working bibliography will probably contain more sources than you will actually include in your list of works cited in your final paper.

Most researchers print or save bibliographic information from the library’s online catalog, its periodical databases, and the Web. The information you need to collect is given in the chart on page 360. If you download a visual, you must gather the same information as for a print source.

For Web sources, some bibliographic information may not be available, but spend time looking for it before assuming that it doesn’t exist. When information isn’t available on the home page, you may have to drill into the site, following links to interior pages. Look especially for the author’s name, the date of publication (or latest update), and the name of any sponsoring organization. Do not omit such information unless it is genuinely unavailable.

Once you have created a working bibliography, you can annotate it. Writing several brief sentences summarizing key points of a source will help you identify how it relates to your argument and to your other sources. You should evaluate the source in your own words and use quotations sparingly. Clarifying the source’s ideas at this stage will help you separate them from your own and avoid plagiarizing them later.

**SAMPLE ANNOTATED BIBLIOGRAPHY ENTRY (MLA STYLE)**

In this editorial, Gonsalves considers the implications of several surveys, including one in which 61% of respondents said that their companies have the right to spy on them. The author agrees with this majority, claiming that it’s fine if his company chooses to monitor him as long as the company discloses its monitoring practices. He argues that “the days of Internet freedom at work are...”

**MODELS**

hackerhandbooks.com/writersref

- Model papers
- MLA annotated bibliography: Orlov
- APA annotated bibliography: Haddad
justifiably finished,” adding that he would prefer not to know the extent of the surveillance. Gonsalves writes for eWeek.com, a publication focused on technology products. He presents himself as an employee who is comfortable with being monitored, but his job may be a source of bias. This editorial contradicts some of my other sources, which claim that employees want to know and should know all the details of their company’s monitoring procedures.

R3-b Keep track of source materials.

The best way to keep track of source materials is to save a copy of each one. Many database subscription services will allow you to e-mail, save, or print citations or full texts of articles, and you can easily download, copy, or take screen shots of information from the Web.

Working with photocopies, printouts, and electronic files—as opposed to relying on memory or hastily written notes—has several benefits. You can highlight key passages, perhaps even color-coding them to reflect topics in your outline. You can annotate the source in the margins by hand or with your word processing program’s comment feature and get a head start on note taking (for an example, see the annotated article on p. 434). Finally, you reduce the chances of unintentional plagiarism, since you will be able to compare your use of a source in your paper with the actual source, not just with your notes (see R3-c).

NOTE: It’s especially important to keep print or electronic copies of Web sources, which may change or even become inaccessible over time. Make sure that your copy includes the site’s URL and your date of access.

TIP: Your school may provide citation software, which allows researchers to download references directly from online sources. Similarly, many databases format citations with a mouse click, and Web sites offer fill-in-the-blank forms for generating formatted citations. You must proofread such citations carefully, however, because the programs sometimes provide incorrect results.

R3-c As you take notes, avoid unintentional plagiarism.

When you take notes and jot down ideas, be very careful not to use language from your sources unless you clearly identify borrowed words and phrases as quotations. Even if you half-copy the author’s
### Information for a working bibliography

#### For an entire book
- All authors; any editors or translators
- Title and subtitle
- Edition (if not the first)
- Publication information: city, publisher, and date

#### For a periodical article
- All authors of the article
- Title and subtitle of the article
- Title of the magazine, journal, or newspaper
- Date; volume, issue, and page numbers

#### For a periodical article retrieved from a database (in addition to preceding information)
- Name of the database and an item number, if available
- Name of the subscription service
- URL of the subscription service (for an online database)
- Accession number or other number assigned by the database
- Digital object identifier (DOI), if there is one
- Date you retrieved the source

**NOTE:** Use particular care when printing or saving articles in PDF format. These files may not include some of the elements you need to properly cite the source. You may need to record additional information from the database or Web site where you retrieved the file.

#### For a Web source (including visuals)
- All authors, editors, or creators of the source
- Editor or compiler of the Web site, if there is one
- Title and subtitle of the source
- Title of the site
- Publication information for the source, if available
- Page or paragraph numbers, if any
- Date of online publication (or latest update)
- Sponsor of the site
- Date you accessed the source
- The site’s URL

**NOTE:** For the exact bibliographic format to use in your working bibliography and in the final paper, see MLA-4b, APA-4b, or CMS-4c.
sentences—either by mixing the author’s phrases with your own without using quotation marks or by plugging your synonyms into the author’s sentence structure—you are committing plagiarism, a serious academic offense. (For examples of this kind of plagiarism, see MLA-2, APA-2, and CMS-2.)

To prevent unintentional borrowing, resist the temptation to look at the source as you take notes—except when you are quoting. Keep the source close by so you can check for accuracy, but don’t try to put ideas in your own words with the source’s sentences in front of you. When you need to quote the exact words of a source, make sure you copy the words precisely and put quotation marks around them.

**TIP:** Be especially careful when using copy and paste functions in electronic files. Some researchers have unintentionally plagiarized their sources because they lost track of which words came from sources and which were their own. To prevent unintentional plagiarism, put quotation marks around any exact language you save from your sources.

**Academic English** Even in the early stages of note taking, it is important to keep in mind that, in the United States, written texts are considered an author’s property. (This “property” isn’t a physical object, so it is often referred to as intellectual property.) The author (or publisher) owns the language as well as any original ideas contained in the writing, whether the source is published in print or electronic form. When you use another author’s property in your own writing, you need to follow certain conventions for citing the material; if you don’t, you risk committing plagiarism.

Summarizing, paraphrasing, and quoting are three ways of taking notes. Be sure to include exact page references for all three types of notes, since you will need the page numbers later if you use the information in your paper.

**Summarizing without plagiarizing**

A summary condenses information, perhaps reducing a chapter to a short paragraph or a paragraph to a single sentence. A summary should be written in your own words; if you use phrases from the source, put them in quotation marks.

On page 362 is a passage from a source about mountain lions. Following the passage is the student’s summary. (The bibliographic information is recorded in MLA style.)
In some respects, the increasing frequency of mountain lion encounters in California has as much to do with a growing human population as it does with rising mountain lion numbers. The scenic solitude of the western ranges is prime cougar habitat, and it is falling swiftly to the developer’s spade. Meanwhile, with their ideal habitat already at its carrying capacity, mountain lions are forcing younger cats into less suitable terrain, including residential areas. Add that cougars have generally grown bolder under a lengthy ban on their being hunted, and an unsettling scenario begins to emerge.

Encounters between mountain lions and humans are on the rise in California because increasing numbers of lions are competing for a shrinking habitat. As the lions’ wild habitat shrinks, older lions force younger lions into residential areas. These lions have lost some of their fear of humans because of a ban on hunting (Rychnovsky 40).

**Paraphrasing without plagiarizing**

Like a summary, a paraphrase is written in your own words; but whereas a summary reports significant information in fewer words than the source, a paraphrase retells the information in roughly the same number of words. If you retain occasional choice phrases from the source, use quotation marks so that later you will know which phrases are not your own.

As you read the following paraphrase of the original source at the top of this page, notice that the language is significantly different from that in the original.

**PARAPHRASE**

Californians are encountering mountain lions more frequently because increasing numbers of humans and a rising population of lions are competing for the same territory. Humans have moved into mountainous regions once dominated by the lions, and the wild habitat that is left cannot sustain the current lion population.
Therefore, the older lions are forcing younger lions into residential areas. And because of a ban on hunting, these younger lions have become bolder—less fearful of encounters with humans (Rychnovsky 40).

**Using quotation marks to avoid plagiarizing**

A quotation consists of the exact words from a source. In your notes, put all quoted material in quotation marks; do not assume that you will remember later which words, phrases, and passages you have quoted and which are your own. When you quote, be sure to copy the words of your source exactly, including punctuation and capitalization.

**QUOTATION**

Rychnovsky explains that as humans expand residential areas into mountain ranges, the cougar’s natural habitat “is falling swiftly to the developer’s spade” (40).

**Avoiding Internet plagiarism**

**UNDERSTAND WHAT PLAGIARISM IS.** When you use another author’s intellectual property—language, visuals, or ideas—in your own writing without giving proper credit, you commit a kind of academic theft called plagiarism.

**TREAT WEB SOURCES IN THE SAME WAY YOU TREAT PRINT SOURCES.** Any language that you find on the Internet must be carefully cited, even if the material is in the public domain or is publicly accessible on free sites. When you use material from Web sites sponsored by federal, state, or municipal governments (.gov sites) or by nonprofit organizations (.org sites), you must acknowledge that material, too, as intellectual property owned by those agencies.

**KEEP TRACK OF WHICH WORDS COME FROM SOURCES AND WHICH ARE YOUR OWN.** To prevent unintentional plagiarism when you copy and paste passages from Web sources to an electronic file, put quotation marks around any text that you have inserted into your own notes or paper. In addition, during note taking and drafting, you might use highlighting or a different color font to draw attention to text taken from sources—so that material from articles, Web sites, and other sources stands out unmistakably as someone else’s words.
Integrating and citing sources to avoid plagiarism

Source text

Our language is constantly changing. Like the Mississippi, it keeps forging new channels and abandoning old ones, picking up debris, depositing unwanted silt, and frequently bursting its banks. In every generation, there are people who deplore changes in the language and many who wish to stop the flow. But if our language stopped changing it would mean that American society had ceased to be dynamic, innovative, pulsing with life—that the river had frozen up.

— Robert MacNeil and William Cran, *Do You Speak American?*, p. 1

NOTE: The examples in this chart follow MLA style (see MLA-4). For information on APA and CMS (Chicago) styles, see APA-4 and CMS-4, respectively.

If you are using an exact sentence from a source, with no changes . . . ➔ . . . put quotation marks around the sentence. Use a signal phrase and include a page number in parentheses.

MacNeil and Cran write, “Our language is constantly changing” (1).

If you are using a few exact words from the source but not an entire sentence . . . ➔ . . . put quotation marks around the exact words that you have used from the source. Use a signal phrase and include a page number in parentheses.

The English language, according to MacNeil and Cran, is “like the Mississippi” (1).

If you are using near-exact words from the source but changing some word forms (*I* to *she*, *walk* to *walked*) or adding words to clarify and make the quotation flow with your own text . . . ➔ . . . put quotation marks around the quoted words, and put brackets around the changes you have introduced. Include a signal phrase and follow the quotation with the page number in parentheses.

MacNeil and Cran compare the English language to the Mississippi River, which “forg[es] new channels and abandon[s] old ones” (1).
If you are paraphrasing the source, using the author's ideas but not any of the author's exact words . . .

MacNeil and Cran write, “In every generation, there are people who deplore changes in the [English] language and many who wish to stop the flow” (1).

. . . introduce the ideas with a signal phrase and put the page number at the end of your sentence. Do not use quotation marks. (See MLA-2, APA-2, and CMS-2.)

MacNeil and Cran argue that changes in the English language are natural and that they represent cultural progress (1).

If you have used the source's sentence structure but substituted a few synonyms for the author's words . . .

STOP! This is a form of plagiarism even if you use a signal phrase and a page number. Change your sentence by using one of the techniques given in this chart or in MLA-3, APA-3, or CMS-3.

PLAGIARIZED
MacNeil and Cran claim that, like a river, English creates new waterways and discards old ones.

INTEGRATED AND CITED CORRECTLY
MacNeil and Cran claim, “Like the Mississippi, [English] keeps forging new channels and abandoning old ones” (1).

AVOID WEB SITES THAT BILL THEMSELVES AS “RESEARCH SERVICES” AND SELL ESSAYS. When you use Web search engines to research a topic, you will often see links to sites that appear to offer legitimate writing support but that actually sell college essays. Of course, submitting a paper that you have purchased is cheating, but even using material from such a paper is considered plagiarism.

For more on avoiding plagiarism while working with sources, see MLA-2, APA-2, or CMS-2.
Choosing a documentation style

The various academic disciplines use their own style for citing sources and for listing the works that are cited in a paper. A Writer’s Reference describes three commonly used styles: MLA (Modern Language Association), APA (American Psychological Association), and CMS (Chicago Manual of Style). See the appropriate tabbed section for details about each style.

NOTE: For a list of style manuals in a variety of disciplines, visit Research and Documentation Online at hackerhandbooks.com/resdoc.

Select a style appropriate for your discipline.

In researched writing, sources are cited for several reasons. First, it is important to acknowledge the contributions of others. If you fail to credit sources properly, you commit plagiarism, a serious academic offense. Second, by choosing appropriate sources, you will add credibility to your work; in a sense, you are calling on authorities to serve as expert witnesses. The more care you have taken in choosing reliable sources, the stronger your argument will be. Finally—and most importantly—you are engaging in a scholarly conversation: when you cite your sources, you show readers where they can pursue your topic in greater depth.

All of the academic disciplines cite sources for these same reasons. However, the different styles for citing sources are based on the values and intellectual goals of scholars in different disciplines.

MLA and APA in-text citations

MLA style and APA style both use citations in the text of a paper that refer to a list of works at the end of the paper. The systems work somewhat differently, however, because MLA style was created for scholars in English composition and literature and APA style was created for researchers in the social sciences.

MLA IN-TEXT CITATION

Brandon Conran argues that the story is written from “a bifocal point of view” (111).
APA IN-TEXT CITATION

As researchers Yanovski and Yanovski (2002) have explained, obesity was once considered “either a moral failing or evidence of underlying psychopathology” (p. 592).

While MLA and APA styles work in a similar way, some basic disciplinary differences show up in these key elements:

- author’s name
- date of publication
- page numbers
- verb tense in signal phrases

MLA style gives the author’s full name when it is first mentioned. This approach emphasizes authorship and interpretation. APA style, which uses only the last names of authors, gives a date after the author’s name. This approach reflects the social scientist’s concern with the currency of research. MLA style places the date in the works cited list but omits it in the text. While currency is important, what someone had to say a century ago may be as significant as the latest contribution to the field.

Both styles include page numbers for quotations. MLA style requires page numbers for summaries and paraphrases as well; with a page number, readers can easily find the original passage that has been summarized or paraphrased. While APA does not require page numbers for summaries and paraphrases, it recommends that writers use a page number if doing so would help readers find the passage in a longer work.

Finally, MLA style uses the present tense (such as argues) to introduce cited material, whereas APA style uses the past or present perfect tense (such as argued or have argued) in signal phrases. The present tense evokes the timelessness of a literary text; the past or present perfect tense emphasizes that research or experimentation occurred in the past.

CMS footnotes or endnotes

Most historians and many scholars in the humanities use the style of footnotes or endnotes recommended by *The Chicago Manual of Style* (CMS). Historians base their work on a wide variety of primary and secondary sources, all of which must be cited. The CMS note system has the virtue of being relatively unobtrusive; even when a paper or
an article is thick with citations, readers will not be overwhelmed. In
the text of the paper, only a raised number appears. Readers who are
interested can consult the accompanying numbered note, which is
given either at the foot of the page or at the end of the paper.

**TEXT**

Historian Albert Castel quotes several eyewitnesses on both the Union and the
Confederate sides as saying that Forrest ordered his men to stop firing.\(^7\)

**NOTE**

7. Albert Castel, “The Fort Pillow Massacre: A Fresh Examination of the

The CMS system gives as much information as the MLA or APA sys-
tem, but less of that information appears in the text of the paper.

28. Sacred text, 409
Most English instructors and some humanities instructors will ask you to document your sources with the Modern Language Association (MLA) system of citations described in MLA-4. When writing an MLA paper that is based on sources, you face three main challenges: (1) supporting a thesis, (2) citing your sources and avoiding plagiarism, and (3) integrating quotations and other source material.
Examples in this tabbed section are drawn from a student’s research about online monitoring of employees’ computer use. Anna Orlov’s research paper, in which she argues that electronic surveillance in the workplace threatens employees’ privacy, appears on pages 436–40. (See highlights of Anna Orlov’s research process on pp. 432–35.)

MLA-1 Supporting a thesis

Most research assignments ask you to form a thesis, or main idea, and to support that thesis with well-organized evidence.

MLA-1a Form a working thesis.

Once you have read a variety of sources and considered your issue from different perspectives, you are ready to form a working thesis: a one-sentence (or occasionally a two-sentence) statement of your central idea (see also C2-a). Because it is a working, or tentative, thesis, you can remain flexible and revise it as your ideas develop. In a research paper, your thesis will answer the central research question you pose (see R1-a). Here, for example, are Anna Orlov’s research question and working thesis.

RESEARCH QUESTION
Should employers monitor their employees’ online activities in the workplace?

WORKING THESIS
Employers should not monitor their employees’ online activities because electronic surveillance can compromise workers’ privacy.

After you have written a rough draft and perhaps done more reading, you may decide to revise your thesis, as Orlov did.

REVISED THESIS
Although companies often have legitimate concerns that lead them to monitor employees’ Internet usage—from expensive security breaches to reduced productivity—the benefits of electronic surveillance are outweighed by its costs to employees’ privacy and autonomy.

The thesis usually appears at the end of the introductory paragraph. To read Anna Orlov’s thesis in the context of her introduction, see page 436.
MLA-1b Organize ideas with a rough outline.

The body of your paper will consist of evidence in support of your thesis. Instead of getting tangled up in a formal outline early in the process, sketch an informal plan that organizes your ideas in bold strokes. Anna Orlov, for example, used this simple plan to outline the structure of her argument:

- Compared with older types of surveillance, electronic surveillance allows employers to monitor workers more efficiently.
- Some experts argue that companies have important financial and legal reasons to monitor employees’ Internet usage.
- But monitoring employees’ Internet usage may lower worker productivity when the threat to privacy creates distrust.
- Current laws do little to protect employees’ privacy rights, so employees and employers have to negotiate the potential risks and benefits of electronic surveillance.

After you have written a rough draft, a more formal outline can be a useful way to shape the complexities of your argument. See C1-d for an example.

MLA-1c Use sources to inform and support your argument.

Used thoughtfully, the source materials you have gathered will make your argument more complex and convincing for readers. Sources can play several different roles as you develop your points.

Providing background information or context

You can use facts and statistics to support generalizations or to emphasize the importance of your topic, as student writer Anna Orlov does in her introduction.

As the Internet has become an integral tool of businesses, company policies on Internet usage have become as common as policies regarding vacation days or sexual harassment. A 2005 study by the American Management Association and ePolicy Institute found that 76% of companies monitor employees’ use of the Web,
and the number of companies that block employees’ access to certain Web sites has increased 27% since 2001 (1).

**Explaining terms or concepts**

If readers are unlikely to be familiar with words or ideas important to your topic, you must explain them. Quoting or paraphrasing a source can help you define terms and concepts in accessible language.

One popular monitoring method is keystroke logging, which is done by means of an undetectable program on employees’ computers. . . . As Lane explains, these programs record every key entered into the computer in hidden directories that can later be accessed or uploaded by supervisors; the programs can even scan for keywords tailored to individual companies (128-29).

**Supporting your claims**

As you draft your argument, make sure to back up your assertions with facts, examples, and other evidence from your research. (See also A2-e.) Orlov, for example, uses an anecdote from one of her sources to support her claim that limiting computer access causes resentment among a company's staff.

Monitoring online activities can have the unintended effect of making employees resentful. . . . Kesan warns that “prohibiting personal use can seem extremely arbitrary and can seriously harm morale. . . . Imagine a concerned parent who is prohibited from checking on a sick child by a draconian company policy” (315-16). As this analysis indicates, employees can become disgruntled when Internet usage policies are enforced to their full extent.

**Lending authority to your argument**

Expert opinion can give weight to your argument. (See also A2-e.) But don’t rely on experts to make your argument for you. Construct your argument in your own words and, when appropriate, cite the judgment of an authority in the field to support your position.

Additionally, many experts disagree with employers’ assumption that online monitoring can increase productivity. Employment law attorney Joseph Schmitt argues that, particularly for employees who are paid a salary rather than an hourly wage, “a company shouldn’t care whether employees spend one or 10 hours on the Internet as long as they are getting their jobs done—and provided that they are not accessing inappropriate sites” (qtd. in Verespej).
Anticipating and countering objections

Do not ignore sources that seem contrary to your position or that offer arguments different from your own. Instead, use them to give voice to opposing points of view and to state potential objections to your argument before you counter them (see A-2f). Anna Orlov, for example, cites conflicting evidence to acknowledge that some readers may feel that unlimited Internet access in the workplace hinders productivity. In doing so, she creates an opportunity to counter that objection and persuade those readers.

On the one hand, computers and Internet access give employees powerful tools to carry out their jobs; on the other hand, the same technology offers constant temptations to avoid work. As a 2005 study by Salary.com and America Online indicates, the Internet ranked as the top choice among employees for ways of wasting time on the job; it beat talking with co-workers—the second most popular method—by a margin of nearly two to one (Frauenheim).

MLA-2 Citing sources; avoiding plagiarism

Your research paper is a collaboration between you and your sources. To be fair and ethical, you must acknowledge your debt to the writers of those sources. If you don’t, you commit plagiarism, a serious academic offense.

In general, these three acts are considered plagiarism: (1) failing to cite quotations and borrowed ideas, (2) failing to enclose borrowed language in quotation marks, and (3) failing to put summaries and paraphrases in your own words. Definitions of plagiarism may vary; it’s a good idea to find out how your school defines academic dishonesty.

MLA-2a Cite quotations and borrowed ideas.

Sources are cited for two reasons:

1. to tell readers where your information comes from— so that they can assess its reliability and, if interested, find and read the original source
2. to give credit to the writers from whom you have borrowed words and ideas

You must cite anything you borrow from a source, including direct quotations; statistics and other specific facts; visuals such as cartoons, graphs, and diagrams; and any ideas you present in a summary or paraphrase.

The only exception is common knowledge—information your readers could easily find in any number of general sources. For example, most encyclopedias will tell readers that Alfred Hitchcock directed *Notorious* in 1946 and that Emily Dickinson published only a handful of her many poems during her lifetime.

As a rule, when you have seen information repeatedly in your reading, you don’t need to cite it. However, when information has appeared in only one or two sources, when it is highly specific (as with statistics), or when it is controversial, you should cite the source. If a topic is new to you and you are not sure what is considered common knowledge or what is controversial, ask your instructor or someone else with expertise. When in doubt, cite the source.

The Modern Language Association recommends a system of in-text citations. Here, briefly, is how the MLA citation system usually works:

1. The source is introduced by a signal phrase that names its author.
2. The material being cited is followed by a page number in parentheses.
3. At the end of the paper, a list of works cited (arranged alphabetically by authors’ last names) gives complete publication information about the source.

**IN-TEXT CITATION**

Legal scholar Jay Kesan points out that the law holds employers liable for employees’ actions such as violations of copyright laws, the distribution of offensive or graphic sexual material, and illegal disclosure of confidential information (312).

**ENTRY IN THE LIST OF WORKS CITED**

This basic MLA format varies for different types of sources. For a detailed discussion of other models, see MLA-4.
MLA-2b Enclose borrowed language in quotation marks.

To indicate that you are using a source’s exact phrases or sentences, you must enclose them in quotation marks unless they have been set off from the text by indenting (see p. 381). To omit the quotation marks is to claim—falsely—that the language is your own. Such an omission is plagiarism even if you have cited the source.

ORIGINAL SOURCE
Without adequate discipline, the World Wide Web can be a tremendous time sink; no other medium comes close to matching the Internet’s depth of materials, interactivity, and sheer distractive potential.

—Frederick Lane, The Naked Employee, p. 142

PLAGIARISM
Frederick Lane points out that if people do not have adequate discipline, the World Wide Web can be a tremendous time sink; no other medium comes close to matching the Internet’s depth of materials, interactivity, and sheer distractive potential (142).

BORROWED LANGUAGE IN QUOTATION MARKS
Frederick Lane points out that for those not exercising self-control, “the World Wide Web can be a tremendous time sink; no other medium comes close to matching the Internet’s depth of materials, interactivity, and sheer distractive potential” (142).

MLA-2c Put summaries and paraphrases in your own words.

A summary condenses information from a source; a paraphrase conveys the information using roughly the same number of words as the original source. When you summarize or paraphrase, it is not enough to name the source; you must restate the source’s meaning using your own language. (See also R3-c.) You commit plagiarism if you half-copy the author’s sentences—either by mixing the author’s phrases with your own without using quotation marks or by plugging your synonyms into the author’s sentence structure.

The first paraphrase of the following source is plagiarized—even though the source is cited—because too much of its language is borrowed from the original. The underlined strings of words have been copied exactly (without quotation marks). In addition, the writer has
closely echoed the sentence structure of the source, merely substituting some synonyms (restricted for limited, modern era for computer age, monitoring for surveillance, and inexpensive for cheap).

ORIGINAL SOURCE
In earlier times, surveillance was limited to the information that a supervisor could observe and record firsthand and to primitive counting devices. In the computer age surveillance can be instantaneous, unblinking, cheap, and, maybe most importantly, easy.

PLAGIARISM: UNACCEPTABLE BORROWING
Scholars Carl Botan and Mihaela Vorvoreanu argue that in earlier times monitoring of employees was restricted to the information that a supervisor could observe and record firsthand. In the modern era, monitoring can be instantaneous, inexpensive, and, most importantly, easy (126).

To avoid plagiarizing an author’s language, resist the temptation to look at the source while you are summarizing or paraphrasing. After you have read the original passage, set the source aside. Ask yourself, “What is the author’s meaning?” In your own words, state the author’s basic point. Return to the source and check that you haven’t used the author’s language or sentence structure or misrepresented the author’s ideas. When you fully understand another writer’s meaning, you can more easily and accurately present those ideas in your own words.

ACCEPTABLE PARAPHRASE
Scholars Carl Botan and Mihaela Vorvoreanu claim that the nature of workplace surveillance has changed over time. Before the arrival of computers, managers could collect only small amounts of information about their employees based on what they saw or heard. Now, because computers are standard workplace technology, employers can monitor employees efficiently (126).

MLA-3 Integrating sources
Quotations, summaries, paraphrases, and facts will help you develop your argument, but they cannot speak for you. You can use several strategies to integrate information from research sources into your paper while maintaining your own voice.
MLA-3a Use quotations appropriately.

Limiting your use of quotations

Although it is tempting to insert many quotations in your paper and to use your own words only for connecting passages, do not quote excessively. In your academic writing, keep the emphasis on your ideas; use your own words to summarize and to paraphrase your sources and to explain your points. Sometimes, however, quotations can be the most effective way to integrate a source’s ideas.

When to use quotations

- When language is especially vivid or expressive
- When exact wording is needed for technical accuracy
- When it is important to let the debaters of an issue explain their positions in their own words
- When the words of an authority lend weight to an argument
- When the language of a source is the topic of your discussion (as in an analysis or interpretation)

It is not always necessary to quote full sentences from a source. To reduce your reliance on the words of others, you can often integrate language from a source into your own sentence structure. (For the use of signal phrases in integrating quotations, see MLA-3b.)

Kizza and Ssanyu observe that technology in the workplace has been accompanied by “an array of problems that needed quick answers” such as electronic monitoring to prevent security breaches (4).

Using the ellipsis mark and brackets

Two useful marks of punctuation, the ellipsis mark and brackets, allow you to keep quoted material to a minimum and to integrate it smoothly into your text.

The ellipsis mark  To condense a quoted passage, you can use the ellipsis mark (three periods, with spaces between) to indicate that you have left words out. What remains must be grammatically complete.

Lane acknowledges the legitimate reasons that many companies have for monitoring their employees’ online activities, particularly management’s concern about preventing “the theft of information that can be downloaded to a . . . disk, e-mailed to oneself . . ., or even posted to a Web page for the entire world to see” (12).
The writer has omitted from the source the words *floppy* or *Zip* before *disk* and *or a confederate* after *oneself.*

On the rare occasions when you want to leave out one or more full sentences, use a period before the three ellipsis dots.

Charles Lewis, director of the Center for Public Integrity, points out that “by 1987, employers were administering nearly 2,000,000 polygraph tests a year to job applicants and employees. . . . Millions of workers were required to produce urine samples under observation for drug testing . . .” (22).

Ordinarily, do not use an ellipsis mark at the beginning or at the end of a quotation. Your readers will understand that the quoted material is taken from a longer passage, so such marks are not necessary. The only exception occurs when you have dropped words at the end of the final quoted sentence. In such cases, put three ellipsis dots before the closing quotation mark and parenthetical reference, as in the previous example.

Make sure omissions and ellipsis marks do not distort the meaning of your source.

**Brackets**  Brackets allow you to insert your own words into quoted material. You can insert words in brackets to clarify a confusing reference or to keep a sentence grammatical in your context. You also use brackets to indicate that you are changing a letter from capital to lowercase (or vice versa) to fit into your sentence.

Legal scholar Jay Kesan notes that “[a] decade ago, losses [from employees’ computer crimes] were already mounting to five billion dollars annually” (311).

This quotation began *A decade ago . . .* in the source, so the writer indicated the change to lowercase with brackets and inserted words in brackets to clarify the meaning of *losses.*

To indicate an error such as a misspelling in a quotation, insert [sic], including the brackets, right after the error.

Johnson argues that “while online monitoring is often imagined as harmless [sic], the practice may well threaten employees’ rights to privacy” (14).

**Setting off long quotations**

When you quote more than four typed lines of prose or more than three lines of poetry, set off the quotation by indenting it one inch from the left margin.

Long quotations should be introduced by an informative sentence, usually followed by a colon. Quotation marks are unnecessary because
the indented format tells readers that the passage is taken word-for-word from the source.

Botan and Vorvoreanu examine the role of gender in company practices of electronic surveillance:

There has never been accurate documentation of the extent of gender differences in surveillance, but by the middle 1990s, estimates of the proportion of surveilled employees that were women ranged from 75% to 85%. ... Ironically, this gender imbalance in workplace surveillance may be evening out today because advances in surveillance technology are making surveillance of traditionally male dominated fields, such as long-distance truck driving, cheap, easy, and frequently unobtrusive. (127)

Notice that at the end of an indented quotation the parenthetical citation goes outside the final mark of punctuation. (When a quotation is run into your text, the opposite is true. See the sample citations on p. 380.)

**MLA-3b Use signal phrases to integrate sources.**

Whenever you include a paraphrase, summary, or direct quotation of another writer in your paper, prepare your readers for it with a signal phrase. A signal phrase usually names the author of the source and often provides some context. It commonly appears before the source material. To vary your sentence structure, you may decide to interrupt source material with a signal phrase or place the signal phrase after your paraphrase, summary, or direct quotation.

When you write a signal phrase, choose a verb that is appropriate for the way you are using the source (see MLA-1c). Are you providing background, explaining a concept, supporting a claim, lending authority, or refuting a belief? See the chart on page 383 for a list of verbs commonly used in signal phrases. Note that MLA style calls for verbs in the present or present perfect tense (argues or has argued) to introduce source material unless you include a date that specifies the time of the original author’s writing.

**Marking boundaries**

Readers need to move from your words to the words of a source without feeling a jolt. Avoid dropping quotations into the text without warning. Instead, provide clear signal phrases, including at least the author’s name, to indicate the boundary between your words and the source’s words. (The signal phrase is highlighted in the second example.)
Using signal phrases in MLA papers

To avoid monotony, try to vary both the language and the placement of your signal phrases.

Model signal phrases

In the words of researchers Greenfield and Davis, “...”
As legal scholar Jay Kesn has noted, “...”
The ePolicy Institute, an organization that advises companies about reducing risks from technology, reports that “...”
“...,” writes Daniel Tynan, “...”
“...,” attorney Schmitt claims.
Kizza and Ssanyu offer a persuasive counterargument: “...”

Verbs in signal phrases

- acknowledges
- adds
- admits
- agrees
- argues
- asserts
- believes
- claims
- comments
- compares
- confirms
- contends
- declares
- denies
- disputes
- emphasizes
- endorses
- grants
- illustrates
- implies
- insists
- notes
- observes
- points out
- reasons
- refutes
- rejects
- reports
- responds
- suggests
- thinks
- writes

DROPPED QUOTATION

Some experts have argued that a range of legitimate concerns justifies employer monitoring of employee Internet usage. “Employees could accidentally (or deliberately) spill confidential corporate information . . . or allow worms to spread throughout a corporate network” (Tynan).

QUOTATION WITH SIGNAL PHRASE

Some experts have argued that a range of legitimate concerns justifies employer monitoring of employee Internet usage. As *PC World* columnist Daniel Tynan points out, “Employees could accidentally (or deliberately) spill confidential corporate information . . . or allow worms to spread throughout a corporate network.”

Establishing authority

Good research writing uses evidence from reliable sources. The first time you mention a source, include in the signal phrase the author’s title, credentials, or experience—anything that would help your readers
recognize the source’s authority. (Signal phrases are highlighted in the next two examples.)

**SOURCE WITH NO CREDENTIALS**

Jay Kesin points out that the law holds employers liable for employees’ actions such as violations of copyright laws, the distribution of offensive or graphic sexual material, and illegal disclosure of confidential information (312).

**SOURCE WITH CREDENTIALS**

Legal scholar Jay Kesin points out that the law holds employers liable for employees’ actions such as violations of copyright laws, the distribution of offensive or graphic sexual material, and illegal disclosure of confidential information (312).

When you establish your source’s authority, as with the phrase *Legal scholar* in the previous example, you also signal to readers your own credibility as a responsible researcher who has located trustworthy sources.

**Introducing summaries and paraphrases**

Introduce most summaries and paraphrases with a signal phrase that names the author and places the material in the context of your argument. Readers will then understand that everything between the signal phrase and the parenthetical citation summarizes or paraphrases the cited source.

Without the signal phrase (highlighted) in the following example, readers might think that only the quotation at the end is being cited, when in fact the whole paragraph is based on the source.

Frederick Lane believes that the personal computer has posed new challenges for employers worried about workplace productivity. Whereas early desktop computers were primitive enough to prevent employees from using them to waste time, the machines have become so sophisticated that they now make non-work-related computer activities easy and inviting. Many employees spend considerable company time customizing features and playing games on their computers. But perhaps most problematic from the employer’s point of view, Lane asserts, is giving employees access to the Internet, “roughly the equivalent of installing a gazillion-channel television set for each employee” (15-16).

There are times when a summary or a paraphrase does not require a signal phrase naming the author. When the context makes clear where
the cited material begins, you may omit the signal phrase and include the author’s last name in parentheses.

**Integrating statistics and other facts**

When you are citing a statistic or another specific fact, a signal phrase is often not necessary. In most cases, readers will understand that the citation refers to the statistic or fact (not the whole paragraph).

Roughly 60% of responding companies reported disciplining employees who had used the Internet in ways the companies deemed inappropriate; 30% had fired their employees for those transgressions (Greenfield and Davis 347).

There is nothing wrong, however, with using a signal phrase to introduce a statistic or another fact.

**Putting source material in context**

Readers should not have to guess why source material appears in your paper. A signal phrase can help you connect your own ideas and those of another writer by clarifying how the source will contribute to your paper (see R2-a).

If you use another writer’s words, you must explain how they relate to your point. In other words, you must put the source in context. It’s a good idea to embed a quotation between sentences of your own. In addition to introducing it with a signal phrase, follow it with interpretive comments that link the quotation to your paper’s argument (see also MLA-3c).

**QUOTATION WITH EFFECTIVE CONTEXT**

The difference, Lane argues, between old methods of data gathering and electronic surveillance involves quantity:

> Technology makes it possible for employers to gather enormous amounts of data about employees, often far beyond what is necessary to satisfy safety or productivity concerns. And the trends that drive technology—faster, smaller, cheaper—make it possible for larger and larger numbers of employers to gather ever-greater amounts of personal data. (3-4)

In an age when employers can collect data whenever employees use their computers—when they send e-mail, surf the Web, or even arrive at or depart from their workstations—the challenge for both employers and employees is to determine how much is too much.
**MLA-3c Synthesize sources.**

When you synthesize multiple sources in a research paper, you create a conversation about your research topic. You show readers that your argument is based on your active analysis and integration of ideas, not just a list of quotations and paraphrases. Your synthesis will show how your sources relate to one another; one source may support, extend, or counter the ideas of another. Readers should be able to see how each source functions in your argument (see R2-a).

*Considering how sources relate to your argument*

Before you integrate sources and show readers how they relate to one another, consider how each one might contribute to your own argument. As student writer Anna Orlov became more informed about Internet surveillance in the workplace, she asked herself these questions: *What do I think about monitoring employees online? Which sources might extend or illustrate the points I want to make? Which sources voice opposing points of view that I need to address?* With these questions in mind, Orlov read and annotated sources, including an argument in favor of workplace surveillance. (See the example on p. 434.)

*Placing sources in conversation*

When you synthesize sources, you show readers how the ideas of one source relate to those of another by connecting and analyzing the ideas in the context of your argument. Keep the emphasis on your own writing. After all, you’ve done the research and thought through the issues, so you should control the conversation. The thread of your argument should be easy to identify and to understand, with or without your sources.

**SAMPLE SYNTHESIS (DRAFT)**

Student writer Anna Orlov begins with a claim that needs support.

Productivity is not easily measured in the wired workplace. As a result, employers find it difficult to determine how much freedom to allow their employees. On the one hand, computers and Internet access give employees powerful tools to carry out their jobs; on the other hand, the same technology offers constant temptations to avoid work. As a 2005 study by *Salary.com* and *America Online* indicates, the Internet ranked as the top choice among employees for ways of wasting time on the job (Frauenheim). Chris Gonsalves, an editor for...
eWeek.com, argues that technology has changed the terms between employers and employees: “While bosses can easily detect and interrupt water-cooler chatter,” he writes, “the employee who is shopping at Lands’ End or IMing with fellow fantasy baseball managers may actually appear to be working.” The gap between observable behaviors and actual online activities has motivated some employers to invest in surveillance programs. Many experts, however, disagree with employers’ assumption that online monitoring can increase productivity. Employment law attorney Joseph Schmitt argues that, particularly for salaried employees, “a company shouldn’t care whether employees spend one or 10 hours on the Internet as long as they are getting their jobs done—and provided that they are not accessing inappropriate sites” (qtd. in Verespej). Other experts even argue that time spent on personal Internet browsing can actually be productive for companies. According to Bill Coleman, an executive at Salary.com, “Personal Internet use and casual office conversations often turn into new business ideas or suggestions for gaining operating efficiencies” (qtd. in Frauenheim). Employers, in other words, may benefit from showing more faith in their employees’ ability to exercise their autonomy.

In this draft, Orlov uses her own analyses to shape the conversation among her sources. She does not simply string quotations together or allow her sources to overwhelm her writing. The final sentence, written in her own voice, gives her an opportunity to explain to readers how the various sources support her argument.

When synthesizing sources, ask yourself the following questions:

- Which sources inform, support, or extend your argument?
- Have you varied the function of sources — to provide background, to explain concepts, to lend authority, and to anticipate counterarguments? Do you use signal phrases to indicate these functions?
- Do you explain how your sources support your argument?
- Do you connect and analyze sources in your own voice?
- Is your own argument easy to identify and to understand, with or without your sources?
In English and other humanities classes, you may be asked to use the MLA (Modern Language Association) system for documenting sources, which is set forth in the *MLA Handbook for Writers of Research Papers*, 7th ed. (New York: MLA, 2009).

MLA recommends in-text citations that refer readers to a list of works cited. A typical in-text citation names the author of the source,
often in a signal phrase, and gives a page number in parentheses. At the end of the paper, a list of works cited provides publication information about the source; the list is alphabetized by authors’ last names (or by titles for works without authors). There is a direct connection between the in-text citation and the alphabetized listing. In the following example, that connection is highlighted in orange.

**IN-TEXT CITATION**

Jay Kesan notes that even though many companies now routinely monitor employees through electronic means, “there may exist less intrusive safeguards for employers” (293).

**ENTRY IN THE LIST OF WORKS CITED**

For a list of works cited that includes this entry, see page 440.

**MLA-4a MLA in-text citations**

MLA in-text citations are made with a combination of signal phrases and parenthetical references. A signal phrase introduces information taken from a source (a quotation, summary, paraphrase, or fact); usually the signal phrase includes the author’s name. The parenthetical reference comes after the cited material, often at the end of the sentence. It includes at least a page number (except for unpaginated sources, such as those found online). In the models in MLA-4a, the elements of the in-text citation are highlighted in orange.

**IN-TEXT CITATION**

Kwon points out that even though many companies now routinely monitor employees any protections from employers’ “unreasonable searches and seizures” (6).

Readers can look up the author’s last name in the alphabetized list of works cited, where they will learn the work’s title and other publication information. If readers decide to consult the source, the page number will take them straight to the passage that has been cited.

For a directory to the in-text citation models in this section, see page 371, immediately following the tabbed divider.
Basic rules for print and online sources

The MLA system of in-text citations, which depends heavily on authors’ names and page numbers, was created with print sources in mind. Although many online sources have unclear authorship and lack page numbers, the basic rules are the same for both print and online sources.

The models in this section (items 1–5) show how the MLA system usually works and explain what to do if your source has no author or page numbers.

1. Author named in a signal phrase  Ordinarily, introduce the material being cited with a signal phrase that includes the author’s name. In addition to preparing readers for the source, the signal phrase allows you to keep the parenthetical citation brief.

Frederick Lane reports that employers do not necessarily have to use software to monitor how their employees use the Web: employers can “use a hidden video camera pointed at an employee’s monitor” and even position a camera “so that a number of monitors [can] be viewed at the same time” (147).

The signal phrase—Frederick Lane reports—names the author; the parenthetical citation gives the page number of the book in which the quoted words may be found.

Notice that the period follows the parenthetical citation. When a quotation ends with a question mark or an exclamation point, leave the end punctuation inside the quotation mark and add a period at the end of your sentence. (See also the note on p. 284.)

O’Connor asks a critical question: “When does Internet surveillance cross the line between corporate responsibility and invasion of privacy?” (16).

2. Author named in parentheses  If a signal phrase does not name the author, put the author’s last name in parentheses along with the page number. Use no punctuation between the name and the page number.

Companies can monitor employees’ every keystroke without legal penalty, but they may have to combat low morale as a result (Lane 129).

3. Author unknown  Either use the complete title in a signal phrase or use a short form of the title in parentheses. Titles of books are italicized; titles of articles are put in quotation marks.

A popular keystroke logging program operates invisibly on workers’ computers yet provides supervisors with details of the workers’ online activities (“Automatically”).
**TIP:** Before assuming that a Web source has no author, do some detective work. Often the author’s name is available but is not easy to find. For example, it may appear at the end of the page, in tiny print. Or it may appear on another page of the site, such as the home page.

**NOTE:** If a source has no author and is sponsored by a corporation or government agency, name the corporation or agency as the author (see items 8 and 17 on pp. 392 and 395, respectively).

4. **Page number unknown** Do not include the page number if a work lacks page numbers, as is the case with many Web sources. Even if a printout from a Web site shows page numbers, treat the source as unpagedinated in the in-text citation because not all printouts give the same page numbers. (When the pages of a Web source are stable, as in PDF files, supply a page number in your in-text citation.)

As a 2005 study by Salary.com and America Online indicates, the Internet ranked as the top choice among employees for ways of wasting time on the job; it beat talking with co-workers—the second most popular method—by a margin of nearly two to one (Frauenheim).

If a source has numbered paragraphs or sections, use “par.” (or “pars.”) or “sec.” (or “secs.”) in the parentheses: (Smith, par. 4). Notice that a comma follows the author’s name.

5. **One-page source** If the source is one page long, MLA allows (but does not require) you to omit the page number. Even so, it’s a good idea to supply the page number because without it readers may not know where your citation ends or, worse, may not realize that you have provided a citation at all.

**NO PAGE NUMBER IN CITATION**

Anush Yegyazarian reports that in 2000 the National Labor Relations Board’s Office of the General Counsel helped win restitution for two workers who had been dismissed because their employers were displeased by the employees’ e-mails about work-related issues. The case points to the ongoing struggle to define what constitutes protected speech in the workplace.

**PAGE NUMBER IN CITATION**

Anush Yegyazarian reports that in 2000 the National Labor Relations Board’s Office of the General Counsel helped win restitution for two workers who had been dismissed because their employers were displeased by the employees’ e-mails about work-related issues (62). The case points to the ongoing struggle to define what constitutes protected speech in the workplace.
Variations on the basic rules

This section describes the MLA guidelines for handling a variety of situations not covered by the basic rules in items 1–5. These rules for in-text citations are the same for both print and online sources.

6. **Two or three authors**  Name the authors in a signal phrase, as in the following example, or include their last names in the parenthetical reference: (Kizza and Ssanyu 2).

   Kizza and Ssanyu note that “employee monitoring is a dependable, capable, and very affordable process of electronically or otherwise recording all employee activities at work” and elsewhere (2).

When three authors are named in the parentheses, separate the names with commas: (Alton, Davies, and Rice 56).

7. **Four or more authors**  Name all of the authors or include only the first author’s name followed by “et al.” (Latin for “and others”). The format you use should match the format in your works cited entry (see item 3 on p. 399).

   The study was extended for two years, and only after results were reviewed by an independent panel did the researchers publish their findings (Blaine et al. 35).

8. **Organization as author**  When the author is a corporation or an organization, name that author either in the signal phrase or in the parentheses. (For a government agency as author, see item 17 on p. 395.)

   According to a 2001 survey of human resources managers by the American Management Association, more than three-quarters of the responding companies reported disciplining employees for “misuse or personal use of office telecommunications equipment” (2).

   In the list of works cited, the American Management Association is treated as the author and alphabetized under A. When you give the organization name in parentheses, abbreviate common words in the name: “Assn.,” “Dept.,” “Natl.,” “Soc.,” and so on.

   In a 2001 survey of human resources managers, more than three-quarters of the responding companies reported disciplining employees for “misuse or personal use of office telecommunications equipment” (Amer. Management Assn. 2).
9. **Authors with the same last name** If your list of works cited includes works by two or more authors with the same last name, include the author’s first name in the signal phrase or first initial in the parentheses.

Estimates of the frequency with which employers monitor employees’ use of the Internet each day vary widely (A. Jones 15).

10. **Two or more works by the same author** Mention the title of the work in the signal phrase or include a short version of the title in the parentheses.

The American Management Association and ePolicy Institute have tracked employers’ practices in monitoring employees’ e-mail use. The groups’ 2003 survey found that one-third of companies had a policy of keeping and reviewing employees’ e-mail messages (“2003 E-mail” 2); in 2005, more than 55% of companies engaged in e-mail monitoring (“2005 Electronic” 1).

Titles of articles and other short works are placed in quotation marks; titles of books are italicized.

In the rare case when both the author’s name and a short title must be given in parentheses, separate them with a comma.

A 2004 survey found that 20% of employers responding had employees’ e-mail “subpoenaed in the course of a lawsuit or regulatory investigation,” up 7% from the previous year (Amer. Management Assn. and ePolicy Inst., “2004 Workplace” 1).

11. **Two or more works in one citation** To cite more than one source in the parentheses, give the citations in alphabetical order and separate them with a semicolon.

Several researchers have analyzed the reasons that companies monitor employees’ use of the Internet at work (Botan and Vorvoreanu 128-29; Kesan 317-19; Kizza and Ssanyu 3-7).

Multiple citations can be distracting, so you should not overuse the technique. If you want to point to several sources that discuss a particular topic, consider using an information note instead (see MLA-4c).

12. **Repeated citations from the same source** When your paper is about a single work of fiction or nonfiction (such as an essay), you do not need to include the author’s name each time you quote from or
paraphrase the work. After you mention the author’s name at the beginning of your paper, you may include just the page numbers in your parenthetical citations.

In Susan Glaspell’s short story “A Jury of Her Peers,” two women accompany their husbands and a county attorney to an isolated house where a farmer named John Wright has been choked to death in his bed with a rope. The chief suspect is Wright’s wife, Minnie, who is in jail awaiting trial. The sheriff’s wife, Mrs. Peters, has come along to gather some personal items for Minnie, and Mrs. Hale has joined her. Early in the story, Mrs. Hale sympathizes with Minnie and objects to the way the male investigators are “snoopin’ round and criticizin’” her kitchen (191). In contrast, Mrs. Peters shows respect for the law, saying that the men are doing “no more than their duty” (191).

In a paper with multiple sources, if you are citing a source more than once in a paragraph, you may omit the author’s name after the first mention in the paragraph as long as it is clear that you are still referring to the same source.

13. Encyclopedia or dictionary entry  Unless an entry in an encyclopedia or a dictionary has an author, the source will be alphabetized in the list of works cited under the word or entry that you consulted (see item 27 on p. 409). Either in your text or in your parenthetical citation, mention the word or entry. No page number is required, since readers can easily look up the word or entry.

The word crocodile has a surprisingly complex etymology (“Crocodile”).

14. Multivolume work  If your paper cites more than one volume of a multivolume work, indicate in the parentheses the volume you are referring to, followed by a colon and the page number.

In his studies of gifted children, Terman describes a pattern of accelerated language acquisition (2: 279).

If you cite only one volume of a multivolume work throughout your paper, you will include the volume number in the list of works cited and will not need to include it in the parentheses. (See the second example in item 26, at the top of p. 409.)

15. Entire work  Use the author’s name in a signal phrase or a parenthetical citation. There is no need to use a page number.

Lane explores the evolution of surveillance in the workplace.
16. Selection in an anthology  Put the name of the author of the selection (not the editor of the anthology) in the signal phrase or the parentheses.

In “Love Is a Fallacy,” the narrator’s logical teachings disintegrate when Polly declares that she should date Petey because “[h]e’s got a raccoon coat” (Shulman 379).

In the list of works cited, the work is alphabetized by the author’s last name, not by the name of the editor of the anthology. (See item 24 on pp. 407–08.)

17. Government document  When a government agency is the author, you will alphabetize it in the list of works cited under the name of the government, such as United States or Great Britain (see item 73 on p. 424). For this reason, you must name the government as well as the agency in your in-text citation.

Online monitoring by the United States Department of the Interior over a one-week period found that employees’ use of “sexually explicit and gambling websites . . . accounted for over 24 hours of Internet use” and that “computer users spent over 2,004 hours accessing game and auction sites” during the same period (3).

18. Historical document  For a historical document, such as the United States Constitution or the Canadian Charter of Rights and Freedoms, provide the document title, neither italicized nor in quotation marks, along with relevant article and section numbers. In parenthetical citations, use common abbreviations such as “art.” and “sec.” and abbreviations of well-known titles (US Const., art. 1, sec. 2).

While the United States Constitution provides for the formation of new states (art. 4, sec. 3), it does not explicitly allow or prohibit the secession of states.

For other historical documents, cite as you would any other work, by the first element in the works cited entry (see item 74 on p. 425).

19. Legal source  For legislative acts (laws) and court cases, name the act or case either in a signal phrase or in parentheses. Italicize the names of cases but not the names of acts.

The Jones Act of 1917 granted US citizenship to Puerto Ricans.
In 1857, Chief Justice Roger B. Taney declared in *Dred Scott v. Sandford* that blacks, whether enslaved or free, could not be citizens of the United States.

20. Visual such as a photograph, map, or chart To cite a visual that has a figure number in the source, use the abbreviation “fig.” and the number in place of a page number in your parenthetical citation: (Manning, fig. 4). Spell out the word “figure” if you refer to it in your text.

To cite a visual that does not have a figure number in a print source, use the visual’s title or a general description in your text and cite the author and page number as for any other source.

For a visual that is not contained in a source such as a book or periodical, identify the visual in your text and then cite it using the first element in the works cited entry: the photographer’s or artist’s name or the title of the work. (See items 69 and 72 on pp. 423 and 424.)

Photographs such as *Woman Aircraft Worker* (Bransby) and *Women Welders* (Parks) demonstrate the US government’s attempt to document the contributions of women on the home front during World War II.

21. E-mail, letter, or personal interview Cite e-mail messages, personal letters, and personal interviews by the name listed in the works cited entry, as you would for any other source. Identify the type of source in your text if you feel it is necessary. (See item 53 on p. 419 and items 83 and 84 on p. 427.)

22. Web site or other electronic source Your in-text citation for an electronic source should follow the same guidelines as for other sources. If the source lacks page numbers but has numbered paragraphs, sections, or divisions, use those numbers with the appropriate abbreviation in your in-text citation: “par.,” “sec.,” “ch.,” “pt.,” and so on. Do not add such numbers if the source itself does not use them; simply give the author or title in your in-text citation.

Julian Hawthorne points out profound differences between his father and Ralph Waldo Emerson but concludes that, in their lives and their writing, “together they met the needs of nearly all that is worthy in human nature” (ch. 4).

23. Indirect source (source quoted in another source) When a writer’s or a speaker’s quoted words appear in a source written by someone else, begin the parenthetical citation with the abbreviation “qtd. in.”

According to Bill Coleman, an executive at Salary.com, “Personal Internet use and casual office conversations often turn into new business ideas or suggestions for gaining operating efficiencies” (qtd. in Frauenheim).
Literary works and sacred texts

Literary works and sacred texts are usually available in a variety of editions. Your list of works cited will specify which edition you are using, and your in-text citation will usually consist of a page number from the edition you consulted (see item 24). When possible, give enough information—such as book parts, play divisions, or line numbers—so that readers can locate the cited passage in any edition of the work (see items 25–27).

24. Literary work without parts or line numbers Many literary works, such as most short stories and many novels and plays, do not have parts or line numbers. In such cases, simply cite the page number.

At the end of Kate Chopin’s “The Story of an Hour,” Mrs. Mallard drops dead upon learning that her husband is alive. In the final irony of the story, doctors report that she has died of a “joy that kills” (25).

25. Verse play or poem For verse plays, give act, scene, and line numbers that can be located in any edition of the work. Use arabic numerals and separate the numbers with periods.

In Shakespeare’s King Lear, Gloucester, blinded for suspected treason, learns a profound lesson from his tragic experience: “A man may see how this world goes / with no eyes” (4.2.148-49).

For a poem, cite the part, stanza, and line numbers, if it has them, separated by periods.

The Green Knight claims to approach King Arthur’s court “because the praise of you, prince, is puffed so high, / And your manor and your men are considered so magnificent” (1.12.258-59).

For poems that are not divided into numbered parts or stanzas, use line numbers. For a first reference, use the word “lines”: (lines 5-8). Thereafter use just the numbers: (12-13).

26. Novel with numbered divisions When a novel has numbered divisions, put the page number first, followed by a semicolon and the book, part, or chapter in which the passage may be found. Use abbreviations such as “bk.,” “pt.,” and “ch.”

One of Kingsolver’s narrators, teenager Rachel, pushes her vocabulary beyond its limits. For example, Rachel complains that being forced to live in the Congo with her missionary family is “a sheer tapestry of justice” because her chances of finding a boyfriend are “dull and void” (117; bk. 2, ch. 10).
27. Sacred text  When citing a sacred text such as the Bible or the Qur’an, name the edition you are using in your works cited entry (see item 28 on p. 409). In your parenthetical citation, give the book, chapter, and verse (or their equivalent), separated with periods. Common abbreviations for books of the Bible are acceptable.

Consider the words of Solomon: “If your enemy is hungry, give him bread to eat; and if he is thirsty, give him water to drink” (Oxford Annotated Bible, Prov. 25.21).

The title of a sacred work is italicized when it refers to a specific edition of the work, as in the preceding example. If you refer to the book in a general sense in your text, neither italicize it nor put it in quotation marks. (See also the note in P10-a, p. 305.)

The Bible and the Qur’an provide allegories that help readers understand how to lead a moral life.

MLA-4b  MLA list of works cited

An alphabetized list of works cited, which appears at the end of your research paper, gives publication information for each of the sources you have cited in the paper. Include only sources that you have quoted, summarized, or paraphrased. (For information about preparing the list, see p. 431; for a sample list of works cited, see p. 440.)

For a directory to the works cited models in this section, see pages 371–72, immediately following the tabbed divider.

General guidelines for works cited in MLA style

In an MLA works cited entry, invert the first author’s name (last name first, followed by a comma and the first name); put all other names in normal order. In titles of works, capitalize all words except articles (a, an, the), prepositions (into, between, and so on), coordinating conjunctions (and, but, or, nor, for, so, yet), and the to in infinitives—unless they are the first or last word of the title or subtitle. Use quotation marks for titles of articles and other short works, such as brief documents from Web sites; italicize titles of books and other long works, such as entire Web sites.

Give the city of publication without a state name. Shorten publishers’ names, usually to the first principal word (“Wiley” for “John Wiley and Sons,” for instance); abbreviate “University” and “Press” in the names of university publishers: UP of Florida. For the date of publication, use the date on the title page or the most recent date on the copyright page.

For all works cited entries, include the medium in which a work was published, produced, or delivered. Usually put the medium at the
end of the entry, capitalized but neither italicized nor in quotation marks. Typical designations for the medium are “Print,” “Web,” “Radio,” “Television,” “CD,” “Film,” “Videocassette,” “DVD,” “Photograph,” “Performance,” “Lecture,” “MP3 file,” and “PDF file.” (See specific items throughout MLA-4b.)

**Listing authors (print and online)**

Alphabetize entries in the list of works cited by authors’ last names (or by title if a work has no author). The author’s name is important because citations in the text of the paper refer to it and readers will look for it at the beginning of an entry in the alphabetized list.

**NAME CITED IN TEXT**

According to Nancy Flynn, . . .

**BEGINNING OF WORKS CITED ENTRY**

Flynn, Nancy.

**1. Single author**

<table>
<thead>
<tr>
<th>author: last name</th>
<th>first name</th>

Name all the authors or name the first author followed by “et al.” (Latin for “and others”). In an in-text citation, use the same form for the authors’ names as you use in the works cited entry. See item 7 on page 392.

4. **Organization as author**

   author: organization name, not abbreviated          title (book)

   For a publication by a government agency, see item 73. Your in-text citation should also treat the organization as the author (see item 8 on p. 392).

5. **Unknown author**

   **Article or other short work**

   title (newspaper article) label newspaper title date of publication page(s) medium

   For other examples of an article with no author and of a television program, see items 13 and 65, respectively.

   **Book, entire Web site, or other long work**

   title (book) city of publication publisher date medium

   *Women of Protest: Photographs from the Records of the National Woman’s Party.*

   Before concluding that the author of an online source is unknown, check carefully (see the tip at the top of p. 391). Also remember
that an organization or a government may be the author (see items 4 and 73).

6. **Two or more works by the same author**  If your list of works cited includes two or more works by the same author, first alphabetize the works by title (ignoring the article *A, An*, or *The* at the beginning of a title). Use the author’s name for the first entry only; for subsequent entries, use three hyphens followed by a period. The three hyphens must stand for exactly the same name or names as in the first entry.

**Articles in periodicals (print)**

This section shows how to prepare works cited entries for articles in print magazines, journals, and newspapers. See “General guidelines” and “Listing authors” on pages 398 and 399 for how to handle basic parts of the entries. See also “Online sources” beginning on page 412 for articles from Web sites and articles accessed through a library’s database.

For articles appearing on consecutive pages, provide the range of pages (see items 7 and 8). When an article does not appear on consecutive pages, give the first page number followed by a plus sign: 32+. For dates requiring a month, abbreviate all but May, June, and July. For an illustrated citation of an article in a periodical, see pages 402–03.

7. **Article in a journal (paginated by volume or by issue)**

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>article title</th>
<th>journal title</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blackburn, Robin.</td>
<td>“Economic Democracy: Meaningful, Desirable, Feasible?”</td>
<td><em>Daedalus</em></td>
</tr>
</tbody>
</table>

8. **Article in a monthly magazine**

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>article title</th>
<th>magazine title</th>
<th>date: month + year</th>
<th>page(s)</th>
</tr>
</thead>
</table>

Print.
Citation at a glance: Article in a periodical (MLA)

To cite an article in a print periodical in MLA style, include the following elements:

1. Author of article
2. Title and subtitle of article
3. Title of periodical
4. Volume and issue number (for journal)
5. Date or year of publication
6. Page number(s) of article
7. Medium
WORKS CITED ENTRY FOR AN ARTICLE IN A PRINT PERIODICAL

For more on citing print periodical articles in MLA style, see pages 401–04.

9. **Article in a weekly magazine**

10. **Article in a daily newspaper** Give the page range of the article. If the article does not appear on consecutive pages, use a plus sign (+) after the first page number. If the city of publication is not obvious from the title of the newspaper, include the city in brackets after the name of the newspaper.

If sections are identified by letter, include the section letter as part of the page number. If sections are numbered, include the section number between the date and the page number, using the abbreviation “sec.”

**Page number with section letter**

**Page number with section number**

11. **Abstract of a journal article** Include the word “Abstract” after the title of the article.

12. **Article with a title in its title**  Use single quotation marks around a title of a short work or a quoted term that appears in an article title. Italicize a title or term normally italicized. (See also P5-c.)

13. **Editorial or other unsigned article**  Begin with the article title and alphabetize the entry by the title in the list of works cited.

14. **Letter to the editor**

15. **Review**  For a review of a book, a film, or another type of work, begin with the name of the reviewer and the title of the review, if it has one. Add the words “Rev. of” and the title of the work reviewed, followed by the author, director, or other significant contributor. Give the publication information for the periodical in which the review appears. If the review has no author and no title, begin with “Rev. of” and alphabetize the entry by the first principal word in the title of the work reviewed.

**Books (print)**

Items 16–33 apply to print books. For online books, see items 41 and 42. For an illustrated citation of a print book, see page 406.

16. **Basic format for a book**

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>book title</th>
<th>city of publication</th>
<th>publisher</th>
<th>date</th>
</tr>
</thead>
</table>

Print.
Take the information about the book from its title page and copyright page. Use a short form of the publisher's name; omit terms such as “Press,” “Inc.,” and “Co.” except when naming university presses (“Howard UP,” for example). If the copyright page lists more than one date, use the most recent one.

17. **Book with an author and an editor**

Author: last name first name
Book title in normal order
Publisher: city of publication

The abbreviation “Ed.” means “Edited by,” so it is the same for one or multiple editors.

18. **Book with an author and a translator**

“Trans.” means “Translated by,” so it is the same for one or multiple translators.

19. **Book with an editor**

Begin with the editor’s name. For one editor, use “ed.” (for “editor”) after the name; for multiple editors, use “eds.” (for “editors”).

20. **Graphic narrative or illustrated book**

For a book that combines text and illustrations, begin your citation with the person you wish to emphasize (writer, illustrator, artist) and list any other contributors after the title of the book. Use the abbreviation “illus.” and other common labels to identify contributors. If the writer and illustrator are the same person, cite the work as you would a book, with no labels.

Citation at a glance: Book (MLA)

To cite a print book in MLA style, include the following elements:

1. Author
2. Title and subtitle
3. City of publication
4. Publisher
5. Date of publication
6. Medium

WORKS CITED ENTRY FOR A PRINT BOOK

For more on citing print books in MLA style, see pages 404–11.
21. **Book with an author using a pseudonym** Give the author's name as it appears on the title page (the pseudonym), and follow it with the author's real name in brackets.

22. **Book in a language other than English** If your readers are not familiar with the language of the book, include a translation of the title, italicized and in brackets. Capitalize the title according to the conventions of the book's language, and give the original publication information.

23. **Entire anthology** An anthology is a collection of works on a common theme, often with different authors for the selections and usually with an editor for the entire volume. (For an anthology with one editor, use the abbreviation “ed.” after the editor's name. For more than one editor, use “eds.”)

24. **One or more selections from an anthology**

*One selection from anthology*

<table>
<thead>
<tr>
<th>author of selection</th>
<th>title of selection</th>
<th>title of anthology</th>
</tr>
</thead>
</table>

*editor(s) of anthology, name(s) in normal order, city of publication, publisher, date, page(s) of selection, medium, Print.*

The abbreviation “Ed.” means “Edited by,” so it is the same for one or multiple editors. For an illustrated citation of a selection from an anthology, see pages 410–11.
Two or more selections, with separate anthology entry

If you use two or more works from the same anthology in your paper, provide an entry for the entire anthology (see item 23) and give a shortened entry for each selection. Use the medium only in the entry for the complete anthology. For an illustrated citation of a selection from an anthology, see pages 410–11.

<table>
<thead>
<tr>
<th>author of selection</th>
<th>title of selection</th>
<th>editor(s) of anthology: last name(s) only</th>
<th>pages(s) of selection</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brouwer, Joel</td>
<td>“The Spots.”</td>
<td>Dumanis and Marvin</td>
<td>51-52</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>editor(s) of anthology</th>
<th>title of anthology</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dumanis, Michael, and Cate Marvin, eds.</td>
<td>Legitimate Dangers: American Poets of the New Century.</td>
</tr>
<tr>
<td>city of publication</td>
<td>publisher</td>
</tr>
<tr>
<td>Louisville: Sarabande</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>author of selection</th>
<th>title of selection</th>
<th>editor(s) of anthology: last name(s) only</th>
<th>page(s) of selection</th>
</tr>
</thead>
<tbody>
<tr>
<td>Keith, Sally</td>
<td>“Orphean Song.”</td>
<td>Dumanis and Marvin</td>
<td>195-96</td>
</tr>
</tbody>
</table>

25. Edition other than the first   Include the number of the edition (1st, 2nd, 3rd, and so on). If the book has a translator or an editor in addition to the author, give the name of the translator or editor before the edition number, using the abbreviation “Trans.” for “Translated by” (see item 18) or “Ed.” for “Edited by” (see item 17).

26. Multivolume work   Include the total number of volumes before the city and publisher, using the abbreviation “vols.” If the volumes were published over several years, give the inclusive dates of publication. The abbreviation “Ed.” means “Edited by,” so it is the same for one or multiple editors.

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>title in normal order</th>
<th>editor in normal order</th>
<th>total volumes</th>
<th>city of publication</th>
<th>publisher</th>
<th>inclusive dates</th>
</tr>
</thead>
<tbody>
<tr>
<td>Stark, Freya</td>
<td>Letters</td>
<td>Ed. Lucy Moorehead</td>
<td>8 vols</td>
<td>Salisbury: Compton</td>
<td>1974-82</td>
<td>Print</td>
</tr>
</tbody>
</table>

If you cite only one of the volumes in your paper, include the volume number before the city and publisher and give the date of publication for that volume. After the date, give the medium of publication followed by the total number of volumes.

**27. Encyclopedia or dictionary entry**  List the author of the entry (if there is one), the title of the entry, the title of the reference work, the edition number (if any), the date of the edition, and the medium. Volume and page numbers are not necessary because the entries in the source are arranged alphabetically and are therefore easy to locate.

**28. Sacred text**  Give the title of the sacred text (taken from the title page), italicized; the editor’s or translator’s name (if any); publication information; and the medium. Add the name of the version, if there is one.

**29. Foreword, introduction, preface, or afterword**

If the book part has a title, include it in quotation marks immediately after the author’s name and before the label for the book part. If the author of the book part is also the author or editor of the complete work, give only the last name of the author the second time it is used.

Citation at a glance: Selection from an anthology (MLA)

To cite a selection from a print anthology in MLA style, include the following elements:

1. Author of selection
2. Title of selection
3. Title and subtitle of anthology
4. Editor(s) of anthology
5. City of publication
6. Publisher
7. Date of publication
8. Page number(s) of selection
9. Medium

FROM COPYRIGHT PAGE

WORKS CITED ENTRY FOR A SELECTION FROM AN ANTHOLOGY

For more on citing selections from anthologies in MLA style, see pages 407–08.

30. **Book with a title in its title**  If the book title contains a title normally italicized, neither italicize the internal title nor place it in quotation marks.

If the title within the title is normally put in quotation marks, retain the quotation marks and italicize the entire book title.

31. **Book in a series**  After the publication information, give the medium of publication and then the series name as it appears on the title page, followed by the series number, if any.

32. **Republished book**  After the title of the book, give the original publication date, followed by the current publication information. If the republished book contains new material, such as an introduction or afterword, include information about the new material after the original date.

33. **Publisher’s imprint**  If a book was published by a division (an imprint) of a publishing company, give the name of the imprint, a hyphen, and the name of the publisher.

**Online sources**

MLA guidelines assume that readers can locate most online sources by entering the author, title, or other identifying information in a search engine or a database. Consequently, the *MLA Handbook* does not require a Web address (URL) in citations for online sources. If your instructor requires one, see the note at the end of item 34.

MLA style calls for a sponsor or a publisher in works cited entries for most online sources. If a source has no sponsor or publisher, use the abbreviation “N.p.” (for “No publisher”) in the sponsor position. If there is no date of publication or update, use “n.d.” (for “no date”) after the sponsor. For an article in an online journal or an article from a database, give page numbers if they are available; if they are not, use the abbreviation “n. pag.” (See item 37.)

### 34. Entire Web site

#### Web site with author

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>title of Web site</th>
<th>sponsor of site (personal page)</th>
<th>update</th>
<th>medium</th>
</tr>
</thead>
</table>

**date of access:**

#### Web site with organization (group) as author

<table>
<thead>
<tr>
<th>organization name: not abbreviated</th>
<th>title of Web site</th>
<th>sponsor: abbreviated update medium</th>
</tr>
</thead>
</table>

**date of access:**

#### Web site with no author

<table>
<thead>
<tr>
<th>title of Web site</th>
<th>sponsor of site</th>
<th>update</th>
<th>medium</th>
</tr>
</thead>
</table>

**date of access:**

#### Web site with editor

See item 19 (p. 405) for listing the name(s) of editor(s).

<table>
<thead>
<tr>
<th>title of Web site</th>
<th>sponsor of site</th>
<th>update</th>
<th>medium</th>
</tr>
</thead>
</table>

**Web site with no title**

Use the label “Home page” or another appropriate description in place of a title.

**NOTE:** If your instructor requires a URL for Web sources, include the URL, enclosed in angle brackets, at the end of the entry. When a URL in a works cited entry must be divided at the end of a line, break it after a slash. Do not insert a hyphen.

**35. Short work from a Web site** Short works include articles, poems, and other documents that are not book length or that appear as internal pages on a Web site. For an illustrated citation of a short work from a Web site, see pages 414–15.

**Short work with author**

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>title of short work</th>
<th>title of Web site</th>
<th>sponsor</th>
<th>date of access:</th>
<th>medium</th>
</tr>
</thead>
</table>

**Short work with no author**

<table>
<thead>
<tr>
<th>title of short work</th>
<th>title of Web site</th>
<th>sponsor of site</th>
<th>date of access:</th>
<th>medium</th>
</tr>
</thead>
</table>

**36. Web site with an author using a pseudonym** Begin the entry with the pseudonym and add the author’s or creator’s real name, if known, in brackets. Follow with the information required for a Web site or a short work from a Web site (see item 34 or 35).

**37. Article in an online journal**

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>article title</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>journal title</th>
<th>volume, issue</th>
<th>year</th>
<th>paginated</th>
<th>date of access:</th>
</tr>
</thead>
</table>
Citation at a glance: Short work from a Web site (MLA)

To cite a short work from a Web site in MLA style, include the following elements:

1. Author of short work (if any)
2. Title of short work
3. Title of Web site
4. Sponsor of Web site (“N.p.” if none)
5. Update date (“n.d.” if none)
6. Medium
7. Date you accessed the source
WORKS CITED ENTRY FOR A SHORT WORK FROM A WEB SITE

For more on citing sources from Web sites in MLA style, see pages 412–13.

38. Article in an online magazine
Give the author; the title of the article, in quotation marks; the title of the magazine, italicized; the sponsor or publisher of the site (use “N.p.” if there is none); the date of publication; the medium; and your date of access.

39. Article in an online newspaper
Give the author; the title of the article, in quotation marks; the title of the newspaper, italicized; the sponsor or publisher of the site (use “N.p.” if there is none); the date of publication; the medium; and your date of access.

Smith, Andrew D. “Poll: More than 70% of US Workers Use Internet on the Job.”

40. Work from a database
For a source retrieved from a library’s subscription database, first list the publication information for the source (see items 7–15) and then provide information about the database. For an illustrated citation of an article from a database, see page 416.

Citation at a glance: Article from a database (MLA)

To cite an article from a database in MLA style, include the following elements:

1. Author of article
2. Title of article
3. Title of periodical
4. Volume and issue numbers (for journal)
5. Date or year of publication
6. Page number(s) of article (“n. pag.” if none)
7. Name of database
8. Medium
9. Date you accessed the source

WORKS CITED ENTRY FOR AN ARTICLE FROM A DATABASE

Kranz, David L. “Tracking the Sounds of Franco Zeffirelli’s The Taming of the Shrew.”

For more on citing articles from a database in MLA style, see item 40.
41. Online book-length work  

Cite an online book or an online book-length work, such as a play or a long poem, as you would a short work from a Web site (see item 35), but italicize the title of the work.

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>title of long poem</th>
<th>title of Web site</th>
<th>sponsor of site</th>
<th>update medium</th>
</tr>
</thead>
</table>

Give the print publication information for the work, if available (see items 16–33), followed by the title of the Web site, the medium, and your date of access.

<table>
<thead>
<tr>
<th>author: last name first</th>
<th>book title</th>
<th>editor of original book</th>
<th>city of publication</th>
<th>date of publication</th>
<th>title of Web site</th>
<th>medium</th>
<th>date of access</th>
</tr>
</thead>
</table>

42. Part of an online book  

Begin as for a part of a print book (see item 29 on p. 409). If the online book part has no page numbers, use “N. pag.” following the publication information. End with the Web site on which the work is found, the medium, and your date of access.

43. Digital archives  

Digital archives are online collections of documents or records—books, letters, photographs, data—that have been converted to digital form. Cite publication information for the original document, if it is available, using the models throughout section MLA-4b. Then give the location of the document, if any, neither italicized nor in quotation marks; the name of the archive, italicized; the medium (“Web”); and your date of access.

44. **Entry in an online reference work**  
Give the author of the entry, if there is one. Otherwise begin with the title of the entry, in quotation marks. Then give the title of the site; the sponsor and the update date (use “n.d.” if there is none); the medium; and your date of access.

45. **Online poem**  
Cite as you would a short work from a Web site (item 35) or part of an online book (item 42).

46. **Entire blog (Weblog)**  
Cite a blog as you would an entire Web site (see item 34).

47. **Entry or comment in a blog (Weblog)**  
Cite an entry or a comment (a response to an entry) in a blog as you would a short work from a Web site (see item 35). If the comment or entry has no title, use the label “Weblog entry” or “Weblog comment.” Follow with the remaining information as for an entire blog in item 46.

48. **Academic course or department home page**  
Cite as a short work from a Web site (see item 35). For a course home page, begin with the name of the instructor and the title of the course or title of the page (use “Course home page” if there is no other title). For a department home page, begin with the name of the department and the label “Dept. home page.”

49. **Online video clip**  
Cite as you would a short work from a Web site (see item 35).

<table>
<thead>
<tr>
<th>author</th>
<th>title</th>
<th>sponsor</th>
<th>update</th>
<th>medium</th>
</tr>
</thead>
<tbody>
<tr>
<td>Murphy, Beth.</td>
<td>“Tips for a Good Profile Piece.”</td>
<td>YouTube</td>
<td>7 Sept. 2008</td>
<td>Web</td>
</tr>
</tbody>
</table>

**date of access:**

19 Apr. 2010

50. **Online abstract**  
Cite as you would an abstract of a journal article (see item 11), giving whatever print information is available, followed by the medium and your date of access. If you found the abstract in an online periodical database, include the name of the database after the print publication information (see item 40).

51. **Online editorial or letter to the editor**  
Cite as you would an editorial or a letter to the editor in a print publication (see item 13 or 14), followed by information for a short work from a Web site (see item 35).

52. **Online review**  
Begin the entry as you would for a review in a magazine or newspaper (see item 15). If the review is published in print as well as online, first give publication information as for an article in a periodical (see items 7–10). Then add the Web site on which the review appears, the medium (“Web”), and your date of access. If the review is published only on the Web, give the information required for a short work from a Web site (see item 35). If you found the review in a database, cite as in item 40.

53. **E-mail message**  
Begin with the writer’s name and the subject line. Then write “Message to” followed by the name of the recipient. End with the date of the message and the medium (“E-mail”).

54. Posting to an online discussion list  When possible, cite archived versions of postings. If you cannot locate an archived version, keep a copy of the posting for your records. Begin with the author’s name, followed by the title or subject line, in quotation marks (use the label “Online posting” if the posting has no title). Then proceed as for a short work from a Web site (see item 35).

55. Entry in a wiki  A wiki is an online reference that is openly edited by its users. Treat an entry in a wiki as you would a short work from a Web site (see item 35). Because wiki content is, by definition, collectively edited and can be updated frequently, do not include an author. Give the title of the entry; the name of the wiki, italicized; the sponsor or publisher of the wiki (use “N.p.” if there is none); the date of the last update; the medium; and your date of access.

Audio and visual sources (including online versions)

56. Digital file  A digital file is any document or image that exists in digital form, independent of a Web site. To cite a digital file, begin with information required for the source (such as a photograph, a report, a sound recording, or a radio program), following the guidelines throughout MLA-4b. Then for the medium, indicate the type of file: “JPEG file,” “PDF file,” “MP3 file,” and so on.

<table>
<thead>
<tr>
<th>photographer</th>
<th>photograph title</th>
<th>date of composition</th>
<th>location of photograph</th>
<th>medium:</th>
<th>file type</th>
</tr>
</thead>
</table>

MP3 file.

57. **Podcast**  If you view or listen to a podcast online, cite it as you would a short work from a Web site (see item 35). If you download the podcast and view or listen to it on a computer or portable player, cite it as a digital file (see item 56).

**Podcast online**

**Podcast downloaded as digital file**

58. **Musical score**  For both print and online versions, begin with the composer's name; the title of the work, italicized (unless it is named by form, number, and key); and the date of composition. For a print source, give the place of publication; the name of the publisher and date of publication; and the medium. For an online source, give the title of the Web site; the publisher or sponsor of the site; the date of Web publication; the medium; and your date of access.

59. **Sound recording**  Begin with the name of the person you want to emphasize: the composer, conductor (“Cond.”), or performer (“Perf.”). For a long work, give the title, italicized (unless it is named by form, number, and key); the names of pertinent artists (such as performers, readers, or musicians); and the orchestra and conductor, if relevant. End with the manufacturer, the date, and the medium.

Warner, 1996. CD.

For a song, put the title in quotation marks. If you include the name of the album or CD, italicize it.

Blige, Mary J. “Be without You.” *The Breakthrough.* Geffen, 2005. CD.

60. **Film**  Begin with the title, italicized. Then give the director and the lead actors (“Perf.”) or narrator (“Narr.”); the distributor; the year
of the film’s release; and the medium (“Film,” “Videocassette”). If your paper emphasizes a person or category of people involved with the film, you may begin with those names and titles (see item 61).

<table>
<thead>
<tr>
<th>movie title</th>
<th>director</th>
<th>major performers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frozen River</td>
<td>Courtney Hunt</td>
<td>Melissa Leo, Charlie McDermott, and Misty Upham.</td>
</tr>
</tbody>
</table>

61. DVD For a film on DVD, cite as you would a film (see item 60), giving “DVD” as the medium.

For any other work on DVD, such as an educational work or a game, cite as you would a film, giving whatever information is available about the author, director, distributor, and so on.

Across the Drafts: Students and Teachers Talk about Feedback. Harvard Expository Writing Program, 2005. DVD.

62. Special feature on a DVD Begin with the title of the feature, in quotation marks, and the names of any important contributors, as for films or DVDs (item 60 or 61). End with information about the DVD, as in item 61, including the disc number, if any.

63. CD-ROM Treat a CD-ROM as you would any other source, but add the medium (“CD-ROM”).

64. Computer software or video game List the developer or author of the software (if any); the title, italicized; the distributor and date of publication; and the platform or medium.

65. Radio or television program Begin with the title of the radio segment or television episode (if there is one), in quotation marks. Then give the title of the program or series, italicized; relevant information
about the program, such as the writer (“By”), director (“Dir.”), performers (“Perf.”), or narrator (“Narr.”); the network; the local station (if any) and location; the date of broadcast; and the medium (“Television,” “Radio”). For a program you accessed online, after the information about the program give the network, the original broadcast date, the title of the Web site, the medium (“Web”), and your date of access.

66. Radio or television interview Begin with the name of the person who was interviewed, followed by the word “Interview” and the interviewer’s name, if relevant. End with information about the program as in item 65.

67. Live performance For a live performance of a concert, a play, a ballet, or an opera, begin with the title of the work performed, italicized. Then give the author or composer of the work (“By”); relevant information such as the director (“Dir.”), the choreographer (“Chor.”), the conductor (“Cond.”), or the major performers (“Perf.”); the orchestra or the theater, ballet, or opera company, if any; the theater and location; the date of the performance; and the label “Performance.”

68. Lecture or public address Begin with the speaker’s name, followed by the title of the lecture (if any), in quotation marks; the organization sponsoring the lecture; the location; the date; and a label such as “Lecture” or “Address.”

69. Work of art Cite the artist’s name; the title of the artwork, italicized; the date of composition; the medium of composition (for instance, “Lithograph on paper,” “Photograph,” “Charcoal on paper”); and the
institution and city in which the artwork is located. For artworks found online, omit the medium of composition and include the title of the Web site, the medium (“Web”), and your date of access.

### 70. Cartoon
Give the cartoonist’s name; the title of the cartoon, if it has one, in quotation marks; the label “Cartoon” or “Comic strip”; publication information; and the medium. To cite an online cartoon, instead of publication information give the title of the Web site, the sponsor or publisher, the medium, and your date of access.

### 71. Advertisement
Name the product or company being advertised, followed by the word “Advertised.” Give publication information for the source in which the advertisement appears.

### 72. Map or chart
Cite a map or a chart as you would a book or a short work within a longer work. Use the word “Map” or “Chart” following the title. Add the medium and, for an online source, the sponsor or publisher and the date of access.

### Other sources (including online versions)
This section includes a variety of sources not covered elsewhere. For online sources, consult the appropriate model in this section and also see items 34–55.

### 73. Government document
Treat the government agency as the author, giving the name of the government followed by the name of the
department and the agency, if any. For print sources, add the medium at the end of the entry. For online sources, follow the model for an entire Web site (item 34) or a short work from a Web site (item 35).

74. Historical document To cite a historical document, such as the US Constitution or the Canadian Charter of Rights and Freedoms, begin with the document author, if it has one, and then give the document title, neither italicized nor in quotation marks, and the document date. For a print version, continue as for a selection in an anthology (see item 24) or for a book (with the title not italicized). For an online version, cite as a short work from a Web site (see item 35).

75. Legal source

Legislative act (law)

Begin with the name of the act, neither italicized nor in quotation marks. Then provide the act’s Public Law number; its Statutes at Large volume and page numbers; its date of enactment; and the medium of publication.

Court case
Name the first plaintiff and the first defendant. Then give the volume, name, and page numbers of the law report; the court name; the year of the decision; and publication information. Do not italicize the name of the case. (In the text of the paper, the name of the case is italicized; see item 19 on p. 395.)

76. Pamphlet or brochure Cite as you would a book (see items 16–33).

77. Unpublished dissertation Begin with the author's name, followed by the dissertation title in quotation marks; the abbreviation “Diss.”; the name of the institution; the year the dissertation was accepted; and the medium of the dissertation.

78. Published dissertation For dissertations that have been published in book form, italicize the title. After the title and before the book’s publication information, give the abbreviation “Diss.,” the name of the institution, and the year the dissertation was accepted. Add the medium of publication at the end.

79. Abstract of a dissertation Cite an abstract as you would an unpublished dissertation. After the dissertation date, give the abbreviation DA or DAI (for Dissertation Abstracts or Dissertation Abstracts International), followed by the volume and issue numbers; the year of publication; inclusive page numbers or, if the abstract is not numbered, the item number; and the medium of publication. For an abstract accessed in an online database, give the item number in place of the page number, followed by the name of the database, the medium, and your date of access.

80. **Published proceedings of a conference**  Cite as you would a book, adding the name, date, and location of the conference after the title.

81. **Paper in conference proceedings**  Cite as you would a selection in an anthology (see item 24), giving information about the conference after the title and editors of the conference proceedings (see item 80).

82. **Published interview**  Name the person interviewed, followed by the title of the interview (if there is one). If the interview does not have a title, include the word “Interview” after the interviewee’s name. Give publication information for the work in which the interview was published.

If you wish to include the name of the interviewer, put it after the title of the interview (or after the name of the interviewee if there is no title).

83. **Personal interview**  To cite an interview that you conducted, begin with the name of the person interviewed. Then write “Personal interview” or “Telephone interview,” followed by the date of the interview.

Akufo, Dautey. Personal interview. 11 Apr. 2010.

84. **Personal letter**  To cite a letter that you received, begin with the writer’s name and add the phrase “Letter to the author,” followed by the date. Add the medium (“MS” for “manuscript,” or a handwritten letter; “TS” for “typescript,” or a typed letter).

Primak, Shoshana. Letter to the author. 6 May 2010. TS.
85. Published letter Begin with the writer of the letter, the words “Letter to” and the recipient, and the date of the letter (use “N.d.” if the letter is undated). Then add the title of the collection and proceed as for a selection in an anthology (see item 24).

86. Manuscript Give the author, a title or a description of the manuscript, and the date of composition, followed by the abbreviation “MS” for “manuscript” (handwritten) or “TS” for “typescript.” Add the name and location of the institution housing the material. For a manuscript found online, give the preceding information but omit “MS” or “TS.” Then list the title of the Web site, the medium (“Web”), and your date of access.

MLA-4c MLA information notes (optional)

Researchers who use the MLA system of parenthetical documentation may also use information notes for one of two purposes:

1. to provide additional material that is important but might interrupt the flow of the paper
2. to refer to several sources that support a single point or to provide comments on sources

Information notes may be either footnotes or endnotes. Footnotes appear at the foot of the page; endnotes appear on a separate page at the end of the paper, just before the list of works cited. For either style, the notes are numbered consecutively throughout the paper. The text of the paper contains a raised arabic numeral that corresponds to the number of the note.

TEXT

In the past several years, employees have filed a number of lawsuits against employers because of online monitoring practices.¹

NOTE

¹ For a discussion of federal law applicable to electronic surveillance in the workplace, see Kesan 293.
MLA-5  MLA manuscript format; student research process and sample paper

The following guidelines are consistent with advice given in the *MLA Handbook for Writers of Research Papers*, 7th ed. (New York: MLA, 2009), and with typical requirements for student papers. For a sample MLA paper, see pages 436–40.

**MLA-5a  MLA manuscript format**

*Formatting the paper*

Papers written in MLA style should be formatted as follows.

**Materials and font**  Use good-quality 8½” × 11” white paper. If your instructor does not require a specific font, choose one that is standard and easy to read (such as Times New Roman).

**Title and identification**  MLA does not require a title page. On the first page of your paper, place your name, your instructor’s name, the course title, and the date on separate lines against the left margin. Then center your title. (See p. 436 for a sample first page.)

If your instructor requires a title page, ask for formatting guidelines. A format similar to the one on page 532 may be acceptable.

**Pagination**  Put the page number preceded by your last name in the upper right corner of each page, one-half inch below the top edge. Use arabic numerals (1, 2, 3, and so on).

**Margins, line spacing, and paragraph indents**  Leave margins of one inch on all sides of the page. Left-align the text.

Double-space throughout the paper. Do not add extra space above or below the title of the paper or between paragraphs.

Indent the first line of each paragraph one-half inch from the left margin.

**Capitalization and italics**  In titles of works, capitalize all words except articles (*a, an, the*), prepositions (*to, from, between,* and so on), coordinating conjunctions (*and, but, or, nor, for, so, yet*), and the *to* in infinitives—unless they are the first or last word of the title or subtitle. Follow these guidelines in your paper even if the title appears in all capital or all lowercase letters in the source.
In the text of an MLA paper, when a complete sentence follows a colon, lowercase the first word following the colon unless the sentence is a direct quotation or a well-known expression or principle. (See the examples in item 1 on p. 390.)

Italicize the titles of books, periodicals, and other long works, such as Web sites. Use quotation marks around the titles of periodical articles, short stories, poems, and other short works. (If your instructor prefers underlining, use it consistently in place of italics.)

**Long quotations**  When a quotation is longer than four typed lines of prose or three lines of verse, set it off from the text by indenting the entire quotation one inch from the left margin. Double-space the indented quotation, and do not add extra space above or below it.

Quotation marks are not needed when a quotation has been set off from the text by indenting. See page 436 for an example.

**URLs (Web addresses)**  When you need to break a URL at the end of a line in the text of your paper, break it only after a slash and do not insert a hyphen. For MLA rules on dividing URLs in your list of works cited, see page 431.

**Headings**  MLA neither encourages nor discourages the use of headings and provides no guidelines for their use. If you would like to insert headings in a long essay or research paper, check first with your instructor.

**Visuals**  MLA classifies visuals as tables and figures (figures include graphs, charts, maps, photographs, and drawings). Label each table with an arabic numeral (“Table 1,” “Table 2,” and so on) and provide a clear caption that identifies the subject. Capitalize the caption as you would a title (see P8-c); do not italicize the label and caption or place them in quotation marks. The label and caption should appear on separate lines above the table, flush with the left margin.

For a table that you have borrowed or adapted, give the source below the table in a note like the following:

For each figure, place the figure number (using the abbreviation “Fig.”) and a caption below the figure, flush left. Capitalize the caption as you would a sentence; include source information following the caption. (When referring to the figure in your paper, use the abbreviation “fig.” in parenthetical citations; otherwise spell out the word.) See page 439 for an example of a figure in a paper.
Place visuals in the text, as close as possible to the sentences that relate to them, unless your instructor prefers that visuals appear in an appendix.

**Preparing the list of works cited**

Begin the list of works cited on a new page at the end of the paper. Center the title “Works Cited” about one inch from the top of the page. Double-space throughout. See page 440 for a sample list of works cited.

**Alphabetizing the list** Alphabetize the list by the last names of the authors (or editors); if a work has no author or editor, alphabetize by the first word of the title other than A, An, or The.

If your list includes two or more works by the same author, use the author’s name for the first entry only. For subsequent entries, use three hyphens followed by a period. List the titles in alphabetical order. (See item 6 on p. 401.)

**Indenting** Do not indent the first line of each works cited entry, but indent any additional lines one-half inch. This technique highlights the beginning of each entry, making it easy for readers to scan the alphabetized list. See page 440.

**URLs (Web addresses)** If you need to include a URL in a works cited entry and it must be divided across lines, break the URL only after a slash. Do not insert a hyphen at the end of the line. Insert angle brackets around the URL. (See the note following item 34 on p. 413.) If your word processing program automatically turns URLs into links (by underlining them and changing the color), turn off this feature.

**MLA-5b Highlights of one student’s research process**

The following pages describe key steps in student writer Anna Orlov’s research process, from selecting a research question to documenting sources. At each step, cross-references in the margins point to more discussion and examples elsewhere in the handbook. Samples from Orlov’s process illustrate strategies and skills she used to create an accurate and effective essay. See pages 436–40 for Orlov’s final paper.
Making the most of your handbook
Highlights of one student’s research process (MLA style)

Anna Orlov, a student in a composition class, was assigned a research essay related to technology and the American workplace. The assignment called for her to use a variety of print and electronic sources and to follow MLA style. She developed some questions and strategies to guide her research and writing.

“How do I begin a research paper?”
Before getting started, Orlov worked with a writing tutor to break her research plan into several stages. (Section numbers in blue refer to relevant discussions throughout the book.)

- Ask worthwhile questions about my topic.  
  C1-b, R1-a
- Talk with a reference librarian about useful types of sources and where to find them.  
  R1-b
- Consider how each source can contribute to my paper.  
  R2-a
- Decide which search results are worth a closer look.  
  R2-b
- Evaluate the sources.  
  R2-c, R2-d
- Take notes and keep track of the sources.  
  R3
- Write a working thesis.  
  C1-c, MLA-1a
- Write a draft and integrate sources.  
  C2, MLA-3, MLA-4a
- Document sources.  
  MLA-4

Orlov began by jotting down her research question: Is Internet surveillance in the workplace fair or unfair to employees? She thought the practice might be unfair but wanted to consider all sides of the issue. Orlov knew she would have to be open-minded and flexible and revisit her main ideas as she examined the information and arguments in her sources.

“What sources do I need, and where should I look for them?”
Orlov worked with a reference librarian to develop a search strategy. She looked for sources that would provide that background, evidence, and counterevidence.

Library databases Because her topic was current, Orlov turned to her library’s subscription databases for trustworthy, scholarly, up-to-date articles with concrete examples of workplace Internet surveillance.

Library catalogs Orlov looked for recently published books that could offer in-depth context, including the history of online monitoring and the laws governing workplace surveillance. One book on the topic had the subject heading “electronic monitoring in the workplace.” Using that heading as a search term, Orlov found a more focused list of books.
The Web  Using a general search engine, Orlov found Web sites, articles, and government publications that would explain the software used by employers and various opinions held by those who use the Internet and e-mail in the workplace.

“What search terms should I use?”
Orlov asked a librarian to help her conduct a narrower search with her library’s general periodical database. She could count on the database for fewer, more reliable results than an Internet search could provide.

<table>

<tbody>
<tr>
<td>employee</td>
<td>Past five years</td>
</tr>
<tr>
<td>internet use</td>
<td>Number of results</td>
</tr>
<tr>
<td>surveillance</td>
<td>20</td>
</tr>
</tbody>
</table>

“How do I select sources from my search results?”
Orlov used several criteria to decide which results from her general periodical database search were worth a closer look. Would a source

- be relevant to her topic?
- provide authoritative support?
- provide background information?
- offer a range of views or evidence that Orlov could address when forming her argument?

DATABASE SCREEN: SEARCH RESULTS

The *Wall Street Journal Online*, March 9, 2005, Pui-Wing Tam et al.

“Snooping Bosses; Electronic Surveillance Program”
The *Progressive*, February 1, 2006: 14, Barbara Ehrenreich

“Cyber-Working or Cyber-Shirking? A First Principles Examination of Electronic Privacy in the Workplace”
"How do I evaluate my sources?"

After Orlov had conducted several searches and narrowed her list of results, she downloaded her sources and began evaluating them. She wanted to see what evidence and claims she would need to address to strengthen her argument.

She looked carefully at an article in eWeek, an online business computing magazine. To keep track of her thoughts about the author’s text, she made notes in the margins as she read. Taking good notes would help her to begin forming her own lines of argument and avoid plagiarism.

**Wasting Away on the Web**

*Opinion: More employers are taking workers’ web use seriously.*

By Chris Gonsalves  
2005 09 06

Visitors: 3818; pg. 20

The issue of IT surveillance was driven home last month when L LCD.com and Am erica Online released a survey of 10,000 American workers, many of whom admitted that goofing off on the Internet was their primary method of skimming away the workday. In a sign of the times, it beat out con vat ing with co-workers, 48 percent to 23 percent.

While bosses can easily detect and interrupt water-cooler chatter, the employees who are shopping at Lands’ End or joining with fellow fantasy baseball managers may actually appear to be working. Thwarting the activity is a technology challenge, and it’s one that more and more enterprises are taking seriously, despite resistance from privacy advocates and some employees themselves.

According to the American Management Association, 78 percent of large U.S. employers are regularly checking workers’ e-mail messages, Internet use, computer files and phone calls. Nearly half of such employers store employees’ e-mail messages for review. The AMA also found that 55 percent of enterprises had disciplined employees for misuse of e-mail or the Internet at work, and 37 percent had actually fired someone over such offenses.

According to a recent poll of workers in technology-related fields published by the executive recruiting company PPC, 81 percent said they felt their bosses had the right to cyber-spy on them, but only with consent. Just 28 percent felt IT had the right to monitor their activity without consent, and only 1 percent said an employer never has the right to monitor Internet use.

“It’s not surprising that companies want to assure that their employees’ time is predominantly spent on work-related computer usage,” said PPC President Ron Wurzel. “The majority of employees ..., would like to be informed, so it is always in the company’s best interest to have an Internet usage policy clearly outlining the company’s expectations, which all employees sign upon hiring.”

As the stakes grow beyond a few wasted man-hours and some misappropriated bandwidth, it grows increasingly important for IT to let everyone in the company know they might be watched.

“How do I integrate sources into my paper?”

After reading and evaluating a number of sources, Orlov wrote her working thesis: *Though companies may have legitimate reasons to monitor employees’ Internet usage, electronic surveillance is more unfair than beneficial to employees since it threatens their privacy.* She then sketched an informal plan to organize her ideas and began writing a rough draft. As she wrote and revised, she integrated sources from her research.

For example, Orlov had selected a book on electronic surveillance in the workplace, written by Frederick Lane III. She looked through the table of contents and selected a few chapters that seemed relevant to her working thesis. She read the chapters for ideas and information that she could paraphrase, summarize, or quote to provide background, support her argument, and help her counter the kind of pro-surveillance position that Chris Gonsalves takes in his *eWeek* article.

“How do I keep track of and document my sources?”

Because Orlov took careful notes about publication information and page numbers for source material throughout her research process, she didn’t need to hunt down information as she cited her sources.

She followed the MLA (Modern Language Association) system to document her sources.

**ENTRY IN WORKS CITED LIST**

**MLA-5c  Sample research paper: MLA style**

On the following pages is a research paper on the topic of electronic surveillance in the workplace, written by Anna Orlov, a student in a composition class. Orlov’s paper is documented with in-text citations and a list of works cited in MLA style. Annotations in the margins of the paper draw your attention to Orlov’s use of MLA style and her effective writing.
Online Monitoring: A Threat to Employee Privacy in the Wired Workplace

As the Internet has become an integral tool of businesses, company policies on Internet usage have become as common as policies regarding vacation days or sexual harassment. A 2005 study by the American Management Association and ePolicy Institute found that 76% of companies monitor employees’ use of the Web, and the number of companies that block employees’ access to certain Web sites has increased 27% since 2001 (1). Unlike other company rules, however, Internet usage policies often include language authorizing companies to secretly monitor their employees, a practice that raises questions about rights in the workplace. Although companies often have legitimate concerns that lead them to monitor employees’ Internet usage—from expensive security breaches to reduced productivity—the benefits of electronic surveillance are outweighed by its costs to employees’ privacy and autonomy.

While surveillance of employees is not a new phenomenon, electronic surveillance allows employers to monitor workers with unprecedented efficiency. In his book *The Naked Employee*, Frederick Lane describes offline ways in which employers have been permitted to intrude on employees’ privacy for decades, such as drug testing, background checks, psychological exams, lie detector tests, and in-store video surveillance. The difference, Lane argues, between these old methods of data gathering and electronic surveillance involves quantity:

Technology makes it possible for employers to gather enormous amounts of data about employees, often far beyond what is necessary to satisfy safety or productivity concerns. And the trends that drive technology—faster, smaller, cheaper—make it possible for larger and larger numbers of employers to gather ever-greater amounts of personal data. (3-4)
computers—when they send e-mail, surf the Web, or even arrive at or depart from their workstations—the challenge for both employers and employees is to determine how much is too much.

Another key difference between traditional surveillance and electronic surveillance is that employers can monitor workers' computer use secretly. One popular monitoring method is keystroke logging, which is done by means of an undetectable program on employees' computers. The Web site of a vendor for Spector Pro, a popular keystroke logging program, explains that the software can be installed to operate in “Stealth” mode so that it "does not show up as an icon, does not appear in the Windows system tray, . . . [and] cannot be uninstalled without the Spector Pro password which YOU specify" ("Automatically"). As Lane explains, these programs record every key entered into the computer in hidden directories that can later be accessed or uploaded by supervisors; the programs can even scan for keywords tailored to individual companies (128-29).

Some experts have argued that a range of legitimate concerns justifies employer monitoring of employee Internet usage. As PC World columnist Daniel Tynan points out, companies that don't monitor network traffic can be penalized for their ignorance: "Employees could accidentally (or deliberately) spill confidential information . . . or allow worms to spread throughout a corporate network." The ePolicy Institute, an organization that advises companies about reducing risks from technology, reported that breaches in computer security cost institutions $100 million in 1999 alone (Flynn). Companies also are held legally accountable for many of the transactions conducted on their networks and with their technology. Legal scholar Jay Kesan points out that the law holds employers liable for employees' actions such as violations of copyright laws, the distribution of offensive or graphic sexual material, and illegal disclosure of confidential information (312).

These kinds of concerns should give employers, in certain instances, the right to monitor employee behavior. But employers rushing to adopt surveillance programs might not be adequately weighing the effect such programs can have on employee morale. Employers must consider the possibility that employees will perceive surveillance as a breach of trust that can make them feel like disobedient children, not responsible
adults who wish to perform their jobs professionally and autonomously. Yet determining how much autonomy workers should be given is complicated by the ambiguous nature of productivity in the wired workplace. On the one hand, computers and Internet access give employees powerful tools to carry out their jobs; on the other hand, the same technology offers constant temptations to avoid work. As a 2005 study by Salary.com and America Online indicates, the Internet ranked as the top choice among employees for ways of wasting time on the job; it beat talking with co-workers—the second most popular method—by a margin of nearly two to one (Frauenheim). Chris Gonsalves, an editor for eWeek.com, argues that the technology has changed the terms between employers and employees: "While bosses can easily detect and interrupt water-cooler chatter," he writes, "the employee who is shopping at Land's End or IMing with fellow fantasy baseball managers may actually appear to be working." The gap between behaviors that are observable to managers and the employee's actual activities when sitting behind a computer has created additional motivations for employers to invest in surveillance programs. "Dilbert," a popular cartoon that spoofs office culture, aptly captures how rampant recreational Internet use has become in the workplace (see fig. 1).

But monitoring online activities can have the unintended effect of making employees resentful. As many workers would be quick to point out, Web surfing and other personal uses of the Internet can provide needed outlets in the stressful work environment; many scholars have argued that limiting and policing these outlets can exacerbate tensions between employees and managers. Kesan warns that "prohibiting personal use can seem extremely arbitrary and can seriously harm morale. . . . Imagine a concerned parent who is prohibited from checking on a sick child by a draconian company policy" (315-16). As this analysis indicates, employees can become disgruntled when Internet usage policies are enforced to their full extent.

Additionally, many experts disagree with employers' assumption that online monitoring can increase productivity. Employment law attorney Joseph Schmitt argues that, particularly for employees who are paid a salary rather than an hourly wage, "a company shouldn't care whether employees spend one or 10 hours on the Internet as long as they are
getting their jobs done—and provided that they are not accessing inappropriate sites” (qtd. in Verespej). Other experts even argue that time spent on personal Internet browsing can actually be productive for companies. According to Bill Coleman, an executive at Salary.com, “Personal Internet use and casual office conversations often turn into new business ideas or suggestions for gaining operating efficiencies” (qtd. in Frauenheim). Employers, in other words, may benefit from showing more faith in their employees’ ability to exercise their autonomy.

Employees’ right to privacy and autonomy in the workplace, however, remains a murky area of the law. Although evaluating where to draw the line between employee rights and employer powers is often a duty that falls to the judicial system, the courts have shown little willingness to intrude on employers’ exercise of control over their computer networks. Federal law provides few guidelines related to online monitoring of employees, and only Connecticut and Delaware require companies to disclose this type of surveillance to employees (Tam et al.). “It is unlikely that we will see a legally guaranteed zone of privacy in the American workplace,” predicts Kesan (293). This reality leaves employees and employers to sort the potential risks and benefits of technology in contract agreements and terms of employment. With continuing advances in technology, protecting both employers and employees will require greater awareness of these programs, better disclosure to employees, and a more public discussion about what types of protections are necessary to guard individual freedoms in the wired workplace.

70. Computer software or video game, 483

This tabbed section shows how to document sources in APA style for the social sciences and fields like nursing and business, and in CMS (Chicago) style for history and some humanities classes. It also includes discipline-specific advice on three important topics: supporting a thesis, citing sources and avoiding plagiarism, and integrating sources.

NOTE: For advice on finding and evaluating sources and on managing information in courses across the disciplines, see the tabbed section R, Researching.

APA Papers

Many writing assignments in the social sciences are either reports of original research or reviews of the literature (previously published research) on a particular topic. Often an original research report contains a “review of the literature” section that places the writer’s project in the context of previous research.
Most social science instructors will ask you to document your sources with the American Psychological Association (APA) system of in-text citations and references described in APA-4. You face three main challenges when writing a social science paper that draws on sources: (1) supporting a thesis, (2) citing your sources and avoiding plagiarism, and (3) integrating quotations and other source material.

Examples in this section appear in APA style and are drawn from one student’s research for a review of the literature on treatments for childhood obesity. Luisa Mirano’s complete paper appears on pages 488–96.

### APA-1 Supporting a thesis

Most assignments ask you to form a thesis, or main idea, and to support that thesis with well-organized evidence. In a paper reviewing the literature on a topic, this thesis analyzes the often competing conclusions drawn by a variety of researchers.

#### APA-1a Form a working thesis.

Once you have read a variety of sources and considered your issue from different perspectives, you are ready to form a working thesis: a one-sentence (or occasionally a two-sentence) statement of your central idea. (See also C1-c.) Because it is a working, or tentative, thesis, you can remain flexible and revise it as your ideas develop. Ultimately, your thesis will express not just your opinion but your informed, reasoned answer to your research question (see R1-a). Here, for example, is a research question posed by Luisa Mirano, a student in a psychology class, followed by her thesis in answer to that question.

**RESEARCH QUESTION**

Is medication the right treatment for the escalating problem of childhood obesity?

**WORKING THESIS**

Treating cases of childhood obesity with medication alone is too narrow an approach for this growing problem.

Notice that the thesis expresses a view on a debatable issue—an issue about which intelligent, well-meaning people might disagree. The writer’s job is to persuade such readers that this view is worth taking seriously.
APA-1b Organize your ideas.

The American Psychological Association encourages the use of headings to help readers follow the organization of a paper. For an original research report, the major headings often follow a standard model: Method, Results, Discussion. The introduction is not given a heading; it consists of the material between the title of the paper and the first heading.

For a literature review, headings will vary. The student who wrote about treatments for childhood obesity used four questions to focus her research; the questions then became headings in her paper (see pp. 488–96).

APA-1c Use sources to inform and support your argument.

Used thoughtfully, your source materials will make your argument more complex and convincing for readers. Sources can play several different roles as you develop your points.

Providing background information or context

You can use facts and statistics to support generalizations or to establish the importance of your topic, as student writer Luisa Mirano does in her introduction.

In March 2004, U.S. Surgeon General Richard Carmona called attention to a health problem in the United States that, until recently, has been overlooked: childhood obesity. Carmona said that the “astounding” 15% child obesity rate constitutes an “epidemic.” Since the early 1980s, that rate has “doubled in children and tripled in adolescents.” Now more than 9 million children are classified as obese.

Explaining terms or concepts

If readers are unlikely to be familiar with a word, a phrase, or an idea important to your topic, you must explain it for them. Quoting or paraphrasing a source can help you define terms and concepts in accessible
language. Luisa Mirano uses a scholarly source to explain how one of the major obesity drugs functions.

> Sibutramine suppresses appetite by blocking the reuptake of the neurotransmitters serotonin and norepinephrine in the brain (Yanovski & Yanovski, 2002, p. 594).

**Supporting your claims**

As you draft your argument, make sure to back up your assertions with facts, examples, and other evidence from your research (see also A2-e). Luisa Mirano, for example, uses one source’s findings to support her central idea that the medical treatment of childhood obesity has limitations.

> As journalist Greg Critser (2003) noted in his book Fat Land, use of weight-loss drugs is unlikely to have an effect without the proper “support system”—one that includes doctors, facilities, time, and money (p. 3).

**Lending authority to your argument**

Expert opinion can add credibility to your argument (see also A2-e). But don’t rely on experts to make your argument for you. Construct your argument in your own words and, when appropriate, cite the judgment of an authority in the field for support.

> Both medical experts and policymakers recognize that solutions might come not only from a laboratory but also from policy, education, and advocacy. A handbook designed to educate doctors on obesity called for “major changes in some aspects of western culture” (Hoppin & Taveras, 2004, Conclusion section, para. 1).

**Anticipating and countering alternative interpretations**

Do not ignore sources that seem contrary to your position or that offer interpretations different from your own. Instead, use them to give voice to opposing points of view and alternative interpretations before you counter them (see A2-f). Readers often have objections in mind already, whether or not they agree with you. Mirano uses a source to acknowledge value in her opponents’ position that medication alone can successfully treat childhood obesity.

> As researchers Yanovski and Yanovski (2002) have explained, obesity was once considered “either a moral failing or evidence of underlying psychopathology” (p. 592). But this view has shifted: Many medical professionals now consider obesity a biomedical rather than a moral condition, influenced by both genetic
and environmental factors. Yanovski and Yanovski have further noted that the development of weight-loss medications in the early 1990s showed that “obesity should be treated in the same manner as any other chronic disease . . . through the long-term use of medication” (p. 592).

**APA-2 Citing sources; avoiding plagiarism**

Your research paper is a collaboration between you and your sources. To be fair and ethical, you must acknowledge your debt to the writers of those sources. Failure to do so is a form of academic dishonesty known as plagiarism.

Three different acts are considered plagiarism: (1) failing to cite quotations and borrowed ideas, (2) failing to enclose borrowed language in quotation marks, and (3) failing to put summaries and paraphrases in your own words. It’s a good idea to find out how your school defines and addresses academic dishonesty. (See also R3-c.)

**APA-2a Cite quotations and borrowed ideas.**

Sources are cited for two reasons:

- to tell readers where your information comes from—so that they can assess its reliability and, if interested, find and read the original source
- to give credit to the writers from whom you have borrowed words and ideas

You must cite anything you borrow from a source, including direct quotations; statistics and other specific facts; visuals such as tables, graphs, and diagrams; and any ideas you present in a summary or paraphrase.

The only exception is common knowledge—information that your readers may know or could easily locate in any number of reference sources. For example, most general encyclopedias will tell readers that Sigmund Freud wrote *The Interpretation of Dreams* and that chimpanzees can learn American Sign Language.

As a rule, when you have seen certain information repeatedly in your reading, you don’t need to cite it. However, when information has appeared in only a few sources, when it is highly specific (as with statistics), or when it is controversial, you should cite the source.
The American Psychological Association recommends an author-date system of citations. The following is a brief description of how the author-date system often works.

1. The source is introduced by a signal phrase that includes the last name of the author followed by the date of publication in parentheses.
2. The material being cited is followed by a page number in parentheses.
3. At the end of the paper, an alphabetized list of references gives complete publication information for the source.

**IN-TEXT CITATION**

As researchers Yanovski and Yanovski (2002) have explained, obesity was once considered “either a moral failing or evidence of underlying psychopathology” (p. 592).

**ENTRY IN THE LIST OF REFERENCES**

This basic APA format varies for different types of sources. For a detailed discussion and other models, see APA-4.

**APA-2b Enclose borrowed language in quotation marks.**

To indicate that you are using a source’s exact phrases or sentences, you must enclose them in quotation marks unless they have been set off from the text by indenting (see p. 453). To omit the quotation marks is to claim — falsely — that the language is your own. Such an omission is plagiarism even if you have cited the source.

**ORIGINAL SOURCE**

In an effort to seek the causes of this disturbing trend, experts have pointed to a range of important potential contributors to the rise in childhood obesity that are unrelated to media: a reduction in physical education classes and after-school athletic programs, an increase in the availability of sodas and snacks in public schools, the growth in the number of fast-food outlets across the country, the trend toward “super-sizing” food portions in restaurants, and the increasing number of highly processed high-calorie and high-fat grocery products.

According to the Henry J. Kaiser Family Foundation (2004), experts have pointed to a range of important potential contributors to the rise in childhood obesity that are unrelated to media (p. 1).

**Borrowed Language in Quotation Marks**

According to the Henry J. Kaiser Family Foundation (2004), “experts have pointed to a range of important potential contributors to the rise in childhood obesity that are unrelated to media” (p. 1).

**Note:** When quoted sentences are set off from the text by indenting, quotation marks are not needed (see p. 453).

**APA-2c Put summaries and paraphrases in your own words.**

Summaries and paraphrases are written in your own words. A summary condenses information; a paraphrase conveys the information using roughly the same number of words as in the original source. When you summarize or paraphrase, it is not enough to name the source; you must restate the source’s meaning using your own language. (See also R3-c.) You commit plagiarism if you half-copy the author’s sentences—either by mixing the author’s phrases with your own without using quotation marks or by plugging your own synonyms into the author’s sentence structure. The following paraphrases are plagiarized—even though the source is cited—because their language and sentence structure are too close to those of the source.

**Original Source**

In an effort to seek the causes of this disturbing trend, experts have pointed to a range of important potential contributors to the rise in childhood obesity that are unrelated to media.

**Unacceptable Borrowing of Phrases**

According to the Henry J. Kaiser Family Foundation (2004), experts have indicated a range of significant potential contributors to the rise in childhood obesity that are not linked to media (p. 1).

**Unacceptable Borrowing of Structure**

According to the Henry J. Kaiser Family Foundation (2004), experts have identified a variety of key factors causing a rise in childhood obesity, factors that are not tied to media (p. 1).
To avoid plagiarizing an author’s language, resist the temptation to look at the source while you are summarizing or paraphrasing. After you have read the passage you want to paraphrase, set the source aside. Ask yourself, “What is the author’s meaning?” In your own words, state your understanding of the author’s basic point. Return to the source and check that you haven’t used the author’s language or sentence structure or misrepresented the author’s ideas. When you fully understand another writer’s meaning, you can more easily and accurately present those ideas in your own words.

**ACCEPTABLE PARAPHRASE**

A report by the Henry J. Kaiser Family Foundation (2004) described causes other than media for the childhood obesity crisis.

---

**APA–3**  
**Integrating sources**

Quotations, summaries, paraphrases, and facts will help you develop your argument, but they cannot speak for you. You can use several strategies to integrate information from sources into your paper while maintaining your own voice.

**APA–3a Use quotations appropriately.**

In your academic writing, keep the emphasis on your ideas; use your own words to summarize and to paraphrase your sources and to explain your points. Sometimes, however, quotations can be the most effective way to integrate a source.

**WHEN TO USE QUOTATIONS**

- When language is especially vivid or expressive
- When exact wording is needed for technical accuracy
- When it is important to let the debaters of an issue explain their positions in their own words
- When the words of an authority lend weight to an argument
- When the language of a source is the topic of your discussion

**Limiting your use of quotations**  
Although it is tempting to insert many quotations in your paper and to use your own words only for connecting
passages, do not quote excessively. It is almost impossible to integrate numerous long quotations smoothly into your own text.

It is not always necessary to quote full sentences from a source. To reduce your reliance on the words of others, you can often integrate language from a source into your own sentence structure.

Carmona (2004) advised the subcommittee that the situation constitutes an “epidemic” and that the skyrocketing statistics are “astounding.”

As researchers continue to face a number of unknowns about obesity, it may be helpful to envision treating the disorder, as Yanovski and Yanovski (2002) suggested, “in the same manner as any other chronic disease” (p. 592).

**Using the ellipsis mark** To condense a quoted passage, you can use the ellipsis mark (three periods, with spaces between) to indicate that you have omitted words. What remains must be grammatically complete.

Roman (2003) reported that “social factors are nearly as significant as individual metabolism in the formation of . . . dietary habits of adolescents” (p. 345).

The writer has omitted the words *both healthy and unhealthy* from the source.

When you want to leave out one or more full sentences, use a period before the three ellipsis dots.

According to Sothern and Gordon (2003), “Environmental factors may contribute as much as 80% to the causes of childhood obesity. . . . Research suggests that obese children demonstrate decreased levels of physical activity and increased psychosocial problems” (p. 104).

Ordinarily, do not use an ellipsis mark at the beginning or at the end of a quotation. Readers will understand that you have taken the quoted material from a longer passage, so such marks are not necessary. The only exception occurs when you have dropped words at the end of the final quoted sentence. In such cases, put three ellipsis dots before the closing quotation mark. Make sure that omissions and ellipsis marks do not distort the meaning of your source.

**Using brackets** Brackets allow you to insert your own words into quoted material. You can insert words in brackets to clarify a confusing reference or to keep a sentence grammatical in your context.

The cost of treating obesity currently totals $117 billion per year—a price, according to the surgeon general, “second only to the cost of [treating] tobacco use” (Carmona, 2004).
To indicate an error such as a misspelling in a quotation, insert [sic], italicized and with brackets around it, right after the error. (See P6-b.)

**Setting off long quotations** When you quote forty or more words from a source, set off the quotation by indenting it one-half inch from the left margin. Use the normal right margin and do not single-space the quotation.

Long quotations should be introduced by an informative sentence, usually followed by a colon. Quotation marks are unnecessary because the indented format tells readers that the passage is taken word-for-word from the source.

Yanovski and Yanovski (2002) have described earlier treatments of obesity that focused on behavior modification:

> With the advent of behavioral treatments for obesity in the 1960s, hope arose that modification of maladaptive eating and exercise habits would lead to sustained weight loss, and that time-limited programs would produce permanent changes in weight. Medications for the treatment of obesity were proposed as short-term adjuncts for patients, who would presumably then acquire the skills necessary to continue to lose weight, reach “ideal body weight,” and maintain a reduced weight indefinitely. (p. 592)

Notice that at the end of an indented quotation the parenthetical citation goes outside the final mark of punctuation. (When a quotation is run into your text, the opposite is true. See the sample citations on p. 452.)

**APA-3b Use signal phrases to integrate sources.**

Whenever you include a paraphrase, summary, or direct quotation of another writer’s work in your paper, prepare your readers for it with a signal phrase. A signal phrase usually names the author of the source, gives the publication year in parentheses, and often provides some context. It commonly appears before the source material. To vary your sentence structure, you may decide to interrupt source material with a signal phrase or place the signal phrase after your paraphrase, summary, or direct quotation. It is generally acceptable in the social sciences to call authors by their last name only, even on a first mention. If your paper refers to two authors with same last name, use initials as well.
Integrating sources

When you write a signal phrase, choose a verb that is appropriate for the way you are using the source (see APA-1c). Are you providing background, explaining a concept, supporting a claim, lending authority, or refuting an argument? See the chart on this page for a list of verbs commonly used in signal phrases. Note that APA requires using verbs in the past tense or present perfect tense (explained or has explained) to introduce source material. Use the present tense only for discussing the results of an experiment (the results show) or knowledge that has been clearly established (researchers agree).

Marking boundaries

Readers need to move from your words to the words of a source without feeling a jolt. Avoid dropping direct quotations into your text without warning. Instead, provide clear signal phrases, including at least the author’s name and the year of publication. Signal phrases mark the boundaries between source material and your

---

**Using signal phrases in APA papers**

To avoid monotony, try to vary both the language and the placement of your signal phrases.

**Model signal phrases**

In the words of Carmona (2004), “...”
As Yanovski and Yanovski (2002) have noted, “...”
Hoppin and Taveras (2004), medical researchers, pointed out that “...”
“...,” claimed Critser (2003).
“...,” wrote Duenwald (2004), “...”
Researchers McDuffie et al. (2003) have offered a compelling argument for this view: “...”
Hilts (2002) answered objections with the following analysis: “...”

**Verbs in signal phrases**

<table>
<thead>
<tr>
<th>admitted</th>
<th>contended</th>
<th>reasoned</th>
</tr>
</thead>
<tbody>
<tr>
<td>agreed</td>
<td>declared</td>
<td>refuted</td>
</tr>
<tr>
<td>argued</td>
<td>denied</td>
<td>rejected</td>
</tr>
<tr>
<td>asserted</td>

<td>wrote</td>
</tr>
</tbody>
</table>

When you write a signal phrase, choose a verb that is appropriate for the way you are using the source (see APA-1c). Are you providing background, explaining a concept, supporting a claim, lending authority, or refuting an argument? See the chart on this page for a list of verbs commonly used in signal phrases. Note that APA requires using verbs in the past tense or present perfect tense (explained or has explained) to introduce source material. Use the present tense only for discussing the results of an experiment (the results show) or knowledge that has been clearly established (researchers agree).
own words; they can also tell readers why a source is worth quoting. (The signal phrase is highlighted in the second example.)

**DROPPED QUOTATION**

Obesity was once considered in a very different light. “For many years, obesity was approached as if were either a moral failing or evidence of underlying psychopathology” (Yanovski & Yanovski, 2002, p. 592).

**QUOTATION WITH SIGNAL PHRASE**

Obesity was once considered in a very different light. As researchers Yanovski and Yanovski (2002) have explained, obesity was widely thought of as “either a moral failing or evidence of underlying psychopathology” (p. 592).

**Using signal phrases with summaries and paraphrases**

As with quotations, you should introduce most summaries and paraphrases with a signal phrase that mentions the author and the year and places the material in the context of your argument. Readers will then understand where the summary or paraphrase begins.

Without the signal phrase (highlighted) in the following example, readers might think that only the last sentence is being cited, when in fact the whole paragraph is based on the source.

Carmona (2004) advised a Senate subcommittee that the problem of childhood obesity is dire and that the skyrocketing statistics—which put the child obesity rate at 15%—are cause for alarm. More than 9 million children, double the number in the early 1980s, are classified as obese. Carmona warned that obesity can cause myriad physical problems that only worsen as children grow older.

There are times, however, when a summary or a paraphrase does not require a signal phrase naming the author. When the context makes clear where the cited material begins, you may omit the signal phrase and include the author’s name and the year in parentheses. Unless the work is short, also include the page number in the parentheses.

**Integrating statistics and other facts**

When you are citing a statistic or another specific fact, a signal phrase is often not necessary. In most cases, readers will understand that the citation refers to the statistic or fact (not the whole paragraph).

In purely financial terms, the drugs cost more than $3 a day on average (Duenwald, 2004).
There is nothing wrong, however, with using a signal phrase to introduce a statistic or another fact.

Duenwald (2004) reported that the drugs cost more than $3 a day on average.

**Putting source material in context**

Readers should not have to guess why source material appears in your paper. If you use another writer’s words, you must explain how they relate to your point. In other words, you must put the source in context. It’s a good idea to embed a quotation between sentences of your own, introducing it with a signal phrase and following it up with interpretive comments that link the quotation to your paper’s argument. (See also APA-3c.)

**QUOTATION WITH EFFECTIVE CONTEXT**

A report by the Henry J. Kaiser Family Foundation (2004) outlined trends that may have contributed to the childhood obesity crisis, including food advertising for children as well as a reduction in physical education classes . . . , an increase in the availability of sodas and snacks in public schools, the growth in the number of fast-food outlets . . . , and the increasing number of highly processed high-calorie and high-fat grocery products. (p. 1)

Addressing each of these areas requires more than a doctor armed with a prescription pad; it requires a broad mobilization not just of doctors and concerned parents but of educators, food industry executives, advertisers, and media representatives.

**APA-3c Synthesize sources.**

When you synthesize multiple sources in a research paper, you create a conversation about your research topic. You show readers that your argument is based on your active analysis and integration of ideas, not just a list of quotations and paraphrases. Your synthesis will show how your sources relate to one another; one source may support, extend, or counter the ideas of another. Readers should be able to see how each one functions in your argument (see R2-a).

**Considering how sources relate to your argument**

Before you integrate sources and show readers how they relate to one another, consider how each one might contribute to your own argument. As student writer Luisa Mirano became more informed through
her research about treatments for childhood obesity, she asked herself these questions: What do I think about the various treatments for childhood obesity? Which sources might support my ideas? Which sources might help extend or illustrate the points I want to make? What common counterarguments do I need to address to strengthen my position? Mirano kept these questions in mind as she read and annotated sources.

**Placing sources in conversation**

When you synthesize sources, you show readers how the ideas of one source relate to those of another by connecting and analyzing the ideas in the context of your argument. Keep the emphasis on your own writing. After all, you’ve done the research and thought through the issues, so you should control the conversation. The thread of your argument should be easy to identify and to understand, with or without your sources.

**SAMPLE SYNTHESIS (DRAFT)**

Medical treatments have clear costs for individual patients, including unpleasant side effects, little information about long-term use, and uncertainty that they will yield significant weight loss. The financial burden is heavy as well; the drugs cost more than $3 a day on average (Duenwald, 2004). In each of the clinical trials, use of medication was accompanied by expensive behavioral therapies, including counseling, nutrition education, fitness advising, and monitoring. As Critser (2003) noted in his book *Fat Land*, use of weight-loss drugs is unlikely to have an effect without the proper “support system”—one that includes doctors, facilities, time, and money (p. 3). For many families, this level of care is prohibitively expensive.

Both medical experts and policymakers recognize that solutions might come not only from a laboratory but also from policy, education, and advocacy. A handbook designed to educate doctors on obesity called for “major changes in some aspects of western culture” (Hoppin & Taveras, 2004, Conclusion section, para. 1). Solving the childhood obesity problem will require broad mobilization of doctors and concerned parents and also of educators, food industry executives, advertisers, and media representatives.
In this draft, Mirano uses her own analyses to shape the conversation among her sources. She does not simply string quotations and statistics together or allow her sources to overwhelm her writing. The final sentence, written in her own voice, gives her an opportunity to explain to readers how her sources support and extend her argument.

When synthesizing sources, ask yourself these questions:

- Which sources inform, support, or extend your argument?
- Have you varied the functions of sources—to provide background, explain concepts, lend authority, and anticipate counterarguments? Do your signal phrases indicate these functions?
- Do you explain how your sources support your argument?
- Do you connect and analyze sources in your own voice?
- Is your own argument easy to identify and to understand, with or without your sources?

In most social science classes, you will be asked to use the APA system for documenting sources, which is set forth in the *Publication Manual of the American Psychological Association*, 6th ed. (Washington: APA, 2010). APA recommends in-text citations that refer readers to a list of references.

An in-text citation usually gives the author of the source (often in a signal phrase), the year of publication, and at times a page number in parentheses. At the end of the paper, a list of references provides publication information about the source (see p. 496 for a sample list). The direct link between the in-text citation and the entry in the reference list is highlighted in green in the following example.

**IN-TEXT CITATION**

Yanovski and Yanovski (2002) reported that “the current state of the treatment for obesity is similar to the state of the treatment of hypertension several decades ago” (p. 600).

**ENTRY IN THE LIST OF REFERENCES**

For a reference list that includes this entry, see page 496.
APA in-text citations

APA’s in-text citations provide at least the author’s last name and the year of publication. For direct quotations and some paraphrases, a page number is given as well.

For a directory to the in-text citation models in this section, see page 443, immediately following the tabbed divider.

NOTE: APA style requires the use of the past tense or the present perfect tense in signal phrases introducing cited material: Smith (2005) reported . . ., Smith (2005) has argued. . . .

1. Basic format for a quotation

Ordinarily, introduce the quotation with a signal phrase that includes the author’s last name followed by the year of publication in parentheses. Put the page number (preceded by “p.”) in parentheses after the quotation.

Critser (2003) noted that despite growing numbers of overweight Americans, many health care providers still “remain either in ignorance or outright denial about the health danger to the poor and the young” (p. 5).

If the author is not named in the signal phrase, place the author’s name, the year, and the page number in parentheses after the quotation: (Critser, 2003, p. 5).

NOTE: APA style requires the year of publication in an in-text citation. Do not include a month, even if the entry in the reference list includes the month.

2. Basic format for a summary or a paraphrase

Include the author’s last name and the year either in a signal phrase introducing the material or in parentheses following it. A page number is not required for a summary or a paraphrase, but include one if it would help readers find the passage in a long work. (For the use of other locators, such as paragraph numbers or section names in online sources, see pp. 462–63.)

Yanovski and Yanovski (2002) explained that sibutramine suppresses appetite by blocking the reuptake of the neurotransmitters serotonin and norepinephrine in the brain (p. 594).

Sibutramine suppresses appetite by blocking the reuptake of the neurotransmitters serotonin and norepinephrine in the brain (Yanovski & Yanovski, 2002, p. 594).
3. **Work with two authors** Give the names of both authors in the signal phrase or the parentheses each time you cite the work. In the parentheses, use “&” between the authors’ names; in the signal phrase, use “and.”

According to Sothern and Gordon (2003), “Environmental factors may contribute as much as 80% to the causes of childhood obesity” (p. 104).

Obese children often engage in limited physical activity (Sothern & Gordon, 2003, p. 104).

4. **Work with three to five authors** Identify all authors in the signal phrase or the parentheses the first time you cite the source.

In 2003, Berkowitz, Wadden, Tershakovec, and Cronquist concluded, “Sibutramine . . . must be carefully monitored in adolescents, as in adults, to control increases in [blood pressure] and pulse rate” (p. 1811).

In subsequent citations, use the first author’s name followed by “et al.” in either the signal phrase or the parentheses.

As Berkowitz et al. (2003) advised, “Until more extensive safety and efficacy data are available, . . . weight-loss medications should be used only on an experimental basis for adolescents” (p. 1811).

5. **Work with six or more authors** Use the first author’s name followed by “et al.” in the signal phrase or the parentheses.

McDuffie et al. (2002) tested 20 adolescents, aged 12-16, over a three-month period and found that orlistat, combined with behavioral therapy, produced an average weight loss of 4.4 kg, or 9.7 pounds (p. 646).

6. **Work with unknown author** If the author is unknown, mention the work’s title in the signal phrase or give the first word or two of the title in the parenthetical citation. Titles of short works such as articles and chapters are put in quotation marks; titles of long works such as books and reports are italicized. (For online sources with no author, see item 12 on p. 462.)

Children struggling to control their weight must also struggle with the pressures of television advertising that, on the one hand, encourages the consumption of junk food and, on the other, celebrates thin celebrities (“Television,” 2002).
NOTE: In the rare case when “Anonymous” is specified as the author, treat it as if it were a real name: (Anonymous, 2001). In the list of references, also use the name Anonymous as author.

7. Organization as author If the author is a government agency or another organization, name the organization in the signal phrase or in the parenthetical citation the first time you cite the source.

Obesity puts children at risk for a number of medical complications, including Type 2 diabetes, hypertension, sleep apnea, and orthopedic problems (Henry J. Kaiser Family Foundation, 2004, p. 1).

If the organization has a familiar abbreviation, you may include it in brackets the first time you cite the source and use the abbreviation alone in later citations.

FIRST CITATION (Centers for Disease Control and Prevention [CDC], 2009)
LATER CITATIONS (CDC, 2009)

8. Authors with the same last name To avoid confusion, use initials with the last names if your reference list includes two or more authors with the same last name.

Research by E. Smith (1989) revealed that . . .

9. Two or more works by the same author in the same year When your list of references includes more than one work by the same author in the same year, use lowercase letters (“a,” “b,” and so on) with the year to order the entries in the reference list. (See item 6 on p. 465.) Use those same letters with the year in the in-text citation.

Research by Durgin (2003b) has yielded new findings about the role of counseling in treating childhood obesity.

10. Two or more works in the same parentheses When your parenthetical citation names two or more works, put them in the same order that they appear in the reference list, separated with semicolons.

Researchers have indicated that studies of pharmacological treatments for childhood obesity are inconclusive (Berkowitz et al., 2003; McDuffie et al., 2002).
11. Personal communication  Personal interviews, memos, letters, e-mail, and similar unpublished communications should be cited in the text only, not in the reference list. (Use the first initial with the last name in parentheses.)

One of Atkinson’s colleagues, who has studied the effect of the media on children’s eating habits, has contended that advertisers for snack foods will need to design ads responsibly for their younger viewers (F. Johnson, personal communication, October 20, 2009).

12. Electronic source  When possible, cite electronic sources, including online sources, as you would any other source, giving the author and the year:

Atkinson (2001) found that children who spent at least four hours a day watching TV were less likely to engage in adequate physical activity during the week.

Electronic sources sometimes lack authors’ names, dates, or page numbers.

Unknown author
If no author is named in the source, mention the title of the source in the signal phrase or give the first word or two of the title in the parentheses (see also item 6). (If an organization serves as the author, see item 7.)

The body’s basal metabolic rate, or BMR, is a measure of its at-rest energy requirement (“Exercise,” 2003).

Unknown date
When the date is unknown, use the abbreviation “n.d.” (for “no date”).

Attempts to establish a definitive link between television programming and children’s eating habits have been problematic (Magnus, n.d.).

No page numbers
APA ordinarily requires page numbers for quotations, and it recommends them for summaries and paraphrases from long sources. When an electronic source lacks stable numbered pages, include whatever information is available to help readers locate the particular passage you are citing.

If the source has numbered paragraphs, use the paragraph number preceded by the abbreviation “para.”: (Hall, 2008, para. 5). If the source contains headings, cite the appropriate heading in parentheses; you may also indicate the paragraph under the heading that you are referring to, even if the paragraphs are not numbered.
Hoppin and Taveras (2004) pointed out that several other medications were classified by the Drug Enforcement Administration as having the “potential for abuse” (Weight-Loss Drugs section, para. 6).

NOTE: Electronic files in portable document format (PDF) often have stable page numbers. For such sources, give the page number in the parenthetical citation.

13. **Indirect source** If you use a source that was cited in another source (a secondary source), name the original source in your signal phrase. List the secondary source in your reference list and include it in your parenthetical citation, preceded by the words “as cited in.” In the following example, Satcher is the original source, and Critser is the secondary source, given in the reference list.

Former surgeon general Dr. David Satcher described “a nation of young people seriously at risk of starting out obese and dooming themselves to the difficult task of overcoming a tough illness” (as cited in Critser, 2003, p. 4).

14. **Sacred or classical text** Identify the text, the version or edition you used, and the relevant part (chapter, verse, line). It is not necessary to include the source in the reference list.

Peace activists have long cited the biblical prophet’s vision of a world without war: “And they shall beat their swords into plowshares, and their spears into pruning hooks; nation shall not lift up sword against nation, neither shall they learn war any more” (Isaiah 2:4, Revised Standard Version).

**APA-4b APA list of references**

In APA style, the alphabetical list of works cited, which appears at the end of the paper, is titled “References.” For advice on preparing the list, see pages 486–87. For a sample reference list, see page 496.

For a directory to the reference list models in this section, see pages 443–44, immediately following the tabbed divider.

Alphabetize entries in the list of references by authors’ last names; if a work has no author, alphabetize it by its title. The first element of each entry is important because citations in the text of the paper refer to it and readers will be looking for it in the alphabetized list. The date of publication appears immediately after the first element of the citation.

In APA style, titles of books are italicized; titles of articles are neither italicized nor put in quotation marks. (For rules on capitalization of titles, see p. 485.)
**General guidelines for listing authors (print and online)**

In APA style, all authors’ names are inverted (the last name comes first), and initials are used for all first and middle names.

**NAME AND DATE CITED IN TEXT**

Duncan (2008) has reported that . . .

**BEGINNING OF ENTRY IN THE LIST OF REFERENCES**

1. **Single author**

   author: last name + initial(s) year title (book)

2. **Multiple authors**  List up to seven authors by last names followed by initials. Use an ampersand (&) before the name of the last author. If there are more than seven authors, list the first six followed by three ellipsis dots and the last author’s name. (See pp. 460–61 for citing works with multiple authors in the text of your paper.)

   **Two to seven authors**

   all authors: last name + initial(s) year title (book) place of publication

   all authors: last name + initial(s) year

   **Eight or more authors**

3. **Organization as author**

- **Author:** organization name
- **Year:**
- **Title:** (book)

If the publisher is not the same as the author, give the publisher’s name at the end as you would for any other source.

4. **Unknown author** Begin the entry with the work’s title.

- **Title:** (book)
- **Year:**
- **Place of publication:**
- **Publisher:**

- **Title:** (article) (for weekly publication)
- **Year + month + day:**
- **Volume:**
- **Issue:**
- **Page(s):**

5. **Two or more works by the same author** Use the author’s name for all entries. List the entries by year, the earliest first.

6. **Two or more works by the same author in the same year** List the works alphabetically by title. In the parentheses, following the year add “a,” “b,” and so on. Use these same letters when giving the year in the in-text citation. (See also p. 486.)

**Articles in periodicals (print)**

Periodicals include journals, magazines, and newspapers. For a journal or a magazine, give only the volume number if the publication is paginated continuously throughout each volume; give the volume and issue numbers if each issue of the volume begins on page 1. Italicize the volume number and put the issue number, not italicized, in parentheses.

For all periodicals, when an article appears on consecutive pages, provide the range of pages. When an article does not appear on consecutive pages, give all page numbers: A1, A17. (See also “Online sources”
beginning on p. 472 for online articles and articles accessed through a library’s database.) For an illustrated citation of an article in a print journal or magazine, see page 467.

7. **Article in a journal**

<table>
<thead>
<tr>
<th>author: last name + initial(s)</th>
<th>year</th>
<th>article title</th>
</tr>
</thead>
</table>

8. **Article in a magazine** Cite as you would a journal article, but give the year and the month for monthly magazines; add the day for weekly magazines.

9. **Article in a newspaper**

<table>
<thead>
<tr>
<th>author: last name + initial(s)</th>
<th>year + month + day (for daily publication)</th>
<th>article title</th>
</tr>
</thead>
</table>

   Give the year, month, and day for daily and weekly newspapers. Use “p.” or “pp.” before page numbers.

10. **Article with three to seven authors**

11. **Article with eight or more authors** List the first six authors followed by three ellipsis dots and the last author.

12. **Abstract of a journal article**

Citation at a glance: Article in a journal or magazine (APA)

To cite an article in a print journal or magazine in APA style, include the following elements:

1. Author
2. Year of publication for journal; complete date for magazine
3. Title of article
4. Name of journal or magazine
5. Volume number; issue number, if required (see p. 466)
6. Page number(s) of article

REFERENCE LIST ENTRY FOR AN ARTICLE IN A PRINT JOURNAL OR MAGAZINE

For variations on citing articles in print journals or magazines in APA style, see pages 466–68.
13. **Letter to the editor** Follow the appropriate model for a journal, magazine, or newspaper (see items 7–9) and insert the words “Letter to the editor” in brackets after the title of the letter. If the letter has no title, use the bracketed words as the title.

14. **Editorial or other unsigned article**

15. **Newsletter article**

16. **Review** Give the author and title of the review (if any) and, in brackets, the type of work, the title, and the author for a book or the year for a motion picture. If the review has no author or title, use the material in brackets as the title.

**Books (print)**

Items 17–29 apply to print books. For online books, see items 36 and 37. For an illustrated citation of a print book, see page 470.

Take the information about a book from its title page and copyright page. If more than one place of publication is listed, use only the first. Give the city and state (abbreviated) for all US cities or the city and country (not abbreviated) for all non-US cities; also include the province for Canadian cities. Do not give a state if the publisher’s name includes it (as in many university presses, for example).

17. **Basic format for a book**

<table>
<thead>
<tr>
<th>author: last name + initial(s)</th>
<th>year of publication</th>
<th>book title</th>
</tr>
</thead>
<tbody>
<tr>
<td>place of publication</td>
<td>publisher</td>
<td></td>
</tr>
<tr>
<td>Chicago, IL: Lyceum Books.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
18. **Book with an editor**

<table>
<thead>
<tr>
<th>all editors:</th>
<th>year of</th>
<th>book title</th>
<th>edition</th>
</tr>
</thead>
<tbody>
<tr>
<td>last name + initial(s)</td>
<td>publication</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

The abbreviation “Eds.” is for multiple editors. If the book has one editor, use “Ed.”

19. **Book with an author and an editor**

<table>
<thead>
<tr>
<th>author: last name</th>
<th>year of</th>
<th>name(s) of editor(s):</th>
<th>book title</th>
</tr>
</thead>
<tbody>
<tr>
<td>+ initial(s)</td>
<td>publication</td>
<td>in normal order</td>
<td></td>
</tr>
</tbody>
</table>

The abbreviation “Eds.” is for multiple editors. If the book has one editor, use “Ed.”

20. **Book with an author and a translator** After the title, name the translator, followed by “Trans.,” in parentheses. Add the original date of publication at the end of the entry.

21. **Edition other than the first**

If the entry also requires volume numbers (see item 23), put the volume numbers after the edition number: (3rd ed., Vols. 1-3).

22. **Article or chapter in an edited book or an anthology**

<table>
<thead>
<tr>
<th>author of chapter:</th>
<th>year of</th>
<th>title of chapter</th>
</tr>
</thead>
<tbody>
<tr>
<td>last name + initial(s)</td>
<td>publication</td>
<td></td>
</tr>
</tbody>
</table>

Citation at a glance: Book (APA)

To cite a print book in APA style, include the following elements:

1. Author
2. Year of publication
3. Title and subtitle
4. Place of publication
5. Publisher

REFERENCE LIST ENTRY FOR A PRINT BOOK

For more on citing print books in APA style, see pages 468–71.
The abbreviation “Eds.” is for multiple editors. If the book has one editor, use “Ed.”

23. **Multivolume work**  Give the number of volumes after the title.

If the work is published in an edition other than the first (see item 21), put the edition number before the volume numbers: (3rd ed., Vols. 1-3).

24. **Introduction, preface, foreword, or afterword**

25. **Dictionary or other reference work**

26. **Article in a reference work**

27. **Republished book**

28. **Book with a title in its title**  If the book title contains another book title or an article title, neither italicize the internal title nor place it in quotation marks.

29. **Sacred or classical text**  It is not necessary to list sacred works such as the Bible or the Qur’an or classical Greek and Roman works in your reference list. See item 14 on page 463 for how to cite these sources in the text of your paper.
Online sources

When citing an online article, include publication information as for a print periodical (see items 7–16) and add information about the online version (see items 30–35).

Online articles and books sometimes include a DOI (digital object identifier). APA uses the DOI, when available, in place of a URL in reference list entries.

Use a retrieval date for an online source only if the content is likely to change. Most of the examples in this section do not show a retrieval date because the content of the sources is stable; if you are unsure about whether to use a retrieval date, consult your instructor.

If you must break a DOI or a URL at the end of a line, break it after a double slash or before any other mark of punctuation; do not add a hyphen. Do not put a period at the end of the entry.

30. Article in an online journal

<table>
<thead>
<tr>
<th>author: last name + initial(s)</th>
<th>year of publication</th>
<th>article title</th>
<th>journal title</th>
<th>volume</th>
<th>page(s)</th>
<th>DOI</th>
</tr>
</thead>
</table>

If there is no DOI, include the URL for the journal’s home page.

31. Article in an online magazine Give the author, date, article title, and magazine title. Follow with the volume, issue, and page numbers, if they are available. End with the URL for the magazine’s home page.

32. Article in an online newspaper Give the author, date, article title, and newspaper title. Follow with the page numbers, if they are available. End with the URL for the newspaper’s home page.

33. Supplemental material published only online  
If a journal, magazine, or newspaper contains extra material (an article or a chart, for example) only in its online version, give whatever publication information is available in the source and add the description “Supplemental material” in brackets after the title.

34. Article from a database  
Start with the publication information for the source (see items 7–16). If the database entry includes a DOI for the article, use the DOI number at the end. For an illustrated citation of a work from a database, see page 474.

If there is no DOI, include the URL for the home page of the journal. If the URL is not included in the database entry, you can search for it on the Web.

35. Abstract for an online article

36. Online book

37. Chapter in an online book
Citation at a glance: Article from a database (APA)

To cite an article from a database in APA style, include the following elements:

1. Author(s)
2. Date of publication
3. Title of article
4. Name of periodical
5. Volume number; issue number, if required (see p. 465)
6. Page number(s)
7. DOI (digital object identifier)
8. URL for journal's home page (if there is no DOI)

ON-SCREEN VIEW OF DATABASE RECORD

END OF DATABASE RECORD
REFERENCE LIST ENTRY FOR AN ARTICLE FROM A DATABASE

For more on citing articles from a database in APA style, see item 34.

38. Online reference work

Include a retrieval date only if the content of the work is likely to change.

39. Report or long document from a Web site

List the author’s name, publication date (or “n.d.” if there is no date), document title (in italics), and URL for the document. Give a retrieval date only if the content of the source is likely to change. If a source has no author, begin with the title and follow it with the date in parentheses (see item 4 on p. 465).

**Source with date**

<table>
<thead>
<tr>
<th>all authors: online</th>
<th>publication date</th>
<th>document title</th>
<th>URL</th>
</tr>
</thead>
</table>

**Source with no date**

40. Section in a Web document

URL

For an illustrated citation of a section in a Web document, see page 478.

41. Short work from a Web site

NATO statement endangers patients in Afghanistan. (2010, March 11). Médecins
.doctorswithoutborders.org/

42. Document from a university or government agency Web site

University of California, Santa Barbara, Center for Evolutionary Psychology
website: http://www.psych.ucsb.edu/research/cep/primer.html

43. Article in an online newsletter  Cite as an online article (see items
30–32), giving the title of the newsletter and whatever other information
is available, including volume and issue numbers.

/news/newsletter/may_08/index.jsp

44. Podcast

obesity: How do we measure up? [Audio podcast]. The sounds of science podcast.
URL

Retrieved from http://media.nap.edu/podcasts/

and alternative medicine (No. 12827) [Audio podcast]. Retrieved from University
Web site hosting podcast URL

of California Television website: http://www.uctv.tv/ondemand
45. **Blog (Weblog) post**  
Give the writer’s name, the date of the post, the subject, the label “Web log post” in brackets, and the URL. For a response to a post, use the label “Web log comment.”

46. **Online audio or video file**  
Give the medium or a description of the source file in brackets following the title.

<table>
<thead>
<tr>
<th>writer/presenter</th>
<th>no date</th>
<th>title</th>
<th>label</th>
<th>URL</th>
</tr>
</thead>
</table>

47. **Entry in a wiki**  
Begin with the title of the entry and the date of posting, if there is one (use “n.d.” for “no date” if there is not). Then add your retrieval date, the name of the wiki, and the URL for the wiki entry. Include the date of retrieval because the content of a wiki can change frequently. If an author or an editor is identified, include that name at the beginning of the entry.

48. **Data set or graphic representation**  
Give information about the type of source in brackets following the title. If there is no title, give a brief description of the content of the source in brackets in place of the title.

<table>
<thead>
<tr>
<th>writer/presenter</th>
<th>no date</th>
<th>title</th>
<th>label</th>
<th>URL</th>
</tr>
</thead>
</table>
Citation at a glance: Section in a Web document (APA)

To cite a section from a Web document in APA style, include the following elements:

1. Author
2. Date of publication or most recent update
3. Title of section
4. Title of document
5. URL of section

BROWSER PRINTOUT OF WEB SITE

2008 Minnesota Health Statistics Annual Summary – Minnesota Dept. of Health

2008 Minnesota Health Statistics Annual Summary

The Minnesota “Annual Summary” or “Minnesota Health Statistics” is a report published yearly. The most recent version of this report is **2008 Minnesota Health Statistics**, published January 2010. This report provides statistical data on the following subjects for the state of Minnesota:

- Introduction, Technical Notes, Definitions (PDF: 42KB/7 pages)
- Overview of 2008 Annual Summary (PDF: 66KB/11 pages)
- Live Births (PDF: 196KB/21 pages)
- Fertility (PDF: 26KB/2 pages)
- Infant Mortality and Fetal Deaths (PDF: 188KB/15 pages)
- General Mortality (PDF: 333KB/40 pages)
- Marriage/Dissolution of Marriage Divorce (PDF: 25KB/2 pages)
- Population (PDF: 73KB/12 pages)

Note: Induced abortion statistics previously reported in this publication are now published separately.

See Report to the Legislature: Induced Abortions in Minnesota

See also Minnesota Health Statistics Annual Summary Main Page

For further information about the Annual Summary, please contact:

Center for Health Statistics
Minnesota Department of Health
Golden Rule Building, 3rd Floor
85 East Seventh Place

http://www.health.state.mn.us/divs/chs/annsum/08annsum/index.html

For more on citing documents from Web sites in APA style, see pages 475–80.
49. Conference hearing

50. E-mail  E-mail messages, letters, and other personal communications are not included in the list of references. (See item 11 on p. 462 for citing these sources in the text of your paper.)

51. Online posting  If an online posting is not archived, cite it as a personal communication in the text of your paper and do not include it in the list of references. If the posting is archived, give the URL and the name of the discussion list if it is not part of the URL.

Other sources (including online versions)
52. Dissertation from a database

53. Unpublished dissertation

54. Government document

55. **Report from a private organization**  If the publisher is also the author, begin with the publisher’s name in the author position. For a print source, use “Author” in the publisher position at the end of the entry (see item 3 on p. 465); for an online source, give the URL. If the report has a number, put it in parentheses following the title.

56. **Legal source**

57. **Conference proceedings**

58. **Paper presented at a meeting or symposium (unpublished)**

59. **Poster session at a conference**

60. **Map or chart**

61. **Advertisement**

62. Published interview

63. Lecture, speech, or address
Fox, V. (2008, March 5). Economic growth, poverty, and democracy in Latin America: A president’s perspective. Address at the Freeman Spogli Institute, Stanford University, Stanford, CA.

64. Work of art or photograph

65. Brochure, pamphlet, or fact sheet

66. Presentation slides

67. Film or video (motion picture) Give the director, producer, and other relevant contributors, followed by the year of the film’s release, the title, the description “Motion picture” in brackets, the country where the film was made, and the studio. If you viewed the film on videocassette or DVD, indicate that medium in brackets in place of “Motion picture.” If the original release date and the date of the DVD or videocassette are different, add “Original release” and that date in parentheses at the end of the entry. If the motion picture would be difficult for your readers to find, include the name and address of its distributor instead of the country and studio.

68. **Television program**  List the producer and the date of the program. Give the title, followed by “Television broadcast” in brackets, the city, and the television network or service.

For a television series, use the year in which the series was produced, and follow the title with “Television series” in brackets. For an episode in a series, list the writer and director and the year. After the episode title, put “Television series episode” in brackets. Follow with information about the series.

69. **Sound recording**

70. **Computer software or video game**  Add the words “Computer software” in brackets after the title of the program.

---

The American Psychological Association makes a number of recommendations for formatting a paper and preparing a list of references. The following guidelines are consistent with advice given in the *Publication Manual of the American Psychological Association*, 6th ed. (Washington: APA, 2010).
APA-5a Manuscript format

The APA manual provides guidelines for papers prepared for publication in a scholarly journal; it does not provide separate guidelines for papers prepared for undergraduate classes. The formatting guidelines in this section and the sample paper on pages 488–96 can be used for either type of paper. (See p. 497 for alternative formatting.) If you are in doubt about the specific format preferred or required in your course, ask your instructor.

Formatting the paper

Many instructors in the social sciences require students to follow APA guidelines for formatting a paper.

Materials and font Use good-quality 8½” × 11” white paper. If your instructor does not require a specific font, choose one that is standard and easy to read (such as Times New Roman).

Title page Begin at the top left with the words “Running head,” followed by a colon and the title of your paper (shortened to no more than fifty characters) in all capital letters. Put the page number 1 flush with the right margin.

About halfway down the page, center the full title of your paper (capitalizing all words of four letters or more), your name, and your school’s name. At the bottom of the page, you may add the heading “Author Note,” centered, followed by a brief paragraph that lists specific information about the course or department or provides acknowledgments or contact information. See page 488 for a sample title page.

Some instructors may instead require a title page like the one on page 497. If in doubt about the requirements in your course, check with your instructor.

Page numbers and running head Number all pages with arabic numerals (1, 2, 3, and so on) in the upper right corner about one inch from the top of the page. The title page should be numbered 1.

On every page, in the upper left corner on the same line as the page number, place a running head. The running head consists of the title of the paper (shortened to no more than fifty characters) in all capital letters. (On the title page only, include the words “Running head” followed by a colon before the shortened title.) See pages 488–96. (See an alternative running head on p. 497.)
Margins, line spacing, and paragraph indent  Use margins of one inch on all sides of the page. Left-align the text. Double-space throughout the paper. Indent the first line of each paragraph one-half inch.

Capitalization, italics, and quotation marks  Capitalize all words of four letters or more in titles of works and in headings that appear in the text of the paper. Capitalize the first word after a colon if the word begins a complete sentence. Italicize the titles of books, periodicals, and other long works, such as Web sites. Use quotation marks around the titles of periodical articles, short stories, poems, and other short works.

NOTE: APA has different requirements for titles in the reference list. See page 487.

Long quotations and footnotes  When a quotation is longer than forty words, set it off from the text by indenting it one-half inch from the left margin. Double-space the quotation. Do not use quotation marks around it. See page 495 for an example. If you insert a footnote number in the text of your paper, place the note at the bottom of the page on which the number appears. Insert an extra double-spaced line between the last line of text on the page and the footnote. Double-space the footnote and indent the first line one-half inch. Begin the note with the superscript arabic numeral that corresponds to the number in the text. See page 490 for an example.

Abstract  If your instructor requires an abstract, include it immediately after the title page. Center the word “Abstract” one inch from the top of the page; double-space the abstract. An abstract is a 100-to-150-word paragraph that provides readers with a quick overview of your essay. It should express your main idea and your key points; it might also briefly suggest any implications or applications of the research you discuss in the paper. See page 489 for an example.

Headings  Although headings are not always necessary, their use is encouraged in the social sciences. For most undergraduate papers, one level of heading will usually be sufficient. In APA style, major headings are centered and boldface. Capitalize the first word of the heading along with all words except articles, short prepositions, and coordinating conjunctions. See the sample paper on pages 488–96 for the use of headings.
**Visuals** APA classifies visuals as tables and figures (figures include graphs, charts, drawings, and photographs). Keep visuals as simple as possible.

Label each table with an arabic numeral (Table 1, Table 2, and so on) and provide a clear title. The label and title should appear on separate lines above the table, flush left and double-spaced.

Below the table, give its source in a note. If any data in the table require an explanatory footnote, use a superscript lowercase letter in the body of the table and in a footnote following the source note. Double-space source notes and footnotes and do not indent the first line of each note. See page 493 for an example of a table in a student paper.

For each figure, place a label and a caption below the figure, flush left and double-spaced. The label and caption need not appear on separate lines.

In the text of your paper, discuss significant features of each visual. Place the visual as close as possible to the sentences that relate to it unless your instructor prefers that visuals appear in an appendix.

---

**Preparing the list of references**

Begin your list of references on a new page at the end of the paper. Center the title “References” one inch from the top of the page, and double-space throughout. For a sample reference list, see page 496.

**Indenting entries** Use a hanging indent in the reference list: Type the first line of each entry flush left and indent any additional lines one-half inch, as shown on page 496.

**Alphabetizing the list** Alphabetize the reference list by the last names of the authors (or editors); when a work has no author (or editor), alphabetize by the first word of the title other than A, An, or The.

If your list includes two or more works by the same author, arrange the entries by year, the earliest first. If your list includes two or more works by the same author in the same year, arrange the works alphabetically by title. Add the letters “a,” “b,” and so on within the parentheses after the year. Use only the year and the letter for articles in journals: (2002a). Use the full date and the letter for articles in magazines and newspapers in the reference list: (2005a, July 7). Use only the year and the letter in the in-text citation.

**Authors’ names** Invert all authors’ names and use initials instead of first names. Separate the names with commas. With two to seven authors, use an ampersand (&) before the last author’s name. If there
are eight or more authors, give the first six authors, three ellipsis dots, and the last author (see p. 464).

**Titles of books and articles**  Italicize the titles and subtitles of books. Do not italicize or use quotation marks around the titles of articles. Capitalize only the first word of the title and subtitle (and all proper nouns) of books and articles. Capitalize names of periodicals as you would capitalize them normally (see P8-c).

**Abbreviations for page numbers**  Abbreviations for “page” and “pages” ("p." and “pp.”) are used before page numbers of newspaper articles and articles in edited books (see item 9 on p. 466 and item 22 on p. 469) but not before page numbers of articles in magazines and scholarly journals (see items 7 and 8 on p. 466).

**Breaking a URL or DOI**  When a URL or a DOI (digital object identifier) must be divided, break it after a double slash or before any other mark of punctuation. Do not insert a hyphen, and do not add a period at the end.

For information about the exact format of each entry in your list, consult the models on pages 464–83.

**APA-5b Sample research paper: APA style**

On pages 488–96 is a research paper on the effectiveness of treatments for childhood obesity, written by Luisa Mirano, a student in a psychology class. Mirano’s assignment was to write a review of the literature and document it with APA-style citations and references. (See p. 497 for a sample of alternative formatting.)
A running head, which will be used in the printed journal article, consists of a title (shortened to no more than fifty characters) in all capital letters. On the title page, it is preceded by the label “Running head.” Page numbers appear in the upper right corner.

Full title, writer’s name, and school name are centered halfway down the page.

Can Medication Cure Obesity in Children?
A Review of the Literature

Author Note
This paper was prepared for Psychology 108, Section B, taught by Professor Kang.

Marginal annotations indicate APA-style formatting and effective writing.
CAN MEDICATION CURE OBESITY IN CHILDREN?  

Abstract  
In recent years, policymakers and medical experts have expressed alarm about the growing problem of childhood obesity in the United States. While most agree that the issue deserves attention, consensus dissolves around how to respond to the problem. This literature review examines one approach to treating childhood obesity: medication. The paper compares the effectiveness for adolescents of the only two drugs approved by the Food and Drug Administration (FDA) for long-term treatment of obesity, sibutramine and orlistat. This examination of pharmacological treatments for obesity points out the limitations of medication and suggests the need for a comprehensive solution that combines medical, social, behavioral, and political approaches to this complex problem.
Can Medication Cure Obesity in Children?
A Review of the Literature

In March 2004, U.S. Surgeon General Richard Carmona called attention to a health problem in the United States that, until recently, has been overlooked: childhood obesity. Carmona said that the “astounding” 15% child obesity rate constitutes an “epidemic.” Since the early 1980s, that rate has “doubled in children and tripled in adolescents.” Now more than 9 million children are classified as obese. While the traditional response to a medical epidemic is to hunt for a vaccine or a cure-all pill, childhood obesity is more elusive. The lack of success of recent initiatives suggests that medication might not be the answer for the escalating problem. This literature review considers whether the use of medication is a promising approach for solving the childhood obesity problem by responding to the following questions:

1. What are the implications of childhood obesity?
2. Is medication effective at treating childhood obesity?
3. Is medication safe for children?
4. Is medication the best solution?

Understanding the limitations of medical treatments for children highlights the complexity of the childhood obesity problem in the United States and underscores the need for physicians, advocacy groups, and policymakers to search for other solutions.

What Are the Implications of Childhood Obesity?

Obesity can be a devastating problem from both an individual and a societal perspective. Obesity puts children at risk for a number of medical complications, including Type 2 diabetes, hypertension, sleep apnea, and orthopedic problems (Henry J. Kaiser Family Foundation, 2004, p. 1).

Researchers Hoppin and Taveras (2004) have noted that obesity is often associated with psychological issues such as depression, anxiety, and binge eating (Table 4).

Obesity also poses serious problems for a society struggling to cope with rising health care costs. The cost of treating obesity currently totals

1Obesity is measured in terms of body-mass index (BMI): weight in kilograms divided by square of height in meters. A child or an adolescent with a BMI in the 95th percentile for his or her age and gender is considered obese.
CAN MEDICATION CURE OBESITY IN CHILDREN?

$117 billion per year—a price, according to the surgeon general, “second only to the cost of [treating] tobacco use” (Carmona, 2004). And as the number of children who suffer from obesity grows, long-term costs will only increase.

Is Medication Effective at Treating Childhood Obesity?

The widening scope of the obesity problem has prompted medical professionals to rethink old conceptions of the disorder and its causes. As researchers Yanovski and Yanovski (2002) have explained, obesity was once considered “either a moral failing or evidence of underlying psychopathology” (p. 592). But this view has shifted: Many medical professionals now consider obesity a biomedical rather than a moral condition, influenced by both genetic and environmental factors. Yanovski and Yanovski have further noted that the development of weight-loss medications in the early 1990s showed that “obesity should be treated in the same manner as any other chronic disease . . . through the long-term use of medication” (p. 592).

The search for the right long-term medication has been complicated. Many of the drugs authorized by the Food and Drug Administration (FDA) in the early 1990s proved to be a disappointment. Two of the medications—fenfluramine and dexfenfluramine—were withdrawn from the market because of severe side effects (Yanovski & Yanovski, 2002, p. 592), and several others were classified by the Drug Enforcement Administration as having the “potential for abuse” (Hoppin & Taveras, 2004, Weight-Loss Drugs section, para. 6). Currently only two medications have been approved by the FDA for long-term treatment of obesity: sibutramine (marketed as Meridia) and orlistat (marketed as Xenical). This section compares studies on the effectiveness of each.

Sibutramine suppresses appetite by blocking the reuptake of the neurotransmitters serotonin and norepinephrine in the brain (Yanovski & Yanovski, 2002, p. 594). Though the drug won FDA approval in 1998, experiments to test its effectiveness for younger patients came considerably later. In 2003, University of Pennsylvania researchers Berkowitz, Wadden, Tershakovec, and Cronquist released the first double-blind placebo study testing the effect of sibutramine on adolescents, aged 13-17, over a 12-month period. Their findings are summarized in Table 1.

After 6 months, the group receiving medication had lost 4.6 kg
CAN MEDICATION CURE OBESITY IN CHILDREN?

(about 10 pounds) more than the control group. But during the second half of the study, when both groups received sibutramine, the results were more ambiguous. In months 6-12, the group that continued to take sibutramine gained an average of 0.8 kg, or roughly 2 pounds; the control group, which switched from placebo to sibutramine, lost 1.3 kg, or roughly 3 pounds (p. 1808). Both groups received behavioral therapy covering diet, exercise, and mental health.

These results paint a murky picture of the effectiveness of the medication: While initial data seemed promising, the results after one year raised questions about whether medication-induced weight loss could be sustained over time. As Berkowitz et al. (2003) advised, “Until more extensive safety and efficacy data are available, . . . weight-loss medications should be used only on an experimental basis for adolescents” (p. 1811).

A study testing the effectiveness of orlistat in adolescents showed similarly ambiguous results. The FDA approved orlistat in 1999 but did not authorize it for adolescents until December 2003. Roche Laboratories (2003), maker of orlistat, released results of a one-year study testing the drug on 539 obese adolescents, aged 12-16. The drug, which promotes weight loss by blocking fat absorption in the large intestine, showed some effectiveness in adolescents: an average loss of 1.3 kg, or roughly 3 pounds, for subjects taking orlistat for one year, as opposed to an average gain of 0.67 kg, or 1.5 pounds, for the control group (pp. 8-9). See Table 1.

Short-term studies of orlistat have shown slightly more dramatic results. Researchers at the National Institute of Child Health and Human Development tested 20 adolescents, aged 12-16, over a three-month period and found that orlistat, combined with behavioral therapy, produced an average weight loss of 4.4 kg, or 9.7 pounds (McDuffie et al., 2002, p. 646). The study was not controlled against a placebo group; therefore, the relative effectiveness of orlistat in this case remains unclear.

Is Medication Safe for Children?

While modest weight loss has been documented for both medications, each carries risks of certain side effects. Sibutramine has been observed to increase blood pressure and pulse rate. In 2002, a

consumer group claimed that the medication was related to the deaths of 19 people and filed a petition with the Department of Health and Human Services to ban the medication (Hilts, 2002). The sibutramine study by Berkowitz et al. (2003) noted elevated blood pressure as a side effect, and dosages had to be reduced or the medication discontinued in 19 of the 43 subjects in the first six months (p. 1809).

The main side effects associated with orlistat were abdominal discomfort, oily spotting, fecal incontinence, and nausea (Roche Laboratories, 2003, p. 13). More serious for long-term health is the concern that orlistat, being a fat-blocker, would affect absorption of fat-soluble vitamins, such as vitamin D. However, the study found that this side effect can be minimized or eliminated if patients take vitamin supplements two hours before or after administration of orlistat (p. 10). With close monitoring of patients taking the medication, many of the risks can be reduced.

**Is Medication the Best Solution?**

The data on the safety and efficacy of pharmacological treatments of childhood obesity raise the question of whether medication is the best solution for the problem. The treatments have clear costs for individual patients, including unpleasant side effects, little information about long-term use, and uncertainty that they will yield significant weight loss.

In purely financial terms, the drugs cost more than $3 a day on average (Duenwald, 2004). In each of the clinical trials, use of medication was accompanied by an expensive regime of behavioral therapies, including counseling, nutritional education, fitness advising, and monitoring. As journalist Greg Critser (2003) noted in his book *Fat Land*, use of weight-loss drugs is unlikely to have an effect without the proper “support system”—one that includes doctors, facilities, time, and money (p. 3). For some, this level of care is prohibitively expensive.

A third complication is that the studies focused on adolescents aged 12-16, but obesity can begin at a much younger age. Few data exist to establish the safety or efficacy of medication for treating very young children.

While the scientific data on the concrete effects of these medications in children remain somewhat unclear, medication is not the only avenue for addressing the crisis. Both medical experts and
CAN MEDICATION CURE OBESITY IN CHILDREN?

Policymakers recognize that solutions might come not only from a laboratory but also from policy, education, and advocacy. A handbook designed to educate doctors on obesity called for “major changes in some aspects of western culture” (Hoppin & Taveras, 2004, Conclusion section, para. 1). Cultural change may not be the typical realm of medical professionals, but the handbook urged doctors to be proactive and “focus [their] energy on public policies and interventions” (Conclusion section, para. 1).

The solutions proposed by a number of advocacy groups underscore this interest in political and cultural change. A report by the Henry J. Kaiser Family Foundation (2004) outlined trends that may have contributed to the childhood obesity crisis, including food advertising for children as well as

- a reduction in physical education classes and after-school athletic programs,
- an increase in the availability of sodas and snacks in public schools,
- the growth in the number of fast-food outlets . . . , and the increasing number of highly processed high-calorie and high-fat grocery products. (p. 1)

Addressing each of these areas requires more than a doctor armed with a prescription pad; it requires a broad mobilization not just of doctors and concerned parents but of educators, food industry executives, advertisers, and media representatives.

The barrage of possible approaches to combating childhood obesity—from scientific research to political lobbying—indicates both the severity and the complexity of the problem. While none of the medications currently available is a miracle drug for curing the nation’s 9 million obese children, research has illuminated some of the underlying factors that affect obesity and has shown the need for a comprehensive approach to the problem that includes behavioral, medical, social, and political change.
CAN MEDICATION CURE OBESITY IN CHILDREN?

References

Obesity in Children were classified by the Drug Enforcement Administration as having the “potential for abuse” (Hoppin & Taveras, 2004, Weight-Loss Drugs section, para. 6). Currently only two medications have been approved by the FDA for long-term treatment of obesity: sibutramine (marketed...
### CMS (Chicago) Papers

Most assignments in history and other humanities classes are based to some extent on reading. At times you will be asked to respond to one or two readings, such as essays or historical documents. At other times you may be asked to write a research paper that draws on a wide variety of sources.
Many history instructors and some humanities instructors require you to document sources with footnotes or endnotes based on *The Chicago Manual of Style*, 16th ed. (Chicago: U of Chicago P, 2010). (See CMS-4.) When you write a paper using sources, you face three main challenges: (1) supporting a thesis, (2) citing your sources and avoiding plagiarism, and (3) integrating quotations and other source material.

Examples in this section appear in CMS style and are drawn from one student’s research on the Fort Pillow massacre. Sample pages from Ned Bishop’s paper appear on pages 532–37.

CMS-1  Supporting a thesis

Most research assignments ask you to form a thesis, or main idea, and to support that thesis with well-organized evidence.

CMS-1a  Form a working thesis.

Once you have read a variety of sources and considered your issue from different perspectives, you are ready to form a working thesis: a one-sentence (or occasionally a two-sentence) statement of your central idea. (See also C1-c.) In a research paper, your thesis will answer the central research question that you pose. Here, for example, are student writer Ned Bishop’s research question and working thesis statement.

**RESEARCH QUESTION**

To what extent was Confederate Major General Nathan Bedford Forrest responsible for the massacre of Union troops at Fort Pillow?

**WORKING THESIS**

By encouraging racism among his troops, Nathan Bedford Forrest was directly responsible for the massacre of Union troops at Fort Pillow.

Notice that the thesis expresses a view on a debatable issue—an issue about which intelligent, well-meaning people might disagree. The writer’s job is to persuade such readers that this view is worth taking seriously. To read Ned Bishop’s thesis in the context of his introduction, see page 533.
CMS-1b Organize your ideas.

The body of your paper will consist of evidence in support of your thesis. Instead of getting tangled up in a formal outline early in the process, sketch an informal plan that organizes your ideas in bold strokes. Ned Bishop, for example, used a simple outline to structure his ideas. In the paper itself, these points became headings that help readers follow his line of argument.

What happened at Fort Pillow?

Did Forrest order the massacre?

Can Forrest be held responsible for the massacre?

CMS-1c Use sources to inform and support your argument.

Used thoughtfully, your source materials will make your argument more complex and convincing for readers. Sources can play several different roles as you develop your points.

Providing background information or context

You can use facts and statistics to support generalizations or to establish the importance of your topic, as student writer Ned Bishop does early in his paper.

Fort Pillow, Tennessee, which sat on a bluff overlooking the Mississippi River, had been held by the Union for two years. It was garrisoned by 580 men, 292 of them from United States Colored Heavy and Light Artillery regiments, 285 from the white Thirteenth Tennessee Cavalry. Nathan Bedford Forrest commanded about 1,500 troops.¹

Explaining terms or concepts

If readers are unlikely to be familiar with a word, a phrase, or an idea important to your topic, you must explain it for them. Quoting or paraphrasing a source can help you define terms and concepts clearly and concisely.

The Civil War practice of giving no quarter to an enemy—in other words, “denying [an enemy] the right of survival”—defied Lincoln’s mandate for humane and merciful treatment of prisoners.⁹
Supporting your claims

As you draft your argument, make sure to back up your assertions with facts, examples, and other evidence from your research (see also A2-e). Ned Bishop, for example, uses an eyewitness report of the racially motivated violence perpetrated by Nathan Bedford Forrest’s troops.

The slaughter at Fort Pillow was no doubt driven in large part by racial hatred. . . . A Southern reporter traveling with Forrest makes clear that the discrimination was deliberate: “Our troops maddened by the excitement, shot down the ret[er]eating Yankees, and not until they had attained t[he] water’s edge and turned to beg for mercy, did any prisoners fall in [to] our hands—Thus the whites received quarter, but the negroes were shown no mercy.”19

Lending authority to your argument

Expert opinion can give weight to your argument (see also A2-e). But don’t rely on experts to make your argument for you. Construct your argument in your own words and, when appropriate, cite the judgment of an authority in the field for support.

Fort Pillow is not the only instance of a massacre or threatened massacre of black soldiers by troops under Forrest’s command. Biographer Brian Steel Wills points out that at Brice’s Cross Roads in June 1864, “black soldiers suffered inordinately” as Forrest looked the other way and Confederate soldiers deliberately sought out those they termed “the damned negroes.”21

Anticipating and countering alternative interpretations

Do not ignore sources that seem contrary to your position or that offer interpretations different from your own. Instead, use them to give voice to opposing points of view and alternative interpretations before you counter them (see A2-f). Readers often have objections in mind already, whether or not they agree with you. Ned Bishop, for example, presents conflicting evidence to acknowledge that some readers may credit Nathan Bedford Forrest with stopping the massacre. In doing so, Bishop creates an opportunity to counter that objection and persuade those readers that Forrest can be held accountable.

Hurst suggests that the temperamental Forrest “may have ragingly ordered a massacre and even intended to carry it out—until he rode inside the fort and viewed the horrifying result” and ordered it stopped.15 While this is an intriguing interpretation of events, even Hurst would probably admit that it is merely speculation.
Your research paper is a collaboration between you and your sources. To be fair and ethical, you must acknowledge your debt to the writers of those sources. Failure to do so is a form of academic dishonesty known as plagiarism.

Three different acts are generally considered plagiarism: (1) failing to cite quotations and borrowed ideas, (2) failing to enclose borrowed language in quotation marks, and (3) failing to put summaries and paraphrases in your own words. Definitions of plagiarism may vary; it’s a good idea to find out how your school defines and addresses academic dishonesty. (See also R3-c.)

CMS-2a Cite quotations and borrowed ideas.

You must cite anything you borrow from a source, including direct quotations; statistics and other facts; visuals such as tables, maps, and photographs; and any ideas you present in a summary or paraphrase.

The only exception is common knowledge — information your readers could easily find in any number of general sources. For example, most encyclopedias will tell readers that the Korean War ended in 1953 and that President Theodore Roosevelt was the first American to receive a Nobel Prize. As a rule, when you have seen certain information repeatedly in your reading, you don’t need to cite it. However, when information has appeared in only a few sources, when it is highly specific (as with statistics), or when it is controversial, you should cite the source.

CMS citations consist of superscript numbers in the text of the paper that refer readers to notes with corresponding numbers either at the foot of the page (footnotes) or at the end of the paper (endnotes).

**TEXT**

Governor John Andrew was not allowed to recruit black soldiers from out of state.

“Ostensibly,” writes Peter Burchard, “no recruiting was done outside Massachusetts but it was an open secret that Andrew’s agents were working far and wide.”

**NOTE**

This basic CMS format varies for different types of sources. For a detailed discussion and other models, see CMS-4. When you use footnotes or endnotes, you will usually need to provide a bibliography as well (see CMS-4b).

**CMS-2b Enclose borrowed language in quotation marks.**

To indicate that you are using a source’s exact phrases or sentences, you must enclose them in quotation marks unless they have been set off from the text by indenting (see p. 506). To omit the quotation marks is to claim — falsely — that the language is your own. Such an omission is plagiarism even if you have cited the source.

**ORIGINAL SOURCE**

For many Southerners it was psychologically impossible to see a black man bearing arms as anything but an incipient slave uprising complete with arson, murder, pillage, and rapine.

— Dudley Taylor Cornish, *The Sable Arm*, p. 158

**PLAGIARISM**

According to Civil War historian Dudley Taylor Cornish, for many Southerners it was psychologically impossible to see a black man bearing arms as anything but an incipient slave uprising complete with arson, murder, pillage, and rapine.2

**BORROWED LANGUAGE IN QUOTATION MARKS**

According to Civil War historian Dudley Taylor Cornish, “For many Southerners it was psychologically impossible to see a black man bearing arms as anything but an incipient slave uprising complete with arson, murder, pillage, and rapine.”2

**NOTE:** When quoted sentences are set off from the text by indenting, quotation marks are not needed (see p. 506).

**CMS-2c Put summaries and paraphrases in your own words.**

Summaries and paraphrases are written in your own words. A summary condenses information; a paraphrase conveys the information using roughly the same number of words as in the original source. When you summarize or paraphrase, it is not enough to name the source; you must restate the source’s meaning using your own language. (See also R3-c.) You commit plagiarism if you half-copy the author’s sentences — either by mixing the author’s phrases with your own without using quotation marks or by plugging your own synonyms into the author’s sentence structure.
The first paraphrase of the following source is plagiarized—even though the source is cited—because too much of its language is borrowed from the original. The underlined strings of words have been copied exactly (without quotation marks). In addition, the writer has closely followed the sentence structure of the original source, merely making a few substitutions (such as Fifty percent for Half and angered and perhaps frightened for enraged and perhaps terrified).

**ORIGINAL SOURCE**
Half of the force holding Fort Pillow were Negroes, former slaves now enrolled in the Union Army. Toward them Forrest's troops had the fierce, bitter animosity of men who had been educated to regard the colored race as inferior and who for the first time had encountered that race armed and fighting against white men. The sight enraged and perhaps terrified many of the Confederates and aroused in them the ugly spirit of a lynching mob.

**PLAGIARISM: UNACCEPTABLE BORROWING**
Albert Castel suggests that much of the brutality at Fort Pillow can be traced to racial attitudes. Fifty percent of the troops holding Fort Pillow were Negroes, former slaves who had joined the Union Army. Toward them Forrest's soldiers displayed the savage hatred of men who had been taught the inferiority of blacks and who for the first time had confronted them armed and fighting against white men. The vision angered and perhaps frightened the Confederates and aroused in them the ugly spirit of a lynching mob.

To avoid plagiarizing an author’s language, resist the temptation to look at the source while you are summarizing or paraphrasing. After you have read the passage you want to paraphrase, set the source aside. Ask yourself, “What is the author’s meaning?” In your own words, state your understanding of the author’s basic point. Return to the source and check that you haven’t used the author’s language or sentence structure or misrepresented the author’s ideas. When you fully understand another writer’s meaning, you can more easily and accurately present those ideas in your own words.

**ACCEPTABLE PARAPHRASE**
Albert Castel suggests that much of the brutality at Fort Pillow can be traced to racial attitudes. Nearly half of the Union troops were blacks, men whom the Confederates had been raised to consider their inferiors. The shock and perhaps fear of facing armed ex-slaves in battle for the first time may well have unleashed the fury that led to the massacre.
CMS-3 Integrating sources

Quotations, summaries, paraphrases, and facts will help you develop your argument, but they cannot speak for you. You can use several strategies to integrate information from sources into your paper while maintaining your own voice.

CMS-3a Use quotations appropriately.

In your academic writing, keep the emphasis on your ideas; use your own words to summarize and to paraphrase your sources and to explain your points. Sometimes, however, quotations can be the most effective way to integrate a source.

WHEN TO USE QUOTATIONS

- When language is especially vivid or expressive
- When exact wording is needed for technical accuracy
- When it is important to let the debaters of an issue explain their positions in their own words
- When the words of an authority lend weight to an argument
- When the language of a source is the topic of your discussion

Limiting your use of quotations Although it is tempting to insert many quotations in your paper and to use your own words only for connecting passages, do not quote excessively. It is almost impossible to integrate numerous long quotations smoothly into your own text.

It is not always necessary to quote full sentences from a source. To reduce your reliance on the words of others, you can often integrate language from a source into your own sentence structure.

As Hurst has pointed out, until “an outcry erupted in the Northern press,” even the Confederates did not deny that there had been a massacre at Fort Pillow.4

Union surgeon Dr. Charles Fitch testified that after he was in custody, he “saw” Confederate soldiers “kill every negro that made his appearance dressed in Federal uniform.”20

Two useful marks of punctuation, the ellipsis mark and brackets, allow you to keep quoted material to a minimum and to integrate it smoothly into your text.
Using the ellipsis mark  To condense a quoted passage, you can use the ellipsis mark (three periods, with spaces between) to indicate that you have omitted words. What remains must be grammatically complete.

Union surgeon Fitch’s testimony that all women and children had been evacuated from Fort Pillow before the attack conflicts with Forrest’s report: “We captured . . . about 40 negro women and children.”

The writer has omitted several words not relevant to the issue at hand: 164 Federals, 75 negro troops, and.

When you want to leave out one or more full sentences, use a period before the three ellipsis dots. For an example, see the long quotation on page 507.

Ordinarily, do not use an ellipsis mark at the beginning or at the end of a quotation. Readers will understand that you have taken the quoted material from a longer passage, so such marks are not necessary. The only exception occurs when you have dropped words at the end of the final quoted sentence. In such cases, put three ellipsis dots before the closing quotation mark.

Using brackets  Brackets allow you to insert your own words into quoted material, perhaps to explain a confusing reference or to keep a sentence grammatical in your context.

According to Albert Castel, “It can be reasonably argued that he [Forrest] was justified in believing that the approaching steamships intended to aid the garrison [at Fort Pillow].”

NOTE: To indicate an error such as a misspelling in a quotation, insert the word [sic], italicized and with brackets around it, right after the error. (See the example on p. 507 and in P6-b for more information.)

Setting off long quotations  CMS style allows you some flexibility in deciding whether to set off a long quotation or run it into your text. For emphasis, you may want to set off a quotation of more than four or five typed lines of text; almost certainly you should set off quotations of ten or more lines. To set off a quotation, indent it one-half inch from the left margin and use the normal right margin. Double-space the indented quotation.

Long quotations should be introduced by an informative sentence, often followed by a colon. Quotation marks are unnecessary because the indented format tells readers that the passage is taken word-for-word from the source.
In a letter home, Confederate officer Achilles V. Clark recounted what happened at Fort Pillow:

Words cannot describe the scene. The poor deluded negroes would run up to our men fall upon their knees and with uplifted hands scream for mercy but they were ordered to their feet and then shot down. The white [sic] men fared but little better. . . . I with several others tried to stop the butchery and at one time had partially succeeded, but Gen. Forrest ordered them shot down like dogs, and the carnage continued.8

CMS-3b Use signal phrases to integrate sources.

Whenever you include a paraphrase, summary, or direct quotation of another writer’s work in your paper, prepare your readers for it with a signal phrase. A signal phrase usually names the author of the source and often provides some context. It commonly appears before the source material. To vary your sentence structure, you may decide to interrupt source material with a signal phrase or place the signal phrase after your paraphrase, summary, or direct quotation.

When the signal phrase includes a verb, choose one that is appropriate for the way you are using the source (see CMS-1c). Are you providing background, explaining a concept, supporting a claim, lending authority, or refuting an argument? See the chart on page 508 for a list of verbs commonly used in signal phrases.

Note that CMS style calls for verbs in the present tense or present perfect tense (points out or has pointed out) to introduce source material unless you include a date that specifies the time of the original author’s writing.

The first time you mention an author, use the full name: Shelby Foote argues. . . . When you refer to the author again, you may use the last name only: Foote raises an important question.

Marking boundaries

Readers need to move from your words to the words of a source without feeling a jolt. Avoid dropping quotations into your text without warning. Instead, provide clear signal phrases, usually including the author’s name, to indicate the boundary between your words and the source’s words. (The signal phrase is highlighted in the second example.)
Integrating sources

DROPPED QUOTATION

Not surprisingly, those testifying on the Union and Confederate sides recalled events at Fort Pillow quite differently. Unionists claimed that their troops had abandoned their arms and were in full retreat. “The Confederates, however, all agreed that the Union troops retreated to the river with arms in their hands.”

QUOTATION WITH SIGNAL PHRASE

Not surprisingly, those testifying on the Union and Confederate sides recalled events at Fort Pillow quite differently. Unionists claimed that their troops had abandoned their arms and were in full retreat. “The Confederates, however,” writes historian Albert Castel, “all agreed that the Union troops retreated to the river with arms in their hands.”

Using signal phrases with summaries and paraphrases

As with quotations, you should introduce most summaries and paraphrases with a signal phrase that mentions the author and places the
material in the context of your argument. Readers will then understand where the summary or paraphrase begins.

Without the signal phrase (highlighted) in the following example, readers might think that only the last sentence is being cited, when in fact the whole paragraph is based on the source.

According to Jack Hurst, official Confederate policy was that black soldiers were to be treated as runaway slaves; in addition, the Confederate Congress decreed that white Union officers commanding black troops be killed. Confederate Lieutenant General Kirby Smith went one step further, declaring that he would kill all captured black troops. Smith’s policy never met with strong opposition from the Richmond government.10

**Integrating statistics and other facts**

When you are citing a statistic or another specific fact, a signal phrase is often not necessary. In most cases, readers will understand that the citation refers to the statistic or another fact (not the whole paragraph).

Of 295 white troops garrisoned at Fort Pillow, 168 were taken prisoner. Black troops fared worse, with only 58 of 262 captured and most of the rest presumably killed or wounded.12

There is nothing wrong, however, with using a signal phrase to introduce a statistic or fact.

Shelby Foote notes that of 295 white troops garrisoned at Fort Pillow, 168 were taken prisoner but that black troops fared worse, with only 58 of 262 captured and most of the rest presumably killed or wounded.12

**Putting source material in context**

Readers should not have to guess why source material appears in your paper. If you use another writer’s words, you must explain how they relate to your point. In other words, you must put the source in context. It’s a good idea to embed a quotation between sentences of your own, introducing it with a signal phrase and following it up with interpretive comments that link the quotation to your paper’s argument.

**QUOTATION WITH EFFECTIVE CONTEXT**

In a respected biography of Nathan Bedford Forrest, Hurst suggests that the temperamental Forrest “may have ragingly ordered a massacre and even intended
to carry it out—until he rode inside the fort and viewed the horrifying result” and ordered it stopped.11 While this is an intriguing interpretation of events, even Hurst would probably admit that it is merely speculation.

NOTE: When you bring other sources into a conversation about your research topic, you are synthesizing. For more on synthesis, see MLA-3c.

CMS-4 Documenting sources

In history and some humanities courses, you may be asked to use the documentation system set forth in The Chicago Manual of Style, 16th ed. (Chicago: U of Chicago P, 2010). In Chicago (CMS) style, superscript numbers in the text of the paper refer readers to notes with corresponding numbers either at the foot of the page (footnotes) or at the end of the paper (endnotes). A bibliography is often required as well; it appears at the end of the paper and gives publication information for all the works cited in the notes.

TEXT

A Union soldier, Jacob Thompson, claimed to have seen Forrest order the killing, but when asked to describe the six-foot-two general, he called him “a little bit of a man.”12

FOOTNOTE OR ENDNOTE

BIBLIOGRAPHY ENTRY

CMS-4a First and subsequent notes for a source

The first time you cite a source, the note should include publication information for that work as well as the page number on which the passage being cited may be found.

For subsequent references to a source you have already cited, you may simply give the author’s last name, a short form of the title, and the page or pages cited. A short form of the title of a book is italicized; a short form of the title of an article is put in quotation marks.

When you have two consecutive notes from the same source, you may use “Ibid.” (meaning “in the same place”) and the page number for the second note. Use “Ibid.” alone if the page number is the same.

6. Ibid., 174.

**CMS-4b CMS-style bibliography**

A bibliography, which appears at the end of your paper, lists every work you have cited in your notes; in addition, it may include works that you consulted but did not cite. For advice on constructing the list, see page 531. A sample bibliography appears on page 537.

**NOTE:** If you include a bibliography, *The Chicago Manual of Style* suggests that you shorten all notes, including the first reference to a source, as described at the top of this page. Check with your instructor, however, to see whether using an abbreviated note for a first reference to a source is acceptable.

**CMS-4c Model notes and bibliography entries**

The following models are consistent with guidelines in *The Chicago Manual of Style*, 16th ed. For each type of source, a model note appears first, followed by a model bibliography entry. The note shows the format you should use when citing a source for the first time. For subsequent citations of a source, use shortened notes (see CMS-4a). For a directory to models in this section, see page 498.

Some online sources, typically periodical articles, use a permanent locator called a digital object identifier (DOI). Use the DOI, when it is available, in place of a URL in your citations of online sources.
When a URL (Web address) or a DOI must break across lines, do not insert a hyphen or break at a hyphen if the URL or DOI contains one. Instead, break after a colon or a double slash or before any other mark of punctuation.

**Books (print and online)**

1. **Basic format for a print book**
   

   For an illustrated citation of a print book, see pages 514–15.

2. **Basic format for an online book**
   

   

4. **Two or more authors** For a work with two or three authors, give all authors’ names in both the note and the bibliography entry. For a work with four or more authors, in the note give the first author’s name followed by “et al.” (for “and others”); in the bibliography entry, list all authors’ names.

5. Organization as author

6. Unknown author

7. Multiple works by the same author In the bibliography, use three hyphens in place of the author’s name in the second and subsequent entries. Arrange the entries alphabetically by title.

8. Edited work without an author

9. Edited work with an author

10. Translated work

11. Edition other than the first

Citation at a glance: Book (CMS)

To cite a print book in CMS (Chicago) style, include the following elements:

1. Author
2. Title and subtitle
3. City of publication
4. Publisher
5. Year of publication
6. Page number(s) cited (for notes)
12. Volume in a multivolume work

13. Work in an anthology

14. Introduction, preface, foreword, or afterword

15. Republished book

16. **Work with a title in its title** Use quotation marks around any title within an italicized title.

17. **Letter in a published collection** Use the day-month-year form for the date of the letter. If the letter writer’s name is part of the book title, begin the note with only the writer’s last name but begin the bibliography entry with the full name.

For an illustrated citation of a letter in a published collection, see pages 518–19.

18. **Work in a series**

19. **Encyclopedia or dictionary entry**

The abbreviation “s.v.” is for the Latin *sub verbo* (“under the word”). Well-known reference works such as encyclopedias do not require publication information and are usually not included in the bibliography.

20. **Sacred text**

Sacred texts are usually not included in the bibliography.
21. Source quoted in another source

Articles in periodicals (print and online)

22. Article in a print journal Include the volume and issue numbers and the date; end the bibliography entry with the page range of the article.

For an illustrated citation of an article in a journal, see pages 520–21.

23. Article in an online journal Give the DOI if the article has one; if there is no DOI, give the URL for the article. For an unpaginated online article, in your note you may include locators, such as numbered paragraphs (if the article has them), or headings from the article.

24. Journal article from a database Give whatever identifying information is available in the database listing: a DOI for the article; the name of the database and the number assigned by the database; or a “stable” or “persistent” URL for the article.

For an illustrated citation of an article from a database, see pages 522–23.

Citation at a glance: Letter in a published collection (CMS)

To cite a letter in a published collection in CMS (Chicago) style, include the following elements:

1. Author of letter
2. Recipient of letter
3. Date of letter
4. Title of collection
5. Editor of collection
6. City of publication
7. Publisher
8. Year of publication
9. Page number(s) cited (for notes); page range of letter (for bibliography)

TO HIS EXCELLENCY THOMAS JEFFERSON

Letters to a President

JACK MCLAUGHLIN

Avon Books New York

Copyright © 1991
His Excellency Ths. Jefferson

Sir,

I have not the honor to be personally known to your Excellency therefore you will no doubt think it strange to receive this letter from a person of whom you have not the smallest knowledge. But in order to state to your Excellency in as few words as possible the purport of this address, I am a young man, a Roman Catholic who had been born and partly educated in Ireland but finding like many others who had been compelled to Migrate from that Kingdom in con-

sideration of the political state of the Island, I had determined to leave the Island and come to this Country at the same time I was in the service of the French and having been taken Prisoner to the British Army I escaped and had the good fortune to come to this Country. The difficulties which I have then and since met with have induced me to request your Excellency to be a little indulgent to my wants and to give me the rank of a Office or appointment in that extensive Country of Louisiana. It should be my constant endeavour to merit the same by fidelity and an indefatigable attention to whatever business I should be assigned. May I have the satisfaction in whatsoever Country or situation [1] may be in to hear of your Excellencies long continu-
ence of your Natural powers unempaired to conduct the Helm of this Extensive Country which are the sincere wishes of your Excellencies Mo. Obr. Hum. Servt.

John O'Neill

---

*When the Venzuelan creole Francisco de Miranda led an expeditionary force to the shores of his native land to liberate it from Spanish rule in the summer of 1806, he brought with him a new weapon for making revolutions: a printing press. He hoped that their head of state, Haci, and a few partisans would start a revolt to free his country with an alliance of words and ideas. After dawdling for ten days, Miranda learned that royal troops (also white, Haci, and Mexican) were marching from Caracas. He withdrew before the two multi-national forces could clash. Consider Miranda's reasons for retreat. The notion he sought to free from its chains was not, in his opinion, a nation at all. While Venezuela reacted for "Civil Liberty," they did not know how to grasp and protect it. They needed a liberation that would unite them in the ways of liberty and fraternity, to create a nation of virtues citizens out of a colony of subjects. This was why Miranda created the printing press, a portable factory of words about liberty and sovereignty, as part of the annual change: he wanted to create public opinion where there was none. But faced with the prospect of a violent clash and a scarring of "oppositions and internal divisions," of a war waged mostly with words, he preferred to pull out and hide his troops.*

*Miranda's dilemma—whether or not to press forward knowing how revolutions worked in imperial settings when their protagonists did not presume that their cause was self-evidently bound to triumph—echoes questions about the embedded politics of what we might call, with a wince, "regime change." As empira gave way to successor systems in their colonies, those regimes began to call themselves anew not in order to cause imperial crises, but as the result of such crises. The study of imperial crises and the study of the origins of nationalism in colonial societies should inform each other more than they do. Bringing these two separate fields of scholarship together, and questioning the tact and nerve of intellectuals upon which they rest, can help us refract the complex passages from empire to successor states, free...

29. Article in an online newspaper Include the URL for the article; if the URL is very long, use the URL for the newspaper's home page. Omit page numbers, even if the source provides them.

30. Newspaper article from a database Give whatever identifying information is available in the database listing: a DOI for the article; the name of the database and the number assigned by the database; or a “stable” or “persistent” URL for the article.

31. Unsigned article When the author of a periodical article is unknown, treat the periodical itself as the author.

32. **Book review**

33. **Letter to the editor** Do not use the letter’s title, even if the publication gives one.

**Online sources**

For most Web sites, include an author if a site has one, the title of the site, the sponsor, the date of publication or modified date (date of most recent update), and the site’s URL. Do not italicize a Web site title unless the site is an online book or periodical. Use quotation marks for the titles of sections or pages in a Web site. If a site does not have a date of publication or modified date, give the date you accessed the site (“accessed on January 3, 2010”).

34. **Web site**

35. **Short work from a Web site** Place the title of the short work in quotation marks.

For an illustrated citation of a primary source from a Web site, see pages 526–27.

36. **Online posting or e-mail** If an online posting has been archived, include a URL. E-mails that are not part of an online discussion are treated as personal communications (see item 42). Online postings and e-mails are not included in the bibliography.

37. **Blog (Weblog) post**  Treat as a short document from a Web site (see item 35). Put the title of the posting in quotation marks, and italicize the name of the blog. Insert “blog” in parentheses after the name if the word “blog” is not part of the name.

38. **Podcast**  Treat as a short work from a Web site (see item 35), including the following, if available: the author’s (or speaker’s) name; the title of the podcast, in quotation marks; an identifying number, if any; the title of the site on which the podcast appears; the sponsor of the site; and the URL. Before the URL, identify the type of podcast or file format and the date of posting or your date of access.

39. **Online audio or video**  Cite as a short work from a Web site (see item 35). If the source is a downloadable file, identify the file format or medium before the URL.

**Other sources (including online versions)**

40. **Government document**

Citation at a glance: Primary source from a Web site (CMS)

To cite a primary source (or any other document) from a Web site in CMS (Chicago) style, include as many of the following elements as are available:

1. Author
2. Title of document
3. Title of site
4. Sponsor of site
5. Publication date or modified date; date of access if none
6. URL

**Draft of the Emancipation Proclamation, by President Abraham Lincoln, July 22, 1862. The Robert Todd Lincoln Family Papers, Manuscript Division.**

**The Library of Congress**

A Cooperative Project from Library of Congress

Mr. Lincoln's Virtual Library highlights two collections at the Library of Congress that illuminate the life of Abraham Lincoln (1809-1865), the sixteenth president of the United States. The Abraham Lincoln Papers housed in the Manuscript Division contain approximately 20,000 items including correspondence and papers accumulated primarily during Lincoln's presidency. Transcriptions and annotations for the Papers are available through a cooperative agreement with the Lincoln Studies Center, Knox College. The "Well Sing to Abe Our Song" online collection, drawn from the Alfred Whital Stern Collection in the Rare Book and Special Collections Division, includes more than two hundred sheet-music compositions that represent Lincoln and the war as reflected in popular music. In addition to the sheet music, the Stern Collection contains books, pamphlets, broadsides, autograph letters, prints, cartoons, maps, drawings, and other memorabilia adding up to over 10,500 items that offer a unique view of Lincoln's life and times. Mr. Lincoln's Virtual Library provides access to a variety of documents and resources about Abraham Lincoln. This project is being supported by a generous gift from Donald G. Jones, Terri L. Jones, and The Jones Family Foundation.

**CMS-5 ** *Manuscript format; sample pages*

The following guidelines for formatting a CMS-style paper and preparing its endnotes and bibliography are based on *The Chicago Manual of Style*, 16th ed. (Chicago: U of Chicago P, 2010). For pages from a sample paper, see CMS-5b.
CMS-5a  Manuscript format

Formatting the paper

CMS manuscript guidelines are fairly generic because they were not created with a specific type of writing in mind.

Materials and font  Use good-quality 8½” × 11” white paper. If your instructor does not require a specific font, choose one that is standard and easy to read (such as Times New Roman).

Title page  Include the full title of your paper, your name, the course title, the instructor’s name, and the date. See page 532 for a sample title page.

Pagination  Using arabic numerals, number the pages in the upper right corner. Do not number the title page but count it in the numbering; that is, the first page of the text will be numbered 2. Depending on your instructor’s preference, you may also use a short title or your last name before the page numbers to help identify pages.

Margins and line spacing  Leave margins of at least one inch at the top, bottom, and sides of the page. Double-space the body of the paper, including long quotations that have been set off from the text. (For line spacing in notes and the bibliography, see p. 531.) Left-align the text.

Long quotations  You can choose to set off a long quotation of five to ten typed lines by indenting the entire quotation one-half inch from the left margin. (You should always set off quotations of ten or more lines.) Double-space the quotation; do not use quotation marks. (See p. 533 for a long quotation in the text of a paper; see also pp. 506–07.)

Capitalization and italics  In titles of works, capitalize all words except articles (a, an, the), prepositions (at, from, between, and so on), coordinating conjunctions (and, but, or, nor, for, so, yet), and to and as—unless one of these words is first or last in the title or subtitle. Follow these guidelines in your paper even if the title is styled differently in the source.

   Lowercase the first word following a colon even if the word begins a complete sentence. When the colon introduces a series of sentences or questions, capitalize all sentences in the series, including the first.

   Italicize the titles of books, periodicals, and other long works. Use quotation marks around the titles of periodical articles, short stories, poems, and other short works.
**Visuals** CMS classifies visuals as tables and illustrations (illustrations, or figures, include drawings, photographs, maps, and charts). Keep visuals as simple as possible.

Label each table with an arabic numeral (“Table 1,” “Table 2,” and so on) and provide a clear title that identifies the table’s subject. The label and the title should appear on separate lines above the table, flush left. Below the table, give its source in a note like this one:

For each figure, place a label and a caption below the figure, flush left. The label and caption need not appear on separate lines. The word “Figure” may be abbreviated “Fig.”

In the text of your paper, discuss significant features of each visual. Place visuals as close as possible to the sentences that relate to them unless your instructor prefers that visuals appear in an appendix.

**URLs (Web addresses)** When a URL must break across lines, do not insert a hyphen or break at a hyphen if the URL contains one. Instead, break the URL after a colon or a double slash or before any other mark of punctuation. If your word processing program automatically turns URLs into links (by underlining them and changing the color), turn off this feature.

**Headings** CMS does not provide guidelines for the use of headings in student papers. If you would like to insert headings in a long essay or research paper, check first with your instructor. See the sample pages of a CMS-style paper on pages 532–37 for typical placement and formatting of headings.

**Preparing the endnotes**

Begin the endnotes on a new page at the end of the paper. Center the title “Notes” about one inch from the top of the page, and number the pages consecutively with the rest of the manuscript. See page 536 for an example.

**Indenting and numbering** Indent the first line of each note one-half inch from the left margin; do not indent additional lines in the note. Begin the note with the arabic numeral that corresponds to the number in the text. Put a period after the number.

**Line spacing** Single-space each note and double-space between notes (unless your instructor prefers double-spacing throughout).
Preparing the bibliography

Typically, the notes in CMS-style papers are followed by a bibliography, an alphabetically arranged list of all the works cited or consulted. Center the title “Bibliography” about one inch from the top of the page. Number bibliography pages consecutively with the rest of the paper. See page 537 for a sample bibliography.

Alphabetizing the list Alphabetize the bibliography by the last names of the authors (or editors); when a work has no author or editor, alphabetize it by the first word of the title other than A, An, or The.

If your list includes two or more works by the same author, use three hyphens instead of the author’s name in all entries after the first. Arrange the entries alphabetically by title.

Indenting and line spacing Begin each entry at the left margin, and indent any additional lines one-half inch. Single-space each entry and double-space between entries (unless your instructor prefers double-spacing throughout).

CMS-5b Sample pages from a research paper: CMS style

Following are pages from a research paper by Ned Bishop, a student in a history class. The assignment required CMS-style endnotes and bibliography. Bishop followed CMS guidelines in preparing his manuscript as well.
The Massacre at Fort Pillow:
Holding Nathan Bedford Forrest Accountable

Ned Bishop

History 214
Professor Citro
March 22, 2008

Marginal annotations indicate CMS-style formatting and effective writing.
Although Northern newspapers of the time no doubt exaggerated some of the Confederate atrocities at Fort Pillow, most modern sources agree that a massacre of Union troops took place there on April 12, 1864. It seems clear that Union soldiers, particularly black soldiers, were killed after they had stopped fighting or had surrendered or were being held prisoner. Less clear is the role played by Major General Nathan Bedford Forrest in leading his troops. Although we will never know whether Forrest directly ordered the massacre, evidence suggests that he was responsible for it.

What happened at Fort Pillow?

Fort Pillow, Tennessee, which sat on a bluff overlooking the Mississippi River, had been held by the Union for two years. It was garrisoned by 580 men, 292 of them from United States Colored Heavy and Light Artillery regiments, 285 from the white Thirteenth Tennessee Cavalry. Nathan Bedford Forrest commanded about 1,500 troops.1

The Confederates attacked Fort Pillow on April 12, 1864, and had virtually surrounded the fort by the time Forrest arrived on the battlefield. At 3:30 p.m., Forrest demanded the surrender of the Union forces, sending in a message of the sort he had used before: "The conduct of the officers and men garrisoning Fort Pillow has been such as to entitle them to being treated as prisoners of war. . . . Should my demand be refused, I cannot be responsible for the fate of your command."2 Union Major William Bradford, who had replaced Major Booth, killed earlier by sharpshooters, asked for an hour to consider the demand. Forrest, worried that vessels in the river were bringing in more troops, "shortened the time to twenty minutes."3 Bradford refused to surrender, and Forrest quickly ordered the attack.

The Confederates charged to the fort, scaled the parapet, and fired on the forces within. Victory came quickly, with the Union forces running toward the river or surrendering. Shelby Foote describes the scene like this:

Some kept going, right on into the river, where a number drowned and the swimmers became targets for marksmen on the bluff. Others, dropping their guns in terror, ran back toward the Confederates with their hands up, and of these some were spared as prisoners, while others were shot down in the act of surrender.4

In his own official report, Forrest makes no mention of the massacre. He does make much of the fact that the Union flag was not lowered by the

3 Statistics are cited with an endnote.
4 Ellipsis mark indicates that words have been omitted.
5 Quotation is cited with an endnote.
6 Long quotation is set off from text by indenting. Quotation marks are omitted.
7 Bishop uses a primary source as well as secondary sources.
Union forces, saying that if his own men had not taken down the flag, “few, if any, would have survived unhurt another volley.” However, as Jack Hurst points out and Forrest must have known, in this twenty-minute battle, “Federals running for their lives had little time to concern themselves with a flag.”

The federal congressional report on Fort Pillow, which charged the Confederates with appalling atrocities, was strongly criticized by Southerners. Respected writer Shelby Foote, while agreeing that the report was “largely” fabrication, points out that the “casualty figures . . . indicated strongly that unnecessary killing had occurred.” In an important article, John Cimprich and Robert C. Mainfort Jr. argue that the most trustworthy evidence is that written within about ten days of the battle, before word of the congressional hearings circulated and Southerners realized the extent of Northern outrage. The article reprints a group of letters and newspaper sources written before April 22 and thus “untainted by the political overtones the controversy later assumed.” Cimprich and Mainfort conclude that these sources “support the case for the occurrence of a massacre” but that Forrest’s role remains “clouded” because of inconsistencies in testimony.

Did Forrest order the massacre?

We will never really know whether Forrest directly ordered the massacre, but it seems unlikely. True, Confederate soldier Achilles Clark, who had no reason to lie, wrote to his sisters that “I with several others tried to stop the butchery . . . but Gen. Forrest ordered them [Negro and white Union troops] shot down like dogs, and the carnage continued.”

But it is not clear whether Clark heard Forrest giving the orders or was just reporting hearsay. Many Confederates had been shouting “No quarter! No quarter!” and, as Shelby Foote points out, these shouts were “thought by some to be at Forrest’s command.” A Union soldier, Jacob Thompson, claimed to have seen Forrest order the killing, but when asked to describe the six-foot-two general, he called him “a little bit of a man.”

Perhaps the most convincing evidence that Forrest did not order the massacre is that he tried to stop it once it had begun. Historian Albert Castel quotes several eyewitnesses on both the Union and Confederate sides as saying that Forrest ordered his men to stop firing. In a letter to his wife three days after the battle, Confederate soldier Samuel Caldwell
Bishop 4

wrote that “if General Forrest had not run between our men & the Yanks with his pistol and sabre drawn not a man would have been spared.”

In a respected biography of Nathan Bedford Forrest, Hurst suggests that the temperamental Forrest “may have ragingly ordered a massacre and even intended to carry it out—until he rode inside the fort and viewed the horrifying result” and ordered it stopped. While this is an intriguing interpretation of events, even Hurst would probably admit that it is merely speculation.

Can Forrest be held responsible for the massacre?

Even assuming that Forrest did not order the massacre, he can still be held accountable for it. That is because he created an atmosphere ripe for the possibility of atrocities and did nothing to ensure that it wouldn’t happen. Throughout his career Forrest repeatedly threatened “no quarter,” particularly with respect to black soldiers, so Confederate troops had good reason to think that in massacring the enemy they were carrying out his orders. As Hurst writes, “About all he had to do to produce a massacre was issue no order against one.”

Dudley Taylor Cornish agrees:

It has been asserted again and again that Forrest did not order a massacre. He did not need to. He had sought to terrify the Fort Pillow garrison by a threat of no quarter, as he had done at Union City and at Paducah in the days just before he turned on Pillow. If his men did enter the fort shouting “Give them no quarter; kill them; kill them; it is General Forrest’s orders,” he should not have been surprised.

The slaughter at Fort Pillow was no doubt driven in large part by racial hatred. Numbers alone suggest this: Of 295 white troops, 168 were taken prisoner, but of 262 black troops, only 58 were taken into custody, with the rest either dead or too badly wounded to walk. A Southern reporter traveling with Forrest makes clear that the discrimination was deliberate: “Our troops maddened by the excitement, shot down the retreating Yankees, and not until they had attained the water’s edge and turned to beg for mercy, did any prisoners fall in to our hands—Thus the whites received quarter, but the negroes were shown no mercy.”

Union surgeon Dr. Charles Fitch, who was taken prisoner by Forrest, testified that after he was in custody he “saw” Confederate soldiers “kill every negro that made his appearance dressed in Federal uniform.”

Teaching with A Writer’s Reference, tabbed section T, appears in the instructor’s edition only. The student edition begins with “How to use this book and its companion Web site.”
Teaching with A Writer’s Reference

**T1** Using both the reference and classroom features of the handbook, IE-2

- a Use the handbook’s reference aids, IE-2
- b Make the most of examples and models as you teach, IE-6

**T2** Choosing the right version of A Writer’s Reference to meet your needs, IE-8

**T3** Integrating A Writer’s Reference into your course: General strategies, IE-10

- a Introduce the handbook, IE-10
- b Plan with the handbook, IE-11
- c Use the handbook in class discussions, IE-16
- d Respond with the handbook, IE-16
- e Use the companion Web resources, IE-19

**T4** Integrating A Writer’s Reference into your course: Classroom activities, IE-21

- a Use the handbook to teach the composing process, IE-21
- b Use the handbook to teach thesis statements and the parts of an essay, IE-22
- c Use the handbook to teach argument and analysis, IE-23
- d Use the handbook to teach the research process, IE-24
- e Use the handbook to teach grammar, style, and punctuation, IE-25
- f Use the handbook to teach visual literacy, IE-26

**T5** Using CompClass for A Writer’s Reference, IE-26
Thank you for choosing *A Writer’s Reference*. This tabbed section will help you make the most of the book as a classroom tool and will guide you in orienting your students to the handbook as a reference tool.

- Section T1 provides an overview of the book’s reference aids.
- T2 fleshes out the different versions of *A Writer’s Reference* that are available.
- T3 and T4 give specific ideas, strategies, and models for integrating and using the handbook as you teach your composition course or any writing-intensive course. The emphasis in these sections is on promoting student use of the handbook.
- T5 provides teaching help for users of *CompClass for A Writer’s Reference*.

For additional teaching ideas, go to hackerhandbooks.com and click on the tab for *Teaching with Hacker Handbooks*.
Using both the reference and classroom features of the handbook

A Writer's Reference is designed to be flexible—to be used both as a reference and as a tool for classroom and online instruction. As a reference text, it helps writers by giving advice and models when class is not in session or when an instructor is not available. A Writer's Reference offers straightforward advice for starting and planning an essay, crafting a thesis statement, gathering support, editing for style or correctness, finding and citing sources, designing a document, and much more.

The handbook begins by telling your students that A Writer's Reference can save them time. It does so by offering quick access to reliable help 24/7, which means no hunting around randomly on the Web. Keep in mind that the book and its supplemental resources are designed to save you time as well—by giving you a shorthand system for marking surface errors and some specific activities that are ready-made for the classroom.

If a handbook is to serve as a classroom text, it must be easy to use, offer quick avenues to clear content, and support class activities and course goals. A Writer's Reference is such a text; it includes a variety of reference aids, and it supports writers and teachers with accessible advice, examples, and models.

Use the handbook’s reference aids.

It’s worthwhile getting acquainted with the book if it’s your first time using it—and getting reacquainted if you have adopted a new edition. And even if you don’t plan to use A Writer’s Reference in every lesson, knowing how the book is organized and how to find information and examples right when you need them can save time when you use it in class.

Working from the outside in, you will notice several reference aids.

The main menu

The menu on the inside front cover gives you an overview of the book’s contents, roughly organized in three sections: composition and style, correctness and basics, and research and the index. Color-coded arrows point the way to the appropriate tabbed section.
If you have adopted the Classic version of A Writer’s Reference, the menu will show twelve tabbed sections. If you have ordered a different version for your students, such as A Writer’s Reference with Writing in the Disciplines or A Writer’s Reference with Writing about Literature, your students will see a description of that version to the left of the main menu.

Tabs

The Classic version of the handbook has twelve tabbed dividers, or tabs; other versions may have thirteen. The front of each tab includes the code letter for that tabbed section (A for Academic Writing, for example). These code letters are used in index entries to help students flip quickly to the right section. The reverse side of each tab includes a list of contents for that tabbed section. The page range for the section is printed on the tab extension—the part of the tab that sticks out of the book.
Tags and codes

At the tops of the pages, alongside the page numbers, you will find other helpful information. Every right-hand page includes tags, a brief list of topics covered. These tags are often in plain language for easier student access. You might, for example, see “choppy” at the top of a page on which advice about coordination and subordination appears.

In addition to tags, you’ll find a tab at the top of each page that gives the handbook’s section codes. Some instructors find these helpful as a search device and as an aid when they respond to students’ drafts (see p. 3).

Boxes, charts, and checklists

These quick-reference devices serve as hubs of information. For many years, both teachers and students have told us how much they’ve come to rely on the many boxes, charts, and checklists in A Writer’s Reference—pages that are often dog-eared by users because they offer at-a-glance summaries of key content.

If you use PowerPoint in your teaching, check out the instructor resources section of the companion Web site at hackerhandbooks.com/writersref. You can download PowerPoint slides for many of the book’s charts and checklists, such as the ones on global revision and using signal phrases.

Using signal phrases in MLA papers

To avoid monotony, try to vary both the language and the placement of your signal phrases.

Model signal phrases

In the words of researchers Greenfield and Davis, “...”

As legal scholar Jay Kesan has noted, “...”

The ePolicy Institute, an organization that advises companies about reducing risks from technology, reports that “...”

“...,” writes Daniel Tynan, “...”

“...,” attorney Schmitt claims.

Kizza and Ssanyu offer a persuasive counterargument: “...”

Verbs in signal phrases

acknowledges  comments  endorses  reasons
adds  compares  grants  refutes
admits  confirms  illustrates  rejects
agrees  contends  implies  reports
argues  declares  insists  responds
asserts  denies  notes  suggests
believes  disputes  observes  thinks
claims  emphasizes  points out  writes
Documentation directories

In each of the three style sections—MLA, APA, and CMS (Chicago)—students will find a directory of documentation models. Scanning the directory, organized by type of source, allows students to quickly find the model they need to cite their source. Many students flag the directory pages or highlight the models they use most often.

The index

The index, written to be user-friendly, includes traditional handbook terms alongside entries inspired by students’ search practices and their own terminology. The index includes dots as well as ellipsis mark, for example, and flow as well as coherence.

Other reference aids

Turn to the back of A Writer’s Reference and you’ll see a detailed menu, or list of contents, that may come in handy as you respond to drafts. (Some teachers use codes to respond to surface errors: P1-b for commas with introductory elements or S4-a for shifts in point of view, for example.) Coming into the book from the back, you’ll notice other useful reference aids: a menu that directs multilingual writers to targeted content, a list of revision symbols (dev and sv agr, for example) that may save you time when you write marginal comments, a list of charts in the handbook, and a directory to model papers and other sample documents.
T1-b Make the most of examples and models as you teach.

Writers benefit from seeing examples:

- examples of the kinds of sentences they are trying to craft or correct
- examples of tasks they are attempting for the first time (such as annotating a reading) or in a new context
- examples of tools they will use (such as databases) when conducting research
- examples of bibliographic entries and in-text citations for when they work with sources
- examples of the kinds of papers they are expected to compose
- examples of large writing projects divided into manageable tasks

A Writer’s Reference is full of examples and models, ready to be consulted in class. During a whole-class activity, students can turn to relevant pages in the print book—or the pages can be projected with a docu-cam or projected from the e-book version of A Writer’s Reference on your laptop.

Many instructors take class time to review one or more of the book’s examples as part of a lesson. On page IE-7 is one teacher’s lesson plan on drafting debatable thesis statements.

For additional lesson plans that make the most of the handbook’s examples, see Teaching with Hacker Handbooks, available as a free download (hackerhandbooks.com/teaching) or a free print resource from your sales representative. (See also pp. IE-30 and IE-31.)
Drafting debatable thesis statements

The purpose of the activity is to help you understand what debatability means, why it is essential for an effective thesis statement, and how you can turn a factual thesis statement into a debatable one.

Whole class:

2. What makes a point debatable? As a class, we’ll make a list of points that are debatable—and a companion list of facts.
   (Debatable point: Hybrid vehicles are the single most important technological development in the last twenty-five years. Fact: Hybrid vehicle sales continue to rise worldwide.)

Small groups:

3. Review the example of the thesis statement that is too factual, the one about the polygraph, on page 17. What is the problem in the draft thesis? What strategy is suggested for revising it? What additional strategies can you come up with?
4. Discuss the revised thesis. How is it different from the draft thesis? What is the debate on this topic? What is an example of a counterpoint that an opponent could make after reading this thesis?

Whole class:

5. As a class, rough out an outline for a paper that uses the revised thesis statement.

Homework: Take a fact from your earlier list (step 2 above) and use the handbook’s suggested strategies—identify a debate and pose a question—to rewrite it as a thesis statement. Due Thursday, January 28.
Choosing the right version of *A Writer’s Reference* to meet your needs

*A Writer’s Reference* is published in several different versions to accommodate varying instructor needs, student needs, and course and program goals. All versions include the core book, the Classic version. All versions other than the Classic include additional content, most often in a separate tabbed section. In the version with exercises, the exercises are integrated throughout the book.

All versions are supported by the same companion Web site: hackerhandbooks.com/writersref. To examine any version, contact your sales representative.

**A Writer’s Reference (Classic)**

Twelve tabbed sections offer class-tested help with composing and revising, academic writing, research and documentation (MLA, APA, and CMS [*Chicago*] styles), grammar and style, and document design—all in a tabbed, comb-bound, quick-reference format. 592 pages.

**A Writer’s Reference with Exercises**

This version is tailor-made to use with your students in class or for additional out-of-class grammar practice—with plenty of items for multilingual students. It includes ninety-eight exercise sets integrated throughout so that the practice for each topic follows the explanations and examples. A helpful mix of exercise formats includes both sentence-length items and paragraph-length items. 656 pages.
A Writer's Reference with Writing in the Disciplines

To help your students write in composition and in other college courses, this version includes an additional tabbed section with advice and model papers in nine academic disciplines: biology, business, criminology, education, engineering, history, music, nursing, and psychology. The Classic version includes a chapter on writing in the disciplines, section A4, and the writing in the disciplines version is an extension of that chapter. Model papers represent multiple genres: lab report, memo, proposal, reflective essay, concert review, technical report, researched essay, clinical practice paper, and review of the literature. 736 pages.

A Writer's Reference with Writing about Literature

If you ask your students to write analytically about works of fiction, poetry, and drama, this version will meet your needs. It gives advice on forming and supporting an interpretation—with an emphasis on avoiding plot summary—guidance for integrating literary quotations in MLA style, and advice about using secondary sources. The literature tab includes two annotated student essays, one of which is based on secondary sources. 656 pages.

A Writer's Reference with Resources for Multilingual Writers and ESL

This version offers multilingual writers targeted advice and strategies for college writing and research. It includes additional exercises, study skills help, advice about meeting college expectations, and sample academic writing by a multilingual student. 656 pages.
A Writer's Reference with Strategies for Online Learners

An ever-growing number of students are enrolled in online sections of first-year writing. This version addresses online students’ needs by offering study tips and time management strategies. Topics include how to be an active participant in the course, how to navigate the learning space, how to communicate appropriately with peers and instructors, and how to seek academic help and other resources. 624 pages.

A Canadian Writer’s Reference

With examples that reflect Canadian culture and concerns and with spelling, style, and measurement changes for cultural relevance, A Canadian Writer’s Reference is a practical, easy-to-use reference for students who are writing in courses taught at Canadian colleges and universities. This version also includes comprehensive coverage of writing about literature. 656 pages.

T3 Integrating A Writer’s Reference into your course: General strategies

If you assign a handbook, you want your students to use the handbook. The following sections offer general strategies for broadening the role that the handbook plays in your course and specific classroom activities designed to draw on the handbook and help students achieve course outcomes.

T3-a Introduce the handbook.

Many instructors find it helpful to introduce all of the textbooks for a course during the first or second class period, whether the books are required or recommended. When you talk about A Writer’s Reference, let your students know how you plan to use it in class and how you expect students to use it outside of class. If you teach online, describe for
your students what role you expect the handbook to play in the course. You may want to use this as a moment to reflect on what a reference is and how it differs from other kinds of textbooks. It can be helpful for the class to brainstorm what other kinds of references they use and how they use them.

To orient your students to the book’s major reference aids—the menus, the index, the documentation directories, and so forth—you can assign the tutorials provided at the beginning of the book (pp. xii–xv). It often helps to pair students up to work on the tutorials; that way the activity becomes an icebreaker as well. Some instructors design scavenger hunts so that students can locate key coverage in the book—coverage that matches the course goals—before they need it. See hackerhandbooks.com/teaching for sample scavenger hunts. Here’s an excerpt from a scavenger hunt for a course that focuses on argumentative writing.

Excerpt from a scavenger hunt

8. Section _____ gives advice about writing thesis statements. I found a sample of a well-written thesis statement on page _____.
9. Guidelines for active reading can be found on page _____.
10. Samples of annotated readings (readings with student notes on them) are in this section: _____.
11. Section _____ gives advice about using specific evidence in argument papers.
12. Section _____ covers how to evaluate another writer’s argument. Pages ____ give advice on judging how a writer represents different viewpoints.
13. I found the sample argument essay on page _____.
14. There is a sample MLA-style works cited page on page _____.

**T3-b Plan with the handbook.**

Detailed assignments with clear expectations help students write focused first drafts. You can give students an added jump start: Include references to advice and models from *A Writer’s Reference*
in your assignments. Many students use their handbook during the revising and editing stages of a paper, but you can help your students see the value of the book even at the prewriting and drafting stages. Pages IE-12 to IE-14 show excerpts from composition assignments (from Worcester State College and York College) and a biology assignment (from Springfield Technical Community College) with built-in cross-references to advice and models in the handbook and on the handbook’s companion Web site.

Summary and analysis assignment for English Composition I, with references to A Writer’s Reference

Choose one of the following essays and write a three-to-five-page essay in which you summarize the work and respond critically:

- Mike Rose, “I Just Wanna Be Average”
- Emily Bazelon, “The Next Kind of Integration”
- Garret Keizer, “Why We Hate Teachers”
- Matt Miller, “First, Kill All the School Boards: A Modest Proposal to Fix the Schools”

A summary requires close, careful reading. A good summary (A1-c) explains the essential points of the essay to someone who hasn’t read it.

A critical response (A1-d) presents your judgment of a piece of writing with a thesis (C2-a) and specific examples from the text. An effective response often raises a question about the author’s position or examines the author’s reasoning and logic (A3-a, A3-b).

Be sure to include an establishing sentence in your opening paragraph. In it, give the title of the reading and the author’s name and present the author’s rhetorical purpose/main idea. In your thesis, be sure to communicate your main idea about the text or your primary judgment of the text.

Shape paragraphs (C4-a, C4-b) so that their relation to your main point is clear. Integrate (MLA-3a, 3b) at least three specific passages from the text into your essay. Include a title, format your paper in MLA style (MLA-5b), and include a works cited page (p. 440).

Notes for summary: Due Tuesday, 2/16
First draft: Due Thursday, 2/18
Peer review (p. 22): Tuesday, 2/23
Final draft: Due Tuesday, 3/2
Excerpt from a research assignment for English Composition II, with references to *A Writer's Reference*

Once you have decided on your topic, you should draft a research question (R1-a) that will provide a clear focus for both your research itself and the report that you will write. Having formulated your research question, you should then determine (1) where to look (R1-b) for appropriate information that would help you answer your question (what library sources? what online sources?) and (2) what kind of original research (R1-g) you might do to produce additional information (observations? interviews? surveys? etc.).

Regarding structure, your report must include the following:

- An informative title
- An introduction (C2-a) that provides relevant context for your research and introduces its purpose
- A series of paragraphs that present a synthesis (MLA-3c) of the information you’ve found or otherwise produced in your research, analyzed in a way that emphasizes its meaning or significance. Alternatively, you may present all of your information—both what was known previously and what you’ve added to that knowledge—in a single, purposeful synthesis paragraph, meaningfully organized.
- A conclusion (C2-c) that summarizes your key findings and judgments about the information included in the report and that points to additional research that needs to be done

Document your report fully and appropriately according to current MLA guidelines (MLA-4).
Excerpt from a lab assignment for biology, with references to A Writer’s Reference

You already have the information you need for this assignment—it is in the notes you took while doing the experiment today. Now you have to arrange this information in the correct format for a lab report (hackerhandbooks.com/writersref > Model papers). Be sure to include each of the following sections.

Abstract: This short paragraph summarizes your whole report. (See p. 485.) One way to think about writing the abstract is to have one or two sentences that capture the main ideas of the following sections.

Introduction: This section gives the background for your work. All the information necessary to understand your work (the experimental organism, the design, the aspect you have chosen to research) is written up here. Include your observations and hypothesis in this section. A good rule of thumb in writing an introduction is to write it for a general audience (pp. 3 and 6) so that anyone, even your parent or grandparent, could understand why you did what you did.

Methods: Describe—don’t just list—what you did and how you did it. Write this in the past tense (G2-f). Identify the control group for your study in this section.

Results: Put all of your experimental results in this section. If you can make a graph, chart, or table (C5-d) of your results, this is where you should put it. But don’t just put it here—be sure to write about it and describe it.

Discussion: This section describes what YOU think about your results. Share ideas you have about your results and why they worked the way they worked—or why they did not work the way you thought they would.

Your grade will be based on content and clarity (edit with sections S, G, and P). Be sure that the main point (C2-a) of the lab is clear in the report. Include all five sections, and be sure to place and label figures (C5-d) appropriately.
Designing writing assignments that integrate the handbook

**Start with purpose and audience.**

- Make the purpose of the writing assignment clear and connected to the learning objectives for the unit or the course. (C1-a)
- The intended audience should be explicitly stated: Is the audience a group of experts? Nonexperts? Other students? Potential clients? Those who might provide funding? If students are to choose the audience, say so. (C1-a)

**Share specific criteria.**

- What do you want students to be able to demonstrate with this assignment? (p. 5)
- Should students document sources in a particular style? (R4)

**Direct students to models; emphasize format.**

- Spend class time (fifteen minutes) walking through the features of a model paper — content features, format features, and rhetorical features. (See model papers in A1-e, A2-h, MLA-5b, APA-5b, and CMS-5b.)
- Determine whether you’ll emphasize academic formats (essay, review, lab report) or professional formats (memo, market analysis, operator’s manual) or a combination of the two in your course. (C5-e, C5-f)

**Use prompts that emphasize positioning and problem solving.**

- Ask students to identify a debate and position themselves within that debate. A sample prompt could be “Our course readings have presented many angles on [topic x]. Write an essay in which you take a position on [x] and support it with evidence.” (C2-a)
- Pose problems to help students improve critical/academic thinking. A sample prompt could be “Apply what you know about Smith’s ‘invisible hand’ theory [concept x] to economic recovery in Haiti or another post-trauma economy [situation y]. How might the theory play out in practice?”
- In a writing-intensive technical course, a prompt such as the following would work: “Review the design specifications for [x]. Suggest one key change you would make to the design. Argue for your modification: What problem does it solve?” (A2)

**Chunk out the tasks; provide interim deadlines.**

- Divide the writing assignment into several steps or tasks, each with due dates. Scaffolding helps students avoid procrastination and plagiarism — and in general produces better writing. (p. 331)
Use the handbook in class discussions.

In class, the handbook can be useful when you need an example, a definition, a model, or an answer to a question. If you are talking about how writers use present perfect tense in APA-style papers, for example, and a student asks what present perfect tense is, try to find the answer as a class—using the handbook.

Respond with the handbook.

When you respond to your students’ drafts, naturally you’ll write comments of varying lengths, purposes, and formats, both in the margins and at the end of the paper. Maybe you do this with pen or pencil or perhaps with the comment feature in your word processor or course management system. Your style may be to ask many questions or to circle errors or to teach lessons through marginal comments.

“Students can’t easily find writing advice online. They must wade through search engines with the right keywords. The handbook eliminates all of the hassle of sifting through info online. Everything is located in one book, and I know the info they get from the reading will be accurate and sound.”

—Chanon Adsanatham, Community College of Aurora
Using some of your comments to direct students to content in the handbook has the dual benefit of saving you time and teaching students how to find revision help in the handbook. You don’t have to edit a student’s subject-verb agreement errors; writing GI or sv agr in the margin will send the student to advice and examples and perhaps will give you more time to comment at length on a more global concern.

Early in the semester, you may want to facilitate a class discussion about comments. You can share your ideas about the role that comments play in the course and ask students to share how they have made sense of and used comments from teachers, tutors, and peers in the past. A Writer’s Reference includes a new feature, “Revising with comments” (section C3-c), that may help you have that discussion with your students. The feature will certainly help your students at the revision stage.

### Tips for responding to student writing

#### Preparing to respond

- **Being positive.** The goal of commenting is to offer encouragement and honest assessment. Look for strengths and help students build on strengths.
- **Taking turns.** Think of responding as teaching, not correcting—especially in early drafts. Responding is most fruitful when you engage students in a dialogue—a conversation between writer and reader.
- **Sharing models.** Share with students a rough draft and final draft of the same paper; let them see that true revising is often an architectural renovation project—not just patchwork and fixes.
- **Discussing the purpose of comments.** Spend class time talking with students about the purpose of comments. Introduce them to the types of comments you give and explain any symbols or shorthand you use. Talk with students not only about how they can use comments to help them revise a specific piece of writing, but also about how they can apply those comments to future writing assignments.

#### Responding to rough drafts

- **Going global.** Resist asking students to patch and edit before they develop their ideas. Asking students to think about grammar, punctuation, and word choice in sentences that may not make it to the next draft could be a waste of both your time and theirs. Turn students’ attention to larger, more global issues of organization and focus.
Tips for responding to student writing (continued)

- **Knowing when to go local.** In a rough draft, you might identify patterns of sentence-level, or local, errors instead of marking individual errors. Identifying patterns—representative strengths and limitations—helps students gain control over their writing and saves you time because you don’t need to comment on every instance of the problem.

- **Anchoring comments.** Anchor your comments in a student’s text to avoid vague directives. If a student has written, “Cultural differences make it difficult for Italian students to study in the United States,” an anchored comment can give better direction. Instead of writing “Examples?!” try a comment like this: “You can strengthen your point by including two or three examples of the kinds of cultural differences you mean.”

- **Planting seeds.** Responding is more effective when the language of comments grows from conversations and lessons in the classroom. Students shouldn’t be encountering terms or ideas for the first time in the margins of their papers. If you write, “You’ve presented the evidence; now analyze the evidence,” it’s best if you’ve talked in class about what it means to analyze evidence.

- **Teaching one lesson at a time.** Reading an entire draft, quickly, before commenting may actually save time. Ask: What single lesson (or two) do I want to teach here? And how will my comments teach this lesson? Heading into each draft with these questions will keep your comments consistent and focused and will help you develop a hierarchy of concerns appropriate for the draft, which may keep you from over-commenting. Keep in mind that there is a finite set of lessons an individual student can learn in revising a single paper.

- **Directing students to handbook help.** For surface-level errors, link comments to specific handbook lessons. You don’t have to use your time to teach lessons about sentence fragments or subject-verb agreement if you assign a handbook. Use a shorthand system to point students to advice and examples in the handbook. If you and your students are all using *A Writer’s Reference*, you can direct them to edit fragments by using the shorthand *frag* in the margin or a code like G5-a. Remember that if you notice a pattern of sentence boundary errors, point out the pattern, but don’t edit every instance.

**Encouraging revision**

- **Treading purposefully and lightly.** Avoid leaving too heavy a footprint in the margins of students’ papers. Use your comments to show students how to start revising without suggesting specific language for the revision.
Beginning the dialogue. Ask students to submit a rough draft along with a cover letter or “Dear Reader” letter. A “Dear Reader” letter reminds students that they are writing for a reader, allows them to begin a dialogue about their work, and provides an opportunity for them to articulate their specific questions and concerns. Always ask students to identify their favorite part of their paper in the “Dear Reader” letter.

Making a plan. When you hand back drafts with your comments, assign students to review the comments, perhaps during the final fifteen minutes of a class, and to write a one-page revision plan in which they explain what they learned from the comments and how they plan to use the comments as they revise.

Responding to final drafts

Refreshing your memory. Before responding to final drafts, reread the assignment and the expectations you may have listed for students. Doing so keeps you grounded in a specific context and keeps the commentary tied to the assignment.

Putting final comments in context. On a final draft, evaluate the strengths and limitations in the context of the assignment’s goals. For you, responding is far easier when the goals of an assignment are specific and when those goals have shaped the language and lessons that prepared students for the assignment.

Providing a bridge. Writers develop their skills over time. It’s too much to expect that first-year writing teachers can cover every lesson students need to write successfully across the curriculum. Make sure your comments on final drafts do double duty. Final comments can evaluate success in relation to the specific assignment, but they should also provide a bridge—or a transportable lesson—to the next assignment or to assignments in other courses.

T3-e Use the companion Web resources.

Free and open resources

The resources on the handbook’s free and open companion Web site provide more opportunities for students to practice skills, sharpen their analysis, and better understand concepts. Some instructors work these resources into class activities by conducting classes in a computer lab or by using a projector in a traditional classroom.
Others assign companion Web site content, such as exercises, for homework. Visit hackerhandbooks.com/writersref.

- If you’d like to assign research, grammar, or writing exercises, the companion site has more than 1,800 items—on every topic in the handbook. Student results report to a gradebook that allows you to see and monitor the progress of individual students and groups of students. If you teach with A Writer’s Reference with Exercises, keep in mind that the exercises on the Web site are different from those in your handbook.

- If you use model student papers as you teach, there are more than thirty on the site, including the five from the handbook. On the site you’ll find two annotated bibliographies, a CSE-style review of the literature, and other papers that don’t appear in the handbook. Having students analyze a sample student paper in pairs before they write their own is often a useful in-class exercise.

- Multilingual writers in search of additional support can click on Multilingual/ESL for additional exercises, a sample student essay draft and revision (by a multilingual writer), and plenty of charts and tools for study help. You may want to make sure that your students and your school’s writing center director know about these resources.

- The free site now includes material to help students revise drafts. Students can click on Revision for examples of global and sentence-level revisions, sample student papers in progress, and a sample rough draft with peer comments.

Other free resources are worth checking out: diagnostic tests, resources for writers and tutors, Research and Documentation Online, helpsheets for common writing problems, and Re:Writing.

**Premium resources**

When you package the handbook with access to the premium resources on the book’s companion site, your students have even more opportunities to see the value in their purchase.

- An innovative e-book version of A Writer’s Reference facilitates on-the-go learning and reference—as well as providing an alternative tool for classroom activities. The e-book allows students to bookmark the sections they use most often and add their own examples and notes. As an instructor, you can add your own content to the e-book, including documents and images, to share with your students. The e-book includes exercises.
• The premium resources for this book also include videos and tutorials designed to inspire and to encourage practice; an interactive peer review game called Peer Factor; a skills-based, highly visual Make-a-Paragraph Kit; and more. In class or for homework, the videos can serve as a foundation for writing prompts. For example, students can watch the three-minute video in which Chitra Banerjee Divakaruni discusses the idea of the American dream and its meaning to immigrants and then write a brief response. Tutorials, such as the one on integrating sources, can be helpful in starting lessons or discussions in class.

---

**T4 Integrating A Writer’s Reference into your course: Classroom activities**

This section offers a sampling of specific teaching ideas and classroom activities that ask students to draw on the handbook for support. T4 is organized by the major content areas of a typical composition course. For more detailed suggestions and ready-to-tailor teaching materials, visit hackerhandbooks.com/teaching or contact your sales representative for a copy of Teaching with Hacker Handbooks.

**T4-a Use the handbook to teach the composing process.**

*Activity 1: Experimenting with audience*

When students have a solid draft of an essay, a report, or another paper that they are writing, ask them to imagine an audience different from the one they originally intended. Ask them to write an entirely different introduction with this alternative audience in mind (you may have them review audience in C1-a). You might even have students write a brief reflective statement or discussion post about how the changes they made for a different audience would change the paper in general.

*A variation of the activity:* Ask students to look at one of the model papers on the companion Web site (hackerhandbooks.com/writersref) or in the handbook (A1-e or A2-h). They should (1) imagine a different audience for the paper they’ve chosen, (2) write a journal entry
identifying the specific alternative audience, and (3) flesh out how the claims would need to change to satisfy audience expectations.

**Activity 2: Revising with comments**

Before you return the first set of drafts, it’s helpful to spend time as a class discussing some of the comments you typically write to students on drafts. Show samples of comments you have written on student papers in the past. Engage students in a discussion about how they might revise based on your comments.

*Extension:* Give a set of drafts back to students. Have them work in pairs to use the advice and strategies in the “Revising with comments” section (C3-c) to determine a revision plan for at least one area of each of their drafts.

**T4-b Use the handbook to teach thesis statements and the parts of an essay.**

**Activity 1: Preparing to draft thesis statements**

As a class, brainstorm a few issues that are topics of hot debate at your school right now. Are there new academic requirements? Is there a proposal in the works for new student parking or housing? Is your school about to adopt a service learning/volunteering requirement for all students? Choose three to five topics and break the class into as many groups as you have topics. At this point, no one is taking a side on any issue. Each group should talk for five minutes about the evidence that could be used for such an essay: News articles? Interviews? Statistics? After each group presents possible evidence to the class, ask students to select one topic to be the focus of the thesis statement they will draft.

Review section C1-c as a class; talk about the thesis as an answer to a question, a resolution of a problem, or a position within a debate. As a class, write a few thesis statements and then break into small groups again. Ask the groups to apply the questions in the “Testing a working thesis” box on page 11 as they evaluate the draft thesis statements.

For an alternative classroom activity, see M1, “Teaching thesis statements,” in *Teaching with Hacker Handbooks*, a free supplement for instructors.
Activity 2: Teaching the parts of an essay

Using one of the model papers in the handbook or on the book’s companion Web site, assign students to identify the following: the introductory paragraph, the closing or concluding paragraph, one body paragraph, the thesis statement, some evidence, a transition between sentences, a transition between paragraphs, and a counterargument. It may work well to photocopy the sample essay so that students can actively annotate it.

Extension: Bring in (or have students bring in) professional pieces of writing such as short journal or newspaper articles. Ask students to work together to find as many of the parts of an essay as they can.

T4-c Use the handbook to teach argument and analysis.

Activity 1: Identifying claims and counterargument

Ask students to work collaboratively, in pairs or small groups, to tackle either the sample analytical essay on pages 75–76 or the sample argument on pages 87–91. As preparation for a writing assignment of their own, ask them to read through the model paper, identifying the major claims, the minor claims, and the counterargument. Depending on the context or lesson, you could also ask them to identify the types of appeals the writer uses, the purpose and audience for the paper, or what makes the thesis debatable. Printing the model papers from the companion Web site may come in handy if you want students to highlight and make notations directly on the model papers.

Activity 2: Practicing critical reading

Practice critical reading and annotating as a class. First, read the examples of annotated passages on pages 69 and 70 and ask students to (1) talk about how making notes on a text might help a reader understand the text, (2) add to the writer’s annotations by making one of their own, and (3) share their annotation with a partner. Then introduce a new text, a brief two-to-three-paragraph article, that everyone in the class reads. Encourage students to mark up the text, circling key terms, asking questions in the margin, challenging the author’s assumptions. Then use the second half of the class time to assemble a class set of critical notes on the work. A docu-cam or projector can be helpful for this activity.
Activity 3: Preparing to write a summary

X-raying (outlining) a text is good practice for writing a summary. Just as an x-ray allows a viewer to see a skeleton, x-raying a piece of writing is an exercise in identifying the structure of a text. Practice x-raying a reading by using different color highlighters (if working with a photocopy). Students should identify the writer’s thesis, or claim, in one color and the main lines of the writer’s argument—in other words, the supporting evidence—in another. See the sample on page 71, an x-ray/outline of the brief article on page 69.

T4-d Use the handbook to teach the research process.

Activity 1: Starting research with a question

Using section R1-a, talk as a class about how research begins with asking a question. Ask students to practice posing possible research questions that might help them begin the research process. As a class, you might brainstorm examples of questions that are too broad, too bland, or too speculative (see pp. 333–34 for examples) and then assign students to present revisions of those questions. You might also want to use R1-a as a springboard to talk about the differences between a topic and a question.

Activity 2: Preparing to write an annotated bibliography

Take a look at the sample annotated bibliographies on the handbook’s companion Web site (hackerhandbooks.com/writersref) and at the sample entry on page 358 in the handbook. Assign students to write annotations for the sources in their working bibliography—either as a distinct assignment or as a step in a researched essay assignment. Ask students to bring in a single source from their research. Students can work through one entry in class. Follow the guidelines from the model in the handbook or use your own or your school’s library guidelines. Begin the activity by talking about the questions that an annotation should answer: What is this source’s main point? How does this source relate to my thesis? How does this source relate to other sources I am using? Why is this source worth using for my project? Use the guidelines on the handbook’s Web site to format the bibliography.
**Activity 3: Using signal phrases**

Academic writers and journalists depend on signal phrases (MLA-3b) to integrate the words and ideas of others into their own writing. Distribute one or two pieces of writing that rely heavily on sources. Ask students to mark up the texts, identifying any signal phrases (Benson suggests that . . .; The director of Homeland Security argues that . . .). Talk about the different roles signal phrases play: as boundary markers, as glue, as authority labels, to introduce counterpoints, and so forth.

**T4-e Use the handbook to teach grammar, style, and punctuation.**

**Activity 1: Using an editing log**

Have students keep a personal editing log from the very first graded paper. Check these every few weeks. Students should copy and paste an incorrect sentence from their own writing into the editing log and then write the handbook section and rule they followed to edit the sentence (for example, S6-b, “Combine choppy sentences”). Finally, they should write the correct version of the sentence. You can find blank editing log pages on the handbook’s companion Web site: Look within Multilingual/ESL and then within Charts and study help.

**Activity 2: Determining the severity of surface errors**

No matter the discipline, errors that impede meaning (such as sentence fragments) halt communication more than the occasional missing apostrophe does. To help your students think critically about degrees of error, have them work collaboratively to create an Err-O-Meter that measures the seriousness of different kinds of errors for their intended audience. If you have students create these scales in small groups, you can also discuss why similar errors are more serious for some groups than for others.

*Extension:* Use this exercise to create a class guide to the most serious errors, having students include tips for checking for the error and listing the section of the handbook that addresses it. (Adapted from a *Bits* post by Barclay Barrios at Florida Atlantic University. Visit bedfordstmartins.com/bits for more teaching ideas.)
Use the handbook to teach visual literacy.

Activity 1: Reading a visual text critically

Ask each of your students to bring an advertisement to class—either a print ad or a printout of an online ad. As a class, look over the sample annotated ad on page 70. Pay particular attention to the annotations. What is the student writer asking and noticing? Ask your students to contribute additional annotations. What do they notice or wonder about as they look at the Equal Exchange ad?

As students annotate their own advertisement, point them to page 70 for an example. During the next class period, ask your students to do a bit more writing about their ad, responding to the questions in the “Guidelines for analyzing a text” box in section A1-e. Their responses can become notes for a first draft of an analytical paper.

Activity 2: Determining the purpose of visuals in professional writing

Bring four or five examples of professional writing to class; be sure each document includes at least one visual. It’s best if the pieces are fairly brief (one to five pages). You might choose a report, a newsletter, a memo, one section of a scholarly article, a popular article, a brochure, or part of a user’s manual. The visuals could be diagrams, photographs, tables, charts, or maps. Break your class into as many small groups as you have documents. Each small group should review the box on pages 52–53, “Choosing visuals to suit your purpose.” Have each group spend twenty to thirty minutes (1) identifying the type of visual(s) used in the document, (2) identifying the purpose of the document, and (3) discussing whether or not the type of visual is best suited to the author’s purpose and how the visual is or is not helping the author to communicate an idea. Each group can share findings with the whole class.

Using CompClass for A Writer’s Reference

Whether you teach traditional on-campus courses, online courses, hybrid courses, or some combination of these, you may have started using a course management system (sometimes called a learning management system). CompClass is a course management space designed by writing instructors for the composition course. It allows...
Instructors to customize the space and tools to fit the way they teach. You may already be using CompClass; in that case you know about the built-in e-book, the opportunities for communication and peer review, and the ease with which you can post and manage grades. If you are new to CompClass, here is a sampling of the tasks it allows you to accomplish—all of which help you to help your students stay on track in the course:

- Post a course description, syllabus, and contact information
- Maintain a course calendar with key dates
- Customize a home page for each section
- Create and post assignments
- Create and assign discussion forums
- Post to your blog and access student blogs
- Create and assign quizzes and other homework
- Customize the e-book by adding notes and rearranging content
- Use the course gradebook

For trial access, visit hackerhandbooks.com/writersref or contact your sales representative.

The following are some specific activities that promote both student use of the handbook and student use of the features in CompClass.

**CC Activity 1: Use the e-book**

You can link to the e-book version of A Writer’s Reference from anywhere in CompClass. To get students to brainstorm ideas for an essay, you might create a discussion forum called “Getting Started.” In the discussion forum directions, you can put a link to A Writer’s Reference C1-b, “Experiment with ways to explore your subject,” which offers ideas for invention strategies. Ask students to read that section and then to try one of the strategies right in the discussion forum. Also ask them to comment on classmates’ ideas, offer suggestions, or perhaps ask questions of their peers. As an instructor, you can choose whether to grade the discussion right from the forum or you can comment along with students, praising good ideas and asking more questions to keep the conversation going. As the discussion goes on, it may become a forum for early drafting and revising.
Extension: After you create the discussion forum, you can link to the discussion from the e-book, making it easy to travel back and forth from the content to the writing space—and helping writers engage the handbook’s advice immediately.

**CC Activity 2: Create a peer review assignment**

Within the *CompClass* writing and commenting space, create peer review assignments that require peer reviewers to do two things: first, describe to a peer what he or she is doing well in a draft and offer one suggestion for improvement and, second, make a link to the handbook section that will help the writer revise the section in question. For example, a classmate might suggest to a peer that a particular paragraph offers evidence that is too skimpy to be effective. Next, the peer reviewer would recommend a link to a handbook section, in this case perhaps A2-e, “Supporting claims with evidence.”

What’s useful about teaching peer review in the writing and commenting space is that you can see what your students are saying to one another. You can give the reviewers advice on writing better comments and writers advice on how to use the comments they are getting from their classmates.

**CC Activity 3: Create an assignment sequence**

*CompClass* lets you design a unit or module by creating a sequence of activities. For example, you might give a diagnostic test and notice that many of your students are having trouble with sentence fragments. You could then make a fragment module that might consist of the following series of links:

- Your introduction to the unit that gives a purpose and any deadlines
- A link to coverage of sentence fragments in *A Writer’s Reference* (section G5)
- A link to exercises on fragments so that students get more practice on identifying and correcting incorrect sentences
- A journal assignment in which students write in their own words the rules for identifying and fixing fragments, including creating their own incorrect sentences and revisions
- A peer review activity in which students swap essays with classmates, check one another’s writing for fragments, and make edits for each other
**CC Activity 4: Assign exercises; assign students to present grammar concepts**

*CompClass* includes six diagnostic tests, each of which generates a personalized study plan linked to sections of the e-book. An easy way to incorporate the handbook in the course is to assign these diagnostics. After students complete a diagnostic test, they receive a report indicating those areas in which they did well and those in which they need practice. You can group students with common weak areas and immerse them in a specific concept: Assign one group, for example, to study subject-verb agreement, another to study vague pronoun reference, and so on. Require the groups to read the e-book sections and do the exercises suggested by the study plan; then each group should create a three-minute presentation to teach the class about the concept.

This kind of activity gets students beyond just doing exercises and helps them turn a weakness into a strength. Having to present the concepts in their own words, perhaps finding sentences in their own writing to illustrate the concept, will deepen their understanding and increase their reliance on the handbook.
More support for instructors

Looking for more ways to integrate A Writer’s Reference into your course?

Try Teaching with Hacker Handbooks, a collection of resources designed to accompany all four Hacker handbooks. Our full instructor’s manual will help you integrate a handbook into your composition or writing-intensive course. Part I includes chapters that address broad teaching topics. Part II offers ten teaching modules, each including a discussion of common writing challenges, a single assignment or class activity, and a directory to additional resources. Part III includes handouts, assignments, and sample syllabi drawn from composition instructors around the country.

Teaching with Hacker Handbooks

PART I: TOPICS
T1 Designing and planning your writing course
T2 Designing effective assignments
T3 Responding to student writing
T4 Working with multilingual writers (Teaching ESL)
T5 Addressing writing in the disciplines

PART II: MODULES
M1 Teaching thesis statements
M2 Teaching essay structure
M3 Teaching paragraphs
M4 Teaching argument and counterargument
M5 Teaching students to conduct research and evaluate sources
M6 Teaching students to integrate sources and avoid plagiarism
M7 Teaching grammar and punctuation
M8 Teaching with peer review
M9 Teaching visual literacy
M10 Addressing writing in the disciplines

Challenges

Unfamiliar with academic genres, novice college writers sometimes lack the rhetorical and audience awareness needed to write strong thesis statements. If they do not understand the persuasive nature of most academic works, they might write observations rather than assertions. Students who have had some high school instruction in writing thesis statements may knowingly or unknowingly resist your attempts to further develop their skills; they may assume that the instruction they received in high school is sufficient. You may see some of the following patterns emerge as students grapple with writing thesis statements:

- The thesis is too vague or broad, leading to an unwieldy paper.
- The thesis is too narrow or factual and cannot be developed into a full paper.
- Students write purpose statements instead of assertions.
- Students neglect to take a stance on the issue; they write observations instead of assertions.

Strategies

A clear and compelling thesis is the foundation of most college writing assignments. You can help students master thesis statements with extensive modeling and guided practice, using the following strategies:

1. Provide multiple models of thesis statements in the rhetorical style required by the assignment. When possible, present thesis statements in the context of complete texts.
2. For argument papers, use role playing so that students can practice taking a stance on an issue and arguing their points.
3. Help students frame questions that lead to an appropriate thesis statement. See the sample lesson for this strategy.

To find sample thesis statements in your handbook, see Resources at the end of this module.
PART III: SAMPLE SYLLABI AND ASSIGNMENTS

S1  Sample syllabi
S2  Sample assignments

Want more advice and materials from fellow teachers of writing? Want to share your own teaching ideas?

Teaching with Hacker Handbooks continues to grow online. Whether you’re wondering about how to make the most of *A Writer’s Reference* in an eight-week course or you’d like fresh ideas on getting students to understand plagiarism or counterargument, you’ll always be able to find help at hackerhandbooks.com/teaching, where the entire collection is available for download. And if you’ve created an assignment that really worked for you and your students, share it online.
